Master's degree programs which require a thesis consist of *at least* 30 credit hours. All non-thesis master's degree programs require *at least* 30 credit hours.

Credit transferred from other institutions must meet specific criteria and is subject to certain limitations.

Courses completed through correspondence study may *not* be applied to the master's degree.

To qualify for a graduate degree, students must achieve an overall grade point average of 3.0 or higher in the degree program coursework and in all resident graduate coursework attempted. A student must also have at least a 3.0 in all coursework (including undergraduate coursework if any).

Additional information for master's degree students may be found in the Graduate College Bulletin.

The master's degree requires the equivalent of *at least* two semesters of satisfactory graduate work and additional work as may be prescribed for the degree.

All coursework applied to the master's degree must carry graduate credit.

Master's degree programs which require a thesis consist of *at least* 30 credit hours. All non-thesis master's degree programs require *at least* 30 credit hours.

Credit transferred from other institutions must meet specific criteria and is subject to certain limitations.

Courses completed through correspondence study may *not* be applied to the master's degree.

To qualify for a graduate degree, students must achieve an overall grade point average of 3.0 or higher in the degree program coursework and in all resident graduate coursework attempted. A student must also have at least a 3.0 in all coursework (including undergraduate coursework if any).

Additional information for master's degree students may be found in the Graduate College Bulletin.

General Requirements for all Master's Degrees

The master's degree requires the equivalent of *at least* two semesters of satisfactory graduate work and additional work as may be prescribed for the degree.

All coursework applied to the master's degree must carry graduate credit.

Master's degree programs which require a thesis consist of *at least* 30 credit hours. All non-thesis master's degree programs require *at least* 30 credit hours.

Credit transferred from other institutions must meet specific criteria and is subject to certain limitations.

Courses completed through correspondence study may *not* be applied to the master's degree.

To qualify for a graduate degree, students must achieve an overall grade point average of 3.0 or higher in the degree program coursework and in all resident graduate coursework attempted. A student must also have at least a 3.0 in all coursework (including undergraduate coursework if any).

Additional information for master's degree students may be found in the Graduate College Bulletin.

Integrated Childhood Well-Being (Tulsa), M.A.

Minimum Total Hours (Non-Thesis): 36

Program Code: M570

Program Requirements

- *This program is Tulsa campus only.*

In order to obtain the Master of Arts in Integrated Childhood Well-Being, students must complete all of the courses in the following four areas: (1) Economic Well-Being, (2) Education, (3) Health and (4) Family and Community, plus the statistics course with the grade of C or better.

Code	Title	Credit Hours
Core Requirements		
<i>Education (9 hours)</i>		
EDEC 5333	Social and Emotional Learning	3
EDEC 5413	Early Childhood Development	3
EDEC 5920	Internship in Education--Master's	3
<i>Health (6 hours)</i>		
S WK 5163	Child Abuse and Neglect	3
S WK 5263	Biopsychosocial Aspects of Health and Behavior	3
<i>Family & Community (6 hours)</i>		
RCPL 5033	Sociology of Housing	3
EACS 6263	Educational and Community Relations	3
<i>Economic Well-Being (6 hours)</i>		
P SC 5183	Public Budgeting and Finance	3
P SC 5143	Program Evaluation and Applied Policy Analysis	3
<i>Statistics (3 hours)</i>		
EACS 6023	Applied Quantitative Research Methods in Educational Administration	3
Elective Requirements		
Choose 6 hours from the following:		6
OCTH 7162	(Evidence-Based Practice-OUHSC)	
OCTH 8272	(Developmental Disabilities-OUHSC)	
RCPL 5463	Geographic Information Systems for Land Use Planning	
R S 5263	(Family and Diversity-OUHSC)	
Other courses as approved by the Tulsa ILAC Department		
Total Credit Hours		36

General Requirements for all Master's Degrees

The master's degree requires the equivalent of *at least* two semesters of satisfactory graduate work and additional work as may be prescribed for the degree.

All coursework applied to the master's degree must carry graduate credit.

Master's degree programs which require a thesis consist of *at least* 30 credit hours. All non-thesis master's degree programs require *at least* 30 credit hours.

Credit transferred from other institutions must meet specific criteria and is subject to certain limitations.

Courses completed through correspondence study may *not* be applied to the master's degree.

To qualify for a graduate degree, students must achieve an overall grade point average of 3.0 or higher in the degree program coursework and in all resident graduate coursework attempted. A student must also have at least a 3.0 in all coursework (including undergraduate coursework if any).

Additional information for master's degree students may be found in the Graduate College Bulletin.

Literacy Specialist, Graduate Certificate

Minimum Total Hours: 18

Program Code: G078

The courses included in the certificate are all required courses in the master's degree that leads to a recommendation for state certification as a Reading Specialist and have assignments that are used to assess mastery of the standards.

Certificate Requirements

Code	Title	Credit Hours
EDRG 5573	Culture, Language and Literacy	3
EDRG 5723	Emergent and Beginning Literacy	3
EDRG 5814	Applications of Literacy Assessment and Evaluation	4
EDRG 5903	Literacy Leadership	3
EDRG 5934	Applications of Literacy Instructional Strategies	4
EDRG 5641	Topics in Literacy	1
Total Credit Hours		18

A graduate *certificate* is not a graduate *degree*. A graduate degree represents a program of independent inquiry beyond the depth of coursework alone, while a graduate certificate represents a set of courses only.

- All courses must be taken at OU. No transfer credit will apply.
- No course substitutions are permitted for graduate certificates.
- Coursework applied to a graduate certificate cannot be more than five years old as of the semester the graduate certificate is awarded.
- Students must earn a grade point average of 3.00 or higher on all coursework applied to the graduate certificate.

Instructional Leadership & Academic Curriculum, Ph.D.

Minimum Total Hours: 90

Program Code: D545

Program Requirements

Students pursuing a Ph.D. in Instructional Leadership and Academic Curriculum must choose a concentration from the following:

- Bilingual Education (concentration code: R056)
- Biomedical Education¹ (concentration code: R065)
- Early Childhood Education (concentration code: R191)
- Elementary Education (concentration code: R221)
- English Education (concentration code: R236)
- Instructional Leadership² (concentration code: R361)
- Mathematics Education (concentration code: R441)
- Reading Education (concentration code: R566)
- Science Education (concentration code: R591)
- Secondary Education (concentration code: R601)
- Social Studies Education (concentration code: R616)

Code	Title	Credit Hours
Core (minimum 24 hours)		
ILAC 6013	Proseminar in Instructional Leadership and Academic Curriculum	3
ILAC 6023	Theoretical Issues in Instructional Leadership	3
ILAC 6003	Curriculum Theory	3
ILAC 6233	Implications of Diversity	3
Research Methodologies - Courses are selected based on the requirements of a specific area of concentration and students' interests and goals, as approved by the doctoral committee and the Graduate Liaison. (May be partially satisfied through prior coursework.)		12
Concentration (minimum 36 hours)		
For all concentrations, courses are selected based on the requirements of the specific plan of study and students' professional interests and goals, as approved by the advisor and doctoral committee.		36
Electives (12 hour maximum)		
Courses will be selected based on the students' professional interests and goals, as approved by the advisor and doctoral committee.		12
Dissertation (9-12 hours)		
ILAC 6980	Research for Doctoral Dissertation	9-12
Additional Hours		
Additional coursework as needed to reach 90 post-baccalaureate hours, as approved by the advisor and doctoral committee.		0-9
Total Credit Hours		90

The minimum hour requirement for a specific doctoral degree program cannot be waived.

No more than one-half of the credit hours, both OU and overall, excluding Research for Doctoral Dissertation (6980), may be S/U-graded coursework.

The student must be in residence at OU for at least two consecutive 16-week semesters during the pursuit of the doctoral degree while enrolled and engaged in coursework or research activities as prescribed by the major academic unit.

For more detailed regulations and requirements for Doctoral degrees, please consult the Graduate College Bulletin: <http://www.ou.edu/gradcollege/forms/bulletin>

¹ The Biomedical Education concentration is comprised of a 36 hour concentration in medicine as approved by ILAC in consultation with OU HSC faculty:

20 hours minimum in Anatomy or other coursework as approved by the faculty advisor and Graduate Liaison.

10 hours Teaching Practicum.

6 hours additional coursework in research or other coursework as approved by the faculty advisor and Graduate Liaison.

² For the Instructional Leadership area of concentration the 36 concentration hours must include a minimum of 9 hours in ILAC taken after the master's degree (not including dissertation hours).

The remaining hours may be in related educational fields or academic disciplines.

General Requirements for Doctoral Degrees

A student should expect to spend at least the equivalent of three full academic years beyond the bachelor's degree to obtain the doctoral degree. During this period the student will take appropriate graduate coursework, successfully complete the general examination, and successfully defend and submit the final dissertation.

All coursework applied to the doctoral degree must carry graduate credit.

The doctoral degree requires at least 90 post-baccalaureate hours, including both formal coursework and hours of research.

GALLOGLY COLLEGE OF ENGINEERING

107 Carson Engineering Center

Randa Shehab, Ph.D., Senior Associate Dean for Academic Affairs
Zahed Siddique, Ph.D., Associate Dean for Research
Annette Moran, Assistant Dean of Students

General Information

Instruction in professional engineering was first given at the University of Oklahoma in 1899 when a course in surveying was offered. The following year, 1900–01, the first two years of engineering were presented. In 1902–03 a curriculum in civil engineering was established, and a School of Mines was organized. At the same time, courses in electrical and mechanical engineering were listed. In 1904 the courses in engineering were organized as a School of Applied Science. In 1909 the School of Mines and the School of Applied Science were joined and reorganized as the College of Engineering. The first professional degrees were conferred in 1909.

The college has grown substantially since that time. It now offers degrees in 11 undergraduate engineering fields, as well as computer science and environmental science. The student body includes approximately 3,200 undergraduate students and 800 graduate students. Its facilities fill eight major buildings with research facilities in portions of six other buildings.

In recent years, the college has been a major contributor to the philosophy of modern engineering education. It was one of the first to develop and adopt the “core” type engineering curricula now prevalent throughout the country. It was also one of the first to use the new approach to engineering laboratory work, wherein the student’s creativity is developed through the planning and carrying out of the experiment as an exercise in engineering analysis and design. Thus, the curricula in engineering are constantly being updated and modified to meet the needs of industry and future graduate work, increase the versatility of the student, and prolong the usefulness of the material taught.

The college is organized into schools and departments with the responsibility for administering the undergraduate and graduate programs of study, or curricula, as listed in the later pages of this catalog.

The professional subjects in these curricula are supported by courses from other colleges of the University. Upon satisfactory completion of one of the curricula, a student will be recommended for a degree, in most cases qualified by the name of the engineering field pursued.

Faculty

The University of Oklahoma celebrated its centennial of engineering education in the 2009-10 academic year. As the Gallogly College of Engineering completes its first hundred years and looks forward to the next, the faculty is dedicated to excellence in carrying out the University mission of teaching, research and service. The faculty are drawn from many of the nation’s leading universities, including University of California, Georgia Tech, MIT, Rice, and Yale, to name a few. Over one in four faculty members in the college hold an endowed chair or professorship, and one in five hold Presidential Professorships. Four hold University of Oklahoma David Ross Boyd Professorships and eight hold George Lynn Cross Research Professorships. Many of them are recognized as Fellows of national professional societies. In addition, several of the faculty members advise student organizations, including design teams that compete at the championship level in national and international competitions.

Computing

The OU Network consists of a high-speed backbone with connections to faculty, staff, laboratory, and classroom computers. Wireless technology extends the network to cover the engineering buildings, outside areas, laboratories, and classrooms. For more detailed information, visit the OU Information Technology Support page.

Programs Offered

- College of Engineering Administrated Programs (p. 1211)
 - Engineering Leadership, Undergraduate Certificate (p. 1216)
 - Engineering Leadership Course Lists (p. 1217)
 - Engineering Leadership: Sustainability, Undergraduate Certificate (p. 1219)
 - Engineering Leadership Sustainability Course Lists (p. 1219)
 - Applied Computing, M.S. (p. 1220)
 - Electives Course List (p. 1221)
 - Engineering, M.S. (p. 1221)
 - Engineering Leadership and Management, M.S. (p. 1221)
 - Electives Course List (p. 1222)
 - Engineering, Ph.D. (p. 1222)
 - Engineering: Engineering Education, Ph.D. (p. 1222)
- School of Aerospace and Mechanical Engineering (p. 1223)
 - Aerospace Engineering, B.S. (p. 1235)
 - Aerospace & Mechanical Engineering Elective Lists (p. 1238)
 - Mechanical Engineering (Standard), B.S. (p. 1239)
 - Mechanical Engineering - Premedical Option, B.S. (p. 1241)
 - Aerospace Engineering, B.S./M.S. (p. 1244)
 - Mechanical Engineering (Standard), B.S./M.S. (p. 1247)
 - Aerospace Engineering, M.S. (p. 1250)
 - Mechanical Engineering, M.S. (p. 1251)
 - Aerospace Engineering, Ph.D. (p. 1251)
 - Mechanical Engineering, Ph.D. (p. 1252)
 - Cellular and Behavioral Neurobiology: Aerospace and Mechanical Engineering, Ph.D. (p. 1253)
- Stephenson School of Biomedical Engineering (p. 1253)

- Biomedical Engineering, B.S. (p. 1260)
 - BME Course Lists (p. 1263)
- Biomedical Engineering, B.S./M.S. (p. 1263)
- Biomedical Engineering, M.S. (p. 1266)
 - Course Lists (p. 1266)
- Biomedical Engineering, Ph.D. (p. 1267)
- School of Sustainable Chemical, Biological and Materials Engineering (p. 1268)
 - Chemical Engineering (Standard), B.S. (p. 1277)
 - Course Lists (p. 1279)
 - Chemical Engineering - Bioengineering Option, B.S. (p. 1279)
 - Chemical Engineering - Pre-Medical Option, B.S. (p. 1282)
 - Chemical Engineering - Sustainability Option, B.S. (p. 1284)
 - Course Lists (p. 1287)
 - Bioprocessing, Undergraduate Certificate (p. 1287)
 - Chemical Engineering (Standard), B.S./M.S. (p. 1287)
 - Advanced Chemistry Electives Course Lists (p. 1290)
 - Chemical Engineering, M.S. (p. 1290)
 - Sustainability - Energy and Materials Management, M.S. (p. 1291)
 - Electives Course List (p. 1291)
 - Bioprocessing, Graduate Certificate (p. 1291)
 - Chemical Engineering, Ph.D. (p. 1292)
- School of Civil Engineering and Environmental Science (p. 1292)
 - Architectural Engineering, B.S. (p. 1304)
 - Civil Engineering, B.S. (p. 1307)
 - Environmental Engineering, B.S. (p. 1309)
 - Environmental Science, B.S. (p. 1312)
 - Environmental Science, Minor (p. 1314)
 - Water and Sanitation for Health and Sustainable Development, Minor (p. 1315)
 - Architectural Engineering, B.S./Civil Engineering, M.S. (p. 1315)
 - Civil Engineering, B.S./M.S. (p. 1320)
 - Environmental Engineering, B.S./M.S. (p. 1326)
 - Environmental Science, B.S./M.E.S. (p. 1329)
 - Civil Engineering: Geotechnical Engineering, M.S. (p. 1332)
 - Geotechnical Engineering Electives Course List (p. 1333)
 - Civil Engineering: Geotechnical Engineering (Online), M.S. (p. 1333)
 - Civil Engineering: Structural Engineering, M.S. (p. 1334)
 - Structural Engineering Electives Course List (p. 1335)
 - Civil Engineering: Structural Engineering (Online), M.S. (p. 1335)
 - Civil Engineering: Transportation Engineering (Online), M.S. (p. 1336)
 - Civil Engineering: Water Resources Engineering, M.S. (p. 1337)
 - Water Resources Engineering Electives Course List (p. 1337)
 - Civil Engineering: Water Resources Engineering (Online), M.S. (p. 1338)
 - Environmental Engineering, M.S. (p. 1338)
 - Environmental Engineering Electives Course List (p. 1339)
 - Environmental Science, M.E.S. (p. 1340)
 - Environmental Science Electives Course List (p. 1341)
 - Hydrology and Water Security (Online), M.E.S. (p. 1341)
 - Hydrology and Water Security Guided Electives (p. 1342)
 - Civil Engineering, Ph.D. (p. 1342)
 - Environmental Engineering, Ph.D. (p. 1343)
 - Environmental Science, Ph.D. (p. 1343)
 - School of Computer Science (p. 1344)
 - Computer Science, B.S. (p. 1352)
 - Elective Course Lists (p. 1355)
 - Computer Science, Minor (p. 1355)
 - Computational Technology, Minor (p. 1356)
 - Computer Science, B.S./M.S. (p. 1357)
 - BS/MS Elective Course Lists (p. 1360)
 - Computer Science, M.S. (p. 1360)
 - Computer Science, M.S. Approved Course List (p. 1361)
 - Computer Science, Ph.D. (p. 1361)
 - Program in Data Science and Analytics (p. 1362)
 - Data Science and Analytics, Undergraduate Certificate (p. 1367)
 - Data Science and Analytics Undergraduate Certificate Electives (p. 1367)
 - Data Science and Analytics, M.S. (p. 1368)
 - Data Science and Analytics, Graduate Certificate (p. 1368)
 - Data Science and Analytics, Ph.D. (p. 1369)
 - School of Electrical and Computer Engineering (p. 1369)
 - Computer Engineering, B.S. (p. 1378)
 - Electrical Engineering, B.S. (p. 1380)
 - Electrical and Computer Engineering, Minor (p. 1382)
 - Computer Engineering, B.S./Computer Science, M.S. (p. 1383)
 - Computer Engineering, B.S./Electrical and Computer Engineering, M.S. (p. 1386)
 - Electrical Engineering, B.S./Electrical and Computer Engineering, M.S. (p. 1389)
 - Electrical and Computer Engineering, M.S. (p. 1392)
 - Electrical and Computer Engineering, Ph.D. (p. 1392)
 - Program in Engineering Physics (p. 1393)
 - Engineering Physics, B.S. (p. 1395)
 - Engineering Physics, M.S. (p. 1398)
 - Engineering Physics, Ph.D. (p. 1398)
 - School of Industrial and Systems Engineering (p. 1399)
 - Industrial and Systems Engineering, B.S. (p. 1406)
 - Industrial and Systems Engineering - Analytics Option, B.S. (p. 1408)
 - Industrial and Systems Engineering - Pre-Medicine Option, B.S. (p. 1410)
 - Industrial and Systems Engineering, B.S./M.S. (p. 1413)
 - Industrial and Systems Engineering, B.S./Data Science and Analytics, M.S. (p. 1416)
 - Industrial and Systems Engineering, B.S./M.B.A. (p. 1419)
 - Industrial and Systems Engineering - Analytics, B.S./M.S. (p. 1422)
 - Industrial and Systems Engineering - Analytics, B.S./Data Science and Analytics, M.S. (p. 1425)
 - Industrial and Systems Engineering, M.S. (p. 1427)
 - Industrial Systems and Engineering Electives Course List (p. 1429)
 - Industrial and Systems Engineering, Ph.D. (p. 1429)

Programs & Facilities

The Gallogly College of Engineering is primarily located on the northeast corner of the University's Norman campus. Within the Gallogly College of Engineering, there are 12 engineering programs and nearly 40 degree options. In addition to these degree offerings, the college also offers a collaborative program in engineering physics and a program in data science and analytics.

About the College:

The mission of the Gallogly College of Engineering is to foster creativity, innovation and professionalism through dynamic research, development and learning experiences. For more information, view the 2020-2025 Strategic Plan.

Facilities Include:

- The Carson Engineering Center includes classrooms and laboratories for the School of Civil Engineering and Environmental Science, the School of Industrial and Systems Engineering and the Data Science and Analytics Institute.
- Felgar Hall houses laboratories and facilities for the School of Aerospace and Mechanical Engineering, the McCasland Foundation Engineering Pathways Hub, The Boggs Foundation Engineering Pathways Studio, and the Williams Student Services Center (WSSC).
- Sarkeys Energy Center houses the School of Sustainable Chemical, Biological and Materials Engineering.
- Devon Energy Hall houses the School of Computer Science and the School of Electrical and Computer Engineering as well as team and forum rooms, and laboratories.
- Gallogly Hall houses the Stephenson School of Biomedical Engineering and our engineering tutoring spaces.
- The Exxon-Mobil Lawrence G. Rawl Engineering Practice Facility is the home for engineering outreach and recruitment, and houses our engineering competition teams. The REPF also serves as the hub for student professional and leadership development with the Jerry Holmes Leadership Program for Engineers and Scientists, Sooner Engineering Education Center, Student Life and more than fifty student organizations and clubs. Every year, thousands of K-12 students visit the REPF to observe engineering students design, build and test their projects.
- The University's south and north campuses house additional offices and labs in support of the college's research enterprise and makes OU Engineering one of the finest engineering education complexes in the Southwest.

Laboratories:

The laboratories of the college are well-equipped to demonstrate the principles of courses offered and are described in other sections of this catalog. Through these laboratories and the actual use of apparatus, instruments, and equipment, a student is able to make practical applications of the theories and principles which the student has learned in the classroom. Students of the college are active in fieldwork. In addition, laboratories and other facilities of the college are used by students and faculty members in the classroom and for research and experiments which add value to the global economy.

View list of nearly 50 labs in the Gallogly College of Engineering.

Undergraduate ENGINEERING PATHWAYS

The McCasland Foundation Engineering Pathways Hub

Felgar Hall Room 222
865 Asp Avenue
Norman OK 73019
Phone: (405) 325-2621
www.ou.edu/coe/academics/pathways

Engineering Pathways (EP) is a framework to bring cohesive research-informed practices and an ethos of care to nurturing and supporting students along each stage of their journey to becoming engineers. Components of EP provide entry to engineering through educational outreach with preK-12 schools and families and active recruitment of high school students; support students in their transition to college life and along whatever their engineering academic path may be; and ensure students have access to technical and professional development for success in the workplace. A student-focused EP faculty and staff team welcomes incoming students to the Gallogly College of Engineering in first and second-year courses required for all students, as well as through elective opportunities, student organizations, events, and so much more.

Engineering Pathways implements many programs to help young people on their engineering path, from deciding on an engineering career, choosing the University of Oklahoma for their engineering education, and successfully navigating their education for this exciting career.

Engineering Catalyst

The Engineering Catalyst Program is a two-year radical support program designed to help students with a drive to succeed in engineering build their academic and professional success as they travel through their curriculum-to-career pathway. Engineering Catalyst is a selective, by-application program designed for students entering engineering in mathematics prerequisites. The number of Scholars admitted is limited to ensure each Scholar receives optimal resources and support for the duration of the two-year program. As a part of the program's resource-rich framework, Engineering Catalyst Scholars engage in a variety of custom-tailored building blocks for success, including: Specialized classes, Robust learning support, Personalized planning, Community connections, and Financial support.

EMPOWER - Engineering Mathematics Program for Orientation, Workshops, and Other Educational Resources

Loving mathematics is NOT required for being an engineer; engineers only need to be able to use it. Because math is one of the important tools or languages that engineers use, Engineering Pathways EMPOWER offers various degrees of support for GCoE students, beginning before students arrive on campus and continuing during their time here. These include: summer on-campus or virtual math study sessions (Math 'Til You Drop) and suggested review material to support first-year math placement for incoming students and Math 'Til You Drop study sessions, workshops, optional support classes and emailed math study tips to support first-year math classes once students are here.

Undergraduate Advising at Williams Student Services Center

Whether you are a prospective, first-time, continuing or graduating student, the Williams Student Services Center provides centralized support for academic and curricular guidance. Our advising team provides basic information about academic programs and advising, scholarships, student groups, organizations, college support programs, tutoring, mentoring, and graduation. Advisors are available to answer

questions and provide guidance regarding courses, academic performance, scholastic requirements and transfer equivalencies.

The Gallogly College of Engineering provides students the support of a faculty and college academic advisor related to their discipline. Students risk delaying their graduation if they do not make a timely selection of a major. Students are advised each semester prior to enrollment.

All incoming engineering freshmen are advised during the University's New Sooner Orientation program coordinated by The Office of Admissions and Recruitment. Freshmen will continue to be advised by an Academic Success Center academic advisor until the student has completed 24 credits hours in residence at OU and has maintained at least a minimum 2.0 GPA, at which point students will be switched to their degree granting college.

Engineering Laptop Policy

Visit the Gallogly College of Engineering's webpage to learn more about the college's laptop policy.

Admission to the Gallogly College of Engineering

The OU Gallogly College of Engineering uses the same admissions policies for accepting new students into its programs as that of the institution. Students are admitted to the University of Oklahoma using a holistic admissions process. Entry into the Gallogly College of Engineering is open to all students who wish to major in an engineering discipline.

Freshman Admission

For more information regarding freshman admission, visit the OU Admissions webpage.

Transfer Admission

For more information regarding transfer engineering admission, visit the OU Admissions webpage.

A 2.5 combined GPA is required for students with less than 60 hours -or- 2.0 for students with 60 or more hours earned.

The Office of Admissions conducts all initial assessment of transfer coursework. Transfer students who wish to apply un-equated transfer courses towards degree completion are urged to meet with one of the college's academic advisors.

Major specific transfer coursework will be reviewed by the faculty in the specific discipline for evaluation. For more information, visit the University's Transfer Equivalency Database.

Scholastic Requirements & Equivalencies Academic Standards

Students in the Gallogly College of Engineering must meet the following academic standards:

- A minimum grade of C in each course required in the curriculum.
- Both an OU retention and a combined retention grade point average of 2.00 or higher.¹
- A 2.00 minimum combined retention average for all attempted courses presented to satisfy curriculum requirements. *Curriculum requirements include every course on the selected degree requirement sheet.*¹

- A 2.00 minimum OU retention average for all courses attempted at the University of Oklahoma used to satisfy curriculum requirements.¹
- No more than two unsuccessful attempts (D or less) in a course required in the curriculum.

¹ Note: The Gallogly College of Engineering (GCoE) requires a 2.0 OU and Combined GPA to be in good academic standing. If the OU and/or Combined GPA remains below a 2.0 for two consecutive semesters (excluding summer term), the student might be dismissed from the GCoE. Specific accelerated degree programs within the Gallogly College of Engineering may require a higher minimum grade point average. Please contact Williams Student Services Center (WSSC) 112 Felgar Hall for specific requirements.

For purposes of graduation and retention, these grade point averages may be affected by academic forgiveness policies. Students should consult the Academic Records - Academic Forgiveness Policy (p. 46) section of this catalog for more information.

Students who do not meet these standards will be notified by the Director of Advising and guided to meet with their assigned college advisor for support.

The University of Oklahoma utilizes a 4.0 or A=4, B=3, C=2, D=1, F=0 system. The Gallogly College of Engineering requires:

- a minimum grade of C in any course applied toward degree completion.
- P/NP coursework does not count toward degree completion (except for those P/NP grades earned in SP2020 due to Covid-19).
- S grades are accepted toward degree completion as obtained by Advanced Placement (AP), Departmental, higher-level IBC, and CLEP exams.

Time Limitations on Coursework

A student may elect to graduate under the requirements for an undergraduate degree plan in effect at the time of their first enrollment in the state system, *provided that they complete the work for a degree within a maximum of six years*, which is reflected in the degree check. If the work for a degree covers a period longer than that specified by the college, the college will determine the degree plan to be in effect for that student's graduation.

A student whose initial enrollment in the state system is during the summer session will be subject to the University of Oklahoma catalog in effect for the year following that summer.

Credit in the student's major field or area of concentration that is more than 10 years old may not be applied toward a bachelor's degree unless it is validated by the major department, or by the departments in the student's area of concentration. The term "area of concentration" is included in addition to "major field" to allow for those cases in which the equivalent of a major may be earned by a combination of work in several departments.

Honor Roll

To be eligible for the Dean's Honor Roll, a full-time undergraduate student must earn at least 12 or more hours and attain a grade point average of 3.00 or higher during a regular fall or spring semester. Part-time students may qualify for the honor roll by earning at least six but less than 12 hours and attaining a grade point average of 3.00 or higher, provided they have no W's for that semester. There is no college honor roll during

the summer session or during Winter Session, and hours and grades earned during these sessions are not included in any way in determining eligibility for inclusion on regular semester honor rolls.

State-Mandated Articulation Agreements that Impact Engineering Programs

To facilitate the transfer of students within Oklahoma's state system of higher education, the state Board of Regents created the Oklahoma State Regents for Higher Education Course Equivalency Matrix. The Regents established a policy that Freshman and Sophomore-level general education requirements are deemed satisfied for students who complete a two-year Associates of Arts or Associates of Science degree from an Oklahoma public college, and who transfer to a four-year university.

For these reasons, general education coursework readily transfers from Oklahoma colleges into OU. Additionally, if the student has completed the Associates of Arts or Associates of Science, and they earned a D in one of the general education courses used to complete that degree, the GCoE will accept the course toward degree completion unless it is a direct pre-requisite for an engineering course.

Non-Collegiate Learning Experiences

For more information, visit the Academic Records and Transcripts webpage.

Enrollment & Major Declaration

Enrollment Limitations

Pass/No Pass Course Enrollments

Pass/No Pass Course Enrollments may not be used to satisfy Gallogly College of Engineering course requirements. Engineering students may not proceed in their major courses until they have achieved a minimum grade of C in all prerequisites. All required courses listed on the official University of Oklahoma degree checksheet (p. 1203) for any engineering major must be completed with a grade of C or better (except for those P/ NP grades earned in SP2020 due to Covid-19.)

Minimum Grade Requirement/Course Repeats

Students may retake a course in their curriculum a maximum three times (i.e. retake due to not completing the course with a grade of C or above.) If the course is completed unsuccessfully after three attempts (grades such as: I, AU, W, AW, D, F), and if it is a course required in any curricula in the College of Engineering, the student will receive an Enrollment Stop from the Gallogly College of Engineering. (Note: A first course attempt which results a final grade of I, W, AW, or an audit A) is not counted in the "three attempts" rule.) If the course is taken unsuccessfully three times and is required only in the major, the possibility of a student continuing in the Gallogly College of Engineering in a different major will be determined on an individual basis. When courses are repeated, the grade of the last (most recent) attempt is the grade of record.

Enrollment in Upper-division Courses

Enrollment in upper-division Gallogly College of Engineering courses, except any courses specifically exempted in the General Catalog or Class Schedule, is restricted to students who are admitted to the Gallogly College of Engineering and in some cases to those admitted to a specific degree program, have completed the necessary grade and course prerequisites, and are advised into the classes by their engineering faculty or staff advisor. Qualified students from outside the Gallogly College of Engineering are welcome in advanced courses if they have completed the necessary grade and course prerequisites, and are encouraged to explore specific interests with the schools and instructors

involved. Approval must be obtained from the professor teaching the course and the Director of Advising in the Williams Student Services Center (WSSC), 112 Felgar Hall.

Conduct of Engineering Courses

A student is responsible for the prerequisite and the content of any course in which they are officially enrolled. The establishment of specific policy concerning class attendance requirements, as well as announced and unannounced examinations, is the responsibility of the individual instructor. When absences seriously affect a student's classwork, the instructor may report this fact to the Office of Student Affairs and the information will be directed to the student's college dean.

The Gallogly College of Engineering requires final examinations to be given during the regularly scheduled examination periods in all undergraduate courses excluding directed readings, pure laboratory courses and project type design courses and seminars. No faculty member is authorized to depart from this regulation or from the published examination schedule for a class or an individual without prior approval. Special early examinations given to individual students or groups of students as substitutes for final examinations are prohibited. A student will not be expected to take more than two examinations in one day.

Academic Appeals

The Gallogly College of Engineering has established an Academic Appeals Panel to hear grade appeals and academic misconduct cases. To obtain the procedures to be followed, a student should contact the Dean's office in 107 Carson Engineering Center, and refer to Title 14 of the Student Code.

Credit Hour Load

Students requesting to enroll in more than 19 maximum hours in a fall or spring semester or 9 hours in a summer semester must obtain permission from the GCoE Director of Advising.

Change of Major Requests

Students interested in pursuing a change of major within engineering must meet with an academic advisor in the GCoE WSSC academic advising unit to change majors. To add or change majors outside of the GCoE, students must contact the advising office in that college. The advisor will assess the student's GPA and completed courses. If the student lacks necessary preparation to begin coursework in the major, the student might be advised to remain in their current major until they are adequately prepared for the course curriculum. Approved changes of major requests are only processed by the Office of the Registrar within the first 10 weeks of the semester or after final grades are posted. In accordance with State Regents' requirements, students are assigned to the degree program (p. 55) year that was current at the time they entered the Oklahoma State System of Higher Education.

Graduation Requirements

The student must satisfy the following requirements:

- **Curricular Courses:** complete all prescribed curricular courses or equivalent courses as approved by the faculty with a minimum grade of C in each course.
 - Students graduating from a program accredited by the Engineering Accreditation Commission of ABET must complete 37.5% or 48 hours of engineering and 25% or 32 hours of combined mathematics (at the calculus level or above), physics, chemistry, or other science coursework.
 - Students graduating from a program accredited by the Computing Accreditation Commission of ABET must

complete a minimum of 40 hours in computing, 15 hours of mathematics and 30 hours of combined mathematics and science coursework with some exposure to laboratory work.

- **Two-year College Transfer Credits:** a minimum of 60 semester hours must be earned in a senior college or four-year school for a baccalaureate degree.
- **Degree Requirements:** fulfill all requirements listed on the official degree checksheet (p. 1203). Gallogly College of Engineering academic advisors in the Williams Student Services Center (WSSC) clear undergraduate degrees and encourage consultation on remaining degree requirements. However, responsibility for meeting graduation requirements lies with the student.
 - Be in good academic standing both scholastically and in accordance with academic integrity standards of the College and University.
 - Apply for graduation of your respective degree by the deadline for the semester in which you intend to graduate.
 - To ensure that the above conditions will be met, students are encouraged to request a degree check in the Williams Student Services Center (WSSC). This action should be taken at least two semesters before the student expects to graduate. The student can access their degree audit at any time online through Degree Navigator.
NOTE: Students will not be cleared for graduation if they have an I or N grade on their transcript from the University of Oklahoma. These must be resolved prior to degree clearance.
- **Residence Requirements** – to be recommended for a degree, a candidate must have:
 - spent two semesters or the equivalent in residence, with at least one semester enrolled as a Gallogly College of Engineering student;
 - completed at OU 36 of the hours listed in the junior and senior years on their curriculum checksheet, 24 of these 36 hours must be in the major field;
 - fulfilled the grade and grade point requirements of the college and school.
NOTE: Academic credit from any division of the University of Oklahoma – Norman campus, OU Health Sciences Center, OU-Tulsa, OU Polytechnic, OU Online or The College of Professional and Continuing Studies – is considered resident credit at the University of Oklahoma. Grades and hours earned at any of these divisions are included in the OU retention and cumulative grade point averages for purposes of determining completion of degree requirements.
- Undergraduate degrees offered in the Gallogly College of Engineering:
 - **Bachelor of Science:** the Gallogly College of Engineering is organized into departments and schools. The degree of Bachelor of Science is qualified by the name of the engineering field pursued and is conferred upon graduates of the college.
 - **Honors:** Please refer to the Office of Academic Records (p. 44).

Degrees are formally conferred at spring commencement and fall convocation exercises. However, degrees are also awarded in absentia at the end of summer session. All diplomas are mailed to students following the official graduation date. The degree and date of the diploma are entered on the student's permanent academic record. The date of graduation is the last day of the semester or summer session in which all requirements for the degree are completed. When a student completes all requirements for a degree, other than at the close of a semester or summer session, the Office of Academic Records, upon request, will issue

a certified statement that the student is eligible for the degree as of the date when the requirements for the degree were completed.

Graduate Study

EMPOWERING YOU THROUGH LIFE-CHANGING LEARNING EXPERIENCES

The Gallogly College of Engineering offers advanced degrees from seven schools.

The Gallogly College of Engineering is committed to fostering creativity, innovation and professionalism through dynamic research, development and learning experiences. We are committed to attracting a talented and collaborative student body, and we empower our students through life-changing learning experiences, high-impact discoveries and innovations. Graduate programs, research and creative activity are key components in realizing this vision.

With nationally and internationally renowned faculty, world-class research facilities and talented students, we are leaders in a number of areas including materials & manufacturing, weather radar, water resources, medical imaging, immuno-engineering, surface transportation, energy, and data science and analytics. These areas of excellence, and many others, provide the foundation upon which our comprehensive selection of graduate degrees are built, including 12 doctoral programs and 14 masters programs.

Two closely affiliated programs are also available to students through Engineering Physics and the Mewbourne College of Earth and Energy. Please follow the links provided for a brief overview of the school or program. Please contact the appropriate school or program for further information on specific degree programs and areas of specialization offered.

- Aerospace and Mechanical Engineering
- Biomedical Engineering
- Sustainable Chemical, Biological, and Materials Engineering
- Civil Engineering and Environmental Science
- Computer Science
- Data Science and Analytics
- Electrical and Computer Engineering
- Engineering Physics
- Industrial and Systems Engineering

Online Programs

- M.S. in Civil Engineering
- M.S. in Data Science and Analytics
- Graduate Certificate in Data Science and Analytics
- M.S. of Engineering Leadership and Management
- M.S. of Environmental Science Hydrology & Water Security
- M.S. of Industrial and Systems Engineering
- M.S. in Sustainability
- M.S. (p. 1220) Applied Computing (p. 1220)

Opportunities

Engineering Pathways Mentors

The Engineering Pathways Mentors Program fosters connections to the community within the Gallogly College of Engineering through student-to-student interaction. These interactions are based on service, dedication, respect, encouragement, and professionalism. Program members are current engineering students with excellent academic credentials, and a desire to provide strong mentorship and leadership. Program members serve as mentors to first-year engineering students. EP Mentors are selected through an application process.

Undergraduate Research

GCoE students have many opportunities to participate in individual or team research projects with faculty. The Engineering Pathways faculty offer workshops to assist students in getting started with research and in fundamental research skills. Sophomore courses are adding course-based research projects to benefit learning. GCoE offers an Opportunity Portal to assist students in being matched with a faculty-member's project. GCoE also offers a limited number of research fellowships for students.

Gallogly Student Affairs Team (GSAT)

Contact Randa Shehab, Senior Associate Dean for Academic Affairs and Faculty Development, for more information.

Engineering Student Life

Engineering Student Life promotes students' professional and leadership development by hosting and supporting a variety of co-curricular opportunities. These opportunities include workshops, job and internships fairs, tech talks, and the support of a multitude of engineering and STEM focused student organizations including technical and professional societies, service organizations, social organizations, competitive student teams and more.

Engineering Student Competition Teams

The Gallogly College of Engineering supports a variety of student organizations with the focus of competing in specific regional, national, and international engineering competitions. These teams give students a unique opportunity to work on interdisciplinary projects and apply their academic knowledge while learning hands-on skills that will help them in their future careers. Teams also work with faculty and staff on further developing their foundation of engineering and project management skills.

Competition team projects include building and designing planes, rockets, formula-one cars, off-road vehicles, steel bridges, concrete canoes, and creating and programming robots.

Engineering Catalyst

The Engineering Catalyst Program is a two-year radical support program designed to help students with a drive to succeed in engineering build their academic and professional success as they travel through their curriculum-to-career pathway. Engineering Catalyst is a selective, by-application program designed for students entering engineering in mathematics prerequisites. The number of Scholars admitted is limited to ensure each Scholar receives optimal resources and support for the duration of the two-year program. As a part of the program's resource-rich

framework, Engineering Catalyst Scholars engage in a variety of custom-tailored building blocks for success, including: Specialized classes, Robust learning support, Personalized planning, Community connections, and Financial support.

Jerry Holmes Leadership Program for Engineers and Scientists

The Jerry Holmes Leadership Program for Engineers and Scientists (JHLP) provides leadership education for undergraduate and graduate students in the Gallogly College of Engineering and the Mewbourne College of Earth and Energy. Through JHLP's pillar-based approach, students enhance their capabilities across five domains: personal development, interpersonal relationship, management and teamwork, generative leadership, and intercultural competence. Leadership development opportunities include retreats, workshops, courses, Distinguished Speaker days, and an academic Undergraduate Certificate in Engineering Leadership. Students have the option to further develop their leadership capabilities as Holmes Leadership Associates (HLAs). HLAs work with professional mentors to design a personal leadership development plan. They attend monthly topical meetings and other events where they hone their leadership skills, and they create real impact as leaders within the University and surrounding communities.

Study Abroad | International & Global Opportunities

Educational and co-curricular experiences are offered through the College's Study Abroad and International & Global Opportunities (IGO) program. This program includes engineering specific coursework, opportunities for practice related service learning, internships and research. These programs are open to current OU students in collaboration with the University's Education Abroad Office and affiliated partner universities.

Honor Societies

In addition to University-wide honor societies and organizations, the Gallogly College of Engineering has a robust participation in engineering honor societies such as Tau Beta Pi, Pi Tau Sigma, Sigma Gamma Tau, Chi Epsilon, Eta Kappa Nu and Alpha Pi Mu.

Tau Beta Pi

The Tau Beta Pi honor society, which was founded at Lehigh University in June 1885, offers students of technical schools membership in an honorary association. Students who are qualified in any branch of engineering may become members. The annual election to the society, which is based upon scholarship, integrity, breadth of interest (both inside and outside of engineering), adaptability and unselfish activity, is limited to the upper one-fifth of the senior class and to the students who have grade averages within the upper one-eighth of the junior class. The government of the organization in each chapter is under the direction of the elected student officers and an advisory board consisting of four faculty members of Tau Beta Pi. Membership in Tau Beta Pi is one of the highest scholastic honors that an undergraduate engineering student can receive. The Oklahoma charter was granted in 1926.

Pre-K-12 Outreach

Engineering faculty and students engage in promoting science and engineering with pre-K-12 communities. The Boggs Family Sooner Engineering Education Student Ambassadors lead over 3000 students, teachers, and families in hands-on learning of engineering design and computer science fundamentals. Schools bring students to campus; we run Engineering Days for high school students each summer; and we host

Family Engineering nights during the academic year. GCoE schools and faculty host their own activities as well.

Scholarships and Financial Aid Information

Future Students

To be considered for first-year scholarships from the Gallogly College of Engineering, you must apply for admissions to the University of Oklahoma by December 15th. Scholarships are competitive for students demonstrating strong academic merit, leadership, community service, co-curricular activities, financial need, etc. Incoming students can learn more about additional scholarship opportunities through the Office of Admissions & Recruitment.

Transfer Students

To be considered for a transfer scholarship from the Gallogly College of Engineering, you must apply for admissions to the University of Oklahoma by March 1st and have completed 24 hours or more from an accredited two or four year institution. Scholarships are competitive for students demonstrating strong academic merit, leadership, community service, co-curricular activities, financial aid, etc. Incoming transfer students can learn more about additional scholarship opportunities through the Office of Admissions & Recruitment.

Current Students

All undergraduate and graduate engineering students can apply for scholarships through the Centralized Academic Scholarship Hub (CASH). The deadline is February 1st of each year.

Financial Aid

The FAFSA (or Free Application for Federal Student Aid) is the government-provided application for need-based funds to help pay for college. OU highly recommends completing the FAFSA regardless of family's income.

Career Guidance

Our mission is to provide engineering students with a strong foundation for success through responsive, supportive and meaningful academic and career guidance. Each semester, students are required to meet with both their College and Faculty Advisors in order to assist with their academic progression and address concerns related to career pathways, internships, graduate school, etc. Faculty with past and/or current corporate collaborations are excellent resources for our students, as are the college's alumni, many of whom welcome connecting with students regarding career questions. During the first-year Engineering Orientation and the second-year Professional Development courses, students are introduced to the career planning process and the assistance available via the OU Career Services. These courses also introduce students to undergraduate research experience programs and graduate school.

The college also hosts a Graduate School Fair for the undergraduate students. The Gallogly College of Engineering collaborates with the OU Career Services Office to host two annual Career Fairs for engineering students; one in September and the other in February. The September career fair is the largest with an average of 140 companies seeking to recruit our students. Many companies also commit to a regular presence on campus as speakers at student organizations' regular meetings or "Tech Talks."

The OU Career Services offers specialized services to students and alumni, that includes:

- Job search and interviewing skills

- Resume and cover letter writing
- Major specific career advice
- Internship and Job postings
- Information regarding Career Fairs and on-campus interviews

Co-op Program

The Co-op Program offers a work-study experience that combines a sequence of academic study and engineering employment in industry or government. Participating in the Co-op Program allows the engineering student to gain first-hand experience in the application of academic studies to engineering problems.

Participation in the Co-op Program is optional and open to students enrolled full-time in a degree program administered by the Gallogly College of Engineering. Students who wish to participate in the Co-op Program must have completed all of the requirements of the first year of their degree program with a minimum 2.50 GPA. Students also must have the approval of the director of the school of their major. Employment in a Co-op position requires the approval of the participating company. Interested students should apply as soon as possible during their first three semesters on campus.

The time required to complete an engineering degree program as a Co-op student will be longer than the usual eight-semester program. (Caution: Major courses in several GCoE degree programs are sequential and offered only one time per year.) For further information and application forms, contact the Gallogly College of Engineering Undergraduate Advising Office.

Internships

The Gallogly College of Engineering encourages all students to seek an internship either with college faculty assisting with research or with industry. Both the college's Undergraduate Advising office and the OU Career Services office work to facilitate this process.

Work Experience

Students may request to receive credit for internship or co-op experiences. Specific faculty oversee such enrollments and may require the student to provide a final project report and presentation. The faculty of the student's program determine if the credits may apply towards degree completion, and if so, if the credits will apply as a professional or technical elective in the student's program. For more information, contact the college's Undergraduate Advising Office.

Faculty

Last Name	First/Middle Name	Middle init.	OU Service start	Title(s), date(s) appointed	Degrees Earned, Schools, Dates Completed
Denton	Maya	E	2023	ASSISTANT PROFESSOR ENGINEERING PATHWAYS, 2023	PhD, Univ of Texas-Austin, 2023; MS, Univ of Texas-Austin, 2021; BS, Purdue Univ, 2014
Harvey	Tierney		2022	ASSISTANT PROFESSOR ENGINEERING PATHWAYS, 2022	PhD, Duke Univ, 2015; BS, Univ of Virginia, 2009

Haskins	Casey	V	2022	ASSISTANT PROFESSOR ENGINEERING PATHWAYS, 2024; MATH RETENTION SPECIALIST ENGINEERING PATHWAYS, 2022	PhD, Univ of Oklahoma, 2023; MA, Univ of Oklahoma, 2017; BS, Univ of Oklahoma, 2015	Walden	Susan	E	1998	EXECUTIVE DIRECTOR OF ENGINEERING PATHWAYS, 2022; DIRECTOR, UNDERGRADUATE RESEARCH PROGRAM FOR VICE PRESIDENT FOR RESEARCH, 2015-2018; ADJUNCT PROFESSOR OF ENGINEERING, 2011; ASSOCIATE DIRECTOR, ENGINEERING OUTREACH, SOONER ENGINEERING EDUCATION CENTER, 2008; RESEARCH ASSOCIATE PROFESSOR OF ENGINEERING, 2008; RESEARCH SCIENTIST, 1998	Fellow, American Society of Engineering Education, 2017; PhD, Univ of Oklahoma, 1997; MS, Univ of Oklahoma, 1995; BS, Arkansas State, 1984
Kittur	Javeed		2022	ASSISTANT PROFESSOR ENGINEERING PATHWAYS, 2022	PhD, Arizona State Univ, 2022; M.Tech, Natl Inst of Eng, Mysore, India, 2014; BVB, Coll of Eng and Tech, Hubballi, India, 2011						
McSkimming	Brian	M	2022	ASSISTANT PROFESSOR ENGINEERING PATHWAYS, 2022	PhD, Univ Calif, Santa Barbara, 2015; BS, BA, Univ of Buffalo, 2009						
Neeman	Henry	J.	2012	ASSOCIATE PROFESSOR OF ENGINEERING, 2012; EXECUTIVE DIRECTOR OF RESEARCH COMPUTING; DIRECTOR OF OU SUPERCOMPUTING CENTER FOR EDUCATION & RESEARCH (OSKER)	PhD, Univ of Illinois, 1996; MS, Univ of Illinois, 1990; BA, BS, SUNY Buffalo, 1987						
Okolie	Jude	A	2022	ASSISTANT PROFESSOR ENGINEERING PATHWAYS, 2022	PhD, Univ of Saskatchewan, 2021; MS, Tallinn Univ, Estonia, 2018; MS, Imperial Coll London, 2016; B.Eng, Univ of Benin, Nigeria	Wolfenbarger	Kim	G	2005	ASSISTANT PROFESSOR ENGINEERING PATHWAYS, 2022; INTERIM DIRECTOR, ENGINEERING STUDENT LIFE, 2018; DIRECTOR OF JERRY HOLMES LEADERSHIP PROGRAM FOR ENGINEERS & SCIENTISTS, 2015; INDUSTRIAL ENGINEERING LEADERSHIP PROGRAM COORDINATOR, 2010; RECRUITMENT COORDINATOR, ISE, 2006; INSTRUCTOR AND ACADEMIC ADVISOR, ISE, 2005	PhD, Univ of Oklahoma, 2015; MS, Univ of Oklahoma, 2000; BBA, Univ of Oklahoma, 1996
Olayemi	Moses	O	2023	ASSISTANT PROFESSOR ENGINEERING PATHWAYS, 2023	PhD, Purdue Univ, 2023; BS, Univ of Lagos, Nigeria, 2011						
Pittenger	Dominique	M	2008	ASSISTANT PROFESSOR ENGINEERING PATHWAYS, 2022; RESEARCH ASSISTANT PROFESSOR OF ENGINEERING, 2013	PhD, Univ of Oklahoma, 2012; MS, Univ of Oklahoma, 2010; BS, Univ of Oklahoma 2002						
Quiroga	Allison		2017	ASSISTANT PROFESSOR ENGINEERING PATHWAYS, 2022; SUMMER BRIDGE PROGRAM COORDINATOR, 2020; LECTURER, SCHOOL OF CIVIL ENGINEERING AND ENVIRONMENTAL SCIENCE, 2017	PhD, Univ of Oklahoma, 2018; MS, Univ of Oklahoma, 2013; BS, Univ of Oklahoma, 2012						

College of Engineering Administrated Programs

Undergraduate Certificates

Graduates of engineering and applied science degree programs are often elevated to leadership positions early in their careers. Gallogly College of Engineering offers two Undergraduate Certificates in Engineering Leadership (p. 1216), and Engineering Leadership: Sustainability (p. 1219), which allow students wishing to further develop their leadership skills a tangible and intensive format for doing so. The certificates are available to undergraduate students enrolled in degree programs within the Gallogly College of Engineering or the Mewbourne College of Earth and Energy.

Master of Science

The Applied Computing, Master of Science (p. 1220), with substantial built-in project components, will enable students to acquire knowledge

and skills necessary to identify problems and devise solutions for issues relating to computing. Graduates will be able to go into industry positions that require advanced technical skills and continue in similar industry positions throughout their careers. This program will also allow students who did not complete a bachelor's in computer science to break into the tech industry.

The Engineering, Master of Science (p. 1221) program is designed to provide students flexibility to pursue a multidisciplinary curriculum not available through a traditional departmental track.

The Engineering Leadership and Management, Master of Science (p. 1221) will enable students to successfully establish, lead, manage and work in multidisciplinary teams to solve complex real-world problems effectively and efficiently. Graduates of this program will be able to grow intellectually through practicing the skills and knowledge of Engineering Leadership and management, continue to be lifelong learners, and focus on self-improvement through professional development.

Doctor of Philosophy

The Doctor of Philosophy in Engineering (p. 1222) is designed to provide students flexibility to pursue a multidisciplinary curriculum not available through a traditional departmental track.

The Doctor of Philosophy in Engineering with a specialization in Engineering Education (p. 1222) blends important core topics in the new science of engineering education with a solid foundation in qualitative and quantitative research methods.

Courses

ACS 5113 Programming Principles 3 Credit Hours

Prerequisite: Graduate Standing. This course introduces the fundamental concepts of structured and object-oriented programming and provides a comprehensive introduction to programming for computer science and technology majors. Topics include software development methodology, data types, control structures, functions, arrays, classes, methods, object-oriented programming concepts, sorting and searching, and the mechanics of running, testing, and debugging. (F, Sp, Su)

ACS 5123 Mathematics for Computer Science 3 Credit Hours

Prerequisite: Graduate Standing. This course covers widely applicable mathematical tools for computer science, including topics from logic, set theory, combinatorics, linear algebra, number theory, probability theory, and graph theory. It includes practice in reasoning formally and proving theorems. (F, Sp, Su)

ACS 5213 Practical Data Structures and Algorithms 3 Credit Hours

Prerequisite: Graduate Standing; ACS 5113, ACS 5123. This course covers fundamental concepts and the application of data structures and algorithms. Topics include abstract data types, dynamic arrays, iterators, linked lists, generics, stacks, queues, binary search trees, collections, hashing, graphs, and sorting. (F, Sp, Su)

ACS 5223 Introduction to Software Engineering 3 Credit Hours

Prerequisite: Graduate Standing; ACS 5113, ACS 5213. This course is a team project course focused on the practical application of common, modern techniques to all aspects of software project development. Students will learn about effective processes for software requirements specification, planning, design, documentation, development, review, defect tracking, testing, product delivery, and product evaluation. There is some emphasis on resource tracking and software quality. (F, Sp, Su)

ACS 5313 Applied Database System Technologies 3 Credit Hours

Prerequisite: Graduate Standing; ACS 5213, ACS 5223. This course concentrates on the concepts and structures necessary to design, implement, and use a database system. It is oriented towards the general principles, their applications, and the relevant theoretical foundation. This course will give you skills to design, develop, manage, and administer cutting-edge database systems. You will learn about relational database systems with SQL and databases. (F, Sp, Su)

ACS 5323 Data Security, Networks and Network Security 3 Credit Hours

Prerequisite: Graduate Standing; ACS 5113, ACS 5213. This course will begin by introducing Data Security and Information Security. Discussions about Risk Management, its principles, methods, and types will be included in the course. This course will explain the different ways of securing and protecting data on both hardware and software platforms. Network Security will cover various security issues and vulnerabilities in various network layers. (F, Sp, Su)

ACS 5413 Mobile Devices Software Development 3 Credit Hours

Prerequisite: Graduate Standing; ACS 5223, ACS 5313. This course introduces the concepts, practices, and technologies to design, develop, and manage cross-platform websites and applications running on modern mobile devices. The students will gain plenty of experience from hands-on exercises. The course also provides a higher-level survey of technologies, principles, strategies, and frameworks for mobile device software development. The class will focus on UI design and programming. (F, Sp, Su)

ACS 5423 Software Development for World Wide Web 3 Credit Hours

Prerequisite: Graduate standing and ACS 5223. This course will introduce concepts in programming web application servers. At the conclusion of this course, you will understand the fundamental concepts of software engineering as it is applied to web application design and programming, know the modern tools used to program web application servers, and be able to produce substantial web applications as part of a team. (F, Sp, Su)

ACS 5513 Machine Learning Practice 3 Credit Hours

Prerequisite: Graduate Standing and ACS 5213. Machine learning is the data-driven process of constructing mathematical models that can be predictive of data observed in the future. In this course, we will study the use of a range of supervised, semi-supervised and unsupervised methods to solve both classification and regression problems. (F, Sp, Su)

ACS 5523 Introduction to Cloud Computing 3 Credit Hours

Prerequisite: Graduate Standing and ACS 5213. This course gives students an overview of the field of Cloud Computing, its enabling technologies, main building blocks, and hands-on experience through projects utilizing public cloud infrastructures. Cloud computing services are being adopted widely across a variety of organizations and in many domains. (F, Sp, Su)

ELM 5123 Strategic Communication for Engineering Leaders 3 Credit Hours

Prerequisite: Graduate standing. The goal of this course is to impart effective communication abilities to engineers. The course will teach Engineers at all stages of their career skills for effective communication with teammates, clients, and employees and/or pursuing the next level of leadership opportunities. Students will learn to create and deliver powerful presentations and documents. (F, Sp, Su)

ELM 5213 Data Science and Analytics for Engineering Management Decisions 3 Credit Hours

Prerequisite: Graduate standing. It covers various tools that can be applied to data to extract the knowledge that can be applied for engineering management decision-making. The main objective is to understand the world of data science and analytics, including descriptive, predictive, and prescriptive analytics as a tool for informed decision-making. (F, Sp, Su)

ELM 5293 Cost Engineering 3 Credit Hours

(Crosslisted with ISE 5293) Prerequisite: Graduate Standing. This course will discuss the application of scientific principles and techniques to problems of cost estimating, cost control, business planning, profitability analysis, project management, and planning and scheduling. It will provide an understanding of both the tools and models that can be used throughout the design, development, and support phases, and examine the trade-offs between system performance and life-cycle cost. (Su)

ELM 5313 Systems Thinking 3 Credit Hours

Prerequisite: Graduate standing. In this course, you will learn that engineering systems are made of complex interconnections of interrelated subsystems. You will learn how to recognize these subsystems and understand their relationships to build efficient engineering systems. You will learn to use and develop optimization models, understand systems engineering life-cycle, and model-based systems thinking. (F, Sp, Su)

ELM 5323 Leading Creative Teams 3 Credit Hours

Prerequisite: Graduate Standing. In this course, you will learn to assemble the skills, talents, and resources of individuals and groups in effective and efficient ways to best solve the engineering problem at hand. You will learn inter-personnel management skills and tools for creating positive and supportive team cultures and incorporating and supporting diversity in teams. (F, Sp, Su)

ELM 5423 Negotiating Skills for Technical Leaders 3 Credit Hours

Prerequisite: Graduate Standing. In this course, you will learn the underlying principles of negotiation and influence skills that can be effectively employed with supervisors, peers, and team members in engineering environments. Concepts such as the zone of possible agreements, the best alternative to negotiated agreements, and sources of influence are put into practice. (F, Sp, Su)

ELM 5523 Capstone Project 3 Credit Hours

Prerequisite: Graduate Standing. In this capstone course, students work on a team-based multi-disciplinary project that addresses an industry-based engineering management problem. It is meant to integrate the many tools utilized by engineering managers as taught in the course work of the engineering management and leadership program. Students are required to produce a written report and give an oral presentation. (F, Sp, Su)

ELM 5543 Decision Analysis 3 Credit Hours

(Crosslisted with ISE 5543) Prerequisite: Graduate standing. This course provides the fundamentals of decision analysis and explores how analyzing risk can be incorporated into good decision-making. Normative and prescriptive approaches to making decisions when uncertainty exists are central to this course. Topics covered include structuring decision problems, developing alternatives, single and multiple objectives, utility theory, risk tolerance, data-driven, and subjective probability, and psychological pitfalls, among others. (F, Sp, Su)

ELM 5773 Systems Requirements and Architecting 3 Credit Hours

(Crosslisted with ISE 5773) Prerequisite: Graduate Standing. This course provides the fundamentals of systems engineering by offering an overview of the discipline and then focusing on the management of system requirements and developing how a system will meet them. We will discuss the definition of systems, the system development life cycle, and the systems engineering method. Topics include Detail design, requirement analysis and decomposition, and system architecting. (F, Sp, Su)

ENGR 1401 Dean's Leadership Council 1 Credit Hour

Prerequisite: must have submitted an application and be approved by the college. This course is required of all DLC mentors and lead mentors. The purpose of the Dean's Leadership Council is to engage with new students pursuing a degree in the Gallogly College of Engineering. DLC mentors provide support to assist students with the transition to college life at OU, increase student involvement in the engineering community, and increase academic student success. (F, Sp)

ENGR 1411 Pathways to Engineering Thinking 1 Credit Hour

Prerequisite: Freshman standing or departmental permission. Students investigate and practice what it means to engineer. Students are empowered through building awareness of the breadth of engineering in everyday life and how engineering is embedded in society. Students engage in team-based engineering design projects at multiple scales, considering local engineering challenges. Excitement is fostered through design and creation of solutions in authentic, student-centered product development challenges. (F, Sp)

ENGR 1413 Pathways to Engineering Thinking 3 Credit Hours

Prerequisite: Freshman standing or departmental permission. Students investigate and practice what it means to engineer. They are empowered through engineering community building as they learn the impact and cultural connections of engineering in society. Students develop critical thinking and civil discourse skills in engineering design projects addressing authentic community-based engineering challenges, building excitement for their futures. Co-curricular engagements support students' transition to OU and GCoE. (F, Sp) [V-FYE].

ENGR 1421 Engineering Design in Action 1 Credit Hour

Prerequisite: ENGR 1411 and freshman standing, or departmental permission. Students apply engineering design under constraints addressing a relevant problem. Students address the needs of stakeholders as they design, build, test, and iterate solutions. The process requires developing relevant engineering or science knowledge and project management plans and applying ethical and societal considerations. The project and reflections will be documented in a comprehensive engineering design report and a design presentation. (F, Sp)

ENGR 1501 Resources for Engineers in Mathematics 1 Credit Hour

Prerequisite: Departmental Permission, GCoE majors only; Co-requisite: the MATH course aligned with the section of 1501. The course guides students to identify strategies and resources for independent studying and learning of mathematics as a novice engineer, to build transferable engineering problem-solving skills, and to work through engineering and computing applications tied to their mathematics course. May be repeated up to 3 hours in support of different math courses (i.e., MATH 1503, 1523, 1823, and/or 1914). (F, Sp, Su)

ENGR 1510 Selected Topics 3 Credit Hours

0 to 3 hours. Selected topics on current or special topics relating to engineering to be structured for students in engineering and other areas. (F, Sp, Su)

- ENGR 1552 Math Catalyst 2 Credit Hours**
Prerequisite: Corequisite: ENGR 1652; departmental permission and majors only; may be repeated up to 6 hours. The course guides Engineering Catalyst Scholars to build transferable problem-solving skills while developing engineering competency and confidence through applications of mathematics fundamentals. May be repeated up to 6 hours in support of different math courses (i.e., MATH 1503, MATH 1523, MATH 1823, MATH 2423). For Engineering Catalyst Scholars only. (F, Sp, Su)
- ENGR 1652 Engineering Catalyst 2 Credit Hours**
Prerequisite: Corequisite: ENGR 1552; departmental permission and majors only; may be repeated up to 6 hours. Prepares Engineering Catalyst Scholars to optimize their successful study of engineering. The course focuses on building academic success skills, engineering identity, and belonging in the Engineer Catalyst community and the OU Gallogly College of Engineering. May be repeated up to 6 hours. For Engineering Catalyst Scholars only. (F, Sp, Su)
- ENGR 1701 Broadening Engineering Impacts - First Year Seminar 1 Credit Hour**
Prerequisite: Freshman standing and permission of instructor. This seminar is aimed at introducing students to the various disciplines in the Gallogly College of Engineering and Mewbourne College of Earth and Energy at the University of Oklahoma. The ultimate goal of the seminar is to help students clarify and strengthen their commitment to success in engineering and STEM studies. (F, Sp)
- ENGR 2002 Professional Responsibilities and Skills of Engineers and Scientists 2 Credit Hours**
Prerequisite: ENGR 1410 or ENGR 1411 or ENGR 1421; or ENGR 3511 or concurrent enrollment; ENGL 1213 or EXPO 1213, sophomore standing. This course will connect what you might have learned in humanities and social science classes to your education and professional career as an engineer. Serious and diverse professional responsibilities accompany the rights and privileges that engineers and scientists enjoy. This course guides you to start developing and practicing the non-technical aspects of engineering. (F, Sp, Su)
- ENGR 2411 Applied Engineering Statics 1 Credit Hour**
Prerequisites: Physics 2514 and Mathematics 2433 or concurrent enrollment in Mathematics 2433. Review of fundamentals of statics calculations and their applications to common engineering situations. (Sp)
- ENGR 2431 Electrical Circuits 1 Credit Hour**
Prerequisite: MATH 2423 or 2924; and PHYS 2524 or concurrent enrollment. Introduction to basic principles of electrical circuits. Topics include DC circuits analysis, DC transients, static electrical fields, static magnetic fields, capacitors, inductors, and filters. (F, Sp)
- ENGR 2461 Thermodynamics 1 Credit Hour**
Prerequisite: MATH 2433 or 2934; and PHYS 2524 or concurrent enrollment. Introduction to basic principles of thermodynamics. Topics include density, pressure, and temperature, the first law of thermodynamics for a system, the first law of thermodynamics for a control volume, the second law of thermodynamics, and psychometrics. (F)
- ENGR 2531 Electrical Circuits II 1 Credit Hour**
Prerequisite: ENGR 2431 or concurrent enrollment. Introduction to intermediate principles of electrical circuits. Topics include amplifiers, filters, signal conditioning, A/D and D/A conversion, and common digital and analog circuits. (Sp)
- ENGR 2551 Intermediate Math Catalyst 1 Credit Hour**
Prerequisite: ENGR 1552 Math Catalyst (4 credits); good standing in the Engineering Catalyst program; majors only; sophomore standing; departmental permission. This course guides Engineering Catalyst Scholars toward independence in their major-based learning. Students will continue to build transferable problem-solving skills in new engineering and science applications of mathematics content. Topics (through engineering learning contexts) include reading STEM-based texts, reviewing notes, studying for deep learning, dry labs, etc. May be repeated up to 4 hours in support of different math (F, Sp, Su)
- ENGR 2652 Research Catalyst 2 Credit Hours**
Prerequisite: ENGL 1213 or EXPO 1213; ENGR 1552; ENGR 1652; and departmental permission. This course guides student development of understanding of the research process through the design, research, collaborative authorship, and iterative review-based refinement of research ideas. Students will find and analyze primary literature, think creatively, author and communicate in a scholarly fashion, and work collaboratively to solve scientific and societal problems using technology, delegation, and productive team communication. (F)
- ENGR 2970 Special Topics/Seminar 1-3 Credit Hours**
1 to 3 hours. Prerequisite: Permission of instructor. May be repeated; maximum credit nine hours. Special topics or seminar course for content not currently offered in regularly scheduled courses. May include library and/or laboratory research and field projects. (Irreg.)
- ENGR 3051 Experiential Leadership 1 Credit Hour**
Prerequisite: Instructor permission and enrollment in Engineering Leadership Undergraduate Certificate. Participatory course with formal, extended activity that provides opportunity for leadership development. Includes written proposal describing the activity; creation of a personal leadership development plan (PLDP); periodic reflections regarding leadership learning and development; and coaching and/or mentoring. The leadership develop plan will align with the Leadership Capabilities espoused by the Jerry Holmes Leadership Program for Engineers and Scientists. (F, Sp)
- ENGR 3401 Engineering Economics 1 Credit Hour**
Prerequisite: MATH 1823 or 1914. Introduction to basic principles of engineering economics. Topics include value and interest, cash flow diagrams and patterns, equivalence of cash flow patterns, unusual cash flows and interest periods, evaluating alternatives (annual equivalent cost comparisons, present equivalent cost comparisons, incremental approach, rate of return comparisons, benefit/cost comparisons, MARR, replacement problems, always ignore the past, break-even analysis), income tax, depreciation, and inflation. (F, Sp)
- ENGR 3431 Electromechanical Systems 1 Credit Hour**
Prerequisite: ENGR 2431 or concurrent enrollment. Introduction to basic principles of electromechanical systems. Topics include physical principles of sensing and actuation, types of sensors and actuators, and interfacing and communication protocols. (F, Sp)
- ENGR 3440 Mentored Research Experience 3 Credit Hours**
0 to 3 hours. Prerequisites: ENGL 1113 or equivalent, and permission of instructor. May be repeated; maximum credit 12 hours. For the inquisitive student to apply the scholarly processes of the discipline to a research or creative project under the mentorship of a faculty member. Student and instructor should complete an Undergraduate Research & Creative Projects (URCP) Mentoring Agreement and file it with the URCP office. Not for honors credit. (F, Sp, Su)

- ENGR 3441 Fluid Mechanics 1 Credit Hour**
Prerequisite: Mathematics 2433 or 2934; and Physics 2524 or concurrent enrollment. Introduction to basic principles of fluid mechanics. Topics include fluid properties, fluid statics, dimensionless parameters and similitude, control volume equations, open channel flow, and external flow. (Sp)
- ENGR 3511 Engineering Orientation Experience for Transfer Students 1 Credit Hour**
Prerequisite: sophomore standing. Required of all incoming transfer students with a declared major in Engineering. The lecture hours cover a variety of topics including: majors and minors; career planning; advising; and extra-curricular activities. Students also meet with mentors and work on multidisciplinary engineering projects. Also open to students with an interest in engineering. (F, Sp)
- ENGR 3611 Business Principles for Engineers and Scientists 1 Credit Hour**
Prerequisite: Junior Standing and GCoE or MCEE major. This course will introduce engineering and science students to the basic business principles that they will encounter once they join the workforce. The aim is to expose students to the concepts and terminology of business to make them more effective immediately upon employment. This course will address leadership, change management, and organizational culture, business structure, capital and ethics. (F, Sp)
- ENGR 3621 Finance and Accounting for Engineers and Scientists 1 Credit Hour**
Prerequisite: Junior Standing and GCoE or MCEE major. This course introduces students to workforce principles of finance and accounting. The course addresses accounting methods and the requirements to report financial performance in a consistent manner. More specifically, the course will address income statements, balance sheets, cash flow statements and financial statement analysis. In addition, this course will address both the budgeting and forecasting process. (F, Sp)
- ENGR 3631 Investment Decisions for Engineers and Scientists 1 Credit Hour**
Prerequisite: Junior Standing and GCoE or MCEE major. This course introduces engineers to basic business workplace principles. This course covers macroeconomics of commodities including interactions between supply, demand and inventory and the related impact on price. Profit measures are introduced such as profit margins, break-even calculations and cost-volume profit analysis. This course also addresses microeconomics, investment metrics, and considerations of cost of capital. (F, Sp)
- ENGR 3960 Honors Reading 1-3 Credit Hours**
1 to 3 hours. Prerequisite: admission to Honors Program. May be repeated; maximum credit six hours. Consists of topics designated by the instructor in keeping with the student's major program. Cover materials not usually presented in the regular courses. (Sp)
- ENGR 3970 Honors Seminar 1-3 Credit Hours**
1 to 3 hours. Prerequisite: admission to Honors Program. May be repeated; maximum credit six hours. Projects covered will vary. Deal with concepts not usually presented in regular coursework. (Ireg.)
- ENGR 3980 Honors Research 1-3 Credit Hours**
1 to 3 hours. Prerequisite: admission to Honors Program. May be repeated; maximum credit six hours. Provides an opportunity for the gifted Honors candidate to work on a special project in the student's field. (F, Sp, Su)
- ENGR 3990 Independent Study 1-3 Credit Hours**
1 to 3 hours. Prerequisite: permission of instructor and junior standing. May be repeated once with change of content. Independent study may be arranged to study a subject not available through regular course offerings. (F, Sp, Su)
- ENGR 4003 Engineering Practice 3 Credit Hours**
Prerequisites: ENGR 2002 or 2003, junior or senior standing, and permission of the instructor. Focuses on real world application of the skills taught in major courses and the core course, professional development. Allows a student to earn credit toward degree requirements through the completion of an intense internship experience. A written report detailing the responsibilities and results of the experience is required upon completion along with an oral presentation. Other service experience learning may qualify. (F, Su)
- ENGR G4013 Leadership and Management for Engineers 3 Credit Hours**
Prerequisites: junior standing or senior standing; or graduate standing; or instructor permission. This course will help prepare students for leadership and management positions in a global culture. The course emphasizes team building attributes in a multi-cultural organization, how to build commitment among team members, and how to organize to compete in the global marketplace. Students will gain a better understanding of themselves and their personal and professional goals. (F, Sp)
- ENGR G4023 Disruptive and Innovative Technology Ideation 3 Credit Hours**
Prerequisites: sophomore standing, junior standing, or senior standing; or graduate standing; at least one semester of calculus, a working knowledge of basic statistics, and departmental permission. Ideation is the process of conceiving or forming ideas. In the context of this class, the process of ideation will be investigated with regard to both disruptive and innovative commercial technologies. (F, Su)
- ENGR 4051 Lincoln, Leadership & Innovation 1 Credit Hour**
Prerequisite: Junior standing or instructor permission. Students will learn from the example of Lincoln's leadership, his ability to be innovative and employ technology-driven solutions, and his methods of personal and professional development. Students will reflect on and develop their own personal leadership philosophy in response to Lincoln's example. The course will provide students the opportunity to delve into an area of Lincoln's leadership of personal interest. (Sp)
- ENGR G4223 Fundamentals of Project Management 3 Credit Hours**
Prerequisite: Senior standing or permission of instructor. Foundational survey course that considers both technical and sociocultural aspects of project management across the full project life cycle. (F, Su)
- ENGR G4510 Selected Topics 1-6 Credit Hours**
1 to 6 hours. Prerequisite: upper-division or graduate standing. Selected topics on current or special topics relating to engineering. May be structured for students in other areas. (Sp)
- ENGR G4513 Introduction to Sustainable Engineering 3 Credit Hours**
Prerequisite: upper-division or graduate standing in the College of Engineering or permission of the instructor. An introduction to the concepts of sustainable development, sustainable engineering, global resource reserves, and global environmental concerns. The main focus of the class will be application of life cycle assessment to minimize the adverse environmental impacts of products (e.g., a pencil) or processes (e.g., wastewater treatment). Tools for life cycle assessment will include public domain software and SimaPro. (Sp)

ENGR 4960 Directed Readings 1-4 Credit Hours

1 to 4 hours. Prerequisite: good standing in University; permission of instructor and dean. May be repeated; maximum credit four hours. Designed for upper-division students who need opportunity to study a specific problem in greater depth than formal course content permits. (Irreg.)

ENGR 4970 Special Topics/Seminar 1-3 Credit Hours

1 to 3 hours. Prerequisite: Senior standing or permission of instructor. May be repeated; maximum credit nine hours. Special topics or seminar course for content not currently offered in regularly scheduled courses. May include library and/or laboratory research and field projects. (Irreg.)

ENGR 4990 Independent Study 1-3 Credit Hours

1 to 3 hours. Prerequisite: Senior standing and permission of instructor. May be repeated; maximum credit nine hours. Contracted independent study for a topic not currently offered in regularly scheduled courses. Independent study may include library and/or laboratory research and field projects. (Irreg.)

ENGR 5122 Entrepreneurship for Science and Technology 2 Credit Hours

(Crosslisted with ENT 5122) Prerequisite: Graduate standing and departmental permission. This course will introduce entrepreneurship from the science and technology perspective. We will start with ideas, analyze them, and see how they could grow into a business. The course will cover areas such as innovation, prototyping, competition, customer discovery, business model canvas, networking, funding, and legal issues, including patents and intellectual property. (F, Sp)

ENGR 5213 Foundations of Engineering Education 3 Credit Hours

Prerequisite: graduate standing in the College of Engineering or permission of instructor; undergraduate engineering students may take this course with permission of instructor. This course introduces the field of engineering education. It is designed for graduate students pursuing engineering education research and those in technical engineering disciplines who are interested in learning about engineering education. Topics include the history of engineering education, an overview of engineering education research methodologies, current issues, theoretical frameworks and applications of engineering education. (Irreg.)

ENGR 5223 Curriculum Design, Delivery and Assessment 3 Credit Hours

Prerequisite: graduate standing or permission of the instructor. This course will cover curriculum design, delivery, and assessment practices in the field of engineering education. This course will enable graduate students to understand principles of student-centered teaching and learning; course design focused on student learning outcomes; active and collaborative learning strategies; use of technology for learning and design of assessment tools. (Irreg.)

ENGR 5900 Engineering Professional Practice 1-6 Credit Hours

1-6 hours. Prerequisite: Graduate standing and departmental permission. May be repeated; maximum credit six hours. Participation in a professional experience with an approved project sponsor and topic. A written report detailing the responsibilities and results of the experience is required upon completion along with an oral presentation. (F, Sp, Su)

ENGR 5960 Directed Readings 1-3 Credit Hours

1 to 3 hours. Prerequisite: graduate standing and permission of department. May be repeated; maximum credit twelve hours. Directed readings and/or literature reviews under the direction of a faculty member. (F, Sp, Su)

ENGR 5970 Special Topics/Seminar 1-3 Credit Hours

1 to 3 hours. Prerequisite: Graduate standing or permission of instructor. May be repeated; maximum credit nine hours. Special topics or seminar course for content not currently offered in regularly scheduled courses. May include library and/or laboratory research and field projects. (Irreg.)

ENGR 5980 Research for Master's Thesis 2-9 Credit Hours

Variable enrollment, two to nine hours; maximum credit applicable toward degree, four hours. (F, Sp, Su)

ENGR 5990 Independent Study 1-3 Credit Hours

1 to 3 hours. Prerequisite: Graduate standing and permission of instructor. May be repeated; maximum credit nine hours. Contracted independent study for a topic not currently offered in regularly scheduled courses. Independent study may include library and/or laboratory research and field projects. (Irreg.)

ENGR 6960 Directed Readings 1-3 Credit Hours

1 to 3 hours. Prerequisite: graduate standing or permission of instructor. May be repeated; maximum credit six hours. Directed readings and/or literature review under the direction of a faculty member. (Irreg.)

ENGR 6970 Special Topics/Seminar 1-3 Credit Hours

1 to 3 hours. Prerequisite: graduate standing or permission of instructor. May be repeated; maximum credit 12 hours. Special topics or seminar course for content not currently offered in regularly scheduled courses. May include library and/or research and field projects. (Irreg.)

ENGR 6980 Research for Doctoral Dissertation 2-16 Credit Hours

2 to 16 hours. Prerequisite: Graduate standing and permission of instructor; may be repeated. Directed research culminating in the completion of the doctoral dissertation. (F, Sp, Su)

ENGR 6990 Independent Study 1-3 Credit Hours

1 to 3 hours. Prerequisite: Graduate standing and permission of instructor. May be repeated; maximum credit nine hours. Contracted independent study for a topic not currently offered in regularly scheduled courses. Independent study may include library and/or laboratory research and field projects. (Irreg.)

Engineering Leadership, Undergraduate Certificate

Minimum Total Credit Hours: 15

Program Code: T150

Students pursuing the Engineering Leadership Certificate will develop the skills necessary for effective and ethical leadership in professional practice. The curriculum combines required and elective engineering leadership courses with a broad selection of supporting electives in business, humanities, social sciences, physical sciences, and other fields. Certificate students are encouraged to participate in study abroad. Completion is noted on a student's transcript, providing tangible evidence of their leadership education.

- Students must be enrolled as undergraduates in the Gallogly College of Engineering or the Mewbourne College of Earth and Energy.
- All courses counted toward the certificate must be completed with a C or better.

Code	Title	Credit Hours

Engineering Leadership: Sustainability, Undergraduate Certificate

Minimum Total Credit Hours: 15

Program Code: T151

Students pursuing the Engineering Leadership Certificate will develop the skills necessary for effective and ethical leadership in professional practice. The curriculum combines required and elective engineering leadership courses with a broad selection of supporting electives in business, humanities, social sciences, physical sciences, and other fields. Certificate students are encouraged to participate in study abroad. Completion is noted on a student's transcript, providing tangible evidence of their leadership education.

- Students must be enrolled as undergraduates in the Gallogly College of Engineering or the Mewbourne College of Earth and Energy.
- All courses counted toward the certificate must be completed with a C or better.

Electives

Choose 15 hours of ACS elective courses from a list maintained by the program and approved by the Graduate College (p. 1221)	15
--	----

Total Credit Hours 30

General Requirements for all Master's Degrees

The master's degree requires the equivalent of *at least* two semesters of satisfactory graduate work and additional work as may be prescribed for the degree.

All coursework applied to the master's degree must carry graduate credit.

Master's degree programs which require a thesis consist of *at least* 30 credit hours. All non-thesis master's degree programs require *at least* 30 credit hours.

Credit transferred from other institutions must meet specific criteria and is subject to certain limitations.

Courses completed through correspondence study may *not* be applied to the master's degree.

To qualify for a graduate degree, students must achieve an overall grade point average of 3.0 or higher in the degree program coursework and in all resident graduate coursework attempted. A student must also have at least a 3.0 in all coursework (including undergraduate coursework if any).

Additional information for master's degree students may be found in the Graduate College Bulletin.

Electives Course List

Code	Title	Credit Hours
ACS 5323	Data Security, Networks and Network Security	3
ACS 5413	Mobile Devices Software Development	3
ACS 5423	Software Development for World Wide Web	3
ACS 5513	Machine Learning Practice	3
ACS 5523	Introduction to Cloud Computing	3

Engineering, M.S.

Minimum Total Hours (Thesis): 30

Minimum Total Hours (Non-Thesis): 33

Program Code: M370 Q234

At least one year of industry experience is required for the non-thesis option.

No more than 12 credit hours of 4000 level engineering and science courses (approved for graduate credit) can be applied to the degree, and no more than 9 credit hours of these 4000 level courses can be from a single discipline.

A Bachelor of Science in Engineering or equivalent, GRE, and an above-average record in the undergraduate program are required for admission. Students with degrees from non-engineering disciplines are expected to do remedial work as determined by the Graduate Engineering Program Committee.

Engineering, Ph.D.

Minimum Total Hours: 90

Program Code: D370 R232

This program has changes pending State Regents approval for 2024/25. These pending changes are not reflected here.

Program Requirements

Code	Title	Credit Hours
	A minimum of 9 hours of 5000-level or above letter graded engineering courses beyond the M.S.	9
	A minimum of 15 hours of 5000 level or above letter graded courses in engineering, science, or math ¹	15
	Additional Coursework	21-64
Dissertation Research		
ENGR 6980	Research for Doctoral Dissertation	2-45
Total Credit Hours		90

¹ Maximum of 9 hours in science and math.

Coursework Requirements

- A maximum of 12 hours of 4000-level engineering and science courses approved for graduate credit may be applied (maximum of 9 hours of 4000-level courses from a single discipline).
- A maximum of 6 hours of S/U-graded courses (excluding dissertation research) may be applied.

General Requirements for Doctoral Degrees

A student should expect to spend at least the equivalent of three full academic years beyond the bachelor's degree to obtain the doctoral degree. During this period the student will take appropriate graduate coursework, successfully complete the general examination, and successfully defend and submit the final dissertation.

All coursework applied to the doctoral degree must carry graduate credit.

The doctoral degree requires at least 90 post-baccalaureate hours, including both formal coursework and hours of research.

The minimum hour requirement for a specific doctoral degree program cannot be waived.

No more than one-half of the credit hours, both OU and overall, excluding Research for Doctoral Dissertation (6980), may be S/U-graded coursework.

The student must be in residence at OU for at least two consecutive 16-week semesters during the pursuit of the doctoral degree while enrolled and engaged in coursework or research activities as prescribed by the major academic unit.

For more detailed regulations and requirements for Doctoral degrees, please consult the Graduate College Bulletin: <http://www.ou.edu/gradcollege/forms/bulletin>

Engineering: Engineering Education, Ph.D.

Minimum Total Hours: 90

Program Code: D370 R230

General Information Aerospace Engineering

Aerospace engineering is one of the most rewarding and challenging branches of engineering. There is a fulfilling excitement in designing and building flying craft ranging from general aviation to high-performance military aircraft and commercial airliners to drones. There are also opportunities in the design and flight of spacecraft and unmanned vehicles. Challenging space projects are awaiting the next generation of engineers. Aerospace technology has also expanded to include ground effect machines, helicopters, hydrofoil ships, high-power lasers, wind turbines, and high-speed rail vehicles, opening up even more career opportunities for aerospace engineers.

Careers

Aerospace engineers work in industries or government agencies whose mission is to design, test, manufacture, or operate aircraft or spacecraft. Opportunities are available in companies that build large commercial aircraft and companies that specialize in the smaller general aviation aircraft and drones. Careers in private industry and government include work on commercial and military aircraft, UAVs, missiles, spacecraft and satellites.

Engineers employed by the National Aeronautics and Space Administration (NASA) are involved in research, design, development and operation of the U.S. space program and in many aspects of aeronautics. Also, some aerospace engineers find satisfying careers in applying their broad engineering knowledge to other areas of technological development.

Mechanical Engineering

Mechanical engineering is one of the most versatile of all engineering programs. Most branches of industry employ mechanical engineers. The profession encompasses breadth, flexibility and the opportunity for great individuality. Mechanical engineers apply knowledge of material and thermal sciences, fluid and solid mechanics, and mathematics to design, develop, and build mechanical and electromechanical devices and systems.

Since most physical devices and systems have one or more mechanical aspects, mechanical engineering is almost always required in the design, manufacture and utilization of any technical product or system.

Careers

The career opportunities available to mechanical engineers are truly unlimited. Mechanical engineering plays a central role in all major industries including the aerospace, automotive, chemical, computer, construction, electrical, machinery, metals, petroleum and nuclear industries. Mechanical engineers are employed in most technological field including industrial machinery, oil and gas, energy farm equipment, textiles, transportation, pharmaceutical, medical instrumentation, apparel manufacturing, electronics, soap and cosmetics, paper and wood products, education, utilities, and office machinery.

In these and other fields, mechanical engineers are involved in research, development, design, production and testing, construction, operations, sales, management, consulting, and teaching. Mechanical engineers are also employed in defense laboratories and in government where they hold positions of responsibility in state and federal government, in big and small corporations, and in private practice.

Programs & Facilities

Research Facilities

The school's laboratories are primarily located in Felgar Hall and the Engineering Research Center on North Campus and the South Campus. Specialized laboratories have been developed for additive manufacturing, combustion and propulsion, composite materials and structures, robotics, stress analysis and mechanical behavior of materials, fatigue, fluid flow and heat transfer, aerodynamics, hypersonics, material characterization and development, structural health monitoring and biomedical applications.

These laboratories are equipped with modern instrumentation and dedicated data acquisition systems.

Within AME, a departmental computer laboratory is available for use in courses and research. Several other computer laboratories are also available on campus.

The **L.A. Comp Subsonic Wind Tunnel** is located on the Norman campus at the foot of the OU water tower. It is a closed circuit, 4 ft. x 6 ft. test section tunnel, capable of producing wind speeds over 175 miles per hour.

The AME Machine Shop, located in the basement of Felgar Hall, supports the academic and research programs of the school.

See About AME Research for more information concerning Instructional labs and research labs.

Undergraduate Study

Aerospace and Mechanical Engineering Program Educational Objectives (PEOs)

Program Educational Objectives are broad statements that describe what graduates are expected to attain within a few years of graduation.

- a. Our graduates will have successful professional careers in industry, government, academia or non-profit organizations.
- b. Our graduates will be successful in solving the engineering problems associated with the lifecycle of complex systems.
- c. Our graduates will continue to learn and advance their careers through activities such as participation in professional organizations, attainment of professional certification and post-graduate study.

Aerospace Engineering Student

Student outcomes are statements that describe what students are expected to know and be able to do by the time of graduation. These relate to the skills, knowledge and behaviors that students acquire as they progress through the program.

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. An ability to communicate effectively with a range of audiences
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies
8. Knowledge of the major aeronautical topics and some astronomical topics

Mechanical Engineering Student

Student outcomes are statements that describe what students are expected to know and be able to do by the time of graduation. These relate to the skills, knowledge and behaviors that students acquire as they progress through the program.

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety,

and welfare, as well as global, cultural, social, environmental, and economic factors

3. An ability to communicate effectively with a range of audiences
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies
8. Knowledge of thermal and mechanical systems

Curriculum in Aerospace Engineering

For detailed semester by semester curriculum requirements, please see Aerospace Engineering, Bachelor of Science (p. 1235). (Bachelor of Science in Aerospace Engineering accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org>, under the General Criteria and the Aerospace and Similarly Named Program Criteria.)

Curriculum in Mechanical Engineering

Standard Option

For detailed semester by semester curriculum requirements for the Standard Option, please see Mechanical Engineering (Standard), Bachelor of Science (p. 1239). (Bachelor of Science in Mechanical Engineering accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org>, under the General Criteria and the Mechanical and Similarly Named Engineering Programs Program Criteria.)

Premedical Option

The understanding of many physical phenomena associated with the human body is enhanced by the knowledge gained in the study of mechanical engineering. The fluid mechanics of the cardiovascular system, the kinetics and stress analysis of orthopedics, the dynamics of the auditory system are but a few examples of the interaction of mechanical engineering and medicine. Research and development of many diagnostic and treatment techniques are intimately interwoven with principles studied in mechanical engineering.

Students enrolled in the Mechanical Engineering B.S. curriculum and interested in studying medicine or dentistry may choose a premedical elective pattern. This elective pattern allows the student to earn a B.S. degree in Mechanical Engineering and satisfy the prerequisite course requirements for the University of Oklahoma's medical or dental schools.

For detailed semester by semester curriculum requirements or the Premedical Option, please Mechanical Engineering (Premedical Option), Bachelor of Science (p. 1241).

Pre-med students should consult their Pre-Health and Pre-Medical Professions advisor as well as their Mechanical Engineering advisor for necessary medical school information.

Accelerated Bachelor of Science/Master of Science

The School of Aerospace and Mechanical Engineering also offers an accelerated combined BS/MS program to qualified students. This program provides the opportunity for students to complete both the undergraduate and master's degrees in five years.

- Aerospace Engineering, Bachelor of Science/Master of Science (p. 1244)
- Mechanical Engineering (Standard), Bachelor of Science/Master of Science (p. 1247)

More detailed information on the M.S. degree program and its requirements may be obtained from the Student Services Coordinator of the School of Aerospace and Mechanical Engineering.

Graduate Study

The School of Aerospace and Mechanical Engineering offers a broad range of opportunities for advanced academic study and research in the fields of aerospace and mechanical engineering and in the underlying engineering sciences.

The following paragraphs present only the standard minimum requirements and are no more than guidelines, not intended to exclude consideration of any valid academic objectives. The admission evaluation, the academic plan, and the research studies of each student should represent a unique synthesis of program strengths and resources with that student's background and aspirations.

Questions about the programs or about any specific requirement or consideration may be addressed to the Student Services Coordinator in the School of Aerospace and Mechanical Engineering, 865 Asp Avenue, 212 Felgar Hall, University of Oklahoma, Norman, OK 73019-1052.

Areas of Specialization

There is an overlap of the graduate programs in these closely allied fields of the School, and several areas of specialization have evolved within and across these primary disciplines.

Mechanical Engineering

These programs can be categorized into the focus areas of materials, design and manufacturing; intelligent systems; bioengineering, and energy systems and propulsion. These include solid mechanics, fluid mechanics, thermal sciences and heat transfer, controls, robotics, engineering design, and bioengineering.

- Current studies in **solid mechanics** include: experimental mechanics; structural dynamics; mechanical behavior of materials; analysis and processing of composite materials and structures; structural optimization; fatigue and fracture mechanics characterization, additive manufacturing of metals and composite materials; and smart structures.
- Current studies in **fluid mechanics** include: computational fluid dynamics; compressible and hypersonic flows; viscous flows; non-Newtonian fluids; rheology; transport phenomena; turbulent jets and boundary layers; and multiphase flows.
- Current studies in **thermal sciences** include: theoretical and applied studies of radiative, conductive, and convective heat transfer; thermal properties of materials; combustion and flame dynamics; propulsion; renewable and alternate energy systems including battery-based and hydrogen-based systems; mass transfer and handling of alternate

fuels for automobile applications; biological heat transfer; heat transfer in porous media and EHD enhanced heat transfer.

- Current **control studies** include: structural control; and non-linear, robust, autonomous, optimal, and real-time control of systems and vehicles.
- Current **engineering design** studies include: energy system design; materials in design applications; product and product family design; development and applications of computer-aided design and engineering; internet based design; tool integration for concurrent engineering; computer-integrated manufacturing; and rapid prototyping.
- Current studies in **bioengineering** include: biomechanics, biomaterials; implantable devices

Aerospace Engineering

These graduate programs offer opportunities for specialization in aeroservoelasticity; aerospace structures; structural and multidisciplinary design optimization (MDO); flight controls; aerodynamics; propulsion; hypersonics; combustion and flame dynamics; multiphase flows; non-equilibrium flows; computational methods; aeroelasticity; robotics; intelligent systems; astrodynamics; space vehicle/mission design; computational fluid dynamics; and flight vehicle design and synthesis.

Engineering Analysis

Coordinated graduate programs share techniques of advanced engineering analysis, with current emphasis on finite element methods, nonlinear analysis, variational calculus, perturbation methods, computational fluid mechanics, and optimization methodologies.

Prerequisites for Full Graduate Standing

In addition to meeting the general requirements of the Graduate College, prospective students are expected to have previously earned a B.S. degree or its equivalent in the respective fields of aerospace or mechanical engineering. Students with baccalaureate degrees in other engineering disciplines, physical sciences or mathematics who meet the Graduate College requirements may be conditionally admitted to the AME graduate programs with the stipulation that they must complete specified undergraduate courses to correct identified deficiencies in their background.

Evidence of successful academic potential is considered for admission to the graduate program. This is most commonly indicated by the achievement of a grade point average of 3.2 or better on a 4.0 scale (or an equivalent achievement as reflected in the grading system of the applicant's previous education program) for the most recent two years of academic work. GRE scores (optional), letters of reference, and the statement of purpose are also considered in the admission process. Applicants who have a strong research commitment and an intention to pursue graduate studies through the doctoral level are particularly encouraged. Details concerning the admission criteria and the required background courses may be obtained from the School of Aerospace and Mechanical Engineering.

Master of Science

General Information

The degree of Master of Science in Aerospace or Mechanical Engineering usually requires the completion of an original research thesis in addition to coursework beyond the baccalaureate level.

Thesis Program (Standard)

The traditional research-oriented M.S. program with thesis emphasizes an advanced study and research experience that is particularly suited to prepare students for research and development careers in the industry or the government and for further graduate studies. To be eligible for the research option, a student must have identified an appropriate research area and be accepted as an M.S. thesis student by a member of the AME graduate faculty.

Non-Thesis Program

The coursework-emphasis plan is designed to meet the professional needs of part-time students and other students whose background and educational goals may be best served by additional instructed study in lieu of the research investigation involved in an M.S. thesis. To pursue this plan-of-study, students must indicate interest in the coursework-emphasis program on the application for admission. After admission, these students are encouraged to identify faculty members who will serve as their academic M.S. program advisors or they may complete the program under the overall guidance of the Graduate Liaison. The non-thesis M.S. program culminates in a comprehensive examination.

Students pursuing the thesis option are given preference in graduate assistantship consideration.

Students wishing to change from the thesis to non-thesis option must petition the AME graduate liaison. If the petition is approved, no more than 24 hours of credit will be transferred towards the fulfillment of the course requirements in the non-thesis option. Such a transfer cannot take place during a semester.

Accelerated BS/MS Program

The School of Aerospace and Mechanical Engineering also offers an accelerated combined BS/MS program to qualified students. This program provides an opportunity for students to complete both the undergraduate and master's degrees in five years.

More detailed information on the M.S. degree program and its requirements may be obtained from the Student Services Coordinator of the School of Aerospace and Mechanical Engineering.

Doctor of Philosophy

The degree of Doctor of Philosophy (Ph.D.) in aerospace engineering or mechanical engineering requires the completion of an original research dissertation in addition to coursework beyond the bachelor's/master's degree.

Our Ph.D. program emphasizes an advanced study and research experience that is particularly suited to prepare students for research careers in industry or government and for positions in academia. To be eligible for the program, a student must have been admitted into the Ph.D. program. The student must then identify an appropriate research area and must be accepted as a Ph.D. student by a member of the AME graduate faculty. A general exam and a dissertation defense at the end of the research program assures that the student meets the high standards of this terminal degree.

Students must complete at least 42 hours of coursework and at least 42 hours of dissertation work for a minimum of 90 hours beyond the undergraduate degree.

Courses

- AME 2102 Engineering Design Graphics 2 Credit Hours**
Prerequisite: Sophomore standing and majors only; ENGR 1413, and MATH 1914 or MATH 2423. Visualization and modeling techniques for product design and development. Design methodology, graphic standards, projection theory, freehand sketching, and spatial geometry. Three-dimensional Computer-Aided-Design modeling, components and assemblies, graphic standards, geometric dimensioning and tolerancing, engineering drawings. Solving open-ended design and visualization problems. (Sp)
- AME 2113 Statics 3 Credit Hours**
Prerequisite: (PHYS 2514; MATH 1823 or 1914; MATH 2423 or 2924; and CHEM 1315 all with a minimum grade of C; MATH 2433 or 2934 or concurrent enrollment. Vector representation of forces and moments: general three-dimensional theorems of statics; centroids and moments of area and inertia. Free-body diagrams, equilibrium of a particle and of rigid bodies, distributed loads, friction and internal shear and moment loads. Analysis of trusses, frames, and machines. (F)
- AME 2213 Thermodynamics 3 Credit Hours**
Prerequisite: Majors only; (Physics 2514; MATH 1823 or 1914; MATH 2423 or 2924; and CHEM 1315) all with a minimum grade of C. First and second laws of thermodynamics are developed and applied to the solutions of problems from a variety of engineering fields. Extensive use is made of differential calculus to interrelate thermodynamics functions. (F)
- AME 2223 Introduction to Aerospace Engineering 3 Credit Hours**
Prerequisite: AE majors (A010 & B010) only; PHYS 2514; MATH 1823 or 1914; MATH 2423 or 2924; and CHEM 1315 all with a minimum grade of C. Introduction to the foundational dynamics of aerospace vehicles, propulsion system performance, and basic aerodynamic forces and conventions. (F)
- AME 2303 Materials, Design and Manufacturing Processes 3 Credit Hours**
(Crosslisted with IE 2303) Prerequisite: 2113 or Civil Engineering 2113 or Engineering 2113. Mechanical and physical properties of engineering materials. Introduction to design concepts, manufacturing processes and equipment used in engineering. (Sp)
- AME 2402 Engineering Computing 2 Credit Hours**
Prerequisite: MATH 1823 or 1914 or concurrent enrollment; Majors only. Introduction to computer programming and university computing facilities. Program design and development: computer application exercises in engineering. (F)
- AME 2533 Dynamics 3 Credit Hours**
Prerequisite: AME 2113, MATH 2433 or 2934; Majors only. Dynamics (kinematics and kinetics) of particles and rigid bodies for rectilinear, curvilinear and angular motion; work and energy methods; conservations of impulse and momentum; introduction to mechanical vibrations. (Sp)
- AME 2623 Circuits and Sensors 3 Credit Hours**
Prerequisite: PHYS 2514; MATH 1823 or 1914; MATH 2423 or 2924; and CHEM 1315 all with a minimum grade of C or better with an overall average of 3.0 in these four courses - AP credit accepted and weighted based upon score; MATH 3413 and 3401 or concurrent enrollment; PHYS 2524 or concurrent enrollment; Majors only. Formulation and solution of circuit equations, network theorems, sinusoidal steady-state analysis, simple transients. Introduction to digital logic circuits. Physical principles of sensing and actuation. Applications to engineered systems of computer programming, embedded systems, and controls. (Sp)
- AME 3103 Interactive Engineering Design Simulation 3 Credit Hours**
Prerequisite: AME 3143, Solid Mechanics; and AME 3153, Fluid Mechanics or AME 3253, Aerodynamics. Visualization and introductory finite element modeling techniques for product design and development. Three-dimensional CAD modeling, components and assemblies, graphic standards, dimensions and tolerances, engineering drawings. Introduction to finite element methods for structural and fluid mechanics problems, with verification. (Sp)
- AME 3112 Solid Mechanics Lab 2 Credit Hours**
Prerequisite: 3143 or concurrent enrollment. Measurement of displacement; velocity, acceleration, force, torque, strain, stress, data acquisition and processing; data and uncertainty analysis; report writing. (F)
- AME 3122 Heat Transfer and Fluid Mechanics Lab 2 Credit Hours**
Prerequisite: AME 3112; AME 3173 or concurrent enrollment. Basic measurement concepts in fluid mechanics and thermal science. Concepts and methods of measuring pressure, temperature, flow, thermal and transport properties. Laboratory. (Sp)
- AME 3143 Solid Mechanics 3 Credit Hours**
Prerequisite: MATH 3113, or MATH 3413 and MATH 3401; AME 2303; AME 2533. Concepts of stress and strain; mechanical behavior of engineering materials; analysis of uniform stress states; analysis of members in torsion; stresses and deflections in beams; modes and theories of failure; design criteria. (F)
- AME 3153 Fluid Mechanics 3 Credit Hours**
Prerequisite: AME 2113, AME 2213, AME 2533, and MATH 3113; majors only. Principles of fluid mechanics: fluid statics, flow descriptions, conservation equations, dimensional analysis, potential flow, viscous flow and internal flow. (F)
- AME 3173 Heat Transfer 3 Credit Hours**
Prerequisite: AME 2213 and AME 3153 or CEES 2223. Heat transfer by conduction, convection, and radiation; mass transfer and combined modes of heat transfer. (Sp)
- AME 3253 Aerodynamics 3 Credit Hours**
Prerequisite: AME 2213, AME 2223, AME 2533, MATH 3413 and MATH 3401. Fluid properties, fluid statics, flow description, conservation equation; incompressible inviscid flow dynamics; characteristic airfoil parameters; two-dimensional flow around thin airfoils; flow around wings of finite span; boundary layer development; compressibility; governing equations for inviscid compressible flow normal and oblique shock relations; Prandtl-Meyer expansion waves; quasi-one dimensional flow through nozzles and diffusers. (F)
- AME 3272 Windtunnel Laboratory 2 Credit Hours**
Prerequisite: AME 3253 or concurrent enrollment. Operation and calibration of a subsonic wind tunnel. Experimental testing of airfoils, model airplanes, and aerodynamic shapes. Calibration and use of balance and associated test equipment. Laboratory (F)
- AME 3333 Flight Mechanics 3 Credit Hours**
Prerequisites: AME 2223, AME 2533, and AME 3253. Classical linear stability analysis and equations of motion in the body frame for rigid body aircraft. Static and dynamic analysis of aircraft open loop stability. Aircraft design topics including weight and balance, trim, and control sizing. (Sp)
- AME 3353 Design of Mechanical Components 3 Credit Hours**
Prerequisite: 2303 and 3143. Analysis and design of mechanical subsystems and selection of elements such as gears, shafts, clutches, brakes and modern mechanical components. (Sp)

- AME 3363 Design of Thermal-Fluid Systems 3 Credit Hours**
Prerequisite: AME 2402 or C S 1313, AME 3153 or AME 3253, and AME 3173. Design of fluid flow, heat transfer and energy systems including analysis, synthesis and optimization. Topics include but are not limited to: ducts and piping systems, fluid machinery, heat exchangers, thermal storage devices, furnaces, combustors, refrigeration and air conditioning systems. (F)
- AME 3413 Vibrating Systems 3 Credit Hours**
Prerequisite: 2533 and Mathematics 3113. Free and forced vibrations in lumped-parameter linear systems of one, two or more degrees of freedom. Resonance phenomena, dynamic absorbers; vibration-measuring equipment. Introduction to Laplace transforms and transient vibrations, distributed systems. (Irreg.)
- AME 3440 Mentored Research Experience 3 Credit Hours**
0 to 3 hours. Prerequisites: ENGL 1113 or equivalent, and permission of instructor. May be repeated; maximum credit 12 hours. For the inquisitive student to apply the scholarly processes of the discipline to a research or creative project under the mentorship of a faculty member. Student and instructor should complete an Undergraduate Research & Creative Projects (URCP) Mentoring Agreement and file it with the URCP office. Not for honors credit. (F, Sp, Su)
- AME 3523 Aerospace Structural Analysis 3 Credit Hours**
Prerequisite: AME 3143, MATH 3401 and MATH 3413. Advanced concepts of stress and strain; introduction to the analysis of aerospace engineering structures; complex bending and torsion, shear flows in thin-walled and stringer-skin sections; buckling; introduction to the finite element method; introduction to composite materials. (Sp)
- AME 3623 Embedded Real-Time Systems 3 Credit Hours**
Prerequisite: AME 2623 or equivalent, C S 1313 or equivalent. The fundamentals of real-time embedded systems are covered including processes, scheduling, frequency requirements, and watchdog timers. Includes work with actual real-time systems. (Sp)
- AME 3723 Numerical Methods For Engineering Computation 3 Credit Hours**
Prerequisite: AME 2402 or C S 1313, and MATH 3113 or MATH 3413. Course uses specific software applications tailored toward aerospace and mechanical engineering. Basic methods for obtaining numerical solutions with a digital computer. Included are methods for the solutions of algebraic and transcendental equations, simultaneous linear equations, ordinary and partial differential equations, and curve fitting techniques. The methods are compared with respect to computational efficiency and accuracy. (F)
- AME 3960 Honors Reading 1-3 Credit Hours**
1 to 3 hours. Prerequisite: admission to Honors Program. May be repeated; maximum credit six hours. Consists of topics designated by the instructor in keeping with the student's major program. Coverage includes materials not usually presented in the regular courses. (F, Sp, Su)
- AME 3970 Honors Seminar 1-3 Credit Hours**
1 to 3 hours. Prerequisite: admission to Honors Program. May be repeated; maximum credit six hours. The projects covered will vary. Deals with concepts not usually presented in regular coursework. (F, Sp, Su)
- AME 3980 Honors Research 1-3 Credit Hours**
1 to 3 hours. Prerequisite: admission to Honors Program. May be repeated; maximum credit six hours. Provides an opportunity for the gifted Honors candidate to work on a special project in the student's field. (F, Sp, Su)
- AME 3990 Independent Study 1-3 Credit Hours**
1 to 3 hours. Prerequisite: permission of instructor and junior standing. May be repeated once with change of content. Independent study may be arranged to study a subject not available through regular course offerings. (F, Sp, Su)
- AME 4003 Introduction to Structural Health Monitoring 3 Credit Hours**
(Slashlisted with AME 5003) Prerequisite: AME 3112 and AME 3143. Comprehensive instruction of structural dynamics, signal processing, passive and active sensing, feature extraction, statistical pattern recognition, nondestructive evaluation methods. No student may earn credit for both 4003 and 5003. (F)
- AME 4013 Introduction to Medical Device Design 3 Credit Hours**
(Slashlisted with AME 5013; Crosslisted with BME 4013) Prerequisite: Junior standing or permission of instructor. Introduction to medical device design with emphasis on the entire procedure of developing a medical device from identifying the unmet medical need to product launching. Topics include marketing and technology survey, concept development, the biocompatible material, device prototype, bench test, in vitro/in vivo test, clinical trial and FDA regulation. No student may earn credit for both 4013 and 5013. (Sp)
- AME 4043 Analysis of Heat Pumping Systems 3 Credit Hours**
(Slashlisted with AME 5043) Prerequisite: AME 2213 and AME 3173. A systematic introduction of thermodynamic analysis methods for heat pumping systems, including vapor-compression, absorption and other common heat pumping technologies. A specific focus is on the applications to air-conditioning, heat pump and refrigeration equipment. No student may earn credit for both 4043 and 5043. (F)
- AME 4093 Applied Biomechanics - Ear Mechanics 3 Credit Hours**
(Slashlisted with AME 5093; Crosslisted with BME 4093) Prerequisite: Junior standing; PHYS 2514; MATH 1823 or 1914; MATH 2423 or 2924; and CHEM 1315 all with a minimum grade of C or better. The course curriculum starts with a review of some basic solid mechanics and fluid mechanics. Then the course will review the applications of mechanics in different biosystems or organs. Finally, this course will cover how to apply mechanics on ear tissue mechanical measurements, ear modeling and ear implant design. No student may earn credit for both 4093 and 5093. (F)
- AME 4133 Heat Transfer in Multiphase Systems 3 Credit Hours**
(Slashlisted with AME 5133) Prerequisite: MATH 2433, PHYS 2524, AME 2213, AME 3153 and AME 3173; senior standing or permission of instructor. Basic principles for analysis of transport phenomena in multiphase systems are developed and their application to a wide variety of engineering systems including phase change is presented. The scope is limited to thermodynamics and heat and mass transfer fundamentals in solid-liquid, liquid-vapor and solid-vapor phase change processes with emphasis on condensation, evaporation, sublimation, vapor deposition, boiling, melting and solidification. No student may earn credit for both 4133 and 5133. (Sp)
- AME 4143 Nanocomposites 3 Credit Hours**
(Slashlisted with 5143) Prerequisite: 3143 or permission from instructor. Nanostructured materials and their interactions with polymer matrices; dispersion of nanoparticles and nanotubes; surface and interfaces; structure and characterization of nanophases; synthesis and processing of structural nanocomposites; characterization of properties of nanocomposites; nanomechanics of elastic moduli; potential applications and design. No student may earn credit for both 4143 and 5143. (Irreg.)

- AME 4163 Principles of Engineering Design 3 Credit Hours**
Prerequisites: AME 3103, AME 2533, AME 3353. Design process and methodology from concept through analysis, layout and prototyping. Types of design problems, human element in design, computer aid in design, specification development, concept generation, concept evaluation, product generation, function and performance evaluation, prototyping, design for manufacturing, design for assembly, design for life-cycle, sustainability, final product documentation, inclusive intergroup communication, ethics, safety and economics. (F)
- AME 4183 Design Theory and Methods 3 Credit Hours**
(Slashlisted with AME 5183) Prerequisite: AME 3103 and AME 3723, or permission of instructor. A general understanding of modern design theory and mainstream design methods for support of engineering design. Topics include: game and utility theories, decision-based design, single-objective design optimization, multi-objective design optimization, gradient calculation, multi-disciplinary design optimization, and practical engineering applications. Software tools installed on students' laptops for use in lectures, to work on homework, take tests, and collaborate on class project. No student may earn credit for both 4183 and 5183. (Irreg.)
- AME 4193 Introduction to Computer-Aided Design 3 Credit Hours**
(Slashlisted with AME 5193) Prerequisite: AME 3103 and MATH 2443/2934, or permission of instructor. A general understanding of computer-aided design and underline theory of commercial CAD systems for support of engineering design. Topics include: e-Design paradigm, geometric modeling, solid modeling (CSG, B-Rep, parametric modeling, direct modeling), assembly modeling, design parametrization, and product data exchange and management. Offered as a laptop course with hands-on lab sessions. No student may earn credit for both 4193 and 5193. (Irreg.)
- AME 4213 Biomechanics I 3 Credit Hours**
(Slashlisted with AME 5213) Prerequisite: 3143 and 3153 or permission of instructor. Introduction to physiological systems with emphasis on structure and function of tissues and organs; application of continuum mechanics to understanding of tissue and organ behavior at microscopic and macroscopic levels; viscoelastic and solid biomaterials. No student may earn credit for both 4213 and 5213. (F)
- AME G4243 Aerospace Propulsion Systems 3 Credit Hours**
Prerequisites: AME 2213 and AME 3253. Propulsion systems, review of compressible flow, combustion and thermochemical analysis, gas turbine and jet engines, rocket vehicles, chemical rockets. This course is approved for graduate credit. (F)
- AME 4263 Computer Integrated Manufacturing 3 Credit Hours**
(Slashlisted with AME 5263) Prerequisites: AME 2303 or permission of instructor. A general understanding of computer-based methods for manufacturing and assembly of mechanical products. The concept and methods for product manufacturing and assembly will be introduced from design viewpoint. No student may earn credit for both 4263 and 5263. (Irreg.)
- AME 4273 Aerospace Systems Design I 3 Credit Hours**
(Slashlisted with AME 5273) Prerequisites: AME 3103, AME 3253, AME 3333, and AME 3523 or permission of the instructor. Analysis, design, and optimization of an aerospace system. Performance analysis, mission simulation, and multi-disciplinary optimization of flight vehicles using both classical and modern design and analysis methods. No student may earn credit for both 4273 and 5273. Laboratory (F)
- AME 4281 Engineering Co-Op Program 1 Credit Hour**
(Crosslisted with BME, C S, CEES, CH E, ECE, EPHY and ISE 4281)
Prerequisite: Departmental permission and junior standing. May be repeated; maximum credit 6 hours. The Co-Op program provides students an opportunity to enhance their education via career exploration in related professional work experiences. Course assignments help students articulate their experiences by completing journals; mid-term paper; final paper and/or final presentation. Faculty receive an evaluation from the student's Co-Op supervisor who monitors performance. Faculty collaborate with the Co-Op supervisor to ensure student success. (F, Sp, Su)
- AME 4283 Concurrent Design and Manufacturing 3 Credit Hours**
Prerequisite: 2303, 2533, and 3143. The general concepts and methods in performing concurrent design and manufacturing for product development. Fundamental design theories and methods such as utility theory, state transition matrix method, game theory, and system life-cycle modeling and optimization will be introduced. No student may earn credit for both 4283 and 5283. (F)
- AME 4303 Designing for Open Innovation 3 Credit Hours**
(Slashlisted with AME 5303) Prerequisite: All seniors in engineering, business, and the sciences or permission of the instructor. Open innovation; designing for sustainability; realizing new complex engineered systems; system definition, verification and validation; identifying and managing dilemmas; Blooms Taxonomy; white space competencies, energy systems. No student may earn credit for both 4303 and 5303. (Irreg.)
- AME 4373 Aerospace Systems Design II 3 Credit Hours**
(Slashlisted with AME 5373) Prerequisite: AME 4273 or permission of the instructor. Synthesis course that emulates a team aircraft design program from conceptual design to flight test and mission evaluation. Conceptual design, preliminary analysis, detailed CAD, FEA, and CFD analysis; optimization of aircraft configuration. Advanced design, analysis, and fabrication methods based on a complete flight vehicle, a propulsion system, a structural system, or a control system. Laboratory. No student may earn credit for both 4373 and 5373. (Sp) [V].
- AME G4383 Control Systems 3 Credit Hours**
Prerequisite: 2533, Mathematics 3413 and 3401. Introduction to the concepts and theory of feedback control systems. Representation of electromechanical systems and aerospace vehicles by transfer and state variable methods. Stability and performance analysis, design techniques and synthesis methods for linear control systems. (F)
- AME 4393 Renewable Energy Systems and Control 3 Credit Hours**
(Slashlisted with AME 5393) Prerequisite: Senior Standing; MATH 2934 or MATH 2443; AME 2402 or CS 1313; AME 3723 or equivalent; MATH 3333 and AME 4383 or ECE G441 are preferred but not required. This course introduces students to the fundamentals of data science methods for the design and operation of energy systems. The course is oriented towards students pursuing a technical career in cleantech, or a graduate study in the energy sciences and engineering. Course contents include: mathematical modeling & analysis, state estimation, optimization, machine learning, and optimal control. No student may earn credit for both 4393 and 5393. (Sp)
- AME G4442 Internal Combustion Engines Laboratory 2 Credit Hours**
Prerequisite: 3122 or graduate standing. Test equipment and instrumentation, propulsion systems, reciprocating engines, supercharger fuel systems, tests and evaluation. Lecture and Laboratory (Sp)

- AME 4493 Space Sciences and Astrodynamics 3 Credit Hours**
(Slashlisted with AME 5493) Prerequisites: PHYS 2524, MATH 2443 or 2934. Selected topics in astrophysics which may include astrodynamics, stellar structure and evolution, stellar pulsation, supernovae black holes, interstellar medium, galactic structure and clusters and superclusters, active galaxies, quasars, and cosmology. No student may earn credit for both 4493 and 5493. (F)
- AME 4503 Nonlinear Dynamical Systems and Control 3 Credit Hours**
(Slashlisted with AME 5503) Prerequisite: AME 4383 or Instructor's permission. Students will learn to analyze and control nonlinear dynamical systems and apply that knowledge to real engineering problems. No student may earn credit for both 4503 and 5503. (Sp)
- AME 4513 Flight Controls 3 Credit Hours**
(Slashlisted with AME 5513) Prerequisites: AME 3333 and AME 4383. Classical and modern control theory with applications to aircraft flight control system design. No student may earn credit for both 4513 and 5513. (F)
- AME 4553 Design Practicum 3 Credit Hours**
Prerequisite: senior standing, 3363 and 4163. Design study of actual problems in industry. Lecture and Laboratory (Sp) [V].
- AME 4593 Space Systems and Mission Design 3 Credit Hours**
(Slashlisted with 5593) Prerequisite: 4493 or permission from instructor. Topics include basic orbital mechanics, orbit determination, perturbations, numerical techniques, interplanetary transfer, influence of space environment, atmospheric re-entry. Space vehicles subsystems design; propulsion, attitude determination and control, structural design, thermal control, power and telecommunications. Investigation into mission design concepts and consideration. No student may earn credit for both 4593 and 5593. (Sp)
- AME G4653 Air Conditioning Systems 3 Credit Hours**
Prerequisite: 3173. Theory and design of systems for controlling properties such as temperature, humidity, air purity, air distribution and noise in enclosures. (Sp)
- AME 4802 Robotics Laboratory 2 Credit Hours**
Prerequisite: AME major only (A010 or B010); AME 3112, C S 1313 or equivalent. Hands-on studies of robot systems with emphasis on semi-autonomous mobile robots. Mechanical, electrical and computational features of robots will be investigated. Lecture and Laboratory (F)
- AME G4822 Fluid and Thermal Laboratory 2 Credit Hours**
Prerequisite: 3173; 3122 or equivalent or graduate standing. May be repeated with change of content; maximum credit six hours. Experimental studies in heat transfer or fluid mechanics. Lecture and Laboratory (F)
- AME G4832 Micro and Nanomaterials Lab 2 Credit Hours**
Prerequisites: AME 3112, AME 3143 or equivalent or graduate standing. Introduction of experimental analysis and characterization techniques of different types of advanced materials to include polymeric micro composite materials and nanocomposites. Topics include fabrication methods. Determination of mechanical proper ties, microstructural analysis, nondestructive determination of properties of isotropic and anisotropic solids and microscopy techniques. Laboratory. (Irreg.)
- AME 4960 Directed Readings 1-4 Credit Hours**
1 to 4 hours. Prerequisite: good standing in University; permission of instructor and dean. May be repeated; maximum credit four hours. Designed for upper-division students who need opportunity to study a specific problem in greater depth than formal course content permits. (Irreg.)
- AME 4970 Special Topics/Seminar 1-3 Credit Hours**
1 to 3 hours. Prerequisite: Senior standing or permission of instructor. May be repeated; maximum credit nine hours. Special topics or seminar course for content not currently offered in regularly scheduled courses. May include library and/or laboratory research and field projects. (Irreg.)
- AME 4971 Seminar 1 Credit Hour**
(Slashlisted with 5971) Prerequisite: senior standing. May be repeated without limit; maximum credit one hour for a B.S. degree. Recent developments in selected subjects in aerospace and mechanical engineering presented by invited experts from on and off campus. No student may earn credit for both 4971 and 5971. (F, Sp)
- AME 4980 Undergraduate Research Studies 1-3 Credit Hours**
1 to 3 hours. Prerequisite: permission of instructor. May be repeated; maximum credit six hours. Work with various faculty members on individual research projects. The nature of the research and the hours credit varies. (F, Sp, Su)
- AME 4990 Independent Study 1-3 Credit Hours**
1 to 3 hours. Prerequisite: Senior standing and permission of instructor. May be repeated; maximum credit nine hours. Contracted independent study for a topic not currently offered in regularly scheduled courses. Independent study may include library and/or laboratory research and field projects. (Irreg.)
- AME 5003 Introduction to Structural Health Monitoring 3 Credit Hours**
(Slashlisted with AME 4003) Prerequisite: Graduate standing, AME 3112, AME 3143, and AME 3353. Comprehensive instruction of structural dynamics, signal processing, passive and active sensing, feature extraction, statistical pattern recognition, nondestructive evaluation methods. No student may earn credit for both 4003 and 5003. (F)
- AME 5013 Introduction to Medical Device Design 3 Credit Hours**
(Slashlisted with AME 4013; Crosslisted with BME 5013) Prerequisite: Graduate standing or permission of instructor. Introduction to medical device design with emphasis on the entire procedure of developing a medical device, from identifying the unmet medical need to product launching. Topics include marketing and technology survey, concept development, the biocompatible material, device prototype, bench test, in vitro/in vivo test, clinical trial, and FDA regulation. No student may earn credit for both 4013 and 5013. (Sp)
- AME 5023 Elastic Stress Analysis 3 Credit Hours**
Prerequisite: 3143 and Mathematics 3113; or permission. Theory of stress for continuous media, large displacement strain theory, stress-strain relations for elastic media, plane elasticity, application of theory to modern engineering problems. (F)
- AME 5043 Analysis of Heat Pumping Systems 3 Credit Hours**
(Slashlisted with AME 4043) Prerequisite: Graduate standing or permission of instructor. A systematic introduction of thermodynamic analysis methods for heat pumping systems, including vapor-compression, absorption, and other common heat pumping technologies. A specific focus is on the applications to air-conditioning, heat pump, and refrigeration equipment. No student may earn credit for both 4043 and 5043. (F)
- AME 5063 Composite Materials 3 Credit Hours**
Prerequisite: 3143 or permission. Nature and scope of composite materials; stress-strain relations and strength of a single layer of a laminated composite; laminated composite-material beams, plates and cylindrical shells; micromechanics and characterization of stiffness, fracture and transport properties; applications and optimal design. (Irreg.)

- AME 5093 Applied Biomechanics - Ear Mechanics 3 Credit Hours**
(Slashlisted with AME 4093; Crosslisted with BME 5093) Prerequisite: Graduate standing. The course curriculum starts with a review of some basic solid mechanics and fluid mechanics. Then the course will review the applications of mechanics in different biosystems or organs. Finally, this course will cover how to apply mechanics on ear tissue mechanical measurements, ear modeling and ear implant design. No student may earn credit for both 4093 and 5093. (F)
- AME 5133 Heat Transfer in Multiphase Systems 3 Credit Hours**
(Slashlisted with AME 4133) Prerequisite: MATH 2433, PHYS 2524, AME 2213, AME 3153 and AME 3173; graduate standing or permission of instructor. Basic principles for analysis of transport phenomena in multiphase systems are developed and their applications to a wide variety of engineering systems including phase change are presented. The scope is limited to thermodynamics and heat and mass transfer fundamentals in solid-liquid, liquid-vapor and solid-vapor phase change processes with emphasis on condensation, evaporation, sublimation, vapor deposition, boiling, melting and solidification. No student may earn credit for both 4133 and 5133. (Sp)
- AME 5143 Nanocomposites 3 Credit Hours**
(Slashlisted with 4143) Prerequisite: 3143, graduate standing or permission of instructor. Nanostructured materials and their interactions with polymer matrices; dispersion of nanoparticles and nanotubes; surface and interfaces; structure and characterization of nanophases; synthesis and processing of structural nanocomposites; characterization of properties of nanocomposites; nanomechanics of elastic moduli; potential applications and design. No student may earn credit for both 4143 and 5143. (Irreg)
- AME 5183 Design Theory and Methods 3 Credit Hours**
(Slashlisted with AME 4183) Prerequisite: Graduate standing or permission of instructor. A general understanding of modern design theory and mainstream design methods for support of engineering design. Topics include game and utility theories, decision-based design, single-objective design optimization, multi-objective design optimization, gradient calculation, multi-disciplinary design optimization, and practical engineering applications. Software tools installed on students' laptops for use in lectures, to work on homework, take tests, and collaborate on class project. No student may earn credit for both 4183 and 5183. (Irreg.)
- AME 5193 Introduction to Computer-Aided Design 3 Credit Hours**
(Slashlisted with AME 4193) Prerequisite: Graduate standing or permission of instructor. A general understanding of computer-aided design and underline theory of commercial CAD systems for support of engineering design. Topics include: e-Design paradigm, geometric modeling, solid modeling (CSG, B-Rep, parametric modeling, direct modeling), assembly modeling, and design parametrization. Offered as a laptop course with hands-on lab sessions. No student may earn credit for both 4193 and 5193. (Irreg.)
- AME 5213 Biomechanics I 3 Credit Hours**
(Slashlisted with 4213; Crosslisted with BME 5213) Prerequisite: AME 3143 and AME 3153 or permission of instructor. Introduction to physiological systems with emphasis on structure and function of tissues and organs; application of continuum mechanics to understanding of tissue and organ behavior at microscopic and macroscopic levels; viscoelastic and solid biomaterials. No student may earn credit for both 4213 and 5213. (F)
- AME 5263 Computer Integrated Manufacturing 3 Credit Hours**
(Slashlisted with AME 4263) Prerequisite: graduate standing in engineering or permission of instructor. A general understanding of computer-based methods for manufacturing and assembly of mechanical products. The concept and methods for product manufacturing and assembly will be introduced from design viewpoint. No student may earn credit for both 4263 and 5263. (Irreg.)
- AME 5273 Aerospace Systems Design I 3 Credit Hours**
(Slashlisted with AME 4273) Prerequisites: AME 3103, 3253, 3333, 3523 or permission of the instructor. Analysis, design, and optimization of an aerospace system. Performance analysis, mission simulation, and multidisciplinary optimization of flight vehicles using both classical and modern design and analysis methods. No student may earn credit for both 4273 and 5273. Laboratory (F)
- AME 5283 Concurrent Design and Manufacturing 3 Credit Hours**
Prerequisite: graduate standing in engineering. The general concepts and methods in performing concurrent design and manufacturing for product development. Fundamental design theories and methods such as utility theory, state transition matrix method, game theory, and system life-cycle modeling and optimization will be introduced. No student may earn credit for both 4283 and 5283. (F)
- AME 5303 Designing for Open Innovation 3 Credit Hours**
(Slashlisted with AME 4303) Prerequisite: Graduate standing in engineering, business, natural sciences, or permission of instructor. Open innovation; designing for sustainability; realizing new complex engineered systems; system definition, verification and validation; identifying and managing dilemmas; Blooms Taxonomy; white space competencies, energy systems. No student may earn credit for both 4303 and 5303. (Irreg.)
- AME 5333 Thermodynamics and Combustion 3 Credit Hours**
Prerequisite: Graduate standing and AME 2213, or permission of instructor. Thermodynamics of non-reacting and reacting mixtures, chemical equilibrium, flame temperature, transport processes in combustion, chemical kinetics, fuels and their combustion properties, premixed and diffusion flames, deflagrations and detonations, practical combustion systems, and pollutant emissions. (Sp)
- AME 5373 Aerospace Systems Design II 3 Credit Hours**
(Slashlisted with AME 4373) Prerequisite: AME 4273 or permission of the instructor. Synthesis course that emulates a team aircraft design program from conceptual design to flight test and mission evaluation. Conceptual design, preliminary analysis, detailed CAD, FEA, and CFD analysis; optimization of aircraft configuration. Advanced design, analysis, and fabrication methods based on a complete flight vehicle, a propulsion system, a structural system, or a control system. No student may earn credit for both 4373 and 5373. Laboratory. (Sp)
- AME 5393 Renewable Energy Systems and Control 3 Credit Hours**
(Slashlisted with AME 4393) Prerequisite: Graduate Standing; MATH 2934 or MATH 2443; AME 2402 or CS 1313; AME 3723 or equivalent; MATH 3333 and AME 4383 or ECE G441 are preferred but not required. This course introduces students to the fundamentals of data science methods for the design and operation of energy systems. The course is oriented towards students pursuing a technical career in cleantech or graduate study in the energy sciences and engineering. Course contents include mathematical modeling & analysis, state estimation, optimization, machine learning, and optimal control. No student may earn credit for both 4393 and 5393. (Sp)

- AME 5493 Space Sciences and Astrodynamics 3 Credit Hours**
(Slashlisted with AME 4493) Prerequisite: PHYS 2524, MATH 2443 or MATH 2934. Selected topics in astrophysics, the solar system; basic orbital mechanics, orbit determination and maneuvers, perturbations, numerical techniques, rendezvous and proximity operations, the N-body problem and approximations, interplanetary transfers. Design considerations. No student may earn credit for both 4493 and 5493. (F)
- AME 5503 Nonlinear Dynamical Systems and Control 3 Credit Hours**
(Slashlisted with AME 4503) Prerequisite: Graduate standing. Students will learn to analyze and control nonlinear dynamical systems and apply that knowledge to real engineering problems. No student may earn credit for both 4503 and 5503. (Sp)
- AME 5513 Flight Controls 3 Credit Hours**
(Slashlisted with AME 4513) Prerequisites: permission of instructor. Classical and modern control theory with applications to aircraft flight control system design. No student may earn credit for both 4513 and 5513. (F)
- AME 5573 Advanced Engineering Analysis I 3 Credit Hours**
Prerequisite: Mathematics 3413 or equivalent. Vector and tensor analysis. Calculus of variations followed by variational methods and/or the method of weighted residuals. (Ireg.)
- AME 5583 Advanced Engineering Analysis II 3 Credit Hours**
Prerequisite: 5573 or permission. Selected topics in Advanced Engineering Analysis, such as lie theory for ordinary differential equations; eigenvalue problems and spectral analysis; transform methods; solution methods for partial differential equations. (Ireg.)
- AME 5593 Space Systems And Mission Design 3 Credit Hours**
(Slashlisted with 4593) Prerequisite: 4493 or permission from instructor. Topics include basic orbital mechanics, orbit determination, perturbations, numerical techniques, interplanetary transfer, influence of space environment, atmospheric re-entry. Space vehicles subsystems design; propulsion, attitude determination and control, structural design, thermal control, power and telecommunications. Investigation into mission design concepts and consideration. No student may earn credit for both 4593 and 5593. (Sp)
- AME 5710 Topics in Solid Mechanics 1-3 Credit Hours**
1 to 3 hours. Prerequisite: permission of instructor. May be repeated with change of content; maximum credit nine hours for master's degree or twelve hours for a doctoral degree. Selected topics in continuum mechanics, such as theory of continuum mechanics, finite element methods, fatigue analysis and fracture mechanics.
- AME 5720 Topics in Fluid Mechanics 1-3 Credit Hours**
1 to 3 hours. Prerequisite: 5903 or permission of instructor. May be repeated with change of content; maximum credit nine hours for master's or 12 hours for a doctoral degree program. Concentration in a particular field of specialization in fluid mechanics, such as: rotating flows; hypersonic flow theory; advanced aerodynamics; advanced stability theory; plasma and laser dynamics. (Ireg.)
- AME 5740 Topics in Design 1-3 Credit Hours**
Prerequisite: permission of instructor. May be repeated with change of content; maximum credit nine hours for master's or 12 hours for doctoral degree program. Selected topics in conceptual, preliminary and final design; CAD and optimization applications.
- AME 5763 Introduction to the Finite Element Method 3 Credit Hours**
(Crosslisted with CEES 5763) Prerequisite: graduate standing. Weighted residual and variational approaches. Finite element formulation for rod, truss and beam elements; plane stress and plane strain problem; axisymmetric and three-dimensional analysis; isoparametric elements; conforming and nonconforming plate and shell elements. (Sp)
- AME 5803 Principles of Heat Transfer 3 Credit Hours**
Prerequisite: 3173 or permission. Steady and transient heat conduction in multi-dimensional systems, convective heat transfer for external flows, convective heat transfer for internal flows, radiant heat transfer in lumped systems, integral equations of thermal radiation, and combined mode heat transfer. (F)
- AME 5890 Guided Individual Studies 1-4 Credit Hours**
1 to 4 hours. Prerequisite: graduate standing and permission. May be repeated; maximum credit nine hours. May be subject to restricted applicability for specific degree requirements. Guided study of selected topics not offered in regularly scheduled classes. Arrangements and work requirements established by prior agreement of instructor and student(s). Students should expect to spend at least sixty hours of reading and study for each credit hour. (F, Sp, Su)
- AME 5903 Fundamental Fluid Dynamics 3 Credit Hours**
Prerequisite: 3153, 5573 or concurrent enrollment, or permission. Basic laws of fluid motion; Navier-Stokes equations, kinematics of the flow field, vorticity and circulation, basic theorems for inviscid, incompressible flows, potential-flow application, exact solutions. (F)
- AME 5913 Viscous Fluid Dynamics 3 Credit Hours**
Prerequisite: 5903 or permission. Fundamental exact solutions of viscous flow; Stokes' flow, boundary-layer flow, drag and resistance to motion, elements of heat transfer, effects of compressibility, thin shear layers, jets and wakes, elements of turbulence. (Sp)
- AME 5960 Directed Readings 1-3 Credit Hours**
1 to 3 hours. Prerequisite: graduate standing and permission of department. May be repeated; maximum credit twelve hours. Directed readings and/or literature reviews under the direction of a faculty member. (F, Sp, Su)
- AME 5970 Special Topics/Seminar 1-3 Credit Hours**
1 to 3 hours. Prerequisite: Graduate standing or permission of instructor. May be repeated; maximum credit nine hours. Special topics or seminar course for content not currently offered in regularly scheduled courses. May include library and/or laboratory research and field projects. (Ireg.)
- AME 5971 Seminar 1 Credit Hour**
(Slashlisted with 4971) Prerequisite: graduate standing. May be repeated without limit; maximum credit two hours for master's degree or four hours for a doctoral degree. Recent developments in selected subjects in aerospace and mechanical engineering presented by invited experts from on and off campus. No student may earn credit for both 4971 and 5971. (F, Sp)
- AME 5980 Research for Master's Thesis 2-9 Credit Hours**
Variable enrollment, two to nine hours; maximum credit applicable toward degree, six hours. (F, Sp, Su)
- AME 5983 Computational Fluid Dynamics 3 Credit Hours**
Prerequisite: 5573, 5903, 5973, or permission of instructor. Methods for the numerical solution of the Euler, boundary-layer, Navier-Stokes and parabolized Navier-Stokes equations. (Ireg.)

AME 5990 Special Projects 1-9 Credit Hours

1 to 9 hours. Prerequisite: graduate standing and permission of instructor. May be repeated but total credit applicable to any degree may be limited. Individual or group R & D projects involving original laboratory, analytical or theoretical investigations and syntheses. Specific objectives and work requirements established by prior agreement of the instructor and student. Students should expect to spend at least 60 hours for each credit hour and to submit appropriate reports or papers. (F, Sp, Su)

AME 6033 Fracture Mechanics 3 Credit Hours

Prerequisite: 5023 or equivalent. Elastic crack-tip stress field, crack-tip plastic zone, energy principle, plane strain fracture toughness, crack opening displacement criterion, fatigue crack propagation and applications. (Irreg.)

AME 6663 Advanced Finite Element Methods 3 Credit Hours

(Crosslisted with CEES 6663) Prerequisite: 5763. Selected topics such as: nonlinear material problems, plasticity, creep (visco-plasticity), fracture, etc.; geometrically nonlinear problems; large displacements and structural stability; dynamic problems and analytical solution procedures; soil-structure interactions, application of the finite element method to fluid and heat transfer problem. (Irreg.)

AME 6960 Directed Readings 1-3 Credit Hours

1 to 3 hours. Prerequisite: graduate standing or permission of instructor. May be repeated; maximum credit six hours. Directed readings and/or literature review under the direction of a faculty member. (Irreg.)

AME 6970 Advanced Topics In Aerospace And/Or Mechanical Engineering 1-3 Credit Hours

Prerequisite: permission of instructor. May be repeated with change of content; maximum credit nine hours for a master's and twelve hours for doctoral degree program. Selected advanced topics in all aspects of aerospace and/or mechanical engineering.

AME 6980 Research for Doctoral Dissertation 2-16 Credit Hours

2 to 16 hours. Prerequisite: Graduate standing and permission of instructor; may be repeated. Directed research culminating in the completion of the doctoral dissertation. (F, Sp, Su)

AME 6990 Independent Study 1-3 Credit Hours

1 to 3 hours. Prerequisite: Graduate standing and permission of instructor. May be repeated; maximum credit nine hours. Contracted independent study for a topic not currently offered in regularly scheduled courses. Independent study may include library and/or laboratory research and field projects. (Irreg.)

Faculty

Last Name	First/Middle Name	Middle init.	OU Service start	Title(s), date(s) appointed	Degrees Earned, Schools, Dates Completed
Attar	Peter		2006	ASSOCIATE PROFESSOR OF AEROSPACE AND MECHANICAL ENGINEERING, 2012	PhD, Duke Univ, 2003; MSc, Duke Univ, 1999; BS, Tufts Univ, 1997
Baldwin	James		1993	DIRECTOR, DYNAMIC STRUCTURES SENSING AND CONTROL CENTER 2006; ASSOCIATE PROFESSOR OF AEROSPACE AND MECHANICAL ENGINEERING 2001	PhD, Univ of Virginia, 1993; MS, Univ of Virginia, 1990; BS, Univ of Virginia, 1983

Bashetty	Srikanth		2022	ASSISTANT PROFESSOR OF AEROSPACE AND MECHANICAL ENGINEERING, 2022	Ph.D, Texas A&M Univ - Kingsville, 2020; M. Tech, JNTU Hyderabad, 2014; B. Tech JNTU Hyderabad, 2012
Billings	Christopher		2023	RESEARCH ASSISTANT PROFESSOR OF AEROSPACE AND MECHANICAL ENGINEERING, 2023	Ph.D , Mechanical Engineering, University Of Oklahoma 2023; B.S, Mechanical Engineering, University of Oklahoma, 2020
Cai	Jie		2017	ASSOCIATE PROFESSOR OF AEROSPACE AND MECHANICAL ENGINEERING, 2023	PhD, Purdue Univ, 2015; MS, Ball State Univ, 2011; BS, Dalian Univ of Tech, 2009
Chang	Kuang-Hua		1997	DAVID ROSS BOYD PROFESSOR OF AEROSPACE AND MECHANICAL ENGINEERING, 2013; WILLIAMS COMPANIES FOUNDATION PRESIDENTIAL PROFESSOR, 2005	PhD, Univ of Iowa, 1990; MS, Univ of Iowa; 1987; BS, Taipei Inst of Tech, 1980
Dai	Chenkai		2018	ASSOCIATE PROFESSOR OF AEROSPACE AND MECHANICAL ENGINEERING, 2018	Ph.D, Biomedical Engineering, Univ of Oklahoma, 2008; M.D., Tongji Medical College, HUST, Wuhan, China, 2000; M.S., Otorhinolaryngology Science, Tongji Medical College, HUST, Wuhan, China, 2003
Dalton	Christopher R		2000	ASSOCIATE PROFESSOR OF AEROSPACE AND MECHANICAL ENGINEERING, 2020	PhD, Univ of Oklahoma, 2010; MS, Univ of Oklahoma, 2007; BS, Univ of Oklahoma, 2004
Ding	Hanping		2022	ASSISTANT PROFESSOR OF AEROSPACE AND MECHANICAL ENGINEERING, 2022	Ph.D., Univ of South Carolina, 2014; M.S, Univ of Science and Technology of China, 2009; B.S, Jilin Univ China, 2006
Diogo	Sanchez	M	2022	ASSISTANT PROFESSOR OF AEROSPACE AND MECHANICAL ENGINEERING, 2022	Ph.D Brazilian National Institute for Space Research, INPE, 2015; M.Sc São Paulo State Univ Unesp, Brazil, 2009; B.Sc São Paulo State Univ, Unesp, Brazil, 2007

Gan	Rong	1999	GEORGE LYNN CROSS RESEARCH PROFESSOR 2021; CHARLES E. FOSTER CHAIR IN MECHANICAL ENGINEERING, 2002; PROFESSOR OF AEROSPACE AND MECHANICAL ENGINEERING, 2006; PRESIDENTIAL RESEARCH PROFESSOR, 2017	PhD, Univ of Memphis, 1992; MS, Univ of Alberta, 1988; MS, Huazhong Univ of Sci & Tech, 1981; BS, Huazhong Univ of Sci & Tech, 1968	Kazempoor	Pejman	2019	ASSOCIATE PROFESSOR OF AEROSPACE AND MECHANICAL ENGINEERING, 2023	Postdoc, Colorado School of Mines, 2014; Postdoc, Max Planck Institute for Dynamics of Complex Technical Systems, Magdeburg, GR, 2011; PhD Tarbiat Modares University, 2009; MS, Tarbiat Modares University 2003; BS Yard University 2000	
Garg	Jivtesh	2013	ASSOCIATE PROFESSOR OF AEROSPACE AND MECHANICAL ENGINEERING, 2020	PhD, Mass inst of Tech, 2011; MS, Univ of Minnesota, 2002; B Tech, Indian Inst of Tech, 1999	Lai	Fengch yuan	1992	ANADARKO PETROLEUM CORPORATION PRESIDENTIAL PROFESSOR, 2012; PROFESSOR OF AEROSPACE AND MECHANICAL ENGINEERING, 2009	PhD, Univ of Delaware, 1988; MS, Univ of Delaware, 1985; BS, National Tsing-Hua Univ, 1978	
Ghamarian	Iman	2021	ASSISTANT PROFESSOR OF AEROSPACE AND MECHANICAL ENGINEERING, 2021	Postdoc, Univ of Michigan 2021; Ph.D., Materials Science and Engineering, Iowa State Univ, 2017; M.S., Materials Science and Engineering, Univ of North Texas, 2012; B.S., Materials Science and Engineering, Sharif Univ of Technology, Iran, 2010	Liu	Yingtao	2014	WILLIAM H. BARKOW PRESIDENTIAL PROFESSOR, 2022; ASSOCIATE PROFESSOR OF AEROSPACE AND MECHANICAL ENGINEERING, 2020	PhD, Arizona State Univ, 2012; MS, Harbin Inst of Tech, 2006; BS, Harbin Inst of Tech, 2004	
Imbrie	Peter	K	2023	PROFESSOR OF AEROSPACE AND MECHANICAL ENGINEERING AND SPECIAL ASSISTANT TO THE PROVOST OF UNIVERSITY OF OKLAHOMA, 2023	Merchan	Wilson	E	2006	PROFESSOR OF AEROSPACE AND MECHANICAL, 2024	PhD, Univ of Illinois, 2005; MS, Univ of Illinois, 2000; BS, Univ of Illinois, 1998
Jiang	Yijie	2023	ASSISTANT PROFESSOR OF AEROSPACE AND MECHANICAL ENGINEERING, 2023	Ph.D. Aerospace Engineering, Texas A&M University, 2000; MS, Aerospace Engineering, Texas A&M University, 1985; BS, Aerospace Engineering, Texas A&M University, 1980	Mistree	Farrokh	2008	PROFESSOR OF AEROSPACE AND MECHANICAL ENGINEERING, 2009; L.A. COMP CHAIR IN AEROSPACE AND MECHANICAL ENGINEERING, 2009; ADJUNCT PROFESSOR OF INDUSTRIAL AND SYSTEMS ENGINEERING, 2013	PhD, Univ of California, 1974; MS, Univ of California, 1970; B Tech, Indian Inst of Tech, 1967	
Kayacan	Erkan	2022	ASSISTANT PROFESSOR OF AEROSPACE AND MECHANICAL ENGINEERING, 2022	Ph.D. Mechanical Engineering and Applied Mechanics, University of Pennsylvania, 2017; M.S. Mechanical Engineering and Applied Mechanics, University of Pennsylvania, 2013; B.S. Theoretical and Applied Mechanics, Fudan University, China, 2011	Ozawa	Hiroshi	2021	ASSISTANT PROFESSOR OF AEROSPACE AND MECHANICAL ENGINEERING, 2021	Ph.D., Aerospace Engineering, Nagoya Univ, 2010; M.S. Aerospace Engineering, Nagoya Univ, 2006; BS, Mechanical and Systems Engineering, Doshi, 2004	
					Parthasarathy	Ramkumar	N	1994	DIRECTOR OF AEROSPACE AND MECHANICAL ENGINEERING, 2022; PROFESSOR OF AEROSPACE AND MECHANICAL ENGINEERING, 2009; ANADARKO PETROLEUM CORPORATION PRESIDENTIAL PROFESSOR, 2008	PhD, Univ of Michigan, 1989; MS, Pennsylvania State Univ, 1985; B Tech, Indian Inst of Tech, 1984

Saha	Mrinal	2006	PROFESSOR OF AEROSPACE AND MECHANICAL ENGINEERING, 2018	PhD, Old Dominion Univ, 2001; MS, Tuskegee, 1996; MS, Bangladesh Univ, 1992; BS, Bangladesh Univ, 1988
Shabgard	Hamidreza	2016	ASSOCIATE PROFESSOR OF AEROSPACE AND MECHANICAL ENGINEERING, 2022	PhD, Univ of Connecticut, 2014; MS, Amirkabir Univ of Technology, 2007; BS, Azad Univ of Mashhad, 2003
Siddique	Zahed	2000	ASSOCIATE DEAN FOR RESEARCH, 2022; DICK AND SHIRLEY O'SHIELD PROFESSOR, 2015; PROFESSOR OF AEROSPACE AND MECHANICAL ENGINEERING, 2012	PhD, Georgia Inst of Tech, 2000; MS, Georgia Inst of Tech, 1996; BS, Georgia Inst of Tech, 1994
Song	Li	2009	PROFESSOR OF AEROSPACE AND MECHANICAL ENGINEERING, 2020; LLOYD G. AND JOYCE AUSTIN PRESIDENTIAL PROFESSOR, 2019	PhD, Univ of Nebraska, 2004; MS, Harbin Inst of Tech, 1996; BS, Shengyang Univ, 1993
Sun	Wei	2018	ASSISTANT PROFESSOR OF AEROSPACE AND MECHANICAL ENGINEERING, 2018	PhD, Georgia Inst of Tech, 2017; MS, Georgia Inst of Tech, 2015; BS, Peking Univ, 2010
Vedula	Prakash	2006	PROFESSOR OF AEROSPACE AND MECHANICAL ENGINEERING, 2018	PhD, Georgia Inst of Tech, 2001; MS, Georgia Inst of Tech, 1998; BS, India Inst of Tech, 1996
Xu	Bin	2021	ASSISTANT PROFESSOR OF AEROSPACE AND MECHANICAL ENGINEERING, 2021	Ph.D., Automotive Engineering, Clemson Univ, 2017 B.S., Automotive Engineering, Hunan Univ, China, 2013
Xu	Shuozhi	2023	ASSISTANT PROFESSOR OF AEROSPACE AND MECHANICAL ENGINEERING 2023	Ph.D. Georgia institute of Technology Atlanta, Georgia, 2016; M.S Georgia Institute of Technology, Atlanta, Georgia, 2015; M.S China Academy of Engineering Physics, Mianyang, China, 2011; B.S, Beihang University Beijing, China, 2008

Zhang	Dong	2021	ASSISTANT PROFESSOR OF AEROSPACE AND MECHANICAL ENGINEERING, 2021	Ph.D., Systems Engineering, Univ of California, Berkeley, 2020; M.S., Systems Engineering, Univ of California, Berkeley, 2016; B.S., Electrical and Computer Engineering, Shanghai Jiao Tong Univ, China, 2015 B.S., Civil and Environmental Engineering, Univ of Michigan, Ann Arbor, 2015
-------	------	------	---	---

Aerospace Engineering, B.S.

Minimum Total Credit Hours: 128

Overall GPA - Combined and OU: 2.00

Major GPA - Combined and OU: 2.00

Curriculum GPA - Combined and OU: 2.00

Program Code: B010

This program has changes pending State Regents approval for 2024/25. These pending changes are not reflected here.

Bachelor of Science in Aerospace Engineering accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org>, under the General Criteria and the Aerospace and Similarly Named Program Criteria.

In order to progress into 2nd year courses in AME, students must successfully complete (grade C or better) MATH 1914; MATH 2924; PHYS 2514 and CHEM 1315 with 3.0 Combined Retention GPA, and possess a minimum 3.0 Combined Retention GPA in 24 or more credit hours.

Major Requirements

Code	Title	Credit Hours
Required Courses		
AME 2113	Statics	3
AME 2213	Thermodynamics	3
AME 2223	Introduction to Aerospace Engineering	3
AME 2303	Materials, Design and Manufacturing Processes	3
AME 2533	Dynamics	3
AME 2623	Circuits and Sensors	3
AME 3112	Solid Mechanics Lab	2
AME 3143	Solid Mechanics	3
AME 3253	Aerodynamics	3
AME 3272	Windtunnel Laboratory	2
AME 4383	Control Systems	3
AME 3103	Interactive Engineering Design Simulation	3
AME 3333	Flight Mechanics	3

AME 3523	Aerospace Structural Analysis	3
AME 3623	Embedded Real-Time Systems	3
AME 4243	Aerospace Propulsion Systems	3
AME 4273	Aerospace Systems Design I	3
AME 4493	Space Sciences and Astro dynamics	3
AME 4513	Flight Controls	3
AME 4373	Aerospace Systems Design II	3
Experimental Elective		
Choose a two hour approved experimental elective ¹		2
Total Credit Hours		60

¹ AME 4802 is recommended for the experimental elective.

Major Support Requirements

Code	Title	Credit Hours
Math and Science		
MATH 2924	Differential and Integral Calculus II	4
MATH 2934	Differential and Integral Calculus III	4
MATH 3413	Physical Mathematics I	3
MATH 3401	Numerical Methods With Matlab	1
PHYS 2524	General Physics for Engineering and Science Majors	4
Technical Electives		
Choose 6 hours of technical electives from the list of approved courses maintained by the department ¹		6
Additional College Requirements		
ENGR 1411	Pathways to Engineering Thinking ²	1
ENGR 2002	Professional Responsibilities and Skills of Engineers and Scientists	2
C S 1313	Programming for Non-Majors with C	3
Total Credit Hours		28

¹ A list of Technical, Experimental, and Engineering Science electives can be found at: <https://www.ou.edu/coe/ame/undergraduate/ame-current>

² Engineering transfer students may take ENGR 3511 in place of ENGR 1411.

General Education and College Requirements

Courses designated as Core I, II, III, IV, or V are part of the General Education curriculum. Students must complete a minimum of 40 hours of General Education courses, chosen from the approved list, including at least one upper-division Gen. Ed. course outside of the student's major. **Courses graded P/NP will not apply.**

A grade of C or better is required in each course in the curriculum, including all prerequisite courses.

UNIVERSITY-WIDE GENERAL EDUCATION (MINIMUM 40 HOURS) and College Requirements

Code	Title	Credit Hours
Core Area I: Symbolic and Oral Communication		
<i>English Composition</i>		
ENGL 1113	Principles of English Composition	3

ENGL 1213	Principles of English Composition	3
or EXPO 1213	Expository Writing	
<i>Language (0-10 hours in the same language)</i>		
This requirement can be met by two years of the same language in high school:		0-10
Beginning Course (0-5 hours)		
Beginning Course, continued (0-5 hours)		
<i>Mathematics</i>		
MATH 1914	Differential and Integral Calculus I (Core I)	4
	^{1,2}	

Core Area II: Natural Science (including one laboratory)

PHYS 2514	General Physics for Engineering and Science Majors (Core II) ²	4
CHEM 1315	General Chemistry (Core II-Lab) ²	5
or CHEM 1335	General Chemistry I: Signature Course	

Core Area III: Social Science

P SC 1113	American Federal Government	3
Choose one course ³		3

Core Area IV: Arts & Humanities

<i>Artistic Forms</i>		
Choose one course ³		3

<i>Western Culture</i>		
HIST 1483	United States to 1865	3
or HIST 1493	United States, 1865 to the Present	
COMM 3513	Intercultural Communication (or approved substitute Core IV-Western Culture) ³	3

<i>World Culture</i>		
ANTH 4623	Approaches to Cross-Cultural Human Problems (or approved substitute Core IV-World Culture) ³	3

Core Area V: First-Year Experience

Choose one course ³		3
Total Credit Hours		40-50

¹ MATH 1823, MATH 2423, MATH 2433, and MATH 2443 sequence can be substituted for MATH 1914, MATH 2924, and MATH 2934.

² Major support requirements that also satisfy University General Education requirements.

³ To be chosen from the University-Wide General Education Approved Course List. Three of these hours must be upper-division (3000-4000).

Free Electives

Electives to bring total applicable hours to the minimum total required for the degree including a minimum of 40 upper-division hours.

Suggested Semester Plan of Study

Bachelor of Science in Aerospace Engineering accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org>, under the General Criteria and the Aerospace and Similarly Named Program Criteria.

In order to progress in your curriculum in the Gallogly College of Engineering, and as a specific graduation requirement, a grade of C or better is required in each course in the curriculum, including all

prerequisite courses. AME courses are sequential and usually offered only in the semester shown; note prerequisites.

- **DEPARTMENTAL PROGRESSION REQUIREMENTS:**
In order to progress into 2nd year courses in AME, students must successfully complete (grade C or better) MATH 1914; MATH 2924; PHYS 2514 and CHEM 1315 with 3.0 Combined Retention GPA, and possess a minimum 3.0 Combined Retention GPA in 24 or more credit hours. AP credit is acceptable for any of these required courses.

Two college-level courses in a single world language are required; this may be satisfied by successful completion of 2 years in a single world language in high school. Students who must take a language at the University will have an additional 6-10 hours of coursework.

Courses designated as Core I, II, III, IV or V are part of the General Education curriculum. Students must complete a minimum of 40 hours of General Education courses, chosen from the approved list.

Freshman

First Semester		Credit Hours
ENGL 1113	Principles of English Composition (Core I)	3
CHEM 1315	General Chemistry (Core II-Lab) ¹	5
MATH 1914	Differential and Integral Calculus I (Core I) ²	4
HIST 1483 or HIST 1493	United States to 1865 (Core IV) or United States, 1865 to the Present	3
ENGR 1411	Pathways to Engineering Thinking ³	1
Credit Hours		16

Second Semester

ENGL 1213 or EXPO 1213	Principles of English Composition (Core I) or Expository Writing	3
MATH 2924	Differential and Integral Calculus II ²	4

ANTH 4623	Approaches to Cross-Cultural Human Problems (or an advisor-approved substitution) (World Culture - Core IV) ⁴	3
Approved Elective: Social Science (Core III) ⁴		3
Credit Hours		15

Total Credit Hours 128

¹ CHEM 1315 can be substituted with CHEM 1335 (Fall only).

² MATH 1823, MATH 2423, MATH 2433, and MATH 2443 sequence can be substituted for MATH 1914, MATH 2924, and MATH 2934.

³ Engineering transfer students may take ENGR 3511 in place of ENGR 1411.

⁴ To be chosen from the University-Wide General Education Approved Course List. Three of these hours must be upper-division (3000-4000).

⁵ It is recommended that a student take AME 4802 for the experimental elective.

⁶ A list of Technical Electives can be found at: <https://www.ou.edu/coe/ame/undergraduate/ame-current>

Aerospace & Mechanical Engineering Elective Lists

Approved Electives for Undergraduates

Students wishing to use courses such as Technical, Engineering Science, and/or Experimental electives that do not appear on this list should submit a petition to the AME faculty for approval before enrolling. Courses taken during intersessions will not qualify for Engineering Science/Technical Elective credit.

Courses that have not been approved in advance may not count for elective credit. A maximum of 6 credit hours from courses that are not centrally scheduled by the University with regular meeting hours (e.g., AME 3440, AME 3960, AME 3980, AME 3990, AME 4980, AME 4990) can be used for Technical, Engineering Science, and Experimental electives.

I. Engineering Science Electives

- AME courses, 3000 level and above, **not specifically listed on the required curriculum.** **NOTE:** For AME 4980 – a consent form signed by the instructor is required.
- All courses offered by the different schools in the College of Engineering and the School of Petroleum Engineering that are 3000 level and above, excluding courses that are equivalent to AME courses in the required curriculum and excluding ENGR courses.

II. Math/Science Electives

Code	Title	Credit Hours
Chemistry		
CHEM 3053	Organic Chemistry I: Biological Emphasis	3
Any higher numbered Chemistry courses (above 3053)		
Math		
MATH 3333	Linear Algebra I	3
Any MATH 4000 Level and above		
Physics		
PHYS 3043	Physical Mechanics I	3
PHYS 3183	Electricity and Magnetism I	3
PHYS 3223	Modern Physics for Engineers	3
PHYS 3803	Introduction to Quantum Mechanics I	3
Any PHYS 4000 level and above		
Astronomy		
ASTR 3113	Galaxies and Cosmology	3
ASTR 4303	Stellar Astrophysics	3
Biology		
BIOL 5374	Scanning Electron Microscopy	4
BIOL/PBIO 5364	Transmissn Electron Microscopy	4
BIOL/PBIO 5394	Advanced Light Microscopy	4
Geology		
GEOL 3633	Introduction to Oceanography	3

III. Simulation Electives

Code	Title	Credit Hours
AME 4193	Introduction to Computer-Aided Design	3
AME 4133	Heat Transfer in Multiphase Systems	3
AME 4970	Special Topics/Seminar (Topic: Advanced Energy Systems)	1-3
AME 4970	Special Topics/Seminar (Topic: Applied Machine Learning)	1-3
AME 4970	Special Topics/Seminar (Topic: Computational Materials Science)	1-3
AME 5763	Introduction to the Finite Element Method	3
AME 5983	Computational Fluid Dynamics	3

IV. Technical Electives

Code	Title	Credit Hours
Any Engineering Science Elective listed above		
Any Math/Science Elective listed above		
Any Simulation Elective listed above		
A maximum of 3 credit hours from this list can count toward the degree:		
ENGR 4003	Engineering Practice	
ENGR 4013	Leadership and Management for Engineers	
ENGR 4023	Disruptive and Innovative Technology Ideation	
ENGR 4223	Fundamentals of Project Management	
ENGR 4513	Introduction to Sustainable Engineering	
AME 4281	Engineering Co-Op Program (Co-Op students may substitute up to 3 hours of this course for a Technical Elective)	1
<i>Other options:</i>		
Meteorology: Any METR 4000 level and above		
<i>Naval Science</i>		
N S 3223	Naval Ship Systems I: Naval Engineering Systems	3
N S 3433	Naval Ship Systems II - Naval Weapons Systems	3

V. Experimental Electives

Code	Title	Credit Hours
<i>Aerospace Engineering Experimental Electives</i>		
AME 4802	Robotics Laboratory	2
AME 4832	Micro and Nanomaterials Lab	2
AME 4980	Undergraduate Research Studies (Special Lab - NOTE: a consent form signed by the instructor is required. Course content must have experimental emphasis, and a report must be submitted.)	1-3

Mechanical Engineering Experimental Electives

AME 3272	Windtunnel Laboratory (Spring offering)	2
AME 4442	Internal Combustion Engines Laboratory	2
AME 4822	Fluid and Thermal Laboratory	2
AME 4832	Micro and Nanomaterials Lab	2
AME 4980	Undergraduate Research Studies (Special Lab - NOTE: A consent form signed by the instructor is required. Course content must have experimental emphasis and a report must be submitted.)	1-3

AME 4163	Principles of Engineering Design	3
AME 4553	Design Practicum	3
Experimental Elective		
Choose a 2 hour experimental elective from the list of approved courses maintained by the department ¹		2

Two college-level courses in a single world language are required; this may be satisfied by successful completion of 2 years in a single world language in high school. Students who must take a language at the University will have an additional 6-10 hours of coursework.

Courses designated as Core I, II, III, IV, or V are part of the General Education curriculum. Students must complete a minimum of 40 hours of General Education courses, chosen from the approved list.

Students who wish to take the MCAT in their junior year are encouraged to take the required biology elective and the organic chemistry during their junior year. Some may also wish to take an additional biology elective (not required in the curriculum).

Freshman

First Semester		Credit Hours
ENGL 1113	Principles of English Composition (Core I)	3
CHEM 1315	General Chemistry (Core II-Lab) ¹	5
MATH 1914	Differential and Integral Calculus I (Core I) ²	4
ENGR 1411	Pathways to Engineering Thinking ³	1
Advised Elective: First-Year Experience (Core V) ⁶		3
Credit Hours		16

Second Semester

ENGL 1213	Principles of English Composition (Core I) or EXPO 1213 or Expository Writing	3
CHEM 1415	General Chemistry (Continued) (Core II-Lab) ^{1,4}	5
MATH 2924	Differential and Integral Calculus II ²	4
PHYS 2514	General Physics for Engineering and Science Majors (Core II)	4
Credit Hours		16

Sophomore

First Semester

MATH 2934	Differential and Integral Calculus III ²	4
PHYS 2524	General Physics for Engineering and Science Majors	4
CHEM 3053	Organic Chemistry I: Biological Emphasis ⁴	3
AME 2113	Statics	3
AME 2213	Thermodynamics	3
AME 2402	Engineering Computing	2
Credit Hours		19

Second Semester

MATH 3113	Introduction to Ordinary Differential Equations	3
AME 2303	Materials, Design and Manufacturing Processes	3
AME 2533	Dynamics	3
ENGR 2431	Electrical Circuits	1

ENGR 2531	Electrical Circuits II	1
ENGR 3431	Electromechanical Systems	1
CHEM 3153	Organic Chemistry II: Biological Emphasis	3
CHEM 3152	Organic Chemistry Laboratory: Biological Emphasis	2
Credit Hours		17

Junior

First Semester

BIOL 1124	Intro Biol: Molecule/Cell/Phys	4
AME 3112	Solid Mechanics Lab	2
AME 3143	Solid Mechanics	3
AME 3153	Fluid Mechanics	3
AME 3723	Numerical Methods For Engineering Computation	3
ENGR 2002	Professional Responsibilities and Skills of Engineers and Scientists	2
Credit Hours		17

Second Semester

BIOL Elective ⁵		3
AME 3103	Interactive Engineering Design Simulation	3
AME 3122	Heat Transfer and Fluid Mechanics Lab	2
AME 3173	Heat Transfer	3
AME 3353	Design of Mechanical Components	3
HIST 1483	United States to 1865 (Core IV)	3
or HIST 1493	or United States, 1865 to the Present	
Credit Hours		17

Senior

First Semester

PHYS 3223	Modern Physics for Engineers	3
P SC 1113	American Federal Government (Core III)	3
AME 3363	Design of Thermal-Fluid Systems	3
AME 4163	Principles of Engineering Design	3
Approved Elective: Social Science (Core III) ⁶		3
Credit Hours		15

Second Semester

AME 4553	Design Practicum	3
COMM 3513	Intercultural Communication (or an advisor approved substitution) (Western Culture - Core IV) ⁶	3
ANTH 4623	Approaches to Cross-Cultural Human Problems (or an advisor-approved substitution) (World Culture - Core IV) ⁶	3
Approved Engineering Science Elective ⁷		3
Approved Elective: Artistic Forms (Core IV) ⁶		3
Credit Hours		15
Total Credit Hours		132

¹ CHEM 1315 and CHEM 1415 can be substituted with CHEM 1335 (Fall only) and CHEM 1435 (Spring only), respectively.

² MATH 1823, MATH 2423, MATH 2433, and MATH 2443 sequence can be substituted for MATH 1914, MATH 2924, and MATH 2934.

³ Engineering transfer students may take ENGR 3511 in place of ENGR 1411.

⁴ Pre-med students are required to consult the OU Pre-Med Advisor, Cate 1, Room 416, or call (405) 325-2457, and their Mechanical Engineering

advisor each semester prior to enrolling. NOTE: Most medical schools also require PHYS 1311 and PHYS 1321.

⁵ Biology elective to be chosen from BIOL 3113, BIOL 3333, or BIOL 4843.

⁶ To be chosen from the University-Wide General Education Approved Course List. Three of these hours must be upper-division (3000-4000).

⁷ A list of Engineering Science electives can be found at: <https://www.ou.edu/coe/ame/undergraduate/ame-current>

Aerospace Engineering, B.S./M.S.

Minimum Total Credit Hours: 147-153

Overall GPA - Combined and OU: 3.25

Major GPA - Combined and OU: 3.25

Curriculum GPA - Combined and OU: 3.25

Program Code: A010/F010

This program has changes pending State Regents approval for 2024/25. These pending changes are not reflected here.

Bachelor of Science in Aerospace Engineering accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org>, under the General Criteria and the Aerospace and Similarly Named Program Criteria.

Major Requirements

Code	Title	Credit Hours
Required Courses		
AME 2102	Engineering Design Graphics	2
AME 2113	Statics	3
AME 2213	Thermodynamics	3
AME 2223	Introduction to Aerospace Engineering	3

AME 4373	Aerospace Systems Design II	3

AME Electives

6 hours of graduate level AME courses from a list of approved courses maintained by the department ¹

Experimental Elective

Choose a two hour approved experimental elective ²

Simulation Elective

Choose a three hour approved simulation elective ³

Total Credit Hours 65

¹ Shared courses between the BS and MS degrees.

² AME 4802 is recommended for the experimental elective.

³ Refer to the department-maintained list (p. 1238) of Simulation electives for course options.

Major Support Requirements

Code	Title	Credit Hours
Math and Science		
MATH 2924	Differential and Integral Calculus II	4
MATH 2934	Differential and Integral Calculus III	4
MATH 3413	Physical Mathematics I	3
MATH 3401	Numerical Methods With Matlab	1
PHYS 2524	General Physics for Engineering and Science Majors	4
Additional College Requirements		
ENGR 2002	Professional Responsibilities and Skills of Engineers and Scientists	2
C S 1313	Programming for Non-Majors with C	3
Total Credit Hours		21

Graduate Requirements

Up to 9 hours of graduate level AME courses that satisfy MS in aerospace engineering requirements can be shared between BS and MS degrees.

Thesis Option

Code	Title	Credit Hours
------	-------	--------------

Course Requirements

Choose 24 hours of graduate level coursework from the following:

At least 3 hours of graduate level coursework in mathematics or advanced engineering analysis

At least 12 hours of AME courses at the 5000 level or higher ¹

Up to 9 hours of approved graduate-level courses ²

Thesis

AME 5980	Research for Master's Thesis	6
----------	------------------------------	---

Total Credit Hours 30

¹ No more than 3 hours in Special Projects, Guided Individual Studies, or other non-competitively graded enrollments.

² Approved graduate-level courses chosen from other fields of engineering, the physical sciences, and mathematics; or AME courses, including G4000-level courses not required for the B.S. degree in the major field. Thesis students who elect a 2-hour laboratory course may include 1 additional hour of Special Projects of Guided Individual Studies in their program.

Non-Thesis Option

Code	Title	Credit Hours
Course Requirements		
Choose 36 hours of graduate level coursework from the following:		36
At least 3 hours of graduate level coursework in mathematics or advanced engineering analysis		
At least 18 hours of AME courses at the 5000 level or higher ¹		
Up to 12 hours of approved graduate-level courses ²		
Total Credit Hours		36

¹ AME hours may include up to 3 hours Special Projects and up to 3 hours Guided Independent Studies. (Students who elect a 2-hour laboratory course may include 1 additional hour of either of these individual instruction enrollments.)

² Approved graduate-level courses chosen from other fields of engineering, the physical sciences, and mathematics; or AME courses, including G4000-level courses not required for the B.S. degree in the major field. For non-thesis students, the 12 hours may include up to 3 hours of additional enrollment in non-competitively graded courses, and up to 6 hours of G4000-level AME courses not required for the B.S. degree in the major field.

General Education and College Requirements

Courses designated as Core I, II, III, IV, or V are part of the General Education curriculum. Students must complete a minimum of 40 hours of General Education courses, chosen from the approved list, including at least one upper-division Gen. Ed. course outside of the student's major. **Courses graded P/NP will not apply.**

A grade of C or better is required in each course in the curriculum, including all prerequisite courses.

UNIVERSITY-WIDE GENERAL EDUCATION (MINIMUM 40 HOURS) AND COLLEGE REQUIREMENTS

ENGR 1413	Pathways to Engineering Thinking (Core V-FYE) ⁴	3
Total Credit Hours		40-50

¹ MATH 1823, MATH 2423, MATH 2433, and MATH 2443 sequence can be substituted for MATH 1914, MATH 2924, and MATH 2934.

² Major support requirements that also satisfy University General Education requirements.

³ To be chosen from the University-Wide General Education Approved Course List. Three of these hours must be upper-division (3000-4000).

⁴ Transfer students will need to meet the requirements of the first-year experience course as well as the engineering transfer course. Please see your advisor for your specific enrollment.

Free Electives

Electives to bring total applicable hours to the minimum total required for the degree including a minimum of 40 upper-division hours.

Suggested Semester Plan of Study

Bachelor of Science in Aerospace Engineering accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org>, under the General Criteria and the Aerospace and Similarly Named Program Criteria.

In order to progress in your curriculum in the Gallogly College of Engineering, and as a specific graduation requirement, a grade of C or better is required in each course in the curriculum, including all prerequisite courses. AME courses are sequential and usually offered only in the semester shown; note prerequisites.

Approval for admission to the accelerated BS/MS program must be initiated at the beginning of the second semester of the junior year. Students may enter the accelerated program based on the undergraduate degree pattern offered in the year they first enrolled in the Oklahoma State System of Higher Education or later. Students are eligible for graduate status upon graduation with the Bachelor of Science in Aerospace Engineering.

Two college-level courses in a single world language are required; this may be satisfied by successful completion of 2 years in a single world language in high school. Students who must take a language at the University will have an additional 6-10 hours of coursework.

First Semester

PHYS 3223 Modern Physics for Engineers	3
AME 3363 Design of Thermal-Fluid Systems	3
AME 4163 Principles of Engineering Design	3
AME Graduate-level Elective ^{6,7}	3
Approved Experimental Elective ⁵	2
Credit Hours	14

Second Semester

AME 4553 Design Practicum	3
AME Graduate-level Elective ^{6,7}	3
COMM 3513 Intercultural Communication (or an advisor approved substitution) (Western Culture - Core IV) ⁴	3
ANTH 4623 Approaches to Cross-Cultural Human Problems (or an advisor-approved substitution) (World Culture - Core IV) ⁴	3
Approved Elective: Artistic Forms (Core IV) ⁴	3
Credit Hours	15

Fifth Year

First Semester

Choose one of the following: ⁷	3
AME 5573 Advanced Engineering Analysis I	
MATH Graduate-level Elective	
AME Graduate-level Elective ⁷	3
AME Graduate-level Elective ⁷	3

Choose one of the following: ⁸		2-3
AME 5980	Research for Master's Thesis (Thesis Option)	
AME Graduate-level Elective (Non-Thesis Option) ⁸		
Credit Hours		11-12
Second Semester		
AME Graduate-level Elective ⁷		3
AME Graduate-level Elective ⁷		3
AME Graduate-level Elective ⁷		3
Choose one of the following: ⁸		3-4
AME 5980	Research for Master's Thesis (thesis option only)	
AME Graduate-level Elective ⁷		
Credit Hours		12-13
Total Credit Hours		146-148

¹ CHEM 1315 can be substituted with CHEM 1335 (Fall only).

² MATH 1823, MATH 2423, MATH 2433, and MATH 2443 sequence can be substituted for MATH 1914, MATH 2924, and MATH 2934.

³ Engineering transfer students may take ENGR 3511 in place of ENGR 1411.

⁴ To be chosen from the University-Wide General Education Approved Course List. Three of these hours must be upper-division (3000-4000). See list in the Class Schedule.

⁵ A list of Technical, Experimental, and Engineering Science electives is available in the AME Office, FH 212.

⁶ Courses applied to both BS and MS degrees.

⁷ Fourth and fifth year graduate electives must satisfy MS in mechanical engineering requirements.

⁸ Dependent upon whether a student chooses the thesis or non-thesis option. Non-thesis option additionally requires: **AME Graduate-level Elective** (3 hrs.) and AME 5990 (3 hrs.) to be taken in the Summer between the Senior and the Fifth Year, and **Comprehensive Exam** to be taken in the last semester of study.

Two college-level courses in a single world language are required; this may be satisfied by successful completion of 2 years in a single world language in high school. Students who must take a language at the University will have an additional 6-10 hours of coursework.

Courses designated as Core I, II, III, IV, or V are part of the General Education curriculum. Students must complete a minimum of 40 hours of General Education courses, chosen from the approved list.

Aerospace Engineering, M.S.

Minimum Total Hours (Thesis): 30

Minimum Total Hours (Non-Thesis): 36

Program Code: M010

The requirements listed apply to the following concentrations in Aerospace Engineering:

- Aerodynamics - M010 Q026
- Aerospace Engineering General - M010 Q028
- Composites - M010 Q136
- Fluid Mechanics - M010 Q256
- Structures - M010 Q631

Thesis Option

Code	Title	Credit Hours
Course Requirements		
Choose 24 hours of graduate level coursework from the following:		24
At least 12 hours of AME courses at the 5000 level or higher ¹		
At least 3 hours of graduate-level coursework in Mathematics or advanced Engineering analysis		
Up to 9 hours of approved graduate-level courses ²		
Thesis		
AME 5980	Research for Master's Thesis	6
Total Credit Hours		30

¹ No more than 3 hours in Special Projects, Guided Individual Studies, or other non-competitively graded enrollments.

² Approved graduate-level courses chosen from other fields of engineering, the physical sciences, and mathematics; or AME courses, including G4000-level courses not required for the B.S. degree in the major field. Thesis students who elect a 2-hour laboratory course may include 1 additional hour of Special Projects of Guided Individual Studies in their program.

Non-Thesis Option

Code	Title	Credit Hours
Course Requirements		
Choose 36 hours of graduate level coursework from the following:		36
At least 18 hours of AME courses at the 5000 level or higher ¹		
At least 3 hours of graduate-level coursework in Mathematics or advanced Engineering analysis		
Up to 12 hours of approved graduate-level courses ²		
Total Credit Hours		36

¹ AME hours may include up to 3 hours Special Projects and up to 3 hours Guided Independent Studies. (Students who elect a 2-hour laboratory course may include 1 additional hour of either of these individual instruction enrollments.)

² Approved graduate-level courses chosen from other fields of engineering, the physical sciences, and mathematics; or AME courses, including G4000-level courses not required for the B.S. degree in the major field. For non-thesis students, the 12 hours may include up to 3 hours of additional enrollment in non-competitively graded courses, and up to 6 hours of G4000-level AME courses not required for the B.S. degree in the major field.

General Requirements for all Master's Degrees

The master's degree requires the equivalent of *at least* two semesters of satisfactory graduate work and additional work as may be prescribed for the degree.

All coursework applied to the master's degree must carry graduate credit.

Master's degree programs which require a thesis consist of *at least* 30 credit hours. All non-thesis master's degree programs require *at least* 30 credit hours.

Credit transferred from other institutions must meet specific criteria and is subject to certain limitations.

Courses completed through correspondence study may *not* be applied to the master's degree.

To qualify for a graduate degree, students must achieve an overall grade point average of 3.0 or higher in the degree program coursework and in all resident graduate coursework attempted. A student must also have at least a 3.0 in all coursework (including undergraduate coursework if any).

Additional information for master's degree students may be found in the Graduate College Bulletin.

Mechanical Engineering, M.S.

Minimum Total Hours (Thesis): 30

Minimum Total Hours (Non-Thesis): 36

Program Code: M675

The requirements listed on this degree check sheet apply to the following concentrations in Mechanical Engineering:

- Combustion - M675 Q126
- Controls - M675 Q151
- Fluid Mechanics - M675 Q256
- Heat Transfer - M675 Q321
- Mechanical Engineering General - M675 Q448
- Solid Mechanics - M675 Q618

Aerospace Engineering, Ph.D.

Minimum Total Hours: 90

Program Code: D010

Program Requirements

Concentrations:

- Aerodynamics (R026)
- Aerospace Engineering Standard (R028)

- Composites (R136)
- Fluid Mechanics (R256)
- Structures (R631)

Code	Title	Credit Hours
Course Requirements		
	Advanced engineering graduate courses at the 5000-level or higher (minimum 24 hours) ¹	24
	Graduate-level math-related coursework (minimum 3 hours)	3
	Graduate-level math-related or science coursework (minimum 3 hours)	3
	Additional coursework as needed to reach 42 hours ²	0-12
Dissertation Research		
AME 6980	Research for Doctoral Dissertation (42 hours minimum)	42
Total Credit Hours		90

¹ As determined by the student's doctoral advisory conference.

² Students enrolled in the thermal science program are required to take the following: AME 5333, AME 5803, AME 5973 Computational Heat and Fluid Flow.

Coursework Requirements

- The program requires satisfactory completion of at least 42 course credit hours beyond the baccalaureate degree for a total of 90 credit hours.
- A maximum of 9 credit hours of Special Projects, Guided Individual Studies, or other non-competitively graded courses (including 6 credit hours of MS thesis) may be included.
- Students may include up to 42 credit hours from previous graduate work as follows:
 - All of a M.S. degree up to 30 hours but including no more than 6 thesis hours
 - All of a M.S. non-thesis degree up to 36 hours
 - Up to 12 hours of post-master's work

General Requirements for Doctoral Degrees

A student should expect to spend at least the equivalent of three full academic years beyond the bachelor's degree to obtain the doctoral degree. During this period the student will take appropriate graduate coursework, successfully complete the general examination, and successfully defend and submit the final dissertation.

All coursework applied to the doctoral degree must carry graduate credit.

The doctoral degree requires at least 90 post-baccalaureate hours, including both formal coursework and hours of research.

The minimum hour requirement for a specific doctoral degree program cannot be waived.

No more than one-half of the credit hours, both OU and overall, excluding Research for Doctoral Dissertation (6980), may be S/U-graded coursework.

The student must be in residence at OU for at least two consecutive 16-week semesters during the pursuit of the doctoral degree while enrolled

and engaged in coursework or research activities as prescribed by the major academic unit.

For more detailed regulations and requirements for Doctoral degrees, please consult the Graduate College Bulletin: <http://www.ou.edu/gradcollege/forms/bulletin>

Mechanical Engineering, Ph.D.

Minimum Total Hours: 90

Program Code: D675

Program Requirements

Concentrations:

Stephenson School of Biomedical Engineering

Wei Chen, Ph.D., Interim Director, Graduate Liaison, Chair of Graduate Studies, and Professor
 Rebecca Scott, Ph.D., Assistant Professor and Chair of Undergraduate Studies
 Sarah Breen, Ph.D., Associate Professor and Chair of Access and Belonging

Galogly Hall, Room 101
 173 Felgar St.
 Norman, OK 73019
 Phone: (405) 325-0789
biomedical@ou.edu
www.ou.edu/coe/sbme

General Information

The Peggy and Charles Stephenson School of Biomedical Engineering ties together OU's Gallogly College of Engineering, Health Sciences Center, College of Arts and Sciences, Price College of Business, the Oklahoma Medical Research Foundation, and the regional bioscience industry, offering an unprecedented level of health care collaboration and discovery in Oklahoma. The successful and highly multidisciplinary graduate program was established after a Whitaker Foundation grant in the late 1990s and the undergraduate program was launched in the fall of 2016. SBME is housed in Gallogly Hall, completed in the fall of 2019, which is located in the engineering quad.

The faculty of the OU Stephenson School of Biomedical Engineering (SBME) focus on the development of new and improved materials and technologies for the diagnosis and treatment for a wide variety of healthcare needs. While SBME has two strategic research clusters – Immunoengineering and Neuroengineering, the SBME faculty have a variety of research specialties in the following areas:

- Peptide-based materials and applications in biomedical engineering
- Nano-engineered sensing and treatment
- Scholarship of teaching & learning and clinical biomechanics
- Local ablation-based immunotherapy for metastatic cancers
- Neuro-immuno-engineering immunotherapies for neurological diseases
- Computational neuroimaging and neuroengineering
- Regenerative medicine
- Engineering education and single particle elemental analysis
- Multi-omics analysis for cancer therapy and vaccine development
- Engineering education and biomimetic therapeutics/cell-instructive materials
- Biomedical imaging for diagnostics and imaging-guided therapeutics
- Biomaterials
- Nanomaterials
- Brain and psychological networks
- Neuroimaging and neuromodulation

Mission Statement

The mission of the Stephenson School of Biomedical Engineering is to educate the next generation of biomedical engineers and to create new technologies that advance human health.

Biomedical Engineering

Biomedical engineers enhance the quality of life through transformative research that provides solutions to complex medical challenges. From developing immunoengineering approaches for treatment of metastatic cancers, nanotechnologies for drug delivery, neuroimaging and neuromodulation for brain research, to developing multimodality biomedical imaging for diagnostics and imaging-guided therapeutics, biomedical engineers are making an impact – one life at a time.

Institute for Biomedical Engineering, Science and Technology

The University of Oklahoma Institute for Biomedical Engineering, Science and Technology (IBEST) spans research and education activities in

bioscience and biomedical engineering on the Norman and Oklahoma City campuses.

Faculty from the lead departments – School of Sustainable Chemical, Biological and Materials Engineering, School of Aerospace and Mechanical Engineering, School of Electrical and Computer Engineering, and School of Computer Science – work with bioscientists and biomedical engineers from OU's College of Arts and Sciences in Norman and OU Health Sciences Center and Oklahoma Medical Research Foundation in Oklahoma City.

Facilities

In the fall of 2019, Gallogly Hall opened its doors. This 70,000-square-foot building offers lab space for biomedical engineering research and training programs.

The Bachelor of Science in Biomedical Engineering is accredited by the Engineering Accreditation Commission (EAC) of ABET, under the General Criteria and the Bioengineering and Biomedical and Similarly Named Engineering Programs Program Criteria.

Bachelor of Science , under the General Criteria and the Bioengineering and Biomedical and Similarly Named Engineering Programs Program Criteria.

The Bachelor of Science (p. 1260) in Biomedical Engineering focuses on the current and strategic future strengths of our faculty members: Bioimaging, Biotransport, Neural Engineering, Biomechanics, Molecular, Cellular and Tissue Engineering, and Biomedical Micro-/Nano-Technology. Courses are intended to build on previous engineering and life science courses to truly integrate engineering with biology and medicine. They are also pathways to advanced biomedical engineering courses and research, allowing students the flexibility to individualize their curriculum to meet their career objectives. Our bachelor's degree graduates will have a strong foundation in biomedical engineering with opportunities for focus within areas of the field. In addition to engineering principles, the program is built on a solid foundation of the basic sciences (chemistry, physics, and biology) and mathematics.

Undergraduate students and prospective students interested in biomedical engineering or bioengineering can also follow the pre-med option available in the Schools of Aerospace and Mechanical Engineering (AME) or Industrial and Systems Engineering (ISE), or either the pre-medical/biomedical engineering option or biotechnology option available in the School of Chemical, Biological and Materials Engineering (CBME). These curricula provide a solid foundation in engineering and biosciences that can be supplemented with elective courses and undergraduate research opportunities available from the University of Oklahoma Biomedical Engineering Center.

Bachelor of Science/Master of Science

The Accelerated B.S./M.S. degree program (p. 1263) in Biomedical Engineering may be of interest to some students. Among the courses offered are introduction to biomedical engineering, biochemical engineering, bioinstrumentation, neural engineering, biotransport, medical imaging, biomaterials, biomechanics, cellular and tissue engineering, and biosensors.

Program Educational Objectives for BME B.S. Graduates to Attain Within a Few Years of Graduation:

1. **Successful career advancement:** Graduates are advancing in their careers, either in technical roles in the healthcare/life sciences

industry, or continuing their education in professional school (e.g., medicine, dentistry, law, business) or graduate school.

2. **Positive contributors to society:** Graduates are solving healthcare problems with the goal of benefiting the quality of life for people of varied communities, infusing creative, technically competent, evidence-based, and global perspectives.
3. **Interdisciplinary team contributors:** Graduates are communicating effectively, valuing the views and contributions of interdisciplinary team members, and contributing to team success.

The Bachelor of Science in Biomedical Engineering is accredited by the Engineering Accreditation Commission (EAC) of ABET, under the General Criteria and the Bioengineering and Biomedical and Similarly Named Engineering Programs Program Criteria.

BME B.S. Students are Assessed for the Following Outcomes:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Accelerated Dual B.S. / M.S.

BS in Biomedical Engineering / MS in Biomedical Engineering (A108/ F109 Q062)

Students completing this program will receive two degrees: a B.S. and an M.S. in Biomedical Engineering. This program is accelerated because students may share 12 hours of credit that apply to both their undergraduate and graduate degrees. Students should apply for this program option by March 1 of their junior year. Please contact Nicole Palmeter (npalmeter@ou.edu) for the application materials to apply.

Master of Science

The Biomedical Engineering, Master of Science (p. 1266) degree program can be readily completed in two years. A thesis is required.

Application Information

In addition to meeting the general requirements of the Graduate College, any student with an undergraduate degree in engineering from an accredited school may be admitted as a student in full standing. It is recommended that students entering the program have taken at least one college biology course and one college organic chemistry course. A student with an undergraduate degree in the sciences may

be admitted on the condition that specified undergraduate engineering and/or mathematics courses will have to be taken for completion of the degree program, which will depend on the background of each individual student. While here the master's student will continue to follow the general procedures of the Graduate College as well as the procedures of the Biomedical Engineering Program. More application information and application forms are available on the SBME website.

Doctor of Philosophy

The Ph.D. degree in Biomedical Engineering requires ninety post-baccalaureate hours. A student with a B.S. degree can enter the Biomedical Engineering, Doctor of Philosophy (p. 1267) degree program directly; the student does not have to complete the M.S. thesis as part of the Ph.D. degree. A student with an M.S. degree can enter the Ph.D. program directly. At the end of the program, the student will demonstrate excellence in scholarly research by authoring and successfully defending a Ph.D. Dissertation.

During the Ph.D. program, the student is required to take a general examination in accordance with Graduate College requirements. For students entering with a B.S. degree, the general examination must be taken as soon as possible after the student has completed three semesters (not including the summer semester). For students entering with an M.S. degree, the general examination must be taken as soon as possible after the student has completed one semester (not including the summer semester). While here, the doctoral student will continue to follow the general procedures of the Graduate College as well as the procedures of the Biomedical Engineering Program. More application information and application forms are available on the SBME website.

Doctor of Medicine / Doctor of Philosophy in Biomedical Engineering

Students completing this program will receive two degrees: M.D. and Ph.D. in Biomedical Engineering. The M.D. program satisfies the requirements for both degrees including completion of the clinical, advisory conference, general exam, written dissertation, and oral defense components. Individuals pursuing this degree will be prepared to practice and teach medicine in a research setting and/or conduct biomedical research that requires a combination of expertise in medicine and biomedical engineering.

Admission to the program requires a B.S. degree in engineering from an accredited program. In exceptional cases, students with degrees in other technical areas may be admitted upon addressing deficiencies identified by the M.D./Ph.D. Advisory Committee and the Graduate Program Coordinator of the Bioengineering Program. Admission means acceptance by the University of Oklahoma College of Medicine (includes sitting for the MCAT, the AMCAS report, etc.) the Graduate College of the University of Oklahoma-Norman, the Stephenson School of Biomedical Engineering, and the M.D./Ph.D. Advisory Committee. The GRE is not required but may be submitted with the application. The minimum GPA (4.0 scale) for the Biomedical Engineering Program and the College of Medicine is 3.0.

Additional information about degree options and application forms are available on the SBME website or from the SBME administrative office. Information about the OU Medical School at the Health Sciences Center in Oklahoma City can be found on their web pages.

Courses

BME 1421 Introduction to Biomedical Engineering 1 Credit Hour

Prerequisite: Freshman Standing. This course serves as an introduction to and overview of biomedical engineering. Course content serves to provide appreciation for the breadth of the biomedical engineering field and to guide first year students in making curriculum, major, and career choices. (F, Sp)

BME 2333 Biomedical Engineering Fundamentals 3 Credit Hours

Prerequisite: Course is not open to freshmen; Majors only; MATH 1823 or 1914; MATH 2423 or 2924; CHEM 1315 or 1335; CHEM 1415 or 1435; and PHYS 2514, and BME 1421 or permission of instructor. Introduction to material, energy, charge, and momentum balances in biological systems. Steady state and transient conservation equations for mass, energy, charge, and momentum will be derived and applied using basic mathematical principles, physical laws, stoichiometry, and thermodynamic properties. (F)

BME 2433 Signals and Systems for Biomedical Engineering 3 Credit Hours

Prerequisite: BME 2333; ECE 2723 or concurrent enrollment; course is not open to freshmen. Students learn circuits and linear systems concepts necessary for analysis and design of biomedical systems. Theory is motivated by examples from biomedical engineering. Topics covered include electrical circuit fundamentals, operational amplifiers, frequency response, electrical transients, impulse response, transfer functions, and convolution, all motivated by circuit and biomedical examples. Elements of continuous time domain-frequency domain analytical techniques are developed. (Sp)

BME 2970 Special Topics/Seminar 1-3 Credit Hours

1 to 3 hours. Prerequisite: May be repeated; maximum credit nine hours. Special topics or seminar course for content not currently offered in regularly scheduled courses. May include library and/or laboratory research and field projects. (Irreg.)

BME 3113 Bioimaging 3 Credit Hours

Prerequisite: BME 2333; BME 2433; PHYS 2524 and MATH 3113. Introduction to medical imaging techniques such as x-ray, computed tomography, magnetic resonance, and ultrasound. (F, Sp)

BME 3123 Biotransport 3 Credit Hours

Prerequisite: BME 2333; PHYS 2524 and MATH 3113. Covers key transport concepts in biomedical engineering. Emphasis is put on mass and momentum transport with applications related to biology, medical science and biotechnology. (F, Sp)

BME 3133 Bioelectricity 3 Credit Hours

Prerequisite: BME 2333; 2433; PHYS 2524 and MATH 3113. The electrophysiology of excitable cells from a quantitative perspective. Topics include the ionic basis of action potentials, quantitative models for nerve and muscle including the Hodgkin-Huxley equations, impulse propagation, synaptic dynamics, source-field relationships, and an introduction to functional electrical stimulation. (F, Sp)

BME 3143 Biomechanics 3 Credit Hours

Prerequisite: BME 2333, PHYS 2524, and MATH 3113. Analysis of human motion, evaluation of tissue solid mechanics, and use of momentum balance in fluid mechanics. (F, Sp)

BME 3153 Molecular, Cellular and Tissue Engineering 3 Credit Hours

Prerequisite: BME 2333, MATH 3113 and BIOL 1124. Application of engineering methods to study, measure, repair, or replace biological functions at the molecular, cellular, or tissue-level length scales. (F, Sp)

BME 3163 Biomedical Micro-/Nano-Technology 3 Credit Hours

Prerequisite: BME 2333; PHYS 2524; MATH 3113; majors only. Introduction to micro/nanotechnology in biomedical settings, including micro/nanotechnologies used to investigate biological systems, physiological responses to nanotherapeutics, and first principles of microfluidics and microfabrication. (F, Sp)

BME 3171 Biomedical Engineering Lab 1 1 Credit Hour

Prerequisite: Junior standing; ISE 3293 or departmental permission; BME 3143 or concurrent enrollment; majors only. Hands-on lab that teaches students technical skills associated with BME biomechanics, and also includes topics such as bioelectricity and bioimaging. Lab components include hypothesis testing and analysis, computer simulation, lab safety and instrument training, and technical communication. (F)

BME 3181 Biomedical Engineering Lab 2 1 Credit Hour

Prerequisite: Junior standing; BME 3171; BME 3123 or concurrent enrollment, and BME 4813 or concurrent enrollment; majors only. Hands-on lab that teaches students technical skills associated with biotransport and quantitative physiology, and includes topics such as molecular, cellular & tissue engineering, bioimaging, and micro/nanotechnology. Lab components include hypothesis testing and analysis, computer simulation, lab safety and instrument training, and technical communication. (Sp)

BME 3233 Biomaterials 3 Credit Hours

Prerequisite: BIOL 1124, BME 2333, PHYS 2524, and BME 3143; majors only; permission of instructor. Introduction to materials used in biomedical environment, the design and use of implantable materials, such as metals, polyethylene, ceramics, and composites, biocompatibility, test methods, and tissue growth on biomaterials. (F)

BME 3243 Biomechanics of Human Movement 3 Credit Hours

Prerequisite: BME 3143. This course introduces advanced undergraduate students to musculoskeletal biomechanics and the quantitative analysis of human movement. Topics covered will include rigid-body kinematics, dynamics, motion capture, external force measurement, electromyography, and mechanical properties of muscles and tendons. (Sp)

BME 3440 Mentored Research Experience 3 Credit Hours

0 to 3 hours. Prerequisites: ENGL 1113 or equivalent, and permission of instructor. May be repeated; maximum credit 12 hours. For the inquisitive student to apply the scholarly processes of the discipline to a research or creative project under the mentorship of a faculty member. Student and instructor should complete an Undergraduate Research & Creative Projects (URCP) Mentoring Agreement and file it with the URCP office. Not for honors credit. (F, Sp, Su)

BME 3531 Bioinstrumentation Lab 1 Credit Hour

Prerequisite: BME 2433, corequisite BME 3533; Majors only. Fundamental circuit elements and concepts include resistance, capacitance, inductance, op-amps, impedance, voltage, current, power, and frequency. Fundamental analog measurement concepts include adequate bandwidth and amplitude and phase linearity. Examples of medical measurements and devices are included for the fundamental circuit and measurement concepts covered above. Introduction of laboratory instruments used to simulate measurements of and direct measure physiological events. (F)

BME 3533 Biomedical Instrumentation 3 Credit Hours

Prerequisite: Majors only; BME 2433 and ECE 2723. Measurement and analysis of biopotentials and biomedical transducer characteristics; electrical safety applications of FET's; integrated circuits, operational amplifiers for signal processing and computer interfacing; signal analysis and display on the laboratory minicomputer. (Sp)

BME 3722 Numerical Methods in Biomedical Engineering 2 Credit Hours

Prerequisite: Majors only; C S 1213, MATH 3113, and BME 2333. Introduces principles and techniques of numerical analysis of biomedical engineering problems using software packages. Covers numerical methods of interpolation, curve fitting, solving linear systems, analysis of ordinary and partial differential equations, numerical modeling of biomedical engineering systems, symbolic computation, and scientific visualization. (F)

BME 3723 Numerical Methods in Biomedical Engineering 3 Credit Hours

Prerequisite: Majors only; CS 1213; MATH 3113; and BME 2333. Introduces principles and techniques of numerical analysis of biomedical engineering problems using software packages. Covers numerical methods of interpolation, curve fitting, solving linear systems, analysis of ordinary and partial equations, numerical modeling of biomedical engineering systems, symbolic computation, and scientific visualization. (F)

BME 3960 Honors Reading 1-3 Credit Hours

1 to 3 hours. Prerequisite: admission to Honors Program. May be repeated; maximum credit six hours. Consists of topics designated by the instructor in keeping with the student's major program. Covers materials not usually presented in the regular courses. (F, Sp, Su)

BME 3980 Honors Research 1-3 Credit Hours

1 to 3 hours. Prerequisite: admission to Honors Program. May be repeated; maximum credit 6 hours. Selected students work with individual faculty members on research problems in biomedical engineering. (F, Sp, Su)

BME 4013 Introduction to Medical Device Design 3 Credit Hours

(Slashlisted with BME 5013; Crosslisted with AME 4013) Prerequisite: Junior standing or permission of instructor. Introduction to medical device design with emphasis on the entire procedure of developing a medical device from identifying the unmet medical need to product launching. Topics include marketing and technology survey, concept development, the biocompatible material, device prototype, bench test, in vitro/in vivo test, clinical trial and FDA regulation. No student may earn credit for both 4013 and 5013. (Sp)

BME 4050 Design Projects in Biomedical Engineering 3 Credit Hours

0 to 3 hours. Prerequisite: Permission of Instructor. May be repeated; maximum credit 6 hours. This course is designed for students who are participating in design and project based experiences. This course is different from mentored research in that the student is expected to have completed a functioning prototype or design solution by the end of the experience. Credit hours may vary, based on the size, scope, and expectations of the project. (F, Sp)

BME 4093 Applied Biomechanics - Ear Mechanics 3 Credit Hours

(Slashlisted with BME 5093; Crosslisted with AME 4093) Prerequisite: Junior Standing; PHYS 2514; MATH 1823 or 1914; MATH 2423 or 2924; and CHEM 1315 all with a minimum grade of C or better. The course curriculum starts with a review of some basic solid mechanics and fluid mechanics. Then the course will review the applications of mechanics in different biosystems or organs. Finally, this course will cover how to apply mechanics on ear tissue mechanical measurements, ear modeling and ear implant design. No student may earn credit for both 4093 and 5093. (F)

BME 4243 Biochemical Engineering 3 Credit Hours

(Slashlisted with BME 5243; Crosslisted with CH E 4243) Prerequisite: CH E 3113 or permission of instructor. Current bioprocesses for reaction and separation with emphasis on fundamental principles of biochemical engineering, biochemistry, and microbiology. No student may earn credit for both 4243 and 5243. (Sp)

BME 4281 Engineering Co-Op Program 1 Credit Hour

(Crosslisted with AME, C S, CEES, CH E, ECE, ISE and EPHY 4281) Prerequisite: Departmental permission and junior standing. May be repeated; maximum credit 6 hours. The Co-Op program provides students an opportunity to enhance their education via career exploration in related professional work experiences. Course assignments help students articulate their experiences by completing journals; mid-term paper; final paper and/or final presentation. Faculty receive an evaluation from the student's Co-Op supervisor who monitors performance. Faculty collaborate with the Co-Op supervisor to ensure student success. (F, Sp, Su)

BME 4373 Tissue Engineering 3 Credit Hours

(Slashlisted with BME 5373; Crosslisted with CH E 4373) Prerequisite: senior standing or permission of instructor. Examines the background and recent advances in the science of combining multiple cell types with an appropriate support to provide a construct that can replace or support damaged tissue. No student may earn credit for both 4373 and 5373. (Irreg.)

BME 4423 Genetic Engineering and Biotechnology 3 Credit Hours

(Slashlisted with BME 5423; Crosslisted with CH E 4423) Prerequisite: permission of instructor for upper-class undergraduates. The course will cover state-of-the-art technologies of manipulating and controlling genes, genomes and cellular pathways with a goal of engineering human (stem) cells and microbes for health, environmental and industrial applications. No student may earn credit for both 4423 and 5423. (F)

BME 4533 Neural Engineering 3 Credit Hours

(Slashlisted with BME 5533) Prerequisite: BME 3113 or BME 3133 or concurrent enrollment, or instructor permission. Principles and technologies of applying engineering to neuroscience, including areas as neural tissue engineering, models of neural function, neural interface and neuromodulation technology. Examples of neural engineering systems focus on brain-controlled interface and prosthetic systems currently in development or produced commercially, neurofeedback and brain stimulation systems for treating disorders such as depression. MATLAB(R) programming is required. No student may earn credit for both 4533 and 5533. (F)

BME 4713 Biomedical Engineering Design I 3 Credit Hours

Prerequisite: BME 3533 or concurrent enrollment; Senior standing in the BS in BME curriculum. Structured methodologies for designing systems or to interface with living systems. Creative design, analysis, selection, development, and fabrication of biomedical components and systems. (F)

BME G4813 Quantitative Physiology 3 Credit Hours

Prerequisite: BME 3722, junior standing, and majors only. Introduces students to the mathematical and numerical techniques used to develop, solve, and analyze quantitative models of physiology systems. (Sp)

BME 4823 Biomedical Engineering Design II 3 Credit Hours

Prerequisite: BME 4713. Development of team projects in biomedical engineering with emphasis on prototype development and quantitative analysis, and written and oral reporting of the outcome. Capstone. (Sp) [V].

BME 4873 Network Modeling and Analysis of Complex Systems 3 Credit Hours

(Slashlisted with BME 5873) Prerequisite: BME 3722 or permission of instructor. In this course, we will cover the key concepts and methodologies for studying the structure and dynamics of complex biological systems such as protein, genetic, and neural networks. No student may earn credit for both 4873 and 5873. (Sp)

BME 4970 Special Topics/Seminar 1-3 Credit Hours

1 to 3 hours. Prerequisite: Senior standing or permission of instructor. May be repeated; maximum credit nine hours. Special topics or seminar course for content not currently offered in regularly scheduled courses. May include library and/or laboratory research and field projects. (Irreg.)

BME 4980 Senior Thesis 1-3 Credit Hours

1 to 3 hours. Prerequisite: Senior standing, BME 3440 or BME 3980, and permission of instructor. The Senior Thesis is an option for seniors who are especially interested in research and/or intending to continue on to a PhD program. Students who have completed the first semester (fall of their senior year) and have satisfactorily passed the fall semester report will enroll in this course for the Spring of their senior year only. (Sp)

BME 5013 Introduction to Medical Device Design 3 Credit Hours

(Slashlisted with BME 4013; Crosslisted with AME 5013) Prerequisite: Graduate standing or permission of instructor. Introduction to medical device design with emphasis on the entire procedure of developing a medical device, from identifying the unmet medical need to product launching. Topics include marketing and technology survey, concept development, the biocompatible material, device prototype, bench test, in vitro/in vivo test, clinical trial, and FDA regulation. No student may earn credit for both 4013 and 5013. (Sp)

BME 5093 Applied Biomechanics - Ear Mechanics 3 Credit Hours

(Slashlisted with BME 4093; Crosslisted with AME 5093) Prerequisite: Graduate Standing. The course curriculum starts with a review of some basic solid mechanics and fluid mechanics. Then the course will review the applications of mechanics in different biosystems or organs. Finally, this course will cover how to apply mechanics on ear tissue mechanical measurements, ear modeling and ear implant design. No student may earn credit for both 4093 and 5093. (F)

BME 5113 Special Topics in Cancer 3 Credit Hours

Prerequisite: Graduate standing and permission of instructor. Students will develop an appreciation of the tools available at hand to dissect the molecular mechanisms controlling cancer development such that they can take this knowledge to the bench to develop their own graduate research. (Sp)

BME 5123 Biophotonics Imaging Microscopy 3 Credit Hours

Prerequisite: Graduate standing; BME 2333; BME 2433; PHYS 2524 and MATH 3113; or instructor permission. Optical imaging, spectroscopy, and microscopy have become indispensable tools in modern biomedical research. This course will cover the principles and instrumentation of various biomedical optical techniques, including fluorescence and Raman spectroscopy, confocal and multi-photon microscopy, optical coherence tomography, and diffuse optical tomography. Biomedical applications, particularly on cancer and brain research, will also be discussed. (F)

BME 5133 Therapeutic Biophotonics 3 Credit Hours

Prerequisite: Graduate standing, BME 4813 or permission of the instructor. This course will introduce the effects of photothermal, photochemical, photomechanical, photoimmunological, and photomodulatory interactions. Applications of biophotonics in treatment of cancer and other diseases in basic, translational, and clinical studies will be discussed. Modern multiomics technologies, such as spatial and/or single cell transcriptomics for analysis of phototherapy induced biological effects will also be discussed. (Sp)

BME 5143 Biosensor: Fundamentals and Applications 3 Credit Hours

Prerequisite: Graduate standing or Permission of Instructor. Healthcare, precision medicine, and self-monitoring of health all depend on biosensors. The goal of the course is to provide students a thorough introduction to the topic of biosensors as well as a quantitative and in-depth understanding of device design and performance evaluation. (Sp)

BME 5213 Biomechanics I 3 Credit Hours

(Crosslisted with AME 5213) Prerequisite: AME 3143 and AME 3153 or permission of instructor. Introduction to physiological systems with emphasis on structure and function of tissues and organs; application of continuum mechanics to understanding of tissue and organ behavior at microscopic and macroscopic levels; viscoelastic behavior at microscopic and macroscopic levels; viscoelastic and solid biomaterials. (F)

BME 5233 Biomaterials 3 Credit Hours

Prerequisite: Graduate standing, BME 3233, and permission of instructor. Introduction to materials used in biomedical environment, the design and use of implantable materials (such as metals, polyethylene, ceramics, composites), biocompatibility, test methods, and tissue growth on biomaterials. (Sp)

BME 5243 Biochemical Engineering 3 Credit Hours

(Slashlisted with BME 4243; Crosslisted with CH E 5243) Prerequisite: CH E 5971; graduate standing or instructor permission. Current bioprocesses for reaction and separation with emphasis on fundamental principles of biochemical engineering, biochemistry, and microbiology. No student may earn credit for both 4243 and 5243. (Sp)

BME 5283 ImmunoEngineering 3 Credit Hours

Prerequisite: Graduate standing or permission of instructor. The immune system plays a big role to maintain the homeostasis in our body. It provides the first reaction to external stresses, such as pathogens, biomaterials and implants, and cancer. Dysregulations in immune system can cause autoimmune diseases or determine our fate when we are exposed to external diseases. (Sp)

BME 5293 Transport in Biological Systems 3 Credit Hours

(Crosslisted with CH E 5293) Prerequisite: Chemical Engineering Graduate standing or permission of instructor; CH E 5971. Theoretical and practical aspects of transport phenomena in living organisms and biomedical technologies. Applications include hemorheology, drug delivery, extracorporeal circulation and artificial organs. (Irreg.)

BME 5363 Optical Engineering 3 Credit Hours

(Crosslisted with ECE 5363) Prerequisite: ECE 3793. Underlying theory and design of optical systems. Interference, diffraction and coherence phenomena will be examined as a basis for studying the limits of optical system performance. Other topics include a detailed study of polarization, the interaction of light with various media and geometrical optics. (Sp)

- BME 5373 Tissue Engineering 3 Credit Hours**
(Slashlisted with BME 4373; Crosslisted with CH E 5373) Prerequisite: CH E 5971; graduate standing, admission into Gallogly College of Engineering or permission of instructor. Examines the background and recent advances in the science of combining multiple cell types with an appropriate support to provide a construct that can replace or support damaged tissue. No student may earn credit for both 4373 and 5373. (Irreg.)
- BME 5413 Nanomedicine 3 Credit Hours**
Prerequisite: BME 3163 and permission of instructor. Introduction to nanomaterials used in preclinical and clinical stages; the design, application, and evaluation of nanomaterials to diagnose and treat diseases, including cancer. (Sp)
- BME 5423 Genetic Engineering and Biotechnology 3 Credit Hours**
(Slashlisted with BME 4423; Crosslisted with CH E 5423) Prerequisite: Graduate standing in CBME or SBME, or permission of instructor. The course will cover state-of-the-art technologies of manipulating and controlling genes, genomes and cellular pathways with a goal of engineering human (stem) cells and microbes for health, environmental and industrial applications. No student may earn credit for both 4423 and 5423. (F)
- BME 5443 Neural System and Rehabilitation Engineering 3 Credit Hours**
Prerequisite: Graduate standing or permission of instructor. Advanced knowledge of neural control of movement, musculoskeletal system, and movement impairment and disability will be discussed. Topics include the frontiers of rehabilitation engineering, including assistive technologies, brain-computer interfaces, non-invasive brain stimulation, regenerative rehabilitation, and machine learning in rehabilitation. The students will learn writing skills for NIH/AHA aims page for research projects in the field of rehabilitation (Sp)
- BME 5453 Polymer Science and Engineering 3 Credit Hours**
(Crosslisted with CH E 5453) Prerequisite: Chemical Engineering Graduate standing or permission of instructor; CH E 5971. This course will be focused on the synthesis, characterization, processing, and properties of state-of-the-art polymeric and multicomponent polymeric materials. Students should come into the course with a background knowledge of polymers such as that found in an Engineering Materials and/or Organic Chemistry Course. (Sp)
- BME 5533 Neural Engineering 3 Credit Hours**
(Slashlisted with BME 4533) Prerequisite: Graduate standing or permission of instructor. Principles and technologies of applying engineering to neuroscience, including neural tissue engineering, models of neural function, neural interface, and neuromodulation technology. Examples of neural engineering systems focus on brain-controlled interface and prosthetic systems currently in development or produced commercially, and neurofeedback and brain stimulation systems for treating disorders such as depression. MATLAB(R) programming is required. No student may earn credit for both 4533 and 5533. (F)
- BME 5853 Biomedical Signals and Systems 3 Credit Hours**
(Crosslisted with ECE 5853) Prerequisites: ECE 3723 and ECE 3793, or equivalent course in electrical circuits and signal processing, or permission of instructor. Comprehensive coverage of topics related to signals in humans. Emphasis on using engineering tools to interpret signals and underlying physiological principles. Focus on emerging engineering technologies, physiological knowledge and clinical application. (Sp)
- BME 5863 Bioinstrumentation 3 Credit Hours**
(Crosslisted with ECE 5863) Prerequisite: ECE 4213 or permission of the instructor. A comprehensive coverage of topics related to principles, applications, and design of medical instruments widely used in hospitals and clinical researches. Emphasis is placed on general design concepts, discussions on a great variety of medical devices, and medical device safety issues. Materials cover different levels and various aspects of human systems, such as heart, brain, circulation, respiration. (F, Sp)
- BME 5873 Network Modeling and Analysis of Complex Systems 3 Credit Hours**
(Slashlisted with BME 4873) Prerequisite: graduate standing or permission of instructor. In this course, we will cover the key concepts and methodologies for studying the structure and dynamics of complex biological systems such as protein, genetic, and neural networks. No student may earn credit for both 4873 and 5873. (Sp)
- BME 5960 Directed Readings 1-3 Credit Hours**
1 to 3 hours. Prerequisite: graduate standing or permission of department. May be repeated; maximum credit six hours. Directed readings and/or literature reviews under the direction of a faculty member. (Irreg.)
- BME 5970 Special Topics/Seminar 1-3 Credit Hours**
1 to 3 hours. Prerequisite: Graduate standing or permission of instructor. May be repeated; maximum credit nine hours. Special topics or seminar course for content not currently offered in regularly scheduled courses. May include library and/or laboratory research and field projects. (Irreg.)
- BME 5971 Seminar in Biomedical Engineering Research 1 Credit Hour**
Prerequisite: Graduate standing and BME majors only; May be repeated with change of content; maximum credit 6 hours. The department will invite speakers and the graduate students to present their ongoing research. Students will learn the frontiers in biomedical engineering and relevant fields and will have the opportunity for discussion with leading scientists. Students will also be encouraged to present their own research work and get feedback from faculty and peers. (F, Sp)
- BME 5973 Special Topics in Electrical and Computer Engineering 3 Credit Hours**
(Crosslisted with ECE 5973) Prerequisite: Graduate standing and permission of instructor. May be repeated with change of content; maximum credit 12 hours. Selected topics of current research interest not covered by regularly scheduled coursework. (F, Sp, Su)
- BME 5980 Research for Master's Thesis 2-6 Credit Hours**
2 to 6 hours. Prerequisite: graduate standing or permission by instructor. May be repeated; maximum credit toward degree six hours. Directed research culminating in the completion of the master's thesis. (F, Sp, Su)
- BME 5990 Independent Study 1-3 Credit Hours**
1 to 3 hours. Prerequisite: graduate standing or permission by instructor. May be repeated with change of subject matter; maximum credit six hours. Contracted independent study for a topic not currently offered in regularly scheduled courses. Independent study may include library and/or laboratory research and field projects. (Irreg.)
- BME 6213 Optical Information Processing 3 Credit Hours**
Prerequisite: ECE 5213 and ECE 5353. Application of Fourier transforms, linear systems, and diffraction theory to the analysis of optical systems. Emphasis is on the use of optical systems for information processing, including image enhancement, pattern recognition, data processing, optical switching, and computing. (F)

BME 6960 Directed Readings 1-3 Credit Hours

1 to 3 hours. Prerequisite: graduate standing or permission of instructor. May be repeated; maximum credit six hours. Directed readings and/or literature review under the direction of a faculty member. (Irreg.)

BME 6970 Advanced Topics in Bioengineering 1-6 Credit Hours

1 to 6 hours. Prerequisite: graduate standing or instructor permission. May be repeated with change of topic; maximum credit towards degree six hours. Selected topics of current faculty research interest at the PhD level not covered by regularly scheduled courses. (Irreg.)

BME 6980 Research for Doctoral Dissertation 2-16 Credit Hours

2 to 16 hours. Prerequisite: Graduate standing and permission of instructor; may be repeated. Directed research culminating in the completion of the doctoral dissertation. (F, Sp, Su)

BME 6990 Independent Study 1-3 Credit Hours

1 to 3 hours. Prerequisite: graduate standing and permission of instructor. May be repeated; maximum credit nine hours. Contracted independent study for a topic not currently offered in regularly scheduled courses. Independent study may include library and/or laboratory research and field projects. (Irreg.)

Faculty

Last Name	First/Middle Name	Middle init.	OU Service start	Title(s), date(s) appointed	Degrees Earned, Schools, Dates Completed
Acar	Handan		2017	ASSISTANT PROFESSOR OF BIOMEDICAL ENGINEERING, 2017; STEPHENSON PROFESSOR IN BIOMEDICAL ENGINEERING 2017	PhD, Bilkent University, 2013; MS, Ankara University, 2008; BS/MA, Gazi University, 2006
Breen	Sarah		2021	ASSOCIATE PROFESSOR OF BIOMEDICAL ENGINEERING, 2021	PhD, University of Limerick, 2012; BS, University of Limerick, 2008
Chen	Wei	R	2020	INTERIM DIRECTOR, PROFESSOR OF BIOMEDICAL ENGINEERING, 2020; STEPHENSON PROFESSOR IN BIOMEDICAL ENGINEERING 2020	PhD, University of Oregon, 1988; MS, University of Oregon, 1984; BS, Shandong University, 1982
Clegg	John		2021	ASSISTANT PROFESSOR OF BIOMEDICAL ENGINEERING, 2021	PhD, University of Texas, 2019; MA, University of Texas, 2018; MS, University of Texas, 2016; BS, University of South Carolina, 2014
Detamore	Michael	S	2016	FOUNDING DIRECTOR, 2016; STEPHENSON CHAIR, 2016; PROFESSOR OF BIOMEDICAL ENGINEERING, 2016	PhD, Rice University, 2004; BS, University of Colorado, 2000

Ding	Lei		2007	PROFESSOR OF BIOMEDICAL ENGINEERING, 2018; DIRECTOR OF INSTITUTE FOR BIOMEDICAL ENGINEERING, SCIENCE, AND TECHNOLOGY (IBEST), 2016	PhD, University of Minnesota, 2007; BE, Zhejiang University, 2000
Frickenstein	Alex		2023	ASSISTANT PROFESSOR, 2023	PhD, University of Oklahoma, 2023; BS Colorado State University, 2019
Liu	Kaili		2023	RESEARCH ASSISTANT PROFESSOR OF BIOMEDICAL ENGINEERING, 2023	PhD, Chinese Academy of Sciences, 2011; BS, Nanjing Agricultural University, 2005
Rouf	Tahrima Binte		2022	VISITING ASSISTANT PROFESSOR OF BIOMEDICAL ENGINEERING, 2022	PhD, Purdue University, 2019; BS Bangladesh University of Engineering and Technology, 2012
Scott	Rebecca		2021	ASSISTANT PROFESSOR OF BIOMEDICAL ENGINEERING, 2021	PhD, Purdue University, 2014; BS, Saint Louis University, 2010
Tang	Qinggong		2018	ASSISTANT PROFESSOR OF BIOMEDICAL ENGINEERING, 2018	PhD, University of Maryland, 2017; BP, Huazhong University of Science and Technology, 2012
Townsend	Jakob		2023	RESEARCH ASSISTANT PROFESSOR OF BIOMEDICAL ENGINEERING, 2023	PhD, University of Oklahoma, 2017; BS, Oregon State University, 2014
Wilhelm	Stefan		2017	ASSOCIATE PROFESSOR OF BIOMEDICAL ENGINEERING, 2017; STEPHENSON PROFESSOR IN BIOMEDICAL ENGINEERING, 2017	PhD, University of Regensburg 2014; MS, University of Regensburg, 2010; BS, University of Regensburg, 2006
Yuan	Han		2015	ASSOCIATE PROFESSOR OF BIOMEDICAL ENGINEERING, 2015	PhD, University of Minnesota, 2010; BS, Tsinghua University, 2005
Zamani Esfahlani	Farnaz		2023	ASSISTANT PROFESSOR OF BIOMEDICAL ENGINEERING, 2023	PhD, State University of New York at Binghamton, 2018; MS, State University of New York at Binghamton, 2015; BA, University of Tabriz, 2012

Biomedical Engineering, B.S.

Minimum Total Credit Hours: 130

Overall GPA - Combined and OU: 2.00

Major GPA - Combined and OU: 2.00

Curriculum GPA - Combined and OU: 2.00

Program Code: B108

This program has changes pending State Regents approval for 2024/25. These pending changes are not reflected here.

Bachelor of Science in Biomedical Engineering accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org>, under the General Criteria and the Bioengineering, Biomedical and Similarly Named Program Criteria.

In order to progress in your curriculum in the Gallogly College of Engineering, and as a specific graduation requirement, a **grade of C** or better is required in each course in the curriculum, including all prerequisite courses.

Major Requirements

Code	Title	Credit Hours
Required Courses		
BME 1421	Introduction to Biomedical Engineering	1
BME 2333	Biomedical Engineering Fundamentals	3
BME 2433	Signals and Systems for Biomedical Engineering	3
BME 3143	Biomechanics	3
BME 3722	Numerical Methods in Biomedical Engineering	2
BME 3533	Biomedical Instrumentation	3
BME 3531	Bioinstrumentation Lab	1
BME 3171	Biomedical Engineering Lab 1	1
BME 3123	Biotransport	3
BME 3233	Biomaterials	3
BME 4813	Quantitative Physiology	3
BME 3181	Biomedical Engineering Lab 2	1
BME 4713	Biomedical Engineering Design I	3
BME 4823	Biomedical Engineering Design II	3
Total Credit Hours		33

Major Support Requirements

Code	Title	Credit Hours
Math and Science		
BIOL 1124	Intro Biol: Molecule/Cell/Phys	4
CHEM 1415	General Chemistry (Continued)	5
C S 1213	Programming for Non-Majors with Python	3
ECE 2723	Electrical Circuits I	3
ISE 3293	Applied Engineering Statistics	3
MATH 2924	Differential and Integral Calculus II	4
MATH 2934	Differential and Integral Calculus III	4
MATH 3113	Introduction to Ordinary Differential Equations	3
PHYS 2524	General Physics for Engineering and Science Majors	4
Upper-Division Biology Elective		
	Course chosen per BME faculty approval	3

BME Electives

Choose 12 hours of electives from the list of approved courses maintained by the department	12
---	----

Science, Math, and Engineering Electives

Choose 6 hours of electives from the list of approved courses maintained by the department	6
--	---

Additional College Requirements

ENGR 1411	Pathways to Engineering Thinking ¹	1
ENGR 2002	Professional Responsibilities and Skills of Engineers and Scientists	2

Total Credit Hours		57
---------------------------	--	-----------

¹ Engineering transfer students may take ENGR 3511 in place of ENGR 1411.

General Education and College Requirements

Courses designated as Core I, II, III, IV, or V are part of the General Education curriculum. Students must complete a minimum of 40 hours of General Education courses, chosen from the approved list, including at least one upper-division Gen. Ed. course outside of the student's major. **Courses graded P/NP will not apply.**

A grade of C or better is required in each course in the curriculum, including all prerequisite courses.

UNIVERSITY-WIDE GENERAL EDUCATION (MINIMUM 40 HOURS) AND COLLEGE REQUIREMENTS

Code	Title	Credit Hours
Core Area I: Symbolic and Oral Communication		
<i>English Composition</i>		
ENGL 1113	Principles of English Composition	3
ENGL 1213	Principles of English Composition	3
	or EXPO 1213 Expository Writing	
<i>Language (0-10 hours in the same language)</i>		
	This requirement can be met by two years of the same language in high school:	0-10
	Beginning Course (0-5 hours)	
	Beginning Course, continued (0-5 hours)	
<i>Mathematics</i>		
MATH 1914	Differential and Integral Calculus I (Core I) 1, 2	4
Core Area II: Natural Science (including one laboratory)		
PHYS 2514	General Physics for Engineering and Science Majors (Core II) ²	4
CHEM 1315	General Chemistry (Core II-Lab) ²	5
	or CHEM 1335 General Chemistry I: Signature Course	
Core Area III: Social Science		
P SC 1113	American Federal Government	3
	Choose one course ³	3
Core Area IV: Arts & Humanities		
<i>Artistic Forms</i>		
	Choose one course ³	3
<i>Western Culture</i>		
HIST 1483	United States to 1865	3

or HIST 1493 United States, 1865 to the Present	
Choose one course (excluding HIST 1483 and HIST 1493) ³	3
<i>World Culture</i>	
Choose one course ³	3
Core Area V: First-Year Experience	
Choose one course ³	3
Total Credit Hours	40-50

¹ MATH 1914, MATH 2924, and MATH 2934 can be substituted with MATH 1823, MATH 2423, MATH 2433, and MATH 2443.

² Major support requirements that also satisfy University General Education requirements.

³ To be chosen from the University-Wide General Education Approved Course List. Three of these hours must be upper-division (3000-4000). See list in the Class Schedule.

Free Electives

Electives to bring total applicable hours to the minimum total required for the degree including a minimum of 40 upper-division hours.

Suggested Semester Plan of Study

Bachelor of Science in Biomedical Engineering accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org>, under the General Criteria and the Bioengineering, Biomedical and Similarly Named Program Criteria.

In order to progress in your curriculum in the Gallogly College of Engineering, and as a specific graduation requirement, a grade of C or better is required in each course in the curriculum, including all prerequisite courses.

Two college-level courses in a single world language are required; this may be satisfied by successful completion of 2 years in a single world language in high school. Students who must take a language at the University will have an additional 6-10 hours of coursework.

Courses designated as Core I, II, III, IV or V are part of the General Education curriculum. Students must complete a minimum of 40 hours of General Education courses, chosen from the approved list.

General Requirements for all Master's Degrees

The master's degree requires the equivalent of *at least* two semesters of satisfactory graduate work and additional work as may be prescribed for the degree.

All coursework applied to the master's degree must carry graduate credit.

Master's degree programs which require a thesis consist of *at least* 30 credit hours. All non-thesis master's degree programs require *at least* 30 credit hours.

Credit transferred from other institutions must meet specific criteria and is subject to certain limitations.

Courses completed through correspondence study may *not* be applied to the master's degree.

To qualify for a graduate degree, students must achieve an overall grade point average of 3.0 or higher in the degree program coursework and in all resident graduate coursework attempted. A student must also have at least a 3.0 in all coursework (including undergraduate coursework if any).

Additional information for master's degree students may be found in the Graduate College Bulletin.

------	-------	--------------

Open list, but courses in this category should NOT be those in the lists for BME or Life Sciences electives.

- According to the Graduate College requirement, only courses that carry graduate credit are counted toward graduate study programs. When enrolling in courses cross-listed for both undergraduate and graduate sections, make sure to enroll in the graduate section. If a course no longer offers graduate credit, please do not enroll, and contact the departmental program assistant for help.
- The lists here only indicate the courses that are allowed to be counted toward each course category for the graduate programs of study. They do not necessarily indicate that any combination of them is a valid graduate program of study. Check out the degree requirements at both Graduate College and the Stephenson School of Biomedical Engineering.
- Courses in other engineering disciplines and outside of engineering will require a permission override from the course department. Contact the departmental program assistant for an override.

Biomedical Engineering, Ph.D.

Minimum Total Hours: 90

Program Code: D109

Program Requirements

The Ph.D. degree in Biomedical Engineering requires 90 post-baccalaureate hours, which include the courses required for the M.S. degree in Biomedical Engineering. A student with a B.S. degree can enter the Ph.D. program directly; the student does not have to complete the M.S. thesis as part of the Ph.D. degree. At the end of the program, the student will demonstrate excellence in scholarly research by authoring and successfully defending a Ph.D. Dissertation.

During the Ph.D. program, the student is required to take a general examination in accordance with Graduate College requirements. For students entering with a B.S. degree, the general examination must be taken as soon as possible after the student has completed three semesters (not including the summer semester). For students entering with an M.S. degree, the general examination must be taken as soon as possible after the student has completed one semester (not including the summer semester).

Code	Title	Credit Hours
------	-------	--------------

Coursework Requirements

BME 5971	Seminar in Biomedical Engineering Research (1 credit hour per semester for a total of 3 credit hours)	3
----------	---	---

Four courses (12 hours) in biomedical engineering from an approved list ¹ 12

Two courses (6 hours) in life sciences from an approved list 6

Two courses (6 hours) in engineering, science, or math 6

One course in Statistics approved by Ph.D. advisory committee and signed by the Graduate Liaison 3

Dissertation Research

BME 6980	Research for Doctoral Dissertation	2-60
----------	------------------------------------	------

Additional Coursework 0-58

Total Credit Hours 90

¹ Must include 3 hours of physiology unless this requirement has been satisfied through prior undergraduate or graduate study (as determined by the Graduate Studies Committee). Students who have fulfilled the physiology requirement through prior coursework will not receive credit toward the degree for additional physiology courses taken at OU unless the SBME graduate liaison approves in advance.

Note:

For students who hold a Master of Science degree in Biomedical Engineering from the University of Oklahoma, the Ph.D. requires a minimum of nine (9) graduate credit hours beyond the M.S. The M.S. degree requires two courses in life sciences and two courses in engineering/science/math; the Ph.D. requires one additional life sciences course and two additional engineering/science/math courses beyond the M.S.

General Requirements for Doctoral Degrees

A student should expect to spend at least the equivalent of three full academic years beyond the bachelor's degree to obtain the doctoral degree. During this period the student will take appropriate graduate

coursework, successfully complete the general examination, and successfully defend and submit the final dissertation.

All coursework applied to the doctoral degree must carry graduate credit.

The doctoral degree requires at least 90 post-baccalaureate hours, including both formal coursework and hours of research.

The minimum hour requirement for a specific doctoral degree program cannot be waived.

No more than one-half of the credit hours, both OU and overall, excluding Research for Doctoral Dissertation (6980), may be S/U-graded coursework.

The student must be in residence at OU for at least two consecutive 16-week semesters during the pursuit of the doctoral degree while enrolled and engaged in coursework or research activities as prescribed by the major academic unit.

For more detailed regulations and requirements for Doctoral degrees, please consult the Graduate College Bulletin: <http://www.ou.edu/gradcollege/forms/bulletin>

General Information

Chemical engineering was first taught at OU in 1912 and the first graduate degree was granted in 1918. Over the years that followed, the program has developed curricula with traditional strength in fundamentals, while tailoring electives for specializations suited to contemporary and future industrial need. In 1963, the Schools of Chemical Engineering and Metallurgical Engineering were combined into the School of Chemical Engineering and Materials Science. The name was changed in 2008 to the School of Chemical, Biological and Materials Engineering (CBME). This was done to reflect increasing activities in the bioengineering area. The name was changed to the School of Sustainable Chemical, Biological and Materials Engineering in 2023. This was done to reflect the current and anticipated changes in the profession, and the academic and research emphasis shift towards sustainability.

Our dynamic faculty are dedicated to a program of the highest quality and to leadership at the forefront of the profession it serves. This dedication and the cooperative spirit of CBME faculty has fueled a superior level of productivity. The school has developed a very broad base of external research support. A listing of recent research projects shows support from 22 different sources, including the National Science Foundation, the U. S. Environmental Protection Agency, the U.S. Department of Energy, The Department of Defense, The National Institutes of Health, the Oklahoma Center for the Advancement of Science and Technology, and 10 companies. Every faculty member has an active research program and is expected to receive external funding.

Mission Statement

The mission of the School of Sustainable Chemical, Biological and Materials Engineering is to serve the changing needs of society through the training of outstanding engineers in the creation and utilization of chemical engineering knowledge.

Chemical Engineering

Perhaps the most striking facts about chemical engineering are youth and variety. At the turn of the century people were discontented with simply observing chemical phenomena in the laboratory. Chemical engineering was born out of the desire to use these chemical behaviors to serve people and make the world a better place in which to live.

The world has entered an extremely critical period because of shortages and/or environmental impacts of nonrenewable energy. The chemical engineer is an important factor in solving problems in production and use of fossil fuel resources, nuclear energy and alternate energy resources, including biofuels and bioenergy. Chemical engineers have made important contributions to the production and refining of petroleum products. They are now playing an important part in liquefaction of natural gas and gasification of coal. The use of alternate energy sources such as biomass, geothermal, ocean thermal differences, and solar are dependent on contributions made by chemical engineers.

In the space age, chemical engineers are developing nanoengineered materials that will have structural and electronic properties never before encountered. They must perfect processes for life-support systems in other environments. Chemical engineers are needed to provide the fuels for rockets and booster propulsion. They utilize computers to control and analyze complex chemical processes.

Biotechnology and medicine, which have taken tremendous strides in the past few decades, are quite dependent on the efforts of the chemical engineer. It is the chemical engineer who develops ways to produce new recombinant proteins such as insulin at large scale for mass distribution. The vaccines that have saved a whole generation of children from crippling are available because the chemical engineer worked out the ways to produce them safely and economically. The field of mental health has been revolutionized by drugs, astronomical in cost until the chemical engineer mass-produced them so that they are accessible to nearly everyone who needs them.

Briefly, the job of the chemical engineer is to make commercial application of the chemist's and biologist's discoveries. This is not as easy as it sounds, for enormous problems are encountered when the company tries to produce by the ton material that the chemist made by the milligram in the laboratory. The chemical engineer works in a variety of industries, not only the chemical industry, but also in fields of computer systems, electronic materials, environmental control, pharmaceuticals, leather, metals, space, fertilizers, textiles, glass, detergents, paper, food, pesticides, paint, and rubber. New fields are constantly being added.

It is the chemical engineer who develops an economical process for producing a marketable product. The development of penicillin is just such a case. The chemist Sir Alexander Fleming discovered the wonder antibiotic in a Petri dish in his laboratory. The batches produced in a laboratory can hardly supply the millions of people around the world that need the drug, and the cost of a prescription would be exorbitant. Chemical engineers had to develop a continuous process for producing penicillin. Through the efforts of these engineers, millions of lives have been saved.

There are many other kinds of jobs for chemical engineers. A chemical engineer in plant operations must supervise the production process to see that the plant produces a scheduled amount of high-quality material economically. To do this, the engineer is very much involved in managing people and machines.

The research chemical engineer has an analytical mind and likes to solve problems in the technical frontier. If the engineer plans to concentrate on research, exploring new areas and applying untried methods, an advanced chemical engineering degree is probably needed.

Still another type of job appeals to many chemical engineers. This is technical sales. The material that is produced in a plant must be sold. The salesman needs extensive technical training because technical people are the customers.

All chemical engineering jobs — plant operations, research and development, and technical sales — may lead into management or executive positions if the chemical engineer is interested in the broad aspects of a company's business.

There are, of course, major fields besides industry that need chemical engineers. College teaching, for instance, is offering more and more to the engineer, particularly if the person is research-minded. Many college teachers are, in addition, consultants to industry, and the government too is constantly improving the opportunities for chemical engineers in its service. Private research institutes call for chemical engineers. A chemical engineer may choose to work in practically any field.

The curriculum in chemical engineering at the University of Oklahoma is planned to prepare students for the design, construction, and operation of processes in which materials undergo chemical, biological, and physical change. Graduates are prepared to accept a job in chemical engineering practice or to continue studies in graduate school.

Since the chemical engineer must be acquainted with so many diversified subjects, the education at the University is necessarily broad. Students receive solid foundations in mathematics, physics, chemistry, and engineering courses which will prepare them to apply effectively these fundamental principles to the solution of engineering problems. In addition, students in the biotechnology engineering elective patterns receive training in our pre-medical/ biomedical life science and bioengineering courses. Because computers play a vital role in the solution of many chemical engineering problems, students are required to use modern computational tools in their coursework. In addition, there is increasing emphasis on electives in the life sciences and humanistic-social studies. Because of this broad educational background, the engineer is better prepared to accept leadership in the community, as well as in the company, in a management capacity.

Programs & Facilities

Facilities

Laboratories and offices for chemical engineering are located in Sarkeys Energy Center, Carson Engineering Center, Stephenson Research and Technology Center, and the Core Bioprocessing Facility. Facilities include a unit operations laboratory and laboratories dedicated to research in separations and purification, polymers, small angle x-ray scattering, catalysis, biomass conversion and biofuels, thin films, biomedical and biotechnology, and surfactants and other graduate research project laboratories. We occupy several fully equipped laboratories in Carson Engineering Center focusing on applied surfactant technology and enhanced oil recovery. The facilities in Stephenson includes laboratory

areas specifically designed for bioengineering research, and we occupy over 3,000 square feet of the space shared with the Bioengineering Center. Areas of research emphasis include biofuels and bioenergy, nano technology, remediation of polluted soil and water, process systems engineering, bone and vascular tissue engineering, rheology of blood, polymer fibers processing and polymer characterization, biotechnology and biomedical engineering, advanced design, catalysis, electrochemistry, surface modification using ultrathin films, carbon nanotube production, and natural gas utilization. The Core Bioprocessing Facility is used for teaching in the Bioprocessing Certificate and is located at Suite 310, Bld 655 Research Parkway, Oklahoma City, 73104.

Undergraduate Study

Sustainable Chemical, Biological and Materials Engineering Program Educational Objectives

Our chemical engineering undergraduate program is preparing our recent graduates to meet the following objectives:

1. Graduates will perform successfully as professionals in businesses, industries and government.
2. Graduates will perform successfully in their pursuit of advanced degrees in chemical engineering and other technical or professional fields.
3. Graduates will continually improve their professional competencies through further training or education.

Chemical Engineering Undergraduate Student Outcomes

- an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
- an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
- an ability to communicate effectively with a range of audiences
- an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
- an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
- an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
- an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Curriculum in Chemical Engineering

The Bachelor of Science in Chemical Engineering accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org>, under the General Criteria and the Chemical, Biochemical, Biomolecular and Similarly Named Program Criteria.

The degree is offered with three options:

Standard Option

The Standard Option (p. 1277) prepares students for a career in the wide variety of chemical process industries or for graduate engineering

studies. Technical electives allow emphasis on energy, materials, process systems, environment, or other areas of interest.

Premedical Option

The Premedical Option (p. 1282) is designed so that the student is prepared to enter schools of medicine, dentistry or osteopathic medicine as early as the end of the junior year (although most students who pursue a medical career complete the chemical engineering degree). If the student elects not to enter medical school, a normal chemical engineering degree is obtained, so there is no disadvantage to being in the program. Biology courses useful in preparation for the Medical College Admission Test are scheduled in the junior year. The biomedical engineering pattern is similar to the pre-med pattern, differing in suggested technical electives.

Pre-med students should consult their Pre-Health and Pre-Medical Professions advisor as well as their Chemical Engineering or Mechanical Engineering advisor for necessary medical school information.

Bioengineering Option

The Bioengineering Option (p. 1279) is designed to prepare the student for work on the engineering of biological systems and systems in which cells and biochemicals are processed. It includes courses in microbiology, biochemistry, and biochemical engineering. The elective sequence requires two additional credit hours over the basic chemical engineering curriculum.

Sustainability Option

The Sustainability Option (p. 1284) is designed to prepare the student to fully understand the requirements for achieving sustainability across the wide variety of chemical process industries. Building on this quantitative understanding, the student will be able to modify existing processes as well as design new ones to enhance sustainability. The Option includes courses emphasizing sustainability in both general education electives and technical electives.

Undergraduate Certificate

- Bioprocessing (p. 1287)

Accelerated Dual Degree B.S./M.S.

(Bachelor of Science in Chemical Engineering accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org>, under the General Criteria and the Chemical, Biochemical, Biomolecular and Similarly Named Program Criteria.)

- Bachelor of Science in Chemical Engineering/Master of Science (Chemical Engineering-Standard) (p. 1287)

The School of Sustainable Chemical, Biological and Materials Engineering offers one accelerated dual degree (B.S./M.S.) program to qualified undergraduate students. The programs allow students to pursue a graduate degree in conjunction with the undergraduate degree requirements. Students admitted into this program can use up to four courses (12 credit hours) to simultaneously satisfy the requirements of both the B.S. and M.S. degrees.

Graduate Study

The School of Sustainable Chemical, Biological & Materials Engineering offers master and doctor of philosophy degrees in chemical engineering. Research can be in a variety of areas including: advanced energy systems, biochemical and biomedical engineering, catalysis, process

optimization, nanotechnology, novel separation methods, polymers, reaction kinetics, surface science, thermodynamics and thin films.

Any student with an undergraduate degree in chemical engineering or its equivalent from an accredited school and a grade point average (GPA) of at least 3.00 (on a 4.00 scale) during the last 60 hours of undergraduate coursework may be admitted as a student in full standing.

Master of Science

The Chemical Engineering, Master of Science (p. 1290) curriculum is available for students with an undergraduate degree in chemistry, physics, biology, or a similar area and high qualifications. Students who have their degree in an area other than chemical engineering will likely have to take additional courses besides those listed in the special curriculum. Interested students can contact the school for more information.

The Sustainability - Energy and Materials Management (p. 1291), Master of Science intends to enable graduates from a variety of undergraduate disciplines to fast progress their careers via developing strong capabilities in identifying and implementing engineering solutions to achieve sustainable development for our society.

Graduate Certificate

- Bioprocessing (p. 1291)

Doctor of Philosophy

The School of Sustainable Chemical, Biological and Materials Engineering offers the Doctor of Philosophy degree program in Chemical Engineering (p. 1292). Students can apply directly for the Ph.D. degree without obtaining an M.S. degree first.

Courses

CH E 2003 Chemical Engineering Computing/Statistics 3 Credit Hours
Prerequisite: CHE 2033 (or concurrent enrollment in CHE 2033), and MATH 1823 or 1914 or concurrent enrollment. Introduction to engineering computing and programming using prevalent engineering computing software; program design and development; computer application exercises in engineering. Basic statistical concepts. Computer application exercise in engineering and statistics. (Sp)

CH E 2033 Chemical Engineering Fundamentals 3 Credit Hours
Prerequisite: MATH 1823 or 1914, and CHEM 1415 or CHEM 1425 or CHEM 1435 or equivalent. Material balances involving physical equilibria and chemical reaction; energy balances; gas behavior including vapor pressure and Raoult's Law. (F, Sp)

CH E 3113 Momentum, Heat and Mass Transfer I 3 Credit Hours
Prerequisite: CH E 2033; MATH 2443 or 2934 or concurrent enrollment in 2443 or 2934; completion or concurrent enrollment in PHYS 2524 and completion or concurrent enrollment in MATH 3113. The common mathematical and physical basis of these processes is presented. Calculation methods for all three processes are developed. Design procedures of equipment for fluid flow, heat transfer and diffusional processes are given. (Sp)

CH E 3123 Momentum, Heat and Mass Transfer II 3 Credit Hours
Prerequisite: CH E 3113 and MATH 3113. The common mathematical and physical basis of these processes is presented. Calculation methods for all three processes are developed. Design procedures of equipment for fluid flow, heat transfer and diffusional processes are given. (F)

- CH E 3313 Structure and Properties of Materials 3 Credit Hours**
Prerequisite: CHEM 1415 or CHEM 1425 or CHEM 1435, PHYS 2524, and CHE 3123 or instructor permission. The behavior of materials under various conditions and environments is correlated to atomic and molecular structure and bonding. (Sp)
- CH E 3333 Separation Processes 3 Credit Hours**
Prerequisite: CH E 3123 and CH E 3473. Coverage of the fundamentals and modeling techniques of various separation processes found in the chemical process industries. Discussion of various computational approaches for binary and multicomponent separations; factors affecting efficiency, capacity and energy requirements. (Sp)
- CH E 3432 Unit Operations Laboratory 2 Credit Hours**
Prerequisite: CH E 3123, CH E 3333 or concurrent enrollment in CH E 3333, and CH E 3473. Experimental examination of processes involving fluid flow, heat and mass transfer, kinetics and process control. Process parameters and physical properties are measured. Results are presented in written reports and oral presentations. Laboratory. (Sp)
- CH E 3440 Mentored Research Experience 3 Credit Hours**
0 to 3 hours. Prerequisites: ENGL 1113 or equivalent, and permission of instructor. May be repeated; maximum credit 12 hours. For the inquisitive student to apply the scholarly processes of the discipline to a research or creative project under the mentorship of a faculty member. Student and instructor should complete an Undergraduate Research & Creative Projects (URCP) Mentoring Agreement and file it with the URCP office. Not for honors credit. (F, Sp, Su)
- CH E 3473 Chemical Engineering Thermodynamics 3 Credit Hours**
Prerequisite: CH E 2033, CH E 3113, MATH 2443 or 2934, and CHEM 3423; junior standing. Application of the first and second laws of thermodynamics to the analysis of phase change, solution behavior and chemical equilibria and reaction. (F)
- CH E 3723 Numerical Methods for Engineering Computation 3 Credit Hours**
Prerequisite: CHE 2003 and MATH 3113 or 3413. Course uses specific software applications tailored toward chemical engineering. Basic methods for obtaining numerical solutions with a digital computer. Included are methods for the solutions of algebraic and transcendental equations, simultaneous linear equations, ordinary and partial differential equations, and curve fitting techniques. The methods are compared with respect to computational efficiency and accuracy. (F)
- CH E 3953 Undergraduate Research 3 Credit Hours**
Prerequisite: Permission of instructor. Students work on an individual research project in Chemical Engineering. (F, Sp, Su)
- CH E 3960 Honors Reading 1-3 Credit Hours**
1 to 3 hours. Prerequisite: admission to Honors Program. May be repeated; maximum credit six hours. Consists of topics designated by the instructor in keeping with the student's major program. Covers materials not usually presented in the regular courses. (F, Sp, Su)
- CH E 3970 Honors Seminar 1-3 Credit Hours**
1 to 3 hours. Prerequisite: admission to Honors Program. May be repeated; maximum credit six hours. The projects covered will vary. Deals with concepts not usually presented in regular coursework. (Irreg.)
- CH E 3983 Honors Research 3 Credit Hours**
Prerequisite: Admission to Honors Program, and instructor permission. Provides an opportunity for the Honors candidate to work on a special project in the student's field. Laboratory (F, Sp, Su)
- CH E G4153 Process Dynamics and Control 3 Credit Hours**
Prerequisite: 4473. Formulation of first-order models for storage tanks, chemical reactors and heated, stirred tanks; transient and steady-state process dynamics; three-mode control of unit operations; higher-order systems and counter-current operations; analog simulation and digital control of chemical processes. (F)
- CH E 4203 Bioengineering Principles 3 Credit Hours**
(Slashlisted with CH E 5203) Prerequisite: MATH 3113 and PHYS 2524; or permission of instructor. Principles of bioengineering including biomechanics of solids and fluids and mass transfer as they apply to the human body, biomaterials, drug delivery, and tissue engineering. No student may earn credit for both 4203 and 5203. (Sp)
- CH E 4243 Biochemical Engineering 3 Credit Hours**
(Slashlisted with CH E 5243; Crosslisted with BME 4243) Prerequisite: CH E 3113 or permission of instructor. Current bioprocesses for reaction and separation with emphasis on fundamental principles of chemical engineering, biochemistry, and microbiology. No student may earn credit for both 4243 and 5243. (Sp)
- CH E G4253 Process Design & Safety 3 Credit Hours**
Prerequisite: Graduate standing or CH E 3333. Processes and process equipment design including safety considerations; technical design of units combined into plants. (F)
- CH E G4262 Chemical Engineering Design Laboratory 2 Credit Hours**
Prerequisite: CH E 3432 and CH E 4253 or concurrent enrollment in CH E 4253. Experimental techniques for the acquisition of pilot plant data, using unit operations equipment and reactors for use in process design. Results are presented in written reports and oral presentations. Laboratory. (F)
- CH E G4273 Advanced Process Design 3 Credit Hours**
Prerequisite: CH E 3333, CH E 4153, CH E 4253, CH E 4262, and CH E 4473. Process and process equipment design, complete design of process plants including complete flow sheets, estimated plant costs, costs of process development, economics of investment. Results are presented in written reports and oral presentations. (Sp) [V].
- CH E 4281 Engineering Co-Op Program 1 Credit Hour**
(Crosslisted with AME, CEES, C S, ECE, EPHY, ISE and BME 4281) Prerequisite: Departmental permission and junior standing. May be repeated; maximum credit 6 hours. The Co-Op program provides students an opportunity to enhance their education via career exploration in related professional work experiences. Course assignments help students articulate their experiences by completing journals; mid-term paper; final paper and/or final presentation. Faculty receive an evaluation from the student's Co-Op supervisor who monitors performance. Faculty collaborate with the Co-Op supervisor to ensure student success. (F, Sp, Su)
- CH E 4323 Chemical Process Sustainability 3 Credit Hours**
Prerequisite: permission of instructor. Concepts of sustainability relevant to chemical processes, including energy and waste minimization, reduction, of greenhouse gas emissions, economic impact of sustainable practices. (Sp)
- CH E 4373 Tissue Engineering 3 Credit Hours**
(Slashlisted with CH E 5373; Crosslisted with BME 4373) Prerequisite: senior standing or permission of instructor. Examines the background and recent advances in the science of combining multiple cell types with an appropriate support to provide a construct that can replace or support damaged tissue. No student may earn credit for both 4373 and 5373. (Irreg.)

- CH E 4423 Genetic Engineering and Biotechnology 3 Credit Hours**
 (Slashlisted with CH E 5423; Crosslisted with BME 4423) Prerequisite: Permission of instructor for upper-class undergraduates. The course will cover state-of-the-art technologies of manipulating and controlling genes and genomes with a goal of engineering human and non-human cells for health and industrial applications. No student may earn credit for both 4423 and 5423. (F)
- CH E 4473 Kinetics 3 Credit Hours**
 Prerequisite: 3473, 3723, Mathematics 3113. Fundamentals of rates, homogeneous isothermal reactions, non-isothermal reactions, reactors and design, heterogeneous reactions, fixed and fluidized bed reactors, experimental data reduction, non-ideal flow reaction systems. (Sp)
- CH E 4583 Advanced Techniques in Biomanufacturing 3 Credit Hours**
 (Slashlisted with CH E 5583) Prerequisite: CHE 4373 or CHE 5373 or BME 5373 or CHE 4423 or CHE 5423 or BME 5423; co-requisite CHE 4243 or ChE 5243 or BME 5243; or permission of instructor. Biomanufacturing is a multidisciplinary program that requires a strong collaboration among diverse functional groups. This course aims to impart knowledge about biomanufacturing workflow including fermentation, and downstream bioprocessing, with a focus on biological products, design and industrial practices. The main objective is to train students to develop hands-on experience through working with advanced unit operations being used in this field. No student may earn credit for both 4583 and 5583. (Sp)
- CH E 4953 Undergraduate Research II 3 Credit Hours**
 Prerequisite: CHE 3953 and permission of instructor. Students interested in pursuing and advanced Chemical Engineering degree work on an individual research project in Chemical Engineering. (F, Sp, Su)
- CH E 4960 Directed Readings 1-4 Credit Hours**
 1 to 4 hours. Prerequisite: good standing in University; permission of instructor and dean. May be repeated; maximum credit four hours. Designed for upper-division students who need opportunity to study a specific problem in greater depth than formal course content permits. (Irreg.)
- CH E 4970 Special Topics/Seminar 1-3 Credit Hours**
 1 to 3 hours. Prerequisite: Senior standing or permission of instructor. May be repeated; maximum credit nine hours. Special topics or seminar course for content not currently offered in regularly scheduled courses. May include library and/or laboratory research and field projects. (Irreg.)
- CH E 4983 Honors Research II 3 Credit Hours**
 Prerequisite: CHE 3983, admission to Honors Program and instructor permission. Honors students interested in pursuing an advanced CH E degree work on an individual research project in Chemical Engineering. (F, Sp, Su)
- CH E 4990 Independent Study 1-3 Credit Hours**
 1 to 3 hours. Prerequisite: Senior standing and permission of instructor. May be repeated; maximum credit nine hours. Contracted independent study for a topic not currently offered in regularly scheduled courses. Independent study may include library and/or laboratory research and field projects. (Irreg.)
- CH E 5003 Management & Leadership 3 Credit Hours**
 Prerequisite: MATH 1914 or equivalent and graduate standing. The graduates will master the differences between management and leadership, will be able to assemble teams based on main personality traits, will effectively design risk mitigation strategies, and will be proficient in managing financial resources. Invited speakers from academia and industry will allow the graduates understand that effective management/leadership depends on the circumstances. (F)
- CH E 5013 Decision & Risk Analysis 3 Credit Hours**
 Prerequisite: MATH 1914 or equivalent and graduate standing. The graduates will master methods for predicting capital and operational costs of chemical plants, approaches for the quantification of uncertainties and how such uncertainty could affect the profitability of industrial operations, and the most common approaches for decision making in industry, with their pros and cons. Industrial speakers will provide a framework for the material discussed in class. (Sp)
- CH E 5023 Challenge Group Project 3 Credit Hours**
 Prerequisite: MATH 1914 or equivalent and graduate standing. The Challenge consists primarily of a group research project on a topic relevant to the MS in Sustainability. Projects will be offered by Faculty members in the School of Chemical, Biological and Materials Engineering. The instructor will coordinate the activities and assign some individual tasks. Specialistic presentations will be offered to support the projects development. (Su)
- CH E 5033 Environmental Separations 3 Credit Hours**
 Prerequisite: MATH 1914 or equivalent and graduate standing. The graduates will master fundamentals and applied aspects of:
 1. Sustainable aspects of gas and liquid separations
 2. Emergent technologies for the prevention and remediation of liquid contamination. The course will cover existing technologies, as well as current cutting-edge research in these fields, with an emphasis on the potential applicability in the field. (F)
- CH E 5043 Business Sustainability 3 Credit Hours**
 Prerequisite: MATH 1914 or equivalent and graduate standing. The graduates will be able to plan and assess the efficacy of business strategies to ensure the sustainability of commercial operations. In particular, the graduates will be able to (a) Achieve and maintain the social license to operate; (b) Operate within the boundaries of environmental regulations; and (c) Promote the goals of a diverse, inclusive, and equitable work force. (Sp)
- CH E 5053 Carbon Capture & Utilization 3 Credit Hours**
 Prerequisite: MATH 1914 or equivalent and graduate standing. The graduates will quantify pros and cons of cutting-edge technologies available for capturing, storing, and utilizing CO₂ (CCUS). They will become familiar with technological developments in catalysis (for carbon utilization), materials design (carbon capture), and sequestration (geological repositories, hydrates, mineralization, direct capture from air). The graduates will quantify capital and operational costs associated with these technologies. (Sp)
- CH E 5063 Sustainable Energy Applications 3 Credit Hours**
 Prerequisite: Graduate standing. This class presents the fundamental concepts of thermal-, electro-, and photo-catalysis and then builds on that knowledge to cover important sustainable energy conversion applications. Topics to be covered include fuel cells, water electrolyzers, CO₂ conversion to valuable fuels and chemicals, ammonia synthesis, batteries and other state-of-the-art technologies. (F)
- CH E 5123 Sustainable Separations 3 Credit Hours**
 Prerequisite: Graduate Standing or Permission of Instructor. Students will learn the fundamentals of membrane separations. Lectures will connect the mechanism of small molecule transport in polymer membranes to the design of functional membrane materials exhibiting pre-assigned permeability, selectivity, and durability. Details of a variety of membrane processes for gas, vapor, organic liquid and water separation, as well as selective ion separation, will be presented and discussed. (Sp)

- CH E 5133 Water Sustainability 3 Credit Hours**
 (Crosslisted with CEES 5133) Prerequisite: Chemical Engineering Graduate standing or permission of instructor. Introduction to water reclamation and reuse. Wastewater characteristics. Conventional approaches for wastewater treatment. Emerging materials and technologies for water remediation. Water reuse applications and outlook. (Irreg.)
- CH E 5143 Multiscale Modeling of Matter 3 Credit Hours**
 Prerequisite: Chemical Engineering Graduate standing or permission of instructor; CH E 5971. The course is suitable for students who are already familiar with classical thermodynamics, differential and integral calculus. This course covers multiscale modeling methods at atomistic and meso scales. By a combination of method discussions and hands-on tutorials, students will learn fundamentals of structures and properties of matter. Both molecular dynamics simulation and Monte Carlo method will be discussed in detail. (F)
- CH E 5163 Heterogeneous Catalysis 3 Credit Hours**
 Prerequisite: Chemical Engineering Graduate standing or permission of instructor; CH E 5971. Physical characterization of heterogeneous catalysts; catalytic activity of metals, semiconductors, solid acids, and shape-selective materials. Theories of catalytic activity, catalytic reactors, basics of catalyst surface characterization and activity measurement. (F)
- CH E 5183 Graduate Transport Phenomena 3 Credit Hours**
 Prerequisite: Chemical Engineering Graduate standing or permission of instructor; CH E 5971. Fundamentals of the theory of transport process; heat, mass, momentum transfer combined with chemical reactions; derivation of different equations to describe processes and process units; analytical and numerical solutions of systems of describing equations. (F)
- CH E 5203 Bioengineering Principles 3 Credit Hours**
 (Slashlisted with CHE 4203) Prerequisite: MATH 3113 and PHYS 2524; graduate standing. Principles of bioengineering for the areas of the biomechanics of solids and fluids, mass transfer, biomaterials, electrical networks, imaging, and ionizing radiation as they apply to the human body. No student may earn credit for both 4203 and 5203. (Sp)
- CH E 5213 Experimental Methods in Materials Research 3 Credit Hours**
 Prerequisite: Graduate standing or permission of instructor; CH E 5971. Course will focus on theory and application of experimental techniques to characterize hard and soft materials including metals, ceramics, polymers, and composites. This course will include lectures, lab visits with demonstrations, and hands-on laboratory activities. (Sp)
- CH E 5223 Refining Principles 3 Credit Hours**
 Prerequisite: Chemical Engineering Graduate standing or permission of instructor; CH E 5971. Introduction to petroleum refining and how feedstocks are valued and selected. Covers more in-depth operation and modeling of several treatment and conversion processes including hydrotreating, catalytic cracking, hydrocracking, and coking. Additional concepts covered include crude oil fractionation, solids handling, and an introduction to several supporting processes. (Sp)
- CH E 5233 Colloidal Assembly 3 Credit Hours**
 Prerequisite: Chemical Engineering Graduate standing or permission of instructor; CH E 5971. The aim of this course is to provide fundamental knowledge of colloid and interface science with a focus on the assembly phenomenon at the nano and colloidal scale. The concepts discussed in this class will equip students with essential skills helpful in understanding and analyzing literature that entails colloidal building blocks. (F)
- CH E 5243 Biochemical Engineering 3 Credit Hours**
 (Slashlisted with CH E 4243; Crosslisted with BME 5243) Prerequisite: CH E 5971; Chemical Engineering Graduate standing or permission of instructor. Current bioprocesses for reaction and separation with emphasis on fundamental principles of chemical engineering, biochemistry, and microbiology. No student may earn credit for both 4243 and 5243. (Sp)
- CH E 5263 Industrial and Environmental Transport Processes 3 Credit Hours**
 Prerequisite: Chemical Engineering Graduate standing or permission of instructor; CH E 5971. This course is designed to introduce students to areas in transport phenomena that are critical to common applications. We will cover theory, predictive modeling, applications and numerical methods for multiphase flows (gas-liquid and flows with small particles), turbulent flows with transport of heat or mass, and (time permitting) microfluidics. (Sp)
- CH E 5293 Transport in Biological Systems 3 Credit Hours**
 (Crosslisted with BME 5293) Prerequisite: Chemical Engineering Graduate standing or permission of instructor; CH E 5971. Theoretical and practical aspects of transport phenomena in living organisms and biomedical technologies. Applications include hemorheology, drug delivery, extracorporeal circulation, and artificial organs. (Irreg.)
- CH E 5323 Sustainable Engineering Principles 3 Credit Hours**
 Prerequisite: Chemical Engineering Graduate standing or permission of instructor; CH E 5971. Basic concepts of sustainability will be discussed including elements relevant to materials manufacturing, chemical processes, energy production, waste minimization, and reduction of greenhouse gas emissions. Emphasis will be given to equity, diversity, and inclusion in the workplace. Students will also learn to quantify the environmental impact of materials, products and processes via the implementation of a life cycle assessment. (F)
- CH E 5333 Sustainable Polymer Manufacturing 3 Credit Hours**
 Prerequisite: Chemical Engineering Graduate standing or permission of instructor; CH E 5971. Course will provide opportunities for students to develop skills necessary to understand the basic principles of polymer life cycles, polymer properties and environmental footprints, manufacturing, design guidelines for sustainability, and recycling/upcycling. Provides an overview of the contradictory positive and negative characteristics of polymers with respect to sustainability. Discuss conventional processing and additive manufacturing methods for producing polymeric parts and goods. (F)
- CH E 5343 Sustainable Process Design 3 Credit Hours**
 Prerequisite: Chemical Engineering graduate standing or permission of instructor; CH E 5971. This course will cover concepts of sustainable design of chemical processes, including issues related to energy usage and GHG emissions, long-term availability of raw materials, and changes to process design that can lead to sustainable outcomes, including 'green' chemistry options. (Sp)
- CH E 5353 Emerging Technologies toward Water Sustainability 3 Credit Hours**
 Prerequisite: Chemical Engineering Graduate standing or permission of instructor; CH E 5971. This course will provide an introduction to water reclamation and reuse, wastewater characteristics, conventional approaches for wastewater treatment, emerging materials and technologies for water remediation, and water reuse applications and outlook. (F)

- CH E 5373 Tissue Engineering 3 Credit Hours**
(Slashlisted with CH E 4373; Crosslisted with BME 5373) Prerequisite: CH E 5971; graduate standing, admission into Gallogly College of Engineering or permission of instructor. Examines the background and recent advances in the science of combining multiple cell types with an appropriate support to provide a construct that can replace or support damaged tissue. No student may earn credit for both 4373 and 5373. (Irreg.)
- CH E 5393 Rheology of Complex Fluids 3 Credit Hours**
(Crosslisted with P E 5393) Prerequisite: Chemical Engineering Graduate standing or permission of instructor; CH E 5971. Develop skills necessary to understand the basic principles of rheological and viscoelastic properties of complex fluids, such as polymer melts and solutions, emulsions, suspensions, multiphase flow, etc. Covers the flow behavior of non-Newtonian fluids and viscoelastic fluids. Newtonian fluid mechanics will be reviewed to describe the standard flows for rheology. Rheometry, the technique for characterization of fluids, will be discussed. (Sp)
- CH E 5423 Genetic Engineering and Biotechnology 3 Credit Hours**
(Slashlisted with CH E 4423; Crosslisted with BME 5423) Prerequisite: Graduate standing in CBME or SBME, or permission of instructor. The course will cover state-of-the-art technologies of manipulating and controlling genes, genomes and cellular pathways with a goal of engineering human (stem) cells and microbes for health, environmental and industrial applications. No student may earn credit for both 4423 and 5423. (F)
- CH E 5453 Polymer Science and Engineering 3 Credit Hours**
(Crosslisted with BME 5453) Prerequisite: Chemical Engineering Graduate standing or permission of instructor; CH E 5971. This course will be focused on the synthesis, characterization, processing, and properties of state-of-the-art polymeric and multicomponent polymeric materials. Students should come into the course with a background knowledge of polymers such as that found in an Engineering Materials and/or Organic Chemistry Course. (Sp)
- CH E 5463 Polymer Processing 3 Credit Hours**
Prerequisite: Chemical Engineering Graduate standing or permission of instructor; CH E 5971. The theory and practice of the production of finished polymer shapes (tubes, sheets, fibers, bottles, etc.) from polymeric raw materials. (Alt. F)
- CH E 5480 Topics in Chemical Engineering 1-3 Credit Hours**
1 to 3 hours. Prerequisite: graduate standing or permission of instructor. May be repeated with change of content. Seminar course in specialized topics in chemical engineering. (Irreg.)
- CH E 5523 Advanced Mathematical Methods in Science and Engineering 3 Credit Hours**
Prerequisite: Chemical Engineering Graduate standing or permission of instructor; CH E 5971. Scale and vector field theory. Ordinary and partial differential equations. Matrix algebra. Complex analysis. (F)
- CH E 5533 Materials Design for Energy Application 3 Credit Hours**
Prerequisite: Chemical Engineering Graduate standing or permission of instructor; CH E 5971. This course is focused on electrochemical engineering and its application in several energy-related research areas such as lithium ion batteries, fuel cells, and water electrolysis and photolysis. We will introduce basic principles of electrochemistry and materials science and discuss various issues in these energy-related applications and how to address them from a materials science and engineering perspective. (Irreg.)
- CH E 5583 Advanced Techniques in Biomanufacturing 3 Credit Hours**
(Slashlisted with CH E 4583) Prerequisite: CHE 5373 or BME 5373 or CHE 5423 or BME 5423; co-requisite CHE 5243 or BME 5243; graduate standing or permission of instructor. Biomanufacturing is a multidisciplinary program that requires a strong collaboration among diverse functional groups. This course aims to impact knowledge about biomanufacturing workflow including fermentation, and downstream bioprocessing, with a focus on biological products, design and industrial practices. The main objective is to train students to develop hands-on experience through working with advanced unit operations being used in this field. No student may earn credit for both 4583 and 5583. (Sp)
- CH E 5673 Colloid and Surface Science 3 Credit Hours**
(Crosslisted with CEES 5673) Prerequisite: Chemical Engineering Graduate standing or permission of instructor. Capillarity, surface thermodynamics, adsorption from vapor and liquid phases, contact angles, micelle formation, solubilization, emulsions and foams. Applications to be discussed include detergency, enhanced oil recovery and adsorption for pollution control. (Irreg.)
- CH E 5843 Advanced Chemical Engineering Thermodynamics 3 Credit Hours**
Prerequisite: Chemical Engineering Graduate standing or permission of instructor; CH E 5971. Advanced thermodynamics as applied to engineering problems and design. (F)
- CH E 5960 Directed Readings 1-3 Credit Hours**
1 to 3 hours. Prerequisite: graduate standing and permission of department. May be repeated; maximum credit twelve hours. Directed readings and/or literature reviews under the direction of a faculty member. (F, Sp, Su)
- CH E 5970 Special Topics/Seminar 1-3 Credit Hours**
1 to 3 hours. Prerequisite: Chemical Engineering Graduate standing or permission of instructor; CH E 5971; May be repeated, maximum credit nine hours. Special topics or seminar course for content not currently offered in regularly scheduled courses. May include library and/or laboratory research and field projects. (Irreg.)
- CH E 5971 Seminar in Chemical Engineering Research 1 Credit Hour**
Prerequisite: Graduate Standing or departmental permission. Speakers from academia and industry elaborate on methods and results from research in their areas of expertise to provide the student with an appreciation of the problems of current interest in chemical engineering. (F, Sp)
- CH E 5980 Research for Master's Thesis 2-9 Credit Hours**
Variable enrollment, two to nine hours; maximum credit applicable toward degree, six hours. Laboratory (F, Sp, Su)
- CH E 5990 Independent Study 1-3 Credit Hours**
1 to 3 hours. Prerequisite: Graduate standing and permission of instructor. May be repeated; maximum credit nine hours. Contracted independent study for a topic not currently offered in regularly scheduled courses. Independent study may include library and/or laboratory research and field projects. (Irreg.)
- CH E 6522 Designing Circular Materials 2 Credit Hours**
Prerequisite: Graduate standing or instructor permission. This course will adapt the economic concept of 'circular economy' to the design of new materials and products for a variety of practical applications, including recycling and up-cycling. Techniques to quantify sustainability in materials science will also be introduced.

CH E 6523 Materials Discovery 3 Credit Hours

Prerequisite: Graduate standing or instructor permission. This course will introduce a variety of cutting-edge computational tools, ranging from data analysis to simulations, from machine learning to artificial intelligence, and others, and will discuss methods in which these techniques can be used to discover new advanced materials for a variety of cutting-edge applications. (F, Sp)

CH E 6524 Advanced Characterization of Materials 4 Credit Hours

Prerequisite: Graduate standing or instructor permission. This course will explore several cutting-edge experimental techniques currently used to characterize the electronic, atomic, and molecular structure of materials. The course will have both class and laboratory sections. (F, Sp)

CH E 6533 Fundamentals of Materials Structural Properties 3 Credit Hours

Prerequisite: Graduate standing or instructor permission. This course will explore the molecular features of different materials, including but not limited to metals, ceramics, and polymers. The relation between structure and properties of these materials will be developed, achieving a quantitative understanding of how defects can lead to peculiar properties, or perhaps failure. (F, Sp)

CH E 6723 Advanced Kinetics and Reaction Engineering 3 Credit Hours

Prerequisite: Chemical Engineering Graduate standing or permission of instructor; CH E 5971. Understanding and analysis of complex kinetics and reactor systems: free radical and cracking reactions, polymerization, biokinetics and catalytic kinetics with mass heat transfer limitations. Advanced reactor systems such as catalytic fixed bed reactors in one- and two-dimensions, equilibrium limited reaction systems, fluidized and trickle bed reactors, etc. are considered. (F)

CH E 6960 Directed Readings 1-3 Credit Hours

1 to 3 hours. Prerequisite: graduate standing or permission of instructor. May be repeated; maximum credit six hours. Directed readings and/or literature review under the direction of a faculty member. (Irreg.)

CH E 6970 Special Topics/Seminar 1-3 Credit Hours

1 to 3 hours. Prerequisite: graduate standing or permission of instructor. May be repeated; maximum credit 12 hours. Special topics or seminar course for content not currently offered in regularly scheduled courses. May include library and/or research and field projects. (Irreg.)

CH E 6980 Research for Doctoral Dissertation 2-16 Credit Hours

2 to 16 hours. Prerequisite: Chemical Engineering Graduate standing or permission of instructor; CH E 5971 Laboratory. Directed research culminating in the completion of the doctoral dissertation. (F, Sp, Su)

CH E 6990 Special Chemical Engineering Problems 1-2 Credit Hours

1 to 2 Hours. Prerequisite: permission. May be repeated; maximum credit four hours. Special research problems are pursued by the students either as individuals or as a group under staff direction. (F, Sp, Su)

Faculty

Last Name	First/Middle Name	Middle init.	OU Service start	Title(s), date(s) appointed	Degrees Earned, Schools, Dates Completed
Bajpai	Vivek		2023	ASSISTANT PROFESSOR SUSTAINABLE CHEMICAL, BIOLOGICAL AND MATERIALS ENGINEERING 2023	Ph.D. Chemical Engineering (2015) Univ at Buffalo-SUNY; M.S. Biological Sciences & Bioengineering (2008) Indian Institute of Technology Kanpur (India); M.B.B.S. Medicine & Surgery (2005) Maharani Laxmi Bai Medical College (India)
Bui	Ngoc		2020	ASSISTANT PROFESSOR SUSTAINABLE CHEMICAL, BIOLOGICAL AND MATERIALS ENGINEERING 2020	PhD, Univ of Connecticut, 2014; MS Chonnam National Univ, 2007; BS HoChiMinh City Univ of Technology, 2005
Crossley	Steven		2011	PROFESSOR OF SUSTAINABLE CHEMICAL, BIOLOGICAL AND MATERIALS ENGINEERING, 2017; SAM A. WILSON PROFESSOR OF CHEMICAL ENGINEERING, 2017; ROGER AND SHERRY TEIGEN PRESIDENTIAL PROFESSOR, 2017	PhD, Univ of Oklahoma, 2009; BS, Univ of Oklahoma, 2004
Foudazi	Reza		2021	ASSOCIATE PROFESSOR OF SUSTAINABLE CHEMICAL, BIOLOGICAL AND MATERIALS ENGINEERING 2021	Doctorate of Technology in Chemical Engineering, Cape Peninsula Univ of Technology, Cape Town, South Africa (2007 – 2010); Master in Polymer Engineering at Amirkabir Univ of Technology (Tehran Polytechnic), Tehran, Iran (2002 – 2004); Bachelor in Polymer Engineering, Amirkabir Univ of Technology (Tehran Polytechnic), Tehran, Iran (1998 – 2002)
Galizia	Michele		2017	ASSOCIATE PROFESSOR OF SUSTAINABLE CHEMICAL, BIOLOGICAL AND MATERIALS ENGINEERING, 2017	PhD, Univ of Bologna 2010; MS, Univ of Bologna, 2006

Gao	Jie	2018	ASSOCIATE PROFESSOR OF SUSTAINABLE CHEMICAL, BIOLOGICAL AND MATERIALS ENGINEERING, 2018	PhD, East China Univ of Science & Tech, 2010; BS, East China Univ of Science & Tech, 2005	Lobban	Lance	L	1987	FRANCIS W. WINN CHAIR IN SUSTAINABLE CHEMICAL, BIOLOGICAL AND MATERIALS ENGINEERING, 2000; PROFESSOR OF SUSTAINABLE CHEMICAL, BIOLOGICAL AND MATERIALS ENGINEERING, 2000; LLOYD G. AND JOYCE AUSTIN PRESIDENTIAL PROFESSOR, 2000	PhD, Univ of Houston, 1987; BS, Univ of Kansas, 1981
Grady	Brian	1994	PROFESSOR OF CHEMICAL, BIOLOGICAL AND MATERIALS ENGINEERING, 2005; PRESIDENT'S ASSOCIATES PRESIDENTIAL PROFESSOR, 2006	PhD, Univ of Wisconsin, 1994; BS, Univ of Illinois, 1987	Nollert	Matthias	U		ASSOCIATE PROFESSOR OF SUSTAINABLE CHEMICAL, BIOLOGICAL AND MATERIALS ENGINEERING, 1997	PhD, Cornell Univ, 1987; BS, Univ of Virginia, 1981
Gunasooriya	G.T. Kasun Kalhara	2022	ASSISTANT PROFESSOR OF SUSTAINABLE CHEMICAL, BIOLOGICAL AND MATERIALS ENGINEERING 2022	Ph.D. Chemical Engineering (2019) Ghent Univ, Belgium; M.Eng. Chemical and Biomolecular Engineering (2014) National Univ of Singapore (NUS), Singapore; B.Eng. Chemical and Biomolecular Engineering (2011) National Univ of Singapore (NUS), Singapore	O'Rear	Edgar A.		1981	PROFESSOR OF SUSTAINABLE CHEMICAL, BIOLOGICAL AND MATERIALS ENGINEERING, 1991; DIRECTOR, OKLAHOMA BIOENGINEERING CENTER, 2001; FRANCIS W. WINN PROFESSOR OF SUSTAINABLE CHEMICAL, BIOLOGICAL AND MATERIALS ENGINEERING, 2001	PhD, Rice Univ, 1981; SM, Mass Inst of Tech, 1977; BS, Rice Univ, 1975
Hahn	Horst	2022	DISTINGUISH MATERIALS RESEARCH PROFESSOR	Ph.D. Materials Physics (1982) Technical Univ Berlin; B.S. Materials Science (1978) Univ of Saarland, Saarbrücken	Papavassiliou	Dimitrios		1999	PRESIDENT'S ASSOCIATES PRESIDENTIAL PROFESSOR, 2006; PROFESSOR OF SUSTAINABLE CHEMICAL, BIOLOGICAL AND MATERIALS ENGINEERING, 2009; C.M. SLIEPCEVICH PROFESSOR OF CHEMICAL ENGINEERING, 2014	PhD, Univ of Illinois, 1996; MS, Univ of Illinois, 1993; BS, Aristotle Univ, 1989
Harrison	Roger	G	1988	PROFESSOR OF SUSTAINABLE CHEMICAL, BIOLOGICAL AND MATERIALS ENGINEERING, 2007; PROFESSOR OF BIOMEDICAL ENGINEERING, 2016	Huang	Liangliang (Paul)	2014	ASSOCIATE PROFESSOR OF SUSTAINABLE CHEMICAL, BIOLOGICAL AND MATERIALS ENGINEERING, 2014	PhD, North Carolina State Univ 2012; BS, Nanjing Univ of Tech, 2003	
Klier	John	2020	GCOE DEAN, AT&T CHAIR, PROFESSOR	B.S. in Chemical Engineering Massachusetts Institute of Technology 1984; M.S. in Chemical Engineering Purdue 1986; Ph.D. in Chemical Engineering Purdue 1989	Razavi	Sepideh	2018	ASSOCIATE PROFESSOR OF SUSTAINABLE CHEMICAL, BIOLOGICAL AND MATERIALS ENGINEERING, 2018; SUSAN K. MALLISON PROFESSOR, 2024	PhD, City College of New York, 2015; MS, City College of New York, 2012; MS, Sharif Univ of Tech, 2007; BS, Arak Univ, 2005	

Resasco	Daniel	1993	EMERITUS FACULTY, 2024	Ph.D., Chemical Engineering 1984 - Yale University; BS, Chemical Engineering 1975 - Universidad Nacional del Sur, Argentina
Sikavitsas	Vassilios	2002	PROFESSOR OF SUSTAINABLE CHEMICAL, BIOLOGICAL AND MATERIALS ENGINEERING, 2018; UNDERGRADUATE STUDIES CHAIR, 2016	PhD, SUNY at Buffalo, 2000; MS, SUNY at Buffalo, 1995; Diploma, Aristotle Univ, 1991
Striolo	Alberto	2021	PROFESSOR OF SUSTAINABLE CHEMICAL, BIOLOGICAL AND MATERIALS ENGINEERING 2021; ASahi GLASS CHAIR IN CHEMICAL ENGINEERING, LLOYD AND JANE AUSTIN PRESIDENTIAL PROFESSOR	PhD in Chemical Engineering (2002) Univ of Padova, Italy; BS in Chemical Engineering (1998) Univ of Padova (Italy)
Talebnia Rowshan	Farid	2023	RESEARCH ASSISTANT PROFESSOR OF SUSTAINABLE CHEMICAL, BIOLOGICAL AND MATERIALS ENGINEERING 2023	Ph.D. Biochemical Engineering Chalmers University of Technology, Gothenburg, Sweden
Wang	Bin	2014	PROFESSOR OF SUSTAINABLE CHEMICAL, BIOLOGICAL AND MATERIALS ENGINEERING, 2014	PhD, École Normale Supérieure de Lyon, 2010; BA, East China Univ of Science & Tech, 2004

Chemical Engineering (Standard), B.S.

Minimum Total Credit Hours: 127

Overall GPA - Combined and OU: 2.00

Major GPA - Combined and OU: 2.00

Curriculum GPA - Combined and OU: 2.00

Program Code: B160

This program has changes pending State Regents approval for 2024/25. These pending changes are not reflected here.

Bachelor of Science in Chemical Engineering accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org>, under the General Criteria and the Chemical, Biochemical, Biomolecular and Similarly Named Program Criteria.

In order to progress in your curriculum in the Gallogly College of Engineering, and as a specific graduation requirement, a **grade of**

C or better is required in each course in the curriculum, including all prerequisite courses.

Major Requirements

Code	Title	Credit Hours
Required Courses		
CH E 2033	Chemical Engineering Fundamentals	3
CH E 2003	Chemical Engineering Computing/ Statistics	3
CH E 3113	Momentum, Heat and Mass Transfer I	3
CH E 3123	Momentum, Heat and Mass Transfer II	3
CH E 3473	Chemical Engineering Thermodynamics	3
CH E 3723	Numerical Methods for Engineering Computation	3
CH E 3333	Separation Processes	3

ENGR 1411	Pathways to Engineering Thinking ²	1
ENGR 2002	Professional Responsibilities and Skills of Engineers and Scientists	2
ENGR 2411	Applied Engineering Statics	1
ENGR 2431	Electrical Circuits	1

ENGR 3431	Electromechanical Systems	1
Total Credit Hours		47

¹ Chosen from approved list of courses maintained by the department. Technical Elective I, Technical Elective II, or the Advanced Chemistry elective must be CH E. Prior faculty approval is needed.

² Engineering transfer students may take ENGR 3511 in place of ENGR 1411.

General Education and College Requirements

Courses designated as Core I, II, III, IV, or V are part of the General Education curriculum. Students must complete a minimum of 40 hours of General Education courses, chosen from the approved list, including at least one upper-division Gen. Ed. course outside of the student's major. **Courses graded P/NP will not apply.**

A grade of C or better is required in each course in the curriculum, including all prerequisite courses.

UNIVERSITY-WIDE GENERAL EDUCATION (MINIMUM 40 HOURS) AND COLLEGE REQUIREMENTS

Code	Title	Credit Hours
Core Area I: Symbolic and Oral Communication		
<i>English Composition</i>		
ENGL 1113	Principles of English Composition	3
ENGL 1213	Principles of English Composition	3
or EXPO 1213	Expository Writing	
<i>Language (0-10 hours in the same language)</i>		
This requirement can be met by two years of the same language in high school:		0-10
Beginning Course (0-5 hours)		
Beginning Course, continued (0-5 hours)		
<i>Mathematics</i>		
MATH 1914	Differential and Integral Calculus I (Core I) 1,2	4
Core Area II: Natural Science (including one laboratory)		
PHYS 2514	General Physics for Engineering and Science Majors (Core II) ²	4

<i>World Culture</i>		
Choose one course ⁴		3
Core Area V: First-Year Experience		
Choose one course ⁴		3
Total Credit Hours		40-50

¹ MATH 1914, MATH 2924, and MATH 2934 can be substituted with MATH 1823, MATH 2423, MATH 2433, and MATH 2443.

² Major support requirements that also satisfy University General Education requirements.

³ CHEM 1315 can be substituted with CHEM 1335 or CHEM 1425.

⁴ To be chosen from the University-Wide General Education Approved Course List. Three of these hours must be upper-division (3000-4000). See list in the Class Schedule.

Free Electives

Electives to bring total applicable hours to the minimum total required for the degree including a minimum of 40 upper-division hours.

Suggested Semester Plan of Study

Bachelor of Science in Chemical Engineering accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org>, under the General Criteria and the Chemical, Biochemical, Biomolecular and Similarly Named Program Criteria.

In order to progress in your curriculum in the Gallogly College of Engineering, and as a specific graduation requirement, a grade of C or better is required in each course in the curriculum, including all prerequisite courses. Chemical engineering courses are sequential and usually offered only in the semester shown; note prerequisites.

Two college-level courses in a single world language are required; this may be satisfied by successful completion of 2 years in a single world language in high school. Students who must take a language at the University will have an additional 6-10 hours of coursework.

Courses designated as Core I, II, III, IV or V are part of the General Education curriculum. Students must complete a minimum of 40 hours of General Education courses, chosen from the approved list.

Freshman

First Semester		Credit Hours
ENGL 1113	Principles of English Composition (Core I)	3
CHEM 1315	General Chemistry (Core II-Lab) ¹	5
MATH 1914	Differential and Integral Calculus I (Core I) ²	4
ENGR 1411	Pathways to Engineering Thinking ³	1

General Education and College Requirements

Courses designated as Core I, II, III, IV, or V are part of the General Education curriculum. Students must complete a minimum of 40 hours of General Education courses, chosen from the approved list, including at least one upper-division Gen. Ed. course outside of the student's major. **Courses graded P/NP will not apply.**

A grade of C or better is required in each course in the curriculum, including all prerequisite courses.

UNIVERSITY-WIDE GENERAL EDUCATION (MINIMUM 40 HOURS) AND COLLEGE REQUIREMENTS

Code	Title	Credit Hours
Core Area I: Symbolic and Oral Communication		
<i>English Composition</i>		
ENGL 1113	Principles of English Composition	3
ENGL 1213	Principles of English Composition	3
or EXPO 1213	Expository Writing	
<i>Language (0-10 hours in the same language)</i>		
This requirement can be met by two years of the same language in high school:		0-10
Beginning Course (0-5 hours)		
Beginning Course, continued (0-5 hours)		
<i>Mathematics</i>		
MATH 1914	Differential and Integral Calculus I (Core I) 1,2	4
Core Area II: Natural Science (including one laboratory)		
PHYS 2514	General Physics for Engineering and Science Majors (Core II) ²	4
CHEM 1315	General Chemistry (Core II-Lab) ^{2,3}	5
Core Area III: Social Science		

P SC 1113	American Federal Government	3
Choose one course ⁴

HIST 1483	United States to 1865	3
	or HIST 1493 United States, 1865 to the Present	
ARCH 2243	History of the Built Environment I (or approved substitute Core IV-Western Culture) ⁴	3
<i>World Culture</i>		
ANTH 4623	Approaches to Cross-Cultural Human Problems (or approved substitute Core IV-World Culture) ⁴	3
Core Area V: First-Year Experience		
ENGR 1413	Pathways to Engineering Thinking (Core V-FYE) ⁵	3
Total Credit Hours		40-50

¹ MATH 1914, MATH 2924, and MATH 2934 can be substituted with MATH 1823, MATH 2423, MATH 2433, and MATH 2443.

² Major support requirements that also satisfy University General Education requirements.

³ CHEM 1315 can be substituted with CHEM 1335 or CHEM 1425.

⁴ To be chosen from the University-Wide General Education Approved Course List. Three of these hours must be upper-division (3000-4000). See list in the Class Schedule.

⁵ Transfer students will need to meet the requirements of the first-year experience course as well as the engineering transfer course. Please see your advisor for your specific enrollment.

Free Electives

Electives to bring total applicable hours to the minimum total required for the degree including a minimum of 40 upper-division hours.

Suggested Semester Plan of Study

Bachelor of Science in Chemical Engineering accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org>, under the General Criteria and the Chemical, Biochemical, Biomolecular and Similarly Named Program Criteria.

In order to progress in your curriculum in the Gallogly College of Engineering, and as a specific graduation requirement, a grade of C or better is required in each course in the curriculum, including all prerequisite courses. Chemical engineering courses are sequential and usually offered only in the semester shown; note prerequisites.

Students must be admitted to the accelerated program before the beginning of the senior year. Students are eligible for graduate status upon graduation with the Bachelor of Science in Chemical Engineering.

Up to 13 hours of graduate-level CH E and/or science, math, engineering or technical courses (as approved by the graduate liaison) are shared/double-counted and fulfill requirements in both the B.S. and M.S. portions of the Accelerated Degree Program.

Two college-level courses in a single world language are required; this may be satisfied by successful completion of 2 years in a single world

language in high school. Students who must take a language at the University will have an additional 6-10 hours of coursework.

Courses designated as Core I, II, III, IV or V are part of the General Education curriculum. Students must complete a minimum of 40 hours of General Education courses, chosen from the approved list.

General Requirements for all Master's Degrees

The master's degree requires the equivalent of *at least* two semesters of satisfactory graduate work and additional work as may be prescribed for the degree.

All coursework applied to the master's degree must carry graduate credit.

Master's degree programs which require a thesis consist of *at least* 30 credit hours. All non-thesis master's degree programs require *at least* 30 credit hours.

Credit transferred from other institutions must meet specific criteria and is subject to certain limitations.

Courses completed through correspondence study may *not* be applied to the master's degree.

To qualify for a graduate degree, students must achieve an overall grade point average of 3.0 or higher in the degree program coursework and in all resident graduate coursework attempted. A student must also have at least a 3.0 in all coursework (including undergraduate coursework if any).

Additional information for master's degree students may be found in the Graduate College Bulletin.

Sustainability - Energy and Materials Management, M.S.

Minimum Total Hours (Non-Thesis): 30

Program Code: M868 (Online M869)

Note: Transfer credits will not be accepted into this program.

DSA 5103	Intelligent Data Analytics	
Total Credit Hours		12

A graduate *certificate* is not a graduate *degree*. A graduate degree represents a program of independent inquiry beyond the depth of coursework alone, while a graduate certificate represents a set of courses only.

- All courses must be taken at OU. No transfer credit will apply.
- No course substitutions are permitted for graduate certificates.
- Coursework applied to a graduate certificate cannot be more than five years old as of the semester the graduate certificate is awarded.
- Students must earn a grade point average of 3.00 or higher on all coursework applied to the graduate certificate.

Chemical Engineering, Ph.D.

Minimum Total Hours: 90

Program Code: D160

Program Requirements

Code	Title	Credit Hours
Core (12 hours)		
CH E 5183	Graduate Transport Phenomena	3
CH E 5523	Advanced Mathematical Methods in Science and Engineering	3
CH E 5843	Advanced Chemical Engineering Thermodynamics	3
CH E 6723	Advanced Kinetics and Reaction Engineering	3
Electives (18 hours)		
Must include a minimum of 5 hours of advanced CH E courses and a minimum of 9 hours advanced science, math, engineering or technical courses; as approved by the advisory conference committee and graduate liaison		18
Research Seminars (4-8 hours)		
CH E 5971	Seminar in Chemical Engineering Research (1 credit per semester, minimum 4 hours and maximum 8 hours)	4-8
Dissertation Research (46-56 hours)		
CH E 6980	Research for Doctoral Dissertation	46-56
Additional Coursework (0-10 hours)		
As necessary to reach 90 post-baccalaureate hours, as approved by the student's advisory conference committee		0-10
Total Credit Hours		90

General Requirements for Doctoral Degrees

A student should expect to spend at least the equivalent of three full academic years beyond the bachelor's degree to obtain the doctoral degree. During this period the student will take appropriate graduate coursework, successfully complete the general examination, and successfully defend and submit the final dissertation.

All coursework applied to the doctoral degree must carry graduate credit.

The doctoral degree requires at least 90 post-baccalaureate hours, including both formal coursework and hours of research.

The minimum hour requirement for a specific doctoral degree program cannot be waived.

No more than one-half of the credit hours, both OU and overall, excluding Research for Doctoral Dissertation (6980), may be S/U-graded coursework.

The student must be in residence at OU for at least two consecutive 16-week semesters during the pursuit of the doctoral degree while enrolled and engaged in coursework or research activities as prescribed by the major academic unit.

For more detailed regulations and requirements for Doctoral degrees, please consult the Graduate College Bulletin: <http://www.ou.edu/gradcollege/forms/bulletin>

General Information

Vision

Through a community of scholars committed to excellence in research and teaching, the mission of CEES is to provide our students with the technical education and critical thinking skills needed to lead the country in addressing the complex infrastructure and environmental problems facing today's society.

Careers in Architectural Engineering

Architectural engineers design buildings and other structures and understand the design of a building involves more than its appearance. Buildings also must be functional, safe and economical and meet the needs of the people who use them. Architectural engineers design a variety of structures, including office and apartment buildings, schools, churches, factories, hospitals, houses and airport terminals. They also design such complexes as urban centers, college campuses, industrial parks and communities. In addition, they may advise on the selection of building sites, prepare cost analysis and land-use studies and do long-range planning for land development.

Careers in Civil Engineering

Civil engineering is the oldest of the modern engineering disciplines with historical roots dating back to the 1700s. Responsibilities of the first civil engineers increased during the industrial revolution and included the construction of canals, roads and railroads.

Civil engineers are responsible for the design and construction of society's infrastructure, such as buildings, highways, bridges, mass transit systems, dams and locks, and municipal water and sewage treatment systems. They often are responsible for planning, managing, operating and maintaining these facilities. Consequently, civil engineering is frequently referred to as the "the people-serving profession."

Spurred by general population growth and an expanding economy, more civil engineers will be needed to design and construct higher-capacity transportation, water supply and pollution control systems as well as large buildings and building complexes. They also will be needed to repair or replace existing roads, bridges and other public structures.

Careers in Environmental Engineering

Using the principles of physics, biology and chemistry, environmental engineers develop methods to meet such environmental challenges as water and air pollution control, recycling, waste disposal, hydrology, river management and control, and public health issues. Environmental engineers conduct hazardous waste management studies in which they

evaluate the significance of the hazard, offer analysis on treatment and containment and develop regulations to prevent mishaps. They also design municipal sewage and industrial wastewater systems, analyze scientific data, conduct research projects and perform quality control checks.

Past environmental engineering graduates have been employed by state and federal environmental agencies, including the Oklahoma Department of Environmental Quality, the U.S. Environmental Protection Agency and the U.S. Geological Survey as well as various private industries and consulting firms.

Careers in Environmental Science

Environmental scientists have a variety of job responsibilities, including collecting and analyzing air, water and soil samples, monitoring compliance with environmental laws and regulations, assisting industrial companies in complying with environmental regulations, and addressing public meetings on local environmental challenges.

Past environmental science graduates have been employed by the U.S. Environmental Protection Agency, Oklahoma Department of Environmental Quality, Oklahoma Department of Health and numerous private industrial and consulting firms.

Programs & Facilities

CEES is currently housed in the Carson Engineering Center, the Engineering Laboratory Building and Sarkey's Energy Center on the main campus as well as in the Donald G. Fears Structural Engineering Laboratory and the National Weather Center on the south research campus.

Student Team Room and Computing Laboratory

The student team room and computing laboratory is located in Carson Engineering Center and is available to all CEES students.

Teaching and Research Laboratories

CEES has laboratory facilities for teaching and research in environmental science and engineering, geotechnical engineering and structural engineering.

- The traditional wet laboratories in the Carson Engineering Center are associated with teaching and research efforts in environmental science and environmental engineering.
- The materials and soils laboratory is located in Carson Engineering Center and is used for teaching and research in soils and materials science.
- The Donald G. Fears Structural Engineering laboratory is devoted to teaching and research programs in geotechnical and structural engineering.
- The Ray Broce Materials laboratory is devoted to teaching and research in asphalt and other transportation materials.
- The Transportation, Risk, and Information Commons (TRICS) laboratory focuses on how transportation systems depend on social and other physical systems in the context of natural and man-made hazards.

Undergraduate

Civil Engineering and Environmental Science Program Educational Objectives

Program educational objectives (PEOs) are broad statements that describe what graduates are expected to attain within a few years

of graduation. The PEOs were developed to meet the needs of the constituencies of CEES. The primary constituents of CEES programs are our students, alumni and the employers that hire our graduates. The PEO's are focused on providing well trained engineers for employers and to empower those engineers to advance during their careers. The PEOs for CEES engineering graduates are:

Program Educational Objective 1

CEES alumni will embark on successful careers in areas associated with the development, implementation, and management of architectural, civil, and environmental engineering systems, or will continue their education through graduate or professional school.

Program Educational Objective 2

CEES alumni will advance in their careers by employing the latest technical knowledge, creativity, inclusive teamwork, and ethical decision making to find sustainable solutions for pressing environmental and infrastructure problems; they will continue their professional development through lifelong learning; and they will support the profession and the University.

Civil Engineering and Environmental Science Undergraduate Student Outcomes

Student Outcomes describe what students are expected to know and be able to do by the time of graduation. The Student Outcomes for engineering students in CEES are:

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies

Bachelor of Science

Students enrolled in the Bachelor of Science in Architectural Engineering (p. 1304)¹ program take the same core engineering, mathematics, science and English courses taken by other engineering students. They also take a series of architectural planning and methods courses from the College of Architecture.

The Bachelor of Science in Civil Engineering (p. 1307)² curriculum is comprised of four areas of emphasis; environmental, geotechnical, structural, and transportation engineering. The undergraduate civil engineering student must complete a sequence of core engineering courses plus one or two courses in each of these areas. Students then

choose three upper division Professional Electives in their preferred area of emphasis.

The core curriculum for the Bachelor of Science in Environmental Engineering (p. 1309)³ is similar to civil engineering; however, the last two years of the program focus strictly on environmental courses. Students are required to take courses in air pollution control engineering; water and wastewater engineering, and solid and hazardous waste management.

Students pursuing the Bachelor of Science in Environmental Science (p. 1312) complete fundamental courses in chemistry, math, physics, biology, microbiology, and environmental science. Students then choose three upper division track electives in one of four areas: chemistry, biology, math, or physical sciences. Students also choose two upper division Professional Electives in the preferred area of emphasis within environmental science. This flexible program prepares students for careers in government, consulting, and industry.

¹ Bachelor of Science in Architectural Engineering accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org>, under the General Criteria and the Architectural and Similarly Named Program Criteria.

² Bachelor of Science in Civil Engineering accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org>, under the General Criteria and the Civil and Similarly Named Program Criteria.

³ Bachelor of Science in Environmental Engineering accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org>, under the General Criteria and the Environmental Engineering and Similarly Named Program Criteria.

Minor

Students earning a bachelor's of science degree in specific areas are eligible to apply for the Environmental Science Engineering Minor (p. 1314). Additional majors will be considered on a case-by-case basis.

The Water and Sanitation for Health and Sustainable Development Minor (p. 1315) is designed for engineering and non-engineering majors who have an interest in development work in emerging regions, particularly the sectors of water, sanitation, and health.

Accelerated Bachelor of Science/Master of Science

The combined BS/MS program is offered to qualified undergraduate students in the School of Civil Engineering and Environmental Science, University of Oklahoma, who wish to pursue their graduate education while completing their undergraduate degree requirements. The Bachelor of Science portion is accredited by the Engineering Accreditation Commission of ABET.

- Architectural Engineering, Bachelor of Science/Civil Engineering, Master of Science (p. 1315)
- Civil Engineering, Bachelor of Science/Master of Science (p. 1320)
- Environmental Engineering, Bachelor of Science/Master of Science (p. 1326)
- Environmental Science, Bachelor of Science/Master of Environmental Science (p. 1329)

Graduate

Master of Science Civil Engineering

The Civil Engineering Master of Science program is open to students with undergraduate degrees in environmental or civil engineering or related

engineering or science disciplines who have completed certain minimum undergraduate coursework.

- Civil Engineering: Geotechnical Engineering, Master of Science (p. 1332)
- Civil Engineering: Geotechnical Engineering (Online), Master of Science (p. 1333)
- Civil Engineering: Structural Engineering, Master of Science (p. 1334)
- Civil Engineering: Structural Engineering (Online), Master of Science (p. 1335)
- Civil Engineering: Transportation Engineering (Online), Master of Science (p. 1336)
- Civil Engineering: Water Resources Engineering, Master of Science (p. 1337)
- Civil Engineering: Water Resources Engineering (Online), Master of Science (p. 1338)

Master of Science in Environmental Engineering

The Master of Science in Environmental Engineering program is open to students with undergraduate degrees in environmental or civil engineering or related engineering or science disciplines who have completed certain minimum undergraduate coursework.

- Environmental Engineering Master of Science (p. 1338)

Master of Environmental Science

The Master of Environmental Science programs are open to students with undergraduate degrees in the physical, natural, or life sciences or related disciplines who have completed certain minimum undergraduate coursework.

- Environmental Science (p. 1340)
- Environmental Science: Hydrology and Water Security Online (p. 1341)

Doctoral Programs

The School of Civil Engineering and Environmental Science offers doctoral programs in environmental science, (p. 1343) environmental engineering (p. 1343), and civil engineering. (p. 1342) A master's degree in a related discipline is typically required for admission to all CEES Ph.D. degree programs, although students who have outstanding academic credentials and a documented record of research experience at the undergraduate level may occasionally be admitted to the doctoral program without a master's degree.

Courses

CEES 1000 CEES Seminar 0 Credit Hours

Seminar provides a common meeting time for students and faculty for department activities, such as invited speakers, project presentations, educational surveys, cross-course project coordination, and policy announcements. Students must enroll every semester that they are matriculated in CEES at OU after the freshman year, but in no case can a student graduate without successfully completing four semesters of seminar. (F, Sp)

CEES 1111 Exploring CEES 1 Credit Hour

Prerequisite: Majors only. Introduction to fundamental concepts (principles of mechanics, energy balances, simple circuits), problem solving and design, simple computing software, and disciplinary topics for architectural, civil or environmental engineers and environmental scientists. (Sp)

- CEES 1112 Introduction to Civil Engineering and Environmental Science** **2 Credit Hours**
Prerequisite: Freshman only. Introduction to fundamental concepts (mass/flow balance), problem solving and design, and simple computing software for architectural, civil or environmental engineers and environmental scientists. (F)
- CEES 2113 Statics** **3 Credit Hours**
Prerequisite: PHYS 2514 and MATH 2433 or MATH 2934 or concurrent enrollment in MATH 2433 or MATH 2934. Vector representation of forces and moments; general three-dimensional theorems of statics; centroids and moments of area and inertia. Free-body diagrams, equilibrium of a particle and of rigid bodies, distributed loads, friction and internal shear and moment loads. Analysis of trusses, frames, and machines. (F)
- CEES 2153 Mechanics of Materials** **3 Credit Hours**
Prerequisites: 2113 or AME 2113 or PE 2113. Basic principles of mechanics, including the definition of stress and strain, transformations and principal values for the stress and strain tensors, kinematic relations, review of conservation equations and the development and application of constitutive laws for idealized materials. Elementary elastostatics utilizing Hooke's law; constitutive relations for a linear-elastic continuum, including elastic parameters such as Young's modulus, shear and bulk moduli and Poisson's ratio. Solution of elementary one- and two-dimensional mechanics problems, including thermal stresses and strains, beam flexure, shear and deflections, pressure vessels and buckling of columns. (Sp)
- CEES 2213 CADD Fundamentals** **3 Credit Hours**
Prerequisite: CEES Majors only and Sophomore standing. Introduction to computer aided design and drafting with a focus on the AutoCAD and MicroStation platforms. This course is primarily about learning to use the software and learning how to convey an engineering design graphically. (F)
- CEES 2223 Fluid Mechanics** **3 Credit Hours**
Prerequisites: 2113 or AME 2113 or PE 2113, and Math 3113 or concurrent enrollment. Coverage of the fundamentals of fluid statics and dynamics. Formulation of the equation of fluid flow, i.e., Navier-Stokes equation, Eulers equations, Bernoulli equations, etc. and their application. Examples of ideal fluid flow, such as flow in open and closed conduits. (Sp)
- CEES 2313 Water Quality Fundamentals** **3 Credit Hours**
Prerequisite: CHEM 1415, MATH 2423 or MATH 2924. Introduction to environmental mass balance and fate processes. Studies of mass and energy transfer, introductory environmental chemistry, water quality parameters, mathematics of growth, statistics and data analysis, introduction to environmental laws and regulations. (F)
- CEES 2323 Environmental Transport and Fate Process** **3 Credit Hours**
Prerequisite: 2313. Physicochemical and biological processes controlling contaminant distribution and fate; hydrological processes controlling contaminant transport; sources, prevention and remediation of environmental pollutants. (Sp)
- CEES 2412 Earth Systems and Processes** **2 Credit Hours**
Prerequisite: CHEM 1315, and MATH 1823 or MATH 1914. This course provides environmental engineering and science students with a working knowledge of earth systems and their processes, specifically emphasizing the atmosphere, hydrological systems, limnology, soils, and ocean systems. This course will exam the physical structure of these systems, as well as their physical-chemical processes, and how the transfer of energy and mass between earth systems influences the global climate. (Sp)
- CEES 2970 Special Topics/Seminar** **1-3 Credit Hours**
Special Topics. 1 to 3 hours. May be repeated; Maximum credit nine hours. Special topics course for content not currently offered in regularly scheduled courses. May include library and/or laboratory research, and field projects. (Irreg.)
- CEES 3213 Water Resources Engineering** **3 Credit Hours**
Prerequisite: 2223 or permission of instructor. Municipal water demands, surface water hydrology, ground water hydrology, water distribution systems, pump design, wastewater collection systems, storm water management, water law. (F)
- CEES 3243 Water and Wastewater Treatment Design** **3 Credit Hours**
Prerequisite: CEES 2223. Design of municipal water and wastewater treatment plants. Emphasis is placed on the characterization of water and wastewater and physical, chemical and biological treatment methods. Sludge processing advanced treatment methods and treatment plant hydraulics are also considered. (Sp)
- CEES 3251 WaTER Center Integrated Seminar** **1 Credit Hour**
Prerequisite: permission of instructor. This course is a weekly hour-long seminar in which students will hear from guest speakers discussing WASH projects in emerging regions, present their intercultural experience in the form of a case study, and listen to other case study presentations. Students may also read and discuss assigned readings (e.g., published peer-reviewed papers of other researchers doing similar work). (F,SP)
- CEES 3263 Introduction to Dynamics for Architectural and Civil Engineers** **3 Credit Hours**
Prerequisite: CEES 2153 and MATH 3113. Kinematics and kinetics of rigid bodies; free and forced vibrations of undamped and damped single degree-of-freedom systems; concept of mass, stiffness, and damping for typical structures; introduction to vibrations of two and more degrees-of-freedom systems; and determination of loads on structures from dynamic events such as earthquakes. (F)
- CEES 3361 Soil Mechanics Laboratory** **1 Credit Hour**
Prerequisite: CEES 2153 or PE 2153; CEES 3363 or concurrent enrollment (you must be enrolled in both lecture and lab section together the first time you attempt either). This is one of two complimentary courses taken in the area of Geotechnical Engineering and serves as an introduction to soil mechanics. During this course, the student will conduct simple laboratory tests to identify and classify soils, characterize the compacted properties of soil, and quantify soil permeability, compressibility and strength. (F)
- CEES 3363 Soil Mechanics** **3 Credit Hours**
Prerequisite: CEES 2153 or PE 2153; CEES 3361 or concurrent enrollment (you must be enrolled in both lecture and a lab section together the first time you attempt either). General treatment of the physical and mechanical properties of soils. Topics include soil composition, classification, phase relationships, compaction, effective stress, consolidation, shear strength and permeability and seepage. (F)
- CEES 3403 Materials** **3 Credit Hours**
Prerequisite: CEES 2153 or PE 2153 or concurrent enrollment. Study of the properties of materials utilized by architectural and civil engineers; analyses of aggregates, concrete, masonry, steel, asphalt, plastics and wood. Laboratory. (Sp)

- CEES 3413 Structural Analysis I 3 Credit Hours**
Prerequisite: CEES 2153 or PE 2153. Loads, reactions and force systems; introduction to design codes; analysis of frames and trusses; calculation of structural deformations; and analysis of indeterminate structures. Emphasis on classical solutions and time-tested approaches to structural engineering. Introduction to structural analysis computer programs to solve complex problems. (F)
- CEES 3422 Intercultural Immersion Experience in an Emerging Region 2 Credit Hours**
Prerequisite: permission of instructor. This course is intended to be a 3-6 week summer international immersion experience with a WaTER component (technological, cultural, business lens on water, sanitation, hygiene in a particular context). Students design their own experience/ internship, write a proposal of planned activities, and secure CEES faculty advisor approval. After completion, students submit a written report and oral presentation to a review committee. (Su)
- CEES 3440 Mentored Research Experience 3 Credit Hours**
0 to 3 hours. Prerequisites: ENGL 1113 or equivalent, and permission of instructor. May be repeated; maximum credit 12 hours. For the inquisitive student to apply the scholarly processes of the discipline to a research or creative project under the mentorship of a faculty member. Student and instructor should complete an Undergraduate Research & Creative Projects (URCP) Mentoring Agreement and file it with the URCP office. Not for honors credit. (F, Sp, Su)
- CEES 3453 Introduction to Construction Management 3 Credit Hours**
Prerequisite: CEES 2213 and junior level standing in CEES. Introduction to methods for managing construction projects including scheduling, cost estimating, contracts, pay request, change orders, and requests for information. Students will also learn how to read construction documents and understand project specifications. (Sp)
- CEES 3663 Structural Design - Steel I 3 Credit Hours**
Prerequisite: CEES 3413 and CEES 3403 or concurrent enrollment in CEES 3403. Design of steel structural members including tension elements, columns, beams, and beam-columns; bolted and welded connection design; composite beam design; introduction to plastic design. Laboratory. (Sp)
- CEES 3673 Structural Design - Concrete I 3 Credit Hours**
Prerequisite: CEES 3403, CEES 3413. Analysis and design of reinforced concrete beams, columns, slabs, footings, etc., along with discussion of current building practice. Laboratory (F or Sp)
- CEES 3883 Transportation Engineering 3 Credit Hours**
Prerequisite: CEES 2153 or P E 2153 and CEES 3403 or concurrent enrollment. Introduction to transportation planning, design, construction, operations and maintenance emphasizing the highway/street mode. Includes demand modeling, route location and design, pavements including hot mix asphalt volumetrics and stability, drainage, and traffic control devices. (Sp)
- CEES 3960 Honors Reading 1-3 Credit Hours**
1 to 3 hours. Prerequisite: admission to Honors Program. May be repeated; maximum credit six hours. Consists of topics designated by the instructor in keeping with the student's major program. The topics will cover materials not usually presented in the regular courses. (F, Sp, Su)
- CEES 3970 Honors Seminar 1-3 Credit Hours**
1 to 3 hours. Prerequisite: admission to Honors Program. May be repeated; maximum credit six hours. The projects covered will vary. Deals with concepts not usually presented in regular coursework. (Irreg.)
- CEES 3980 Honors Research 1-3 Credit Hours**
1 to 3 hours. Prerequisite: admission to Honors Program. May be repeated; maximum credit six hours. Provides an opportunity for the gifted Honors candidate to work on a special project in the field. (Sp)
- CEES 3990 Independent Study 1-3 Credit Hours**
1 to 3 hours. Prerequisite: permission of instructor and junior standing. May be repeated once with change of content. Independent study may be arranged to study a subject not available through regular course offerings. (F, Sp, Su)
- CEES 4113 Building Lighting and Electrical Systems 3 Credit Hours**
Prerequisite: MATH 2423 or MATH 2924; PHYS 2524; and ENGR 2431 or concurrent enrollment, CEES majors only. Fundamentals of building lighting and electrical systems. Lighting topics include the determination of appropriate lighting quantity and quality, luminaires and lighting design procedures for residential, commercial and industrial buildings. Electrical topics will include service voltages, overcurrent protection, short circuit analysis and branch circuit design for residential, commercial and industrial buildings. (F or Sp)
- CEES 4114 Aquatic Chemistry 4 Credit Hours**
(Slashlisted with CEES 5114) Prerequisite: CHEM 1415 and CEES 2323 or permission of instructor. Environmental kinetics and thermodynamics in aquatic systems; acid/base, precipitation/solubility, metal complexation and oxidation/reduction reactions; environmental colloidal and solid-liquid interface chemistry. No student may earn credit for both 4114 and 5114 or Environmental Science 4114 and 5114. Laboratory. No student may earn credit for both 4114 and 5114. (F)
- CEES G4123 Open Channel Flow 3 Credit Hours**
Prerequisite: CEES 2223. Theory, analysis and design of channels, aqueducts, headworks, siphons, spillways and hydraulic structures. An in-depth study of critical flow and measurement techniques. Backwater analysis by analytical, calculator and computer methods. Special emphasis on practical problems of general interest. (F)
- CEES G4243 Water Technologies for Emerging Regions 3 Credit Hours**
Prerequisite: 2223 or 2323 or equivalent or instructor permission. Students will gain an understanding of water and sanitation issues in remote villages of developing countries. Explore and design sustainable technologies appropriate to these settings including cultural, political and economic factors. (Sp)
- CEES G4253 Statistics and Probability 3 Credit Hours**
Prerequisite: MATH 2423 or 2924 and PHYS 2524 or 2424. Designed to help students understand the fundamentals of probability, statistics, reliability, and risk methods in support of decision making for future engineers and scientists. Fundamental concepts in probability and statistics will be reviewed and used. Engineering decisions are often based on data that contain uncertainty; future scientists and engineers should understand how uncertainty affects calculated quantities, accuracy, precision, and reliability. (Sp)
- CEES G4263 Hazardous and Solid Waste Management 3 Credit Hours**
Prerequisite: junior or above status in CEES or permission of instructor. Sources and types of solid wastes; identification and classification of hazardous wastes; waste handling, transportation, treatment and disposal techniques, federal and state legislation; and environmental and health effects. (F)

- CEES G4273 WaTER Technical Field Methods 3 Credit Hours**
Prerequisite: permission of instructor. A hands-on practicum for construction and implementation of water and sanitation projects in developing countries. Course modules reflect the typical projects and skills needed by development workers in organizations such as Peace Corps, USAID, Engineers Without Borders, and faith-based organizations. Emphasis will be on sustainable technologies using methods and materials appropriate to emerging regions. Non-engineering students are encouraged to participate. (Su)
- CEES 4281 Engineering Co-Op Program 1 Credit Hour**
(Crosslisted with AME, CH E, C S, ECE, EPHY, ISE and BME 4281)
Prerequisite: Departmental permission and junior standing. May be repeated; maximum credit 6 hours. The Co-Op program provides students an opportunity to enhance their education via career exploration in related professional work experiences. Course assignments help students articulate their experiences by completing journals; mid-term paper; final paper and/or final presentation. Faculty receive an evaluation from the student's Co-Op supervisor who monitors performance. Faculty collaborate with the Co-Op supervisor to ensure student success. (F, Sp, Su)
- CEES 4324 Environmental Biology and Ecology 4 Credit Hours**
(Slashlisted with CEES 5324) Prerequisite: CEES 2323. Examines applied environmental biology; biological consequences of environmental impacts; mitigation of environmental impacts via biogeochemical, ecological and microbial processes. No student may earn credit for both 4324 and 5324. Laboratory (F)
- CEES G4333 Foundation Engineering 3 Credit Hours**
Prerequisite: CEES 3363. Substructure analysis and design to meet various soil conditions; footings and rafts, shoring and underpinning, piles, cofferdams, caissons, breakwaters, piers, wharves, vibratory effects on foundations. (Sp)
- CEES 4363 Ecological Engineering Science 3 Credit Hours**
(Slashlisted with 5363) Prerequisite: Senior standing or permission of instructor. Exploration of the design of sustainable ecosystems integrating human society with its natural environment for the benefit of both. Uses a systems perspective that resilient and sustainable solutions involve working with natural ecological and biogeochemical processes and not against them, and require less fossil fuel input, produce less pollution, and represent cost-effective alternatives to traditional energy- and resource-intensive technologies. No student may earn credit for both 4363 and 5363. (Sp)
- CEES 4373 Water Resources Systems Modeling 3 Credit Hours**
(Slashlisted with CEES 5373) Prerequisite: CEES 3213 or concurrent enrollment or instructor permission. Theory and concept of water resources management. An in-depth study of theory of optimization, hydrologic modeling, reservoir and dams operation. Data analysis and computational methods for hydrology and water resources management. Special emphasis on system modeling and parameter tuning using automatic calibration approaches. Basic level of scientific programming. No student may earn credit for both 4373 and 5373. (F)
- CEES 4423 CEES Professional Internship or Co-op 3 Credit Hours**
Prerequisite: completion of at least 19 hours of Civil Engineering and Environmental Science (CEES) coursework (for Civil Engineering and Environmental Engineering majors); or completion of at least 19 hours of CEES and science coursework (for Environmental Science majors); or completion of at least 19 hours CEES and Architecture (ARCH) coursework (for Architectural Engineering majors). Provides three hours of professional elective credit for 400 hours of internship. Prior to starting the internship, students should write a proposal of planned activities and secure the approval from a CEES faculty member to serve as an of the advisor. After completion of the internship or co-op, the students should enroll in this course. The student must then submit a written report, and make an oral presentation for a three-member review committee that includes the faculty advisor. (F, Sp, Su)
- CEES G4453 Geomatics Engineering 3 Credit Hours**
Prerequisites: CEES 2213, CEES 3403 and MATH 2433 or MATH 2934 or instructor permission. Geomatics engineering deals with the science of determining relative positions of features for mapping, engineering and construction plans. Topics include digital leveling, orientation, distance measurement, traversing and control surveys, accuracy, error sources, precise horizontal and zenith angle measurements, and introduction of global navigation satellite system. Laboratory (F)
- CEES G4663 Introduction to Matrix Methods in Structural Analysis 3 Credit Hours**
Prerequisite: CEES 3413. Review of matrix algebra and solution of linear equations; energy concepts and principle of virtual work; fundamentals of flexibility and stiffness methods; coordinate transformation and matrix assemblage; computer-oriented direct stiffness method and computer code developments; secondary effects; support settlement and temperature change; method of finite differences and application to beam and plate problems. (F or Sp)
- CEES G4753 Structural Design - Wood 3 Credit Hours**
Prerequisite: CEES 3413 or equivalent. Material properties and behavior of wood. Analysis and design of solid and laminated structural members, connections, systems, trusses and arches. Current developments in structural wood design and research. (F)
- CEES 4843 Hydrology 3 Credit Hours**
(Slashlisted with CEES 5843) Prerequisite: MATH 2924/2423 and CEES 4253 (pre- or co-requisite) or instructor permission. Hydrology is the study of water across the globe. This is an applied course on hydrology dealing with environmental water problems; principles of hydrologic systems, their structure and components; and methods of analysis and their application to various purposes of water resources planning and development. No student may earn credit for both 4843 and 5843. (Sp)
- CEES G4883 Traffic Analysis, Design and Control 3 Credit Hours**
Prerequisite: CEES 3883 or Permission of Instructor. Study of fundamentals of traffic engineering; components of the traffic system; intersection types and design elements; basic variables of the traffic system (flow, capacity, level of service, delay); design and analysis of traffic signals and intersections; traffic control and traffic impact analysis; safety performance and traffic crash analysis; use of the Highway Capacity Manual and traffic analysis software. (F)

- CEES 4901 Introduction to CE Capstone 1 Credit Hour**
Prerequisite: CEES 3213, CEES 3363, and CEES 3663 or CEES 3673 (or concurrent enrollment). Introduction to the capstone design project, which is a two-semester-long, open-ended engineering design problem that requires applying the skills and techniques acquired in earlier engineering course work. This course will focus on introducing the project requirements; forming multi-disciplinary teams of students; developing team identities; assigning team roles; evaluating project constraints; and developing a project design schedule. (F)
- CEES 4903 Civil Engineering Capstone 3 Credit Hours**
Prerequisite: CEES 3213, and CEES 3363, and CEES 3663 or CEES 3673, and CEES 4901. Solution of major design problems by a team approach of disciplines. Problems to be varied within the areas of civil engineering (structural; geotechnical; and transportation) according to the student's major interest. The capstone project will be under direct faculty supervision. (Sp) [V].
- CEES 4911 Introduction to ES Capstone 1 Credit Hour**
Prerequisite: CEES 4114 or CEES 5114 (or concurrent enrollment), CEES 4324 or CEES 5324 (or concurrent enrollment). Introduction to the capstone design project, which is a two-semester-long, open-ended engineering design problem that requires applying the skills and techniques acquired in earlier engineering course work. This course will focus on introducing the project requirements; forming multi-disciplinary teams of students; developing team identities; assigning team roles; evaluating project constraints; and developing a project design schedule. (F)
- CEES 4913 Environmental Science Capstone 3 Credit Hours**
Prerequisite: CEES 4911 and CEES 4253 (or concurrent enrollment). The capstone experience draws upon undergraduate course work in environmental science, biology, chemistry, physics, mathematics, and related sciences. Student teams address a client-driven, open-ended, real-world problem. Faculty coordinators serve in advisory capacities only, introducing field, laboratory, and computer methods and coordinating class meetings and presentations. Any other in-class presentations cover non-traditional (non-technical) topics. (Sp) [V].
- CEES 4921 Introduction to EE Capstone 1 Credit Hour**
Prerequisite: CEES 3213, CEES 4114 or CEES 5114 (or concurrent enrollment), CEES 4324 or CEES 5324 (or concurrent enrollment). Introduction to the capstone design project, which is a two-semester-long, open-ended engineering design problem that requires applying the skills and techniques acquired in earlier engineering course work. This course will focus on introducing the project requirements; forming multi-disciplinary teams of students; developing team identities; assigning team roles; evaluating project constraints; and developing a project design schedule. (F)
- CEES 4923 Environmental Engineering Capstone 3 Credit Hours**
Prerequisite: CEES 4921 and CEES 4253 (or concurrent enrollment). The capstone experience is a course where students draw upon their undergraduate course work for analysis of an open-ended, real world problem. Faculty coordinators serve in advisory capacities only. All in-class presentations will cover non-traditional (non-technical) topics. Students are presumed to have been trained in basic natural and engineering sciences and introduced to environmental sampling/analysis and impact/risk assessment methods. (Sp) [V].
- CEES 4943 Air Quality Management 3 Credit Hours**
Prerequisite: CEES 2313 or CEES 2223 or instructor permission. Important aspects of air quality will be covered, including air quality legislation, major sources and effects of air pollutants, monitoring, atmospheric dispersion, and air quality modeling. (Sp)
- CEES 4951 Contemporary Topics in Professional Practice 1 Credit Hour**
Prerequisite: Junior standing in Civil Engineering or Environmental Engineering. Civil engineering is a dynamic profession, as methods of practice evolve to address the many pressing problems in today's built and natural environment. This course provides an introduction to contemporary topics in professional practice, such as basic concepts of sustainability in engineering design, modern tools for project management, and the role of business/policy considerations in practice. (F)
- CEES 4960 Directed Readings 1-4 Credit Hours**
1 to 4 hours. Prerequisite: good standing in University; permission of instructor and dean. May be repeated; maximum credit four hours. Designed for upper-division students who need opportunity to study a specific problem in greater depth than formal course content permits. (Irreg.)
- CEES 4970 Special Topics/Seminar 1-3 Credit Hours**
1 to 3 hours. Prerequisite: Senior standing or permission of instructor. May be repeated; maximum credit nine hours. Special topics or seminar course for content not currently offered in regularly scheduled courses. May include library and/or laboratory research and field projects. (Irreg.)
- CEES 4980 Environmental Science Senior Research 1-12 Credit Hours**
Prerequisite: senior standing. Maximum credit twelve hours. Intensive research investigation of a special project under the direction of a faculty member. (F, Sp, Su)
- CEES 4990 Independent Study 1-3 Credit Hours**
1 to 3 hours. Prerequisite: Senior standing and permission of instructor. May be repeated; maximum credit nine hours. Contracted independent study for a topic not currently offered in regularly scheduled courses. Independent study may include library and/or laboratory research and field projects. (Irreg.)
- CEES 4991 Introduction to AE Capstone 1 Credit Hour**
Prerequisite: CEES 3663 (or concurrent enrollment), CEES 3673 (or concurrent enrollment), CEES 4113, and AME 4653 (or concurrent enrollment). Introduction to the capstone design project, which is a two-semester-long, open-ended engineering design problem that requires applying the skills and techniques acquired in earlier engineering course work. This course will focus on introducing the project requirements; forming multi-disciplinary teams of students; developing team identities; assigning team roles; evaluating project constraints; and developing a project design schedule. (F)
- CEES 4993 Architecture Engineering Capstone 3 Credit Hours**
Prerequisite: CEES 3663, CEES 3673, CEES 4991 and AME 4653; CEES 4113 and CEES 4333 or concurrent enrollment. A capstone course emphasizing design of structural components and environmental systems of buildings. Requires students to have knowledge and skills from prerequisite courses to address a real-world, open-ended design problem. (Sp) [V].
- CEES 5010 Civil Engineering Problems 1-4 Credit Hours**
Prerequisite: senior or graduate standing and permission of instructor. May be repeated; maximum credit four hours for a master's program or six hours for a doctoral program, including hours taken as part of another graduate program. Independent or small group study under the supervision of one or more faculty members. (F, Sp, Su)
- CEES 5020 Special Topics in Civil Engineering 1-6 Credit Hours**
1 to 6 hours. Prerequisite: senior or graduate standing and permission of instructor. May be repeated with change of topic; maximum credit twelve hours. Examines subject matter in civil engineering not covered by existing course offerings as a regular course. (F, Sp, Su)

- CEES 5021 Technical Communications 1 Credit Hour**
Prerequisite: CEES graduate standing or permission of instructor. Focused on enabling students to improve oral and written communications skills. Examines appropriate formats for various technical publications, as well as methods and practices for developing effective oral presentations. Each student will be required to develop an oral presentation about his/her written product. (Sp)
- CEES 5103 Water Policy and Institutions 3 Credit Hours**
Prerequisite: Graduate standing or permission of instructor. This course examines the evolution of water policy in the United States and the substantive roles that federal and state water resource institutions have played. Students will gain an understanding of the legal and institutional frameworks within which water resources are managed and the broader implications of climate change for water security. (F)
- CEES 5113 Water Management Chemistry 3 Credit Hours**
Prerequisite: Graduate standing or permission of instructor. This course provides knowledge of water chemistry encountered in the management and assessment of water quality. Course goals are: 1) to become proficient interpreting water chemistry data so to be able to successfully evaluate the water quality status of a water resource, and 2) to know which specific water chemistry parameters are essential to measure for monitoring water quality problems. (F)
- CEES 5114 Aquatic Chemistry 4 Credit Hours**
(Slashlisted with 4114) Prerequisite: graduate standing, one year general chemistry. Environmental kinetics and thermodynamics in aquatic systems; acid/base, precipitation/solubility, metal complexation and oxidation/reduction reactions; environmental colloidal and solid-liquid interface chemistry. No student may earn credit for both 4114 and 5114 or Environmental Science 4114 and 5114. Laboratory. (F)
- CEES 5123 Climate Change and Impacts on Water Energy Food Nexus 3 Credit Hours**
Prerequisite: Graduate standing or permission of instructor. An interdisciplinary course to learn the basics of climate change and its impacts on the interactions among water, energy and food nexus. The course provides fundamental theories of climate change, water cycle, and technologies about renewable energy (hydro, wind, solar, ocean, biomass, geothermal) and non-renewable energy (fossil fuels). The course talks about global food production and teaches basic Python programming. (Sp)
- CEES 5133 Water Sustainability 3 Credit Hours**
(Crosslisted with CH E 5133) Prerequisite: Civil Engineering, Environmental Engineering, or Environmental Science Graduate standing; or permission of instructor. Introduction to water reclamation and reuse. Wastewater characteristics. Conventional approaches for wastewater treatment. Emerging materials and technologies for water remediation. Water reuse applications and outlook. (Irreg.)
- CEES 5153 Water Innovation: Technology, Policy, and Organizational Issues 3 Credit Hours**
Prerequisite: Graduate standing or permission of instructor. This course encompasses water technologies and their extended innovation processes in three substantive sections. A basic understanding of technological innovation frameworks precedes discussion of water systems. The second section addresses water policy in general as well as specific cases of policy innovation. The final section covers organizations and how they can become more innovative with respect to water systems. (Sp)
- CEES 5233 Biological Waste Treatment Design 3 Credit Hours**
Prerequisite: Graduate standing or permission of instructor. Waste treatment design using biological processes; emphasis on treatment biokinetics, municipal wastewater treatment processes, and design of municipal wastewater unit processes; application of biological treatment concepts to other wastes including industrial wastes, groundwater, and solid or hazardous wastes. (F)
- CEES 5243 Physical-Chemical Water Treatment 3 Credit Hours**
Prerequisite: graduate standing or permission of instructor. The course covers physical and chemical processes for water purification, primarily for drinking water treatment, including governing regulations (the Safe Drinking Water Act), reactor kinetics, coagulation, flocculation, sedimentation, filtration, disinfection, demineralization, taste and odor removal, and advanced treatment. (Sp)
- CEES 5244 Physicochemical Water Treatment Processes 4 Credit Hours**
Prerequisite: graduate standing or permission of instructor. Physical and chemical processes for drinking water, ground water and industrial water treatment. Processes discussed include coagulation/flocculation, gravity separation, filtration, disinfection, adsorption, advanced oxidation, and phase transfer (e.g., air stripping). (Sp even years)
- CEES 5313 Engineering Geology 3 Credit Hours**
Prerequisites: CEES 3363, CEES 3361 and permission of instructor. Understanding geology in engineering design and mitigation: topics include weathering and soil-forming processes; engineering properties of rock; landslides and debris flow (slope stability); fluvial processes and hazards; land subsidence; expansive soil; hazard, risk and land-use planning. (F)
- CEES 5323 Geosynthetics 3 Credit Hours**
Prerequisites: CEES 3363 and CEES 3361. To introduce students to concepts and design methods involving the use of geosynthetics in geotechnical and transportation engineering applications. (F)
- CEES 5324 Environmental Biology and Ecology 4 Credit Hours**
(Slashlisted with CEES 4324) Prerequisite: Graduate standing in CEES. Examines applied environmental biology; biological consequences of environmental impacts; mitigation of environmental impacts via biogeochemical, ecological and microbial processes. Laboratory No student may earn credit for both 4324 and 5324. (F)
- CEES 5343 Advanced Soil Mechanics 3 Credit Hours**
Prerequisites: CEES 3363, CEES 3361 and permission of instructor. Advanced treatment of theories and principles of shearing strength, stress distribution and settlement analysis. (F)
- CEES 5353 Introduction to Soil Dynamics 3 Credit Hours**
Prerequisite: Graduate Standing, CEES 3363 or permission of instructor. Review of basic concepts (single- and multi-degree of freedom system, wave propagation, behavior of dynamically loaded soils), liquefaction, vibrations of footings on elastic half space, analog models, dynamics of pile foundations, machine foundations, design of foundations for dynamic loads including earthquake loading. (Irreg.)
- CEES 5363 Ecological Engineering Science 3 Credit Hours**
(Slashlisted with CEES 4363) Prerequisite: senior or graduate standing. Exploration of the design of sustainable ecosystems integrating human society with its natural environment for the benefit of both. Uses a systems perspective that resilient and sustainable solutions involve working with natural ecological and biogeochemical processes and not against them, and require less fossil fuel input, produce less pollution, and represent cost-effective alternatives to traditional energy-and resource-intensive technologies. No student may earn credit for both 4363 and 5363. (Sp)

- CEES 5373 Water Resources Systems Modeling 3 Credit Hours**
 (Slashlisted with CEES 4373) Prerequisite: Graduate standing or permission of instructor. Theory and concept of water resources management. An in-depth study of theory of optimization, hydrologic modeling, reservoir and dams operation. Data analysis and computational methods for hydrology and water resources management. Special emphasis on system modeling and parameter tuning using automatic calibration approaches. Basic level of scientific programming. No student may earn credit for both 4373 and 5373. (F)
- CEES 5383 Earthquake Engineering 3 Credit Hours**
 Prerequisite: senior or graduate standing. To provide students with an understanding of the effects of earthquakes on civil engineering structures and analytical tools for their seismic analysis. (F)
- CEES 5393 Reinforced Soil Structures 3 Credit Hours**
 Prerequisites: CEES 3363 and CEES 3361. Introduce students to the analysis and design methods related to geotechnical structures reinforced with geosynthetics. The main focus of this course will be on reinforced soil walls, slopes and embankments. (Sp)
- CEES 5413 Soil-Structure Interaction 3 Credit Hours**
 Prerequisite: Graduate standing and CEES 3363, or permission of instructor. Introduction-definition, methods of solution; beams on deformable foundations; analysis and design of axially loaded structures – single pile, pile groups, retaining walls; plates on deformable foundations; role of interfaces and joints; wave equation for pile behavior. (Irreg.)
- CEES 5433 In-Situ Soil Testing 3 Credit Hours**
 Prerequisites: CEES 3363, CEES 3361 and permission of instructor. This is a "hands-on" course that focuses on conducting and interpreting laboratory and in-situ tests for geotechnical engineering. Topics can include but are not limited to drilling, sampling, soil characterization, triaxial shear testing, one-dimensional compression, flexible wall permeability testing, pressuremeter, cone penetrometer, borehole shear, and pile load testing. Laboratory (Sp)
- CEES 5443 Unsaturated Soil Mechanics 3 Credit Hours**
 Prerequisites: CEES 3363 and CEES 3361. Provide students with an understanding of the theoretical and practical fundamentals of unsaturated soil mechanics with applications in geotechnical engineering. (F)
- CEES 5473 Forensic Geotechnical Engineering 3 Credit Hours**
 Prerequisites: CEES 3363 and CEES 3361. Examines methods for investigating and analyzing geotechnical failures. Examples include slope failures, pavement subgrade failures, foundation failures, excessive seepage from earth dams, and excavation failures. The course also addresses the role of the engineer as a consultant and/or expert witness in legal cases involving geotechnical failures. (F or Sp)
- CEES 5493 Transportation and Land Development 3 Credit Hours**
 (Crosslisted with RCPL 5493) Prerequisite: graduate standing or permission. Study of interactions between land development activity and the transportation network. Application of planning and design techniques to manage the impacts of development upon the transportation system.
- CEES 5503 Highway Engineering 3 Credit Hours**
 Prerequisite: Graduate standing or permission of instructor. In this course, students will study geometric elements of highway design, with emphasis on highway safety and traffic flow, design controls, route analysis, and alignment. Highway engineering includes corridor selection, design of vertical and horizontal alignments, evaluation of earthwork requirements, drainage and culvert design, and safety considerations. (Su)
- CEES 5513 Traffic Engineering 3 Credit Hours**
 Prerequisite: Graduate standing or permission of instructor. This course focuses on traffic flow theory, analysis of traffic data, and advanced technology applications for data collection, traffic control, and real-time system management. It will include emphasis on highway capacity, signal integration, intelligent transportation systems (ITS), and impacts of advanced technology, including automated vehicles. (Sp)
- CEES 5523 Transportation Asset Management 3 Credit Hours**
 Prerequisite: Graduate standing or permission of instructor. This course focuses on fundamental elements of transportation asset management and application of its principles; explores the impetus, philosophy, and policy for implementing a long term, comprehensive plan for managing infrastructure assets; presents engineering and economic analysis concepts and processes used to evaluate and support strategic and systematic planning, finance, investment, performance, measurement, management, and preservation of a transportation system. (Su)
- CEES 5533 Multimodal Transportation 3 Credit Hours**
 Prerequisite: Graduate standing or permission of instructor. Course focuses on fundamental elements of system performance for the multimodal transportation system and application of its principles; explores the impetus, philosophy, and policy for implementing a long term, comprehensive plan; presents transportation modes, including land, air and marine, modal shift and impact; presents engineering/economic analysis concepts used to evaluate and support planning, design, and financing processes for multimodal system. (Sp)
- CEES 5543 Hazards Mitigation & Community Resilience 3 Credit Hours**
 Prerequisite: Graduate standing or permission of instructor. This course will address, describe, and quantify in time and space the physical phenomena of several natural and man-made hazards. Students will learn about the current best practices and identify novel approaches to mitigate such risks and hazards to be able to sustain and protect the well-being of the residents as well as the infrastructure systems in the community. (F)
- CEES 5583 Water Law 3 Credit Hours**
 Prerequisite: Graduate standing or permission of instructor. A course for non-lawyers that explores systems of water rights; riparian, appropriation, and prescriptive rights; stream, surface, and ground water; development of water supplies; nationwide conflicts; water pollution control; federal and Indian rights and federal water resource issues and problems, so that water managers, environmental scientists or policy makers can provide needed input to threats to and protection of water. (Su)
- CEES 5623 Watershed Management and Restoration 3 Credit Hours**
 Prerequisite: Graduate standing or permission of instructor. Course provides a comprehensive examination of watershed assessment, management, planning, protection, and restoration. Processes governing drainage-basin scale physiography, hydrology, hydrogeomorphology, and ecology are examined, emphasizing water quality-driven approaches to watershed management and restoration. (F even years)

- CEES 5624 Biological Waste Treatment 4 Credit Hours**
Treatment of waste using biological processes; emphasis on treatment kinetics, municipal wastewater treatment processes, and design of municipal wastewater unit processes; application of biological treatment concepts to other wastes including industrial wastes, groundwater, and solid or hazardous wastes. Laboratory (F)
- CEES 5643 Quantitative Hydrometeorology 3 Credit Hours**
(Crosslisted with METR 5643) Prerequisite: Graduate standing or permission of instructor. Theory and concept of hydrometeorology and remote sensing, across atmospheric science and hydrology and across water science and engineering. An in-depth study of precipitation estimation from in-situ, radar, satellite, uncertainty modeling and decision making. Data analysis and computational methods for hydrometeorology. Special emphasis on probabilities/statistics and decision making. Basic level of scientific programming is helpful but not mandatory. (Irreg.)
- CEES 5653 Advanced Mechanics of Materials 3 Credit Hours**
Prerequisite: CEES 2153 or PE 2153 and senior or graduate standing. Principal stresses and strains; theories of failure; introduction to elasticity; unsymmetrical bending and shear; torsion of noncircular solid cross sections, cellular sections and open sections; introduction to plate bending and buckling. (F)
- CEES 5663 Structural Analysis II 3 Credit Hours**
Prerequisite: Graduate standing and CEES 3413, or permission of instructor. This course addresses many of the classical methods used in the analysis of structures before the advent of the computer, such as virtual work, force method, slope-deflection, and approximate methods. Second-order analysis, stability, and matrix methods are also covered, and modern structural analysis software is introduced. (Sp)
- CEES 5673 Colloid and Surface Science 3 Credit Hours**
(Crosslisted with CH E 5673) Prerequisite: Civil Engineering, Environmental Engineering, or Environmental Science Graduate standing or permission of instructor. Capillarity, surface thermodynamics, adsorption from vapor and liquid phases, contact angles, micelle formation, solubilization, emulsions and foams. Applications to be discussed include detergency, enhanced oil recovery and adsorption for pollution control. (Irreg.)
- CEES 5683 Dynamics of Structures 3 Credit Hours**
Prerequisite: Graduate standing, CEES 3263, and CEES 3413. Topics covered include free vibration, forced vibration, and transient response of structures having one, multiple or infinite number of degrees-of-freedom; structural damping effects; numerical solution techniques; Lagrange's equation of motion; and Rayleigh-Ritz method. General matrix formulation for multiple degrees-of-freedom and modal coordinate transformation. Introduction to earthquake engineering concepts. (F)
- CEES 5693 Structural Design of Pavements 3 Credit Hours**
Prerequisites: CEES 3363, 3361 and 3883. Effect of load and climate on the design of rigid and flexible pavements and interaction of pavement components. (Irreg.)
- CEES 5713 Structural Design - Masonry 3 Credit Hours**
Prerequisite: Graduate standing or permission of instructor. A course for students who desire to learn how to design structures using a composite material such as masonry. From its historical use to the modern design involving reinforced masonry, the student will become familiar with the material properties, the different structural elements and their role in transferring horizontal and vertical loads. Code provisions will be reviewed throughout the course. (Sp)
- CEES 5723 Design of RC Structures with Fiber Reinforced Polymers 3 Credit Hours**
Prerequisite: Graduate standing or permission of instructor. This class will be focused on understanding behavior of Fiber Reinforced Polymer (FRP) materials; the design of reinforced concrete structures using FRP reinforcement; the strengthening of existing structures using FRP materials. (F)
- CEES 5733 Hydroclimatology 3 Credit Hours**
(Crosslisted with METR 5733) Prerequisite: Graduate standing or permission of instructor. Theory and concept of hydroclimatology across atmospheric science and hydrology. An in-depth study of the local to global climate of precipitation with specific foci on drought, pluvials, and how they vary in a changing climate system. Data analysis and computational methods for hydroclimatology. Basic level of scientific programming is helpful but not mandatory. (Su)
- CEES 5763 Introduction to Finite Element Method 3 Credit Hours**
(Crosslisted with AME 5763) Prerequisite: graduate standing. Weighted residual and variational approaches. Finite element formulation for rod, truss and beam elements; plane stress and plane strain problem; axisymmetric and three-dimensional analysis; isoparametric elements; conforming and nonconforming plate and shell elements. (Sp)
- CEES 5773 Structural Design--Steel II 3 Credit Hours**
Prerequisite: CEES 3663. Advanced structural steel design including steel deck diaphragms, column and beam bracing, composite beam design, rigid frame design, torsional member design, plate girder design, and design of building connections. (F or Sp)
- CEES 5783 Structural Design--Concrete II 3 Credit Hours**
Prerequisite: CEES 3673. Advanced reinforced concrete behavior and design including limit design, anchorage slender columns, truss models for shear and torsion on beams, two-way and flat slabs, and the art of detailing. (F or Sp)
- CEES 5793 Design of Prestressed Concrete Structures 3 Credit Hours**
Prerequisite: CEES 3673. Design procedures for pretensioned and post-tensioned concrete structures, with emphasis on the behavior of prestressed concrete. Topics include methods of analysis, time dependent effects, fabrication and construction procedures, connections, highway bridges, frames, composite construction, continuous structures, and anchorage zone detailing. (Irreg.)
- CEES 5813 Water Treatment, Reuse, and Health Impacts 3 Credit Hours**
Prerequisite: Graduate standing or permission of instructor. An introduction to water quality applications and the health impacts of water and wastewater. The course covers the basic principles of public health epidemiology and water-related diseases. Conventional and advanced water treatment methods are presented, along with various types of potable and non-potable water reuse to supplement public water supply in times of water stress. (Sp)
- CEES 5833 Ground Water Quality Protection 3 Credit Hours**
Prerequisite: graduate standing or permission. Introduction to ground water quality protection. Covers sources of ground water, ground water hydrology, ground water information sources, ground water pollution sources, subsurface transport and fate processes and monitoring of ground water systems. (F)

- CEES 5843 Hydrology 3 Credit Hours**
(Slashlisted with CEES 4843) Prerequisite: Graduate standing or permission of instructor. Hydrology is the study of water across the globe. This is an applied course on hydrology dealing with environmental water problems; principles of hydrologic systems, their structure and components; and methods of analysis and their application to various purposes of water resources planning and development. No student may earn credit for both 4843 and 5843. (Sp)
- CEES 5853 Groundwater and Seepage 3 Credit Hours**
Prerequisite: graduate standing in civil engineering, environmental engineering, environmental science, geology or permission of instructor. An applied course dealing with properties of aquifers, modeling of groundwater flow, groundwater hydrology and its interrelation with surface water, well hydraulics, pumping tests and safe yield of aquifers. (F)
- CEES 5873 Water Quality Management 3 Credit Hours**
Prerequisite: MATH 3113, and graduate standing, or instructor permission. Water quality in lakes, rivers, estuaries; chemical, physical and biological aspects of marine and fresh waters; waste assimilation; system modeling; water quality management; waste load allocation, and engineer controls. (Sp)
- CEES 5883 Environmental Modeling 3 Credit Hours**
Prerequisite: MATH 3113, graduate standing or instructor permission. Introduction to theoretical and practical issues of computer-based environmental modeling. Covers problem formulation, implementation, and application. Topical areas include conceptualizing problems, conservation laws, partial differential equations, numerical methods, and applications ranging from coastal hydrodynamics to contaminant transport. Emphasis on understanding the model process rather than using "canned" models. (F)
- CEES 5903 Remote Sensing Hydrology 3 Credit Hours**
Prerequisite: senior standing, or graduate standing, or permission of instructor. Overview of various orbital satellite platforms/sensors and introduces advances in remote sensing hydrology from space-borne observations, state-of-the-art retrieval algorithms for hydrological variables, and ground validation strategies. Required for Hydrology minors. (Sp)
- CEES 5933 Climate Change and Water Sustainability 3 Credit Hours**
Prerequisite: Graduate standing or permission of instructor. This seminar course is for students who wish to understand the Earth's climate variability and water sustainability. In the context of an integrated Earth climate system, the course provides an overview of global water resources, impacts of climate change on various systems, and recommends practical responses to mitigate climate change. (F)
- CEES 5960 Directed Readings 1-3 Credit Hours**
1 to 3 hours. Prerequisite: graduate standing and permission of department. May be repeated; maximum credit twelve hours. Directed readings and/or literature reviews under the direction of a faculty member. (F, Sp, Su)
- CEES 5963 Water Security 3 Credit Hours**
Prerequisite: Graduate standing or permission of instructor. This course defines water security as existing at the water quantity-quality-equity nexus, looks at historical examples of water insecurity, discusses major water security challenges (e.g., natural disasters, global warming, the water-food-energy nexus, urbanization, transboundary issues) as well as responses to these challenges (e.g., water resilience plans, LID, desalination/reuse technologies, developing a water ethic) and evaluates pioneering water security initiatives. (Sp)
- CEES 5970 Special Topics/Seminar 1-3 Credit Hours**
1 to 3 hours. Prerequisite: Graduate standing or permission of instructor. May be repeated; maximum credit nine hours. Special topics or seminar course for content not currently offered in regularly scheduled courses. May include library and/or laboratory research and field projects. (Irreg.)
- CEES 5973 Fundamental Hydrology 3 Credit Hours**
Prerequisite: Graduate standing or permission of instructor. A science-based course for students who desire to be water managers, environmental scientists, or policy makers. The course provides a quantitative introduction to atmospheric, surface, and subsurface hydrology. Modules present the storage and movement of water between the environmental compartments, the effect of human activities on the natural water cycle, and the threats to and protection of water security. (Sp)
- CEES 5980 Research for Master's Thesis 2-9 Credit Hours**
Variable enrollment, two to nine hours; maximum credit applicable toward degree, four hours. (F, Sp, Su)
- CEES 5982 CEES Non-Thesis Project 2 Credit Hours**
Prerequisite: graduate standing and instructor permission. This is for all CEES non-thesis students to take as their final project for their non-thesis defense. Each student with their faculty advisor will determine what the project will cover. Each student will be required to develop an oral presentation about his/her written project. (F, Sp, Su)
- CEES 5990 Independent Study 1-3 Credit Hours**
1 to 3 hours. Prerequisite: Graduate standing and permission of instructor. May be repeated; maximum credit nine hours. Contracted independent study for a topic not currently offered in regularly scheduled courses. Independent study may include library and/or laboratory research and field projects. (Irreg.)
- CEES 6663 Advanced Finite Element Methods 3 Credit Hours**
(Crosslisted with AME 6663) Prerequisite: 5763. Selected topics such as: nonlinear material problems, plasticity, creep (visco-plasticity), fracture, etc.; geometrically nonlinear problems, large displacement and structural stability; dynamic problems and analytical solution procedures; soil-structure interactions; application of finite element method to fluid and heat transfer problem. (Irreg.)
- CEES 6960 Directed Readings 1-3 Credit Hours**
1 to 3 hours. Prerequisite: graduate standing or permission of instructor. May be repeated; maximum credit six hours. Directed readings and/or literature review under the direction of a faculty member. (Irreg.)
- CEES 6970 Special Topics/Seminar 1-3 Credit Hours**
1 to 3 hours. Prerequisite: graduate standing or permission of instructor. May be repeated; maximum credit 12 hours. Special topics or seminar course for content not currently offered in regularly scheduled courses. May include library and/or research and field projects. (Irreg.)
- CEES 6980 Research for Doctoral Dissertation 2-16 Credit Hours**
2 to 16 hours. Prerequisites: Graduate standing and permission of instructor; may be repeated. Directed research culminating in the completion of the doctoral dissertation. (F, Sp, Su)
- CEES 6990 Independent Study 1-3 Credit Hours**
1 to 3 hours. Prerequisite: Graduate standing and permission of instructor. May be repeated; maximum credit nine hours. Contracted independent study for a topic not currently offered in regularly scheduled courses. Independent study may include library and/or laboratory research and field projects. (Irreg.)

Faculty

Last Name	First/Middle Name	Middle init.	OU Service start	Title(s), date(s) appointed	Degrees Earned, Schools, Dates Completed
Bounds	Tommy	D.	2023	ASSISTANT PROFESSOR OF CIVIL ENGINEERING AND ENVIRONMENTAL SCIENCE, 2023	PhD, Univ. of Oklahoma 2020; MS, Univ. of Oklahoma 2013; BS, Univ. of Oklahoma 2012
Bui	Ngoc		2020	ASSISTANT PROFESSOR OF CIVIL ENGINEERING AND ENVIRONMENTAL SCIENCE, 2020; ASSISTANT PROFESSOR OF CHEMICAL, BIOLOGICAL AND MATERIALS ENGINEERING, 2020	PhD, Univ. of Connecticut, 2014; MS, Chonnam National Univ., 2007; BS, HoChiMinh City Univ. of Technology, 2005
Butler	Elizabeth		1999	PROFESSOR OF CIVIL ENGINEERING AND ENVIRONMENTAL SCIENCE, 2010	PhD, Univ of Michigan, 1998; MS, Univ of Maryland, 1991; BS, Univ of Maryland, 1985
Cerato	Amy		2005	ROBERT GLENN RAPP FOUNDATION PRESIDENTIAL PROFESSOR, 2009; PROFESSOR OF CIVIL ENGINEERING AND ENVIRONMENTAL SCIENCE, 2016	PhD, Univ of Massachusetts, 2005; MS, Univ of Massachusetts, 2004; MS, Univ of Massachusetts, 2001; BS, Lafayette College, 1999
Dresback	Kendra	M	1997	ASSISTANT PROFESSOR OF CIVIL ENGINEERING AND ENVIRONMENTAL SCIENCE, 2023, RESEARCH ASSISTANT PROFESSOR OF CIVIL ENGINEERING AND ENVIRONMENTAL SCIENCE, 2008; ADJUNCT ASSISTANT PROFESSOR OF CIVIL ENGINEERING AND ENVIRONMENTAL SCIENCE, 2017	PhD, Univ of Oklahoma, 2005; MS, Univ of Oklahoma, 1999; BS, Univ of Oklahoma, 1997
Floyd	Royce		2012	ASSOCIATE PROFESSOR OF CIVIL ENGINEERING AND ENVIRONMENTAL SCIENCE, 2018	PhD, Univ of Arkansas, 2012; BS, Univ of Arkansas, 2008
Han	Lori	A.	2023	ASSISTANT PROFESSOR OF CIVIL ENGINEERING AND ENVIRONMENTAL SCIENCE, 2023	PhD, Univ. of Minnesota, 2018; MS, Univ. of Minnesota, 2012; BS, Univ. of Minnesota 2010
Harvey	Philip	S	2014	ASSOCIATE PROFESSOR OF CIVIL ENGINEERING AND ENVIRONMENTAL SCIENCE, 2020	PhD, Duke Univ, 2013; MS, Duke Univ, 2012; BS, Duke Univ, 2009
Hatami	Kianoosh		2004	PROFESSOR OF CIVIL ENGINEERING AND ENVIRONMENTAL SCIENCE, 2017; PRESIDENT'S ASSOCIATES PRESIDENTIAL PROFESSOR, 2018	PhD, McMaster Univ, 1997; MS, Univ of Iran, 1991; BS, Univ of Iran, 1987
Hong	Yang		2007	CIMMS FELLOW, 2007; ADJUNCT ASSOCIATE PROFESSOR OF METEOROLOGY, 2011; PROFESSOR OF CIVIL ENGINEERING AND ENVIRONMENTAL SCIENCE, 2012; VPR PRESIDENTIAL RESEARCH PROFESSOR, 2014; DIRECTOR, INSTITUTE FOR HYDROMETEOROLOG' AND WATER ENGINEERING, 2017	PhD, Univ of Arizona, 2003; MS, Peking Univ, 1999; BS, Peking Univ, 1996
Kibbey	Tohren	C	1999	PROFESSOR OF CIVIL ENGINEERING AND ENVIRONMENTAL SCIENCE, 2010; LLOYD G. AND JOYCE AUSTIN PRESIDENTIAL PROFESSOR, 2016	PhD, Univ of Michigan, 1997; MSE, Univ of Michigan, 1993; BSE, Univ of Michigan, 1991
Kirstetter	Pierre-Emmanuel		2019	ASSOCIATE PROFESSOR OF CIVIL ENGINEERING AND ENVIRONMENTAL SCIENCE, 2019; ASSOCIATE PROFESSOR OF METEOROLOGY, 2019	PhD, Joseph Fourier Universty, 2008; MS, Joseph Fourier University, 2005; MS Ecole Nationale Supérieure d'Hydraulique et de Mecanique of Grenoble, 2004
Knox	Robert		1986	SAMUEL ROBERTS NOBLE PRESIDENTIAL PROFESSOR, 1998; PROFESSOR OF CIVIL ENGINEERING AND ENVIRONMENTAL SCIENCE, 2001; TED A. KRITIKOS PROFESSOR OF CIVIL ENGINEERING, 2006	PhD, Univ of Oklahoma, 1983; MS, Univ of Oklahoma, 1979; BS, Univ of Oklahoma, 1978
Kolar	Randall		1995	LLOYD G. AND JOYCE AUSTIN PRESIDENTIAL PROFESSOR, 2008; DAVID ROSS BOYD PROFESSOR OF CIVIL ENGINEERING AND ENVIRONMENTAL SCIENCE, 2014; SUN OIL COMPANY CHAIR IN CIVIL ENGINEERING AND ENVIRONMENTAL SCIENCE, 2023	PhD, Univ of Notre Dame, 1992; BS, Univ of Idaho, 1983

Kyprioti	Aikaterini	2022	ASSISTANT PROFESSOR OF CIVIL ENGINEERING AND ENVIRONMENTAL SCIENCE, 2022	PhD, Univ of Notre Dame, 2022; MS, Univ of Notre Dame, 2022; MS, Aristotle Univ of Thessaloniki, 2016; BS, Aristotle Univ of Thessaloniki, 2014	ENVIRONMENTAL SCIENCE, 2019; DIRECTOR, OKLAHOMA WATER SURVEY, 2017	A&M Univ, 1997; BS, Univ of Nebraska, 1995
Miller	Gerald A	1994	PROFESSOR OF CIVIL ENGINEERING AND ENVIRONMENTAL SCIENCE, 2007; ROBERT GLENN RAPP FOUNDATION PRESIDENTIAL PROFESSOR, 2013	PhD, Univ of Massachusetts, 1994; MS, Clarkson, 1989; BS, Clarkson, 1987	ASSOCIATE PROFESSOR OF CIVIL ENGINEERING AND ENVIRONMENTAL SCIENCE, 2013	PhD, Pennsylvania State Univ, 2008; MS, Pennsylvania State Univ, 1987; BS, Pennsylvania State Univ, 1985
MuraleetharaKanthasamy		1994	PRESIDENT'S ASSOCIATES PRESIDENTIAL PROFESSOR, 2005; DAVID ROSS BOYD PROFESSOR OF CIVIL ENGINEERING AND ENVIRONMENTAL SCIENCE, 2009; KIMMELL-BERNARD CHAIR IN ENGINEERING, 2010	PhD, Univ of California Davis, 1990; MS, Univ of California Davis, 1987; BS, Sri Lanka Univ, 1983	KERR MCGEE PRESIDENTIAL PROFESSOR, 1997; AARON ALEXANDER PROFESSOR IN CIVIL ENGINEERING, 2002; DAVID ROSS BOYD PROFESSOR OF CIVIL ENGINEERING AND ENVIRONMENTAL SCIENCE, 2003; PROFESSOR OF PETROLEUM AND GEOLOGICAL ENGINEERING, 2009; ALUMNI CHAIR IN PETROLEUM AND GEOLOGICAL ENGINEERING, 2014	PhD, Univ of Arizona, 1982; MS, Carleton Univ, 1979; BS, Bangladesh Univ of Engr & Tech, 1975
Nairn	Robert	1997	PROFESSOR OF CIVIL ENGINEERING AND ENVIRONMENTAL SCIENCE, 2012; SAM K. VIERSON FAMILY FOUNDATION PRESIDENTIAL PROFESSOR, 2014; DAVID L. BOREN PROFESSOR, 2017; ROBERT W. HUGHES PROFESSOR IN ENGINEERING, 2022	PhD, Ohio State Univ, 1996; BS, Juniata College, 1989	ASSISTANT PROFESSOR OF CIVIL ENGINEERING AND ENVIRONMENTAL SCIENCE, 2018	PhD, Univ of California Irvine, 2015; MS, Univ of California, 2010; BS, Tsinghua Univ, 2009
Nanny	Mark A	1996	PROFESSOR OF EARTH AND ENERGY, 2010; PROFESSOR OF CIVIL ENGINEERING AND ENVIRONMENTAL SCIENCE, 2010	PhD, Univ of Illinois, 1994; MS, Univ of Illinois, 1989; BS, Wayne State, 1986	Zaman Musharraf 1982	
Pei	Jinsong	2002	ASSOCIATE PROFESSOR OF CIVIL ENGINEERING AND ENVIRONMENTAL SCIENCE, 2008	PhD, Columbia Univ, 2001; M Engr, Nanyang Tech Univ, 1997; B Engr, Xi'an Jiaotong Univ, 1989		
Sadri	Arif	2022	ASSISTANT PROFESSOR OF CIVIL ENGINEERING AND ENVIRONMENTAL SCIENCE, 2022	Phd, Purdue Univ, 2016; MS, Purdue Univ, 2012; BS, Bangladesh Univ of Engr & Tech, 2011		
Strevett	Keith	1995	DAVID ROSS BOYD PROFESSOR OF CIVIL ENGINEERING AND ENVIRONMENTAL SCIENCE, 2018	PhD, Univ of Connecticut, 1995; BS, Michigan State Univ, 1992; BS, Michigan State Univ, 1992		
Vemuganti	Shreya	2021	ASSISTANT PROFESSOR OF CIVIL ENGINEERING AND ENVIRONMENTAL SCIENCE, 2021	PhD, Univ of New Mexico, 2021; MS, Univ of New Mexico, 2016; BE, Osmania Univ, 2014		
Vogel	Jason R	2017	PROFESSOR OF CIVIL ENGINEERING AND	PhD, Oklahoma State Univ, 2001; MS, Texas		

Architectural Engineering, B.S.

Minimum Total Credit Hours: 130

Overall GPA - Combined and OU: 2.00

Major GPA - Combined and OU: 2.00

Curriculum GPA - Combined and OU: 2.00

Program Code: B035

This program has changes pending State Regents approval for 2024/25. These pending changes are not reflected here.

Bachelor of Science in Architectural Engineering accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org>, under the General Criteria and the Architectural and Similarly Named Program Criteria.

In order to progress in your curriculum in the Gallogly College of Engineering, and as a specific graduation requirement, a **grade of C** or better is required in each course in the curriculum, including all prerequisite courses.

Major Requirements

Code	Title	Credit Hours
Required Courses		
AME 2213	Thermodynamics	3

AME 3173	Heat Transfer	3
AME 4653	Air Conditioning Systems	3
ARCH 1263	Methods II - Pattern of Architecture	3
ARCH 2243	History of the Built Environment I	3
ARCH 2363	Materials and Form	3
CEES 1000	CEES Seminar (minimum of four semesters required)	0
CEES 1111	Exploring CEES	1
CEES 2113	Statics	3
CEES 2153	Mechanics of Materials	3
CEES 2213	CADD Fundamentals	3
CEES 2223	Fluid Mechanics	3
CEES 3263	Introduction to Dynamics for Architectural and Civil Engineers	3
CEES 3361	Soil Mechanics Laboratory	1
CEES 3363	Soil Mechanics	3
CEES 3403	Materials	3
CEES 3413	Structural Analysis I	3
CEES 3453	Introduction to Construction Management	3
CEES 3663	Structural Design - Steel I	3
CEES 3673	Structural Design - Concrete I	3
CEES 4113	Building Lighting and Electrical Systems	3
CEES 4333	Foundation Engineering	3
CEES 4753	Structural Design - Wood	3
CEES 4991	Introduction to AE Capstone	1
CEES 4993	Architecture Engineering Capstone	3
ENGR 2431	Electrical Circuits	1
ENGR 3401	Engineering Economics	1
Professional Elective		
Choose any 3000-level or higher course in CEES

		71

Major Support Requirements

Code	Title	Credit Hours
Math and Science		
MATH 2924	Differential and Integral Calculus II	4
MATH 2934	Differential and Integral Calculus III	4
MATH 3113	Introduction to Ordinary Differential Equations	3
PHYS 2524	General Physics for Engineering and Science Majors	4
Choose one of the following:		
GEOL 1114	Physical Geology for Science and Engineering Majors (Core II-Lab)	4
Basic Science Elective		
Math (calculus or above)		
Additional College Requirements		
ENGR 1410	¹	0
ENGR 1411	Pathways to Engineering Thinking ¹	1

ENGR 2002	Professional Responsibilities and Skills of Engineers and Scientists	2
Total Credit Hours		22

¹ Engineering transfer students may take ENGR 3410 in place of ENGR 1410 and ENGR 3511 in place of ENGR 1411.

General Education and College Requirements

Courses designated as Core I, II, III, IV, or V are part of the General Education curriculum. Students must complete a minimum of 40 hours of General Education courses, chosen from the approved list, including at least one upper-division Gen. Ed. course outside of the student's major. **Courses graded P/NP will not apply.**

A grade of C or better is required in each course in the curriculum, including all prerequisite courses.

UNIVERSITY-WIDE GENERAL EDUCATION (MINIMUM 40 HOURS) AND COLLEGE REQUIREMENTS

Code	Title	Credit Hours
Core Area I: Symbolic and Oral Communication		
<i>English Composition</i>		
ENGL 1113	Principles of English Composition	3
ENGL 1213	Principles of English Composition	3
	or EXPO 1213 Expository Writing	
<i>Language (0-10 hours in the same language)</i>		
This requirement can be met by two years of the same language in high school:		0-10
Beginning Course (0-5 hours)		
Beginning Course, continued (0-5 hours)		
<i>Mathematics</i>		
MATH 1914	Differential and Integral Calculus I (Core I) 1,2	4
Core Area II: Natural Science (including one laboratory)		
PHYS 2514	General Physics for Engineering and Science Majors (Core II) ²	4

<i>Western Culture</i>		
HIST 1483	United States to 1865	3
	or HIST 1493 United States, 1865 to the Present	
Will be satisfied in major requirements		
ARCH 2243	History of the Built Environment I (Core IV-Western Culture)	0
<i>World Culture</i>		
ANTH 4623	Approaches to Cross-Cultural Human Problems (or approved substitute Core IV-World Culture) ³	3

Core Area V: First-Year Experience

Choose one course ³	3
Total Credit Hours	37-47

¹ MATH 1823, MATH 2423, MATH 2433, and MATH 2443 sequence can be substituted for MATH 1914, MATH 2924, and MATH 2934.

² Major support requirements that also satisfy University General Education requirements.

³ To be chosen from the University-Wide General Education Approved Course List. Three of these hours must be upper-division (3000-4000).

Free Electives

Electives to bring total applicable hours to the minimum total required for the degree including a minimum of 40 upper-division hours.

Suggested Semester Plan of Study

Bachelor of Science in Architectural Engineering accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org>, under the General Criteria and the Architectural and Similarly Named Program Criteria.

In order to progress in your curriculum in the Gallogly College of Engineering, and as a specific graduation requirement, a grade of C or better is required in each course in the curriculum, including all prerequisite courses.

Two college-level courses in a single world language are required; this may be satisfied by successful completion of 2 years in a single world language in high school. Students who must take a language at the University will have an additional 6-10 hours of coursework.

Freshman

First Semester		Credit Hours
ENGL 1113	Principles of English Composition (Core I)	3
Choose one of the following:		4
GEOL 1114	Physical Geology for Science and Engineering Majors (Core II-Lab)

Program Code: B405

This program has changes pending State Regents approval for 2024/25. These pending changes are not reflected here.

In order to progress in your curriculum in the Gallogly College of Engineering, and as a specific graduation requirement, a **grade of C** or better is required in each course in the curriculum, including all prerequisite courses.

Major Requirements

Code	Title	Credit Hours
Required Courses		
CEES 1000	CEES Seminar (minimum of four semesters required)	0
CEES 1111	Exploring CEES	1
CEES 2213	CADD Fundamentals	3
CEES 2313	Water Quality Fundamentals	3
CEES 2323	Environmental Transport and Fate Process	3
CEES 4114	Aquatic Chemistry	4
CEES 4253	Statistics and Probability	3
CEES 4263	Hazardous and Solid Waste Management	3
CEES 4324	Environmental Biology and Ecology	4

CEES 4843	Hydrology	3
or CEES 5843	Hydrology	
CEES 4911	Introduction to ES Capstone	1
CEES 4913	Environmental Science Capstone	3
CEES 4943	Air Quality Management	3

Professional Electives

Choose any two 3000-level or higher course in CEES (one three-hour professional elective can be taken outside CEES with advisor approval)	6
---	---

Total Credit Hours **40**

Major Support Requirements

Code	Title	Credit Hours
------	-------	--------------

Math and Science

Choose one of the following: 4

BIOL 1134 Introductory Biology: Evolution, Ecology and Diversity

or PBIO 1114 General Botany

Choose one of the following: 3

BIOL 3403 Principles of Ecology

or PBIO 3453 Principles of Plant Ecology

CHEM 1415 General Chemistry (Continued) 5

or CHEM 1435 General Chemistry II: Signature Course

CHEM 3053 Organic Chemistry I: Biological Emphasis 3

CHEM 3153 Organic Chemistry II: Biological Emphasis 3

MATH 2423 Calculus and Analytic Geometry II 3

MBIO 2815 Introduction to Microbiology 5

PHYS 2524 General Physics for Engineering and Science Majors 4

or PHYS 2424 General Physics for Life Science Oriented Majors

Track Electives

Choose three courses (See Student Handbook for the list of Track electives) 9

Additional College Requirements

ENGR 1410 ¹ 0

ENGR 1411 Pathways to Engineering Thinking ¹ 1

ENGR 2002 Professional Responsibilities and Skills of Engineers and Scientists 2

Total Credit Hours **42**

¹ Engineering transfer students may take ENGR 3410 in place of ENGR 1410 and ENGR 3511 in place of ENGR 1411.

General Education and College Requirements

Courses designated as Core I, II, III, IV, or V are part of the General Education curriculum. Students must complete a minimum of 40 hours of General Education courses, chosen from the approved list, including at least one upper-division Gen. Ed. course outside of the student's major. **Courses graded P/NP will not apply.**

A grade of C or better is required in each course in the curriculum, including all prerequisite courses.

UNIVERSITY-WIDE GENERAL EDUCATION (MINIMUM 40 HOURS) AND COLLEGE REQUIREMENTS

Code	Title	Credit Hours
Core Area I: Symbolic and Oral Communication		
<i>English Composition</i>		
ENGL 1113	Principles of English Composition	3
ENGL 1213	Principles of English Composition	3
or EXPO 1213	Expository Writing	
<i>Language (0-10 hours in the same language)</i>		
This requirement can be met by two years of the same language in high school:		0-10
Beginning Course (0-5 hours)		
Beginning Course, continued (0-5 hours)		
<i>Mathematics</i>		
MATH 1823	Calculus and Analytic Geometry I (Core I) ¹ , 2	3
Core Area II: Natural Science (including one laboratory)		
PHYS 2514	General Physics for Engineering and Science Majors (Core II) ²	4
or PHYS 2414	General Physics for Life Science Oriented Majors	
CHEM 1315	General Chemistry (Core II-Lab) ²	5
or CHEM 1335	General Chemistry I: Signature Course	
Core Area III: Social Science		
P SC 1113	American Federal Government	3
Choose one course ³		3
Core Area IV: Arts & Humanities		
<i>Artistic Forms</i>		
Choose one course ³		3
<i>Western Culture</i>		
HIST 1483	United States to 1865	3
or HIST 1493	United States, 1865 to the Present	
HSTM 3333	Technology and Society in World History (or approved substitute Core IV-Western Culture) ³	3
<i>World Culture</i>		
ANTH 4623	Approaches to Cross-Cultural Human Problems (or approved substitute Core IV-World Culture) ³	3
Core Area V: First-Year Experience		
Choose one course ³		3
Total Credit Hours		39-49

¹ MATH 1914, MATH 2924, and MATH 2934 sequence can be substituted with MATH 1823, MATH 2423, MATH 2433, and MATH 2443.

² Major support requirements that also satisfy University General Education requirements.

³ To be chosen from the University-Wide General Education Approved Course List. Three of these hours must be upper-division (3000-4000). See list in the Class Schedule.

Free Electives

Electives to bring total applicable hours to the minimum total required for the degree including a minimum of 40 upper-division hours.

Suggested Semester Plan of Study

In order to progress in your curriculum in the Gallogly College of Engineering, and as a specific graduation requirement, a grade of C or better is required in each course in the curriculum, including all prerequisite courses.

Two college-level courses in a single world language are required; this may be satisfied by successful completion of 2 years in a single world language in high school. Students who must take a language at the University will have an additional 6-10 hours of coursework.

Freshman

First Semester	Credit Hours
ENGL 1113 Principles of English Composition (Core I)	3
CHEM 1315 General Chemistry (Core II-Lab) ¹	5
MATH 1823 Calculus and Analytic Geometry I (Core I) ²	3
ENGR 1410 ³	0
ENGR 1411 Pathways to Engineering Thinking ³	1
Approved Elective: First-Year Experience (Core V) ⁵	3
Credit Hours	15

Second Semester

BIOL 1134 Introductory Biology: Evolution, Ecology and Diversity (Core II-Lab) or PBIO 1114 or General Botany	4
ENGL 1213 Principles of English Composition (Core I) or EXPO 1213 or Expository Writing	3
CHEM 1415 General Chemistry (Continued) (Core II-Lab) ¹	5
MATH 2423 Calculus and Analytic Geometry II ²	3
CEES 1111 Exploring CEES	1
Credit Hours	16

Sophomore

First Semester	Credit Hours
CHEM 3053 Organic Chemistry I: Biological Emphasis	3
PHYS 2514 General Physics for Engineering and or PHYS 2414 Science Majors (Core II) or General Physics for Life Science Oriented Majors	4
CEES 2313 Water Quality Fundamentals	3
CEES 1000 CEES Seminar ⁴	0
CEES 2213 CADD Fundamentals	3
BIOL 3403 Principles of Ecology or PBIO 3453 or Principles of Plant Ecology	3
Credit Hours	16

Second Semester

CHEM 3153 Organic Chemistry II: Biological Emphasis	3
MBIO 2815 Introduction to Microbiology (Core II-Lab)	5
CEES 2323 Environmental Transport and Fate Process	3
CEES 1000 CEES Seminar ⁴	0
ENGR 2002 Professional Responsibilities and Skills of Engineers and Scientists	2
HIST 1483 United States to 1865 (Core IV) or HIST 1493 or United States, 1865 to the Present	3
Credit Hours	16

Junior**First Semester**

CEES 1000	CEES Seminar ⁴	0
CEES 4263	Hazardous and Solid Waste Management	3
PHYS 2524 or PHYS 2424	General Physics for Engineering and Science Majors or General Physics for Life Science Oriented Majors	4
CEES Track Elective ⁷		3
CEES Track Elective ⁷		3
Credit Hours		13

Second Semester

ANTH 4623	Approaches to Cross-Cultural Human Problems (or approved substitute) (Core IV, World Culture)	3
Approved Elective: Artistic Forms (Core IV) ⁵		3
CEES 4843/5843	Hydrology	3
CEES 1000	CEES Seminar ⁴	0
CEES 4253	Statistics and Probability	3
CEES 4943	Air Quality Management	3
Credit Hours		15

Senior**First Semester**

HSTM 3333	Technology and Society in World History (or approved substitute) (Core IV, West. Culture)	3
CEES 1000	CEES Seminar ⁴	0
CEES 4911	Introduction to ES Capstone	1
CEES Professional Elective ⁶		3
CEES 4114	Aquatic Chemistry	4
CEES 4324	Environmental Biology and Ecology	4
Credit Hours		15

Second Semester

CEES 4913	Environmental Science Capstone	3
CEES 1000	CEES Seminar ⁴	0
CEES Track Elective ⁷		3
CEES Professional Elective ⁶		3
Approved Elective: Social Science (Core III) ⁵		3
P SC 1113	American Federal Government (Core III)	3
Credit Hours		15
Total Credit Hours		121

¹ CHEM 1315 and CHEM 1415 can be substituted with CHEM 1335 (Fall only) and CHEM 1435 (Spring only), respectively.

² MATH 1914, MATH 2924, and MATH 2934 sequence can be substituted for MATH 1823, MATH 2423, MATH 2433, and MATH 2443.

³ Engineering transfer students may take ENGR 3410 in place of ENGR 1410 and ENGR 3511 in place of ENGR 1411.

⁴ Students must complete a minimum of four semesters of CEES 1000.

⁵ To be chosen from the University-Wide General Education Approved Course List. Three of these hours must be upper-division (3000-4000). See list in the Class Schedule.

⁶ Professional electives can be chosen from any 3000-level or higher course in CEES. One three-hour professional elective can be taken outside CEES with advisor approval.

⁷ See CEES Undergraduate Student Handbook for the list of Track electives.

Courses designated as Core I, II, III, IV or V are part of the General Education curriculum. Students must complete a minimum of 40 hours of General Education courses, chosen from the approved list.

Track electives are covered by footnote #7 and professional electives are covered by footnote #6.

Environmental Science, Minor

Minimum Total Credit Hours: 16

Minimum Upper-Division Hours: 10

Program Code: N405

The requirements for a minor must be completed concurrently with the major degree requirements.

No minor may be added by completing courses after receiving the bachelor's degree.

Students must complete at least nine (9) minor hours in residence at the University of Oklahoma.

At least 9 credit hours will be in upper division courses (3000 or 4000 level).

Students must complete the following courses prior to application to the minor: MATH 1823/MATH 1914, MATH 2423/MATH 2924, CHEM 1315, CHEM 1415, BIOL 1134 or PBIO 1114, and PHYS 2514 or PHYS 2414.

A minimum grade of C is required in all courses which are applied to the minor and in all prerequisite courses for the minor.

Students must complete prerequisites for all courses.

Required Courses

Code	Title	Credit Hours
CEES 2313	Water Quality Fundamentals (Fall only)	3
CEES 2323	Environmental Transport and Fate Process (Spring only)	3
CEES 4263	Hazardous and Solid Waste Management (G) (Fall only)	3
CEES 4114 or CEES 4324	Aquatic Chemistry (Fall only) Environmental Biology and Ecology	4
Choose one of the following:		3
CEES 4243	Water Technologies for Emerging Regions (Spring only)	
ENGR 4513	Introduction to Sustainable Engineering (odd Springs only)	
CEES 4000 or 5000-level course with permission of advisor		
Total Credit Hours		16

Minors are available to all undergraduate students at OU. If the minor is officially declared, successfully completed, and noted on the graduation application, the student's transcript will so indicate at the time the bachelor's degree is posted.

Water and Sanitation for Health and Sustainable Development, Minor

Minimum Total Credit Hours: 18
Minimum Upper-Division Hours: 9

Program Code: N861

The requirements for a minor must be completed concurrently with the major degree requirements.

No minor may be added by completing courses after receiving the bachelor's degree.

Students must declare their intention to seek this minor by completing a short (one-page) application and meet with an Engineering advisor. As part of the application, the student must submit a one-page essay in response to the question: "Why I wish to pursue a minor in Water and Sanitation for Health and Sustainable Development."

At least 9 credit hours will be in upper division courses (3000 or 4000 level).

A minimum of six (6) hours of elective coursework must be taken from outside the student's major area of study.

Elective courses may require additional prerequisites for admission. Students are responsible for identifying and completing those prerequisites.

A minimum grade of C is required in all courses which are applied to the minor.

Students must achieve a minimum 2.75 GPA (OU and overall) in the minor coursework.

Students must complete prerequisites for all courses.

Required Courses

Code	Title	Credit Hours
Core Courses ¹		
CEES 4243	Water Technologies for Emerging Regions (G) (Spring)	3
CEES 4273	WaTER Technical Field Methods (G) (May/Early Summer)	3
CEES 3422	Intercultural Immersion Experience in an Emerging Region	2
CEES 3251	WaTER Center Integrated Seminar	1
Tracks		
Choose 9 hours from at least 2 of the following tracks pre-approved by advisor.		9
Track 1: Engineering & Technology, Natural and Physical Sciences (p. 1315)		
Track 2: Policy, Economics, and Business (p. 1315)		
Track 3: Social/Cultural/Behavioral Sciences (p. 1315)		
Total Credit Hours		18

¹ It is preferred that the core courses are completed in the following order.

Track 1: Engineering & Technology, Natural and Physical Sciences

Code	Title	Credit Hours
CEES 5020	Special Topics in Civil Engineering ¹	1-6
BSE 5113	Principles of Epidemiology (OUHSC)	3
CEES 5363	Ecological Engineering Science (G)	3
ENGR 4513	Introduction to Sustainable Engineering	3
GEOG 3233	Principles of Sustainability	3
GEOG 4293	Hydrologic Science	3
Or similar course(s) with advisor approval		

¹ Course recommended to fulfill the elective requirements.

Track 2: Policy, Economics, and Business

Code	Title	Credit Hours
ENT 3193	Social Entrepreneurship ¹	3
IAS 3323	The Political Economy of Development	3
HSTM 3483	Technology, Politics, and International Development	3
Upper-level language course (beyond that required by OU)		
Or similar course(s) with advisor approval		

¹ Course recommended to fulfill the elective requirements.

Track 3: Social/Cultural/Behavioral Sciences

Code	Title	Credit Hours
ANTH 4303	Women and Development in Africa ¹	3
ANTH 3423	Anthropology of Religion	3
IAS 2003	Understanding the Global Community	3
GEOG 3443	Environment and Society	3
Upper-level language course (beyond that required by OU)		
Or similar course(s) with advisor approval		

¹ Course recommended to fulfill the elective requirements.

Minors are available to all undergraduate students at OU. If the minor is officially declared, successfully completed, and noted on the graduation application, the student's transcript will so indicate at the time the bachelor's degree is posted.

Architectural Engineering, B.S./Civil Engineering, M.S.

Minimum Total Credit Hours: 150-156

Overall GPA - Combined and OU: 3.00
Major GPA - Combined and OU: 3.00

Curriculum GPA - Combined and OU: 3.00

Program Code: A035/F188, F189

This program has changes pending State Regents approval for 2024/25. These pending changes are not reflected here.

Bachelor of Science in Architectural Engineering accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org>, under the General Criteria and the Architectural and Similarly Named Program Criteria.

In order to progress in your curriculum in the Gallogly College of Engineering, and as a specific graduation requirement, a **grade of C** or better is required in each course in the curriculum, including all prerequisite courses.

Major Requirements

Code	Title	Credit Hours
Required Courses		
AME 2213	Thermodynamics	3

General Education and College Requirements

Courses designated as Core I, II, III, IV, or V are part of the General Education curriculum. Students must complete a minimum of 40 hours of General Education courses, chosen from the approved list, including at least one upper-division Gen. Ed. course outside of the student's major. **Courses graded P/NP will not apply.**

A grade of C or better is required in each course in the curriculum, including all prerequisite courses.

UNIVERSITY-WIDE GENERAL EDUCATION (MINIMUM 40 HOURS) AND COLLEGE REQUIREMENTS

Code	Title	Credit Hours
Core Area I: Symbolic and Oral Communication		
<i>English Composition</i>		
ENGL 1113	Principles of English Composition	3
ENGL 1213	Principles of English Composition	3
or EXPO 1213	Expository Writing

ANTH 4623	Approaches to Cross-Cultural Human Problems (or approved substitute Core IV-World Culture) ³	3
Core Area V: First Year Experience		
ENGR 1413	Pathways to Engineering Thinking (Core V-FYE) ⁴	3
Total Credit Hours		37-47

¹ MATH 1823, MATH 2423, MATH 2433, and MATH 2443 sequence can be substituted for MATH 1914, MATH 2924, and MATH 2934.

² Major support requirements that also satisfy University General Education requirements.

³ To be chosen from the University-Wide General Education Approved Course List. Three of these hours must be upper-division (3000-4000).

⁴ Transfer students will need to meet the requirements of the first-year experience course as well as the engineering transfer course. Please see your advisor for your specific enrollment.

Free Electives

Electives to bring total applicable hours to the minimum total required for the degree including a minimum of 40 upper-division hours.

Bachelor of Science in Architectural Engineering accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org>, under the General Criteria and the Architectural and Similarly Named Program Criteria.

In order to progress in your curriculum in the Gallogly College of Engineering, and as a specific graduation requirement, a grade of C or better is required in each course in the curriculum, including all prerequisite courses.

Admission to the accelerated program is by application and requires a minimum GPA of 3.20 and an overall GPA of 3.00. Once admitted, students must maintain an overall GPA of 3.00 during the bachelors. Students may enter the accelerated program based on the undergraduate degree pattern offered in the year they first enrolled in the Oklahoma State System of Higher Education or later. Students are eligible for graduate status upon graduation with the Bachelor of Science in Architectural Engineering.

Two college-level courses in a single world language are required; this may be satisfied by successful completion of 2 years in a single world language in high school. Students who must take a language at the University will have an additional 6-10 hours of coursework.

- ¹ MATH 1823, MATH 2423, MATH 2433, and MATH 2443 sequence can be substituted for MATH 1914, MATH 2924, and MATH 2934.
- ² Transfer students will need to meet the requirements of the first-year experience course as well as the engineering transfer course. Please see your advisor for your specific enrollment.
- ³ Students must complete a minimum of four semesters of CEES 1000.
- ⁴ CHEM 1315 can be substituted with CHEM 1335 (Fall only).
- ⁵ Professional Elective can be chosen from any 3000-level or higher course in CEES
- ⁶ To be chosen from the University-Wide General Education Approved Course List. Three of these hours must be upper-division (3000-4000). See list in the Class Schedule.
- ⁷ Depending on which concentration students have chosen for the masters, they must choose either on-campus thesis option, on-campus non-thesis option, or online non-thesis option. The on-campus thesis students will take CEES 5021, CEES 5980 (5-credit hours), and one 3-credit hour graduate level elective. The on-campus non-thesis students will take three, 3-credit hour graduate level electives. The online non-thesis students will take three, 3-credit hour required concentration courses.
- ⁸ Graduate level elective must be chosen from a list of MSCE electives maintained by the department and approved by the Graduate College.
- ⁹ Shared courses: 3-9 credit hours may count towards both the bachelors and masters degrees. If less hours are shared, total hours for the degree will increase. See concentration requirements for more information on shared course options.

Courses designated as Core I, II, III, IV, or V are part of the General Education curriculum. Students must complete a minimum of 40 hours of General Education courses, chosen from the approved list.

Concentration Requirements

Shared Hours: Accelerated students may dual count 3-9 hours of coursework with graduate credit between the BS/MS. If less hours are shared, then the total hours for the degree will increase.

Thesis/Non-Thesis Options

The Non-Thesis degree is a coursework-only degree; a Non-Thesis examination is not required.

or CHEM 1335 General Chemistry I: Signature Course

Core Area III: Social Science

P SC 1113 American Federal Government 3

Choose one course ³ 3

Core Area IV: Arts & Humanities*Artistic Forms*

Choose one course ³ 3

Western Culture

HIST 1483 United States to 1865 3

or HIST 1493 United States, 1865 to the Present

HSTM 3333 Technology and Society in World History (or approved substitute Core IV-Western Culture) ³ 3

World Culture

ANTH 4623 Approaches to Cross-Cultural Human Problems (or approved substitute Core IV-World Culture) ³ 3

Core Area V: First-Year Experience

Choose one course ³ 3

Total Credit Hours 40-50

¹ MATH 1823, MATH 2423, MATH 2433, and MATH 2443 sequence can be substituted for MATH 1914, MATH 2924, and MATH 2934.

² Major support requirements that also satisfy University General Education requirements.

³ To be chosen from the University-Wide General Education Approved Course List. Three of these hours must be upper-division (3000-4000). See list in the Class Schedule.

Free Electives

Electives to bring total applicable hours to the minimum total required for the degree including a minimum of 40 upper-division hours.

Suggested Semester Plan of Study

Bachelor of Science in Civil Engineering accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org>, under the General Criteria and the Civil and Similarly Named Program Criteria.

In order to progress in your curriculum in the Gallogly College of Engineering, and as a specific graduation requirement, a grade of C or better is required in each course in the curriculum, including all prerequisite courses.

Admission to the accelerated program is by application and requires a minimum major GPA of 3.20 and overall GPA of 3.00. Once admitted,

students must maintained an overall GPA of 3.00 during the bachelors. Students may enter the accelerated program based on the undergraduate degree pattern offered in the year they first enrolled in the Oklahoma State System of Higher Education or later. Students are eligible for graduate status upon graduation with the Bachelor of Science in Civil Engineering.

Two college-level courses in a single world language are required; this may be satisfied by successful completion of 2 years in a single world language in high school. Students who must take a language at the University will have an additional 6-10 hours of coursework.

NON-THESIS OPTION (ONLINE)

The Non-Thesis degree is a coursework-only degree; a Non-Thesis examination is not required.

• **Water Resources Engineering (Online) F191 Q699**

Code	Title	Credit Hours
Core Courses ¹		
ENGR 4223	Fundamentals of Project Management	3
CEES 5853	Groundwater and Seepage	3
ENGR 4013	Leadership and Management for Engineers	3
GIS 5013	Fundamentals of Geographic Information Systems	3
METR 5633	Hydrometeorology	3
CEES 5583	Water Law	3
CEES 4123	Open Channel Flow	3
CEES 5373	Water Resources Systems Modeling	3
CEES 5843	Hydrology	3

CEES 5963	Water Security	3	CEES 4951	Contemporary Topics in Professional Practice	1
or CEES 5813	Water Treatment, Reuse, and Health Impacts				

¹ ArchE Accel. BS can share (3 hours) one professional elective from MS required courses.

Environmental Engineering, B.S./M.S.

Minimum Total Credit Hours: 146

Overall GPA - Combined and OU: 3.00

Major GPA - Combined and OU: 3.00

Curriculum GPA - Combined and OU: 3.00

Program Code: A390/F390

This program has changes pending State Regents approval for 2024/25. These pending changes are not reflected here.

Bachelor of Science in Environmental Engineering accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org>, under the General Criteria and the Environmental Engineering and Similarly Named Program Criteria.

In order to progress in your curriculum in the Gallogly College of Engineering, and as a specific graduation requirement, a **grade of C** or better is required in each course in the curriculum, including all prerequisite courses.

Major Requirements

Code	Title	Credit Hours
Required Courses		
CEES 1000	CEES Seminar (minimum of four semesters required)	0
CEES 1111	Exploring CEES	1
CEES 2113	Statics	3

CEES 4923	Environmental Engineering Capstone	3
CEES 4943	Air Quality Management	3

Total Credit Hours **51**

Major Support Requirements

Code	Title	Credit Hours
Math and Science		
CHEM 1415	General Chemistry (Continued)	5
or CHEM 1435	General Chemistry II: Signature Course	
CHEM 3053	Organic Chemistry I: Biological Emphasis	3
MATH 2924	Differential and Integral Calculus II	4
MATH 2934	Differential and Integral Calculus III	4
MATH 3113	Introduction to Ordinary Differential Equations	3
PHYS 2524	General Physics for Engineering and Science Majors	4
Professional Electives		
	Choose any two 3000-level or higher course in CEES (one three-hour professional elective can be taken outside CEES with advisor approval)	6
Additional College Requirements		
ENGR 1410	¹	0
ENGR 1411	Pathways to Engineering Thinking ¹	1
ENGR 2002	Professional Responsibilities and Skills of Engineers and Scientists	2
ENGR 2461	Thermodynamics	1
ENGR 3401	Engineering Economics	1
Total Credit Hours		34

¹ Engineering transfer students may take ENGR 3410 in place of ENGR 1410, and ENGR 3511 in place of ENGR 1411.

Graduate Requirements

Accelerated students may dual count nine hours of graduate-level electives as approved by their advisor.

All elective courses are subject to the following restrictions: (i) one 3000G course outside CEES may be used toward the degree; (ii) no more than 9 credits of 4000G courses from CEES, including required core courses, may count toward the master's degree; (iii) no more than 12 credits of 4000G courses from all departments, including CEES, may count toward the master's degree; (iv) and no more than 9 hours from departments outside CEES may count toward the master's degree.

Thesis Option

Code	Title	Credit Hours
Required Courses		
CEES 5114	Aquatic Chemistry	4
CEES 5244	Physicochemical Water Treatment Processes	4
CEES 5624	Biological Waste Treatment	4
CEES 5021	Technical Communications	1
Electives		

Elective coursework from a list of MS Env. Engr. electives maintained by the department and approved by the Graduate College (p. 1339) ¹

Thesis		Credit Hours
CEES 5980	Research for Master's Thesis	5
Total Credit Hours		30

¹ MS Env. Engr. students may choose elective courses in civil engineering, environmental engineering, environmental science, mathematics, meteorology, computer science, and/or related subjects. Graduate courses not listed here may also be used as electives with advisor's prior approval.

Non-Thesis Option

The Non-Thesis degree is a coursework-only degree; a Non-Thesis examination is not required.

Code	Title	Credit Hours
Required Courses		
CEES 5114	Aquatic Chemistry	4
CEES 5244	Physicochemical Water Treatment Processes	4
CEES 5624	Biological Waste Treatment	4

Total Credit Hours		30

¹ MS Env. Engr. students may choose elective courses in civil engineering, environmental engineering, environmental science, mathematics, meteorology, computer science, and/or related subjects. Graduate courses not listed here may also be used as electives with advisor's prior approval.

General Education and College Requirements

Courses designated as Core I, II, III, IV, or V are part of the General Education curriculum. Students must complete a minimum of 40 hours of General Education courses, chosen from the approved list, including at least one upper-division Gen. Ed. course outside of the student's major. **Courses graded P/NP will not apply.**

A grade of C or better is required in each course in the curriculum, including all prerequisite courses.

UNIVERSITY-WIDE GENERAL EDUCATION (MINIMUM 40 HOURS) AND COLLEGE REQUIREMENTS

Code	Title	Credit Hours
Core Area I: Symbolic and Oral Communication

CHEM 1315 General Chemistry (Core II-Lab) ² 5
or CHEM 1335 General Chemistry I: Signature Course

Core Area III: Social Science

P SC 1113 American Federal Government 3

Choose one course ³ 3

Core Area IV: Arts & Humanities

Artistic Forms

Choose one course ³ 3

Western Culture

HIST 1483 United States to 1865 3

or HIST 1493 United States, 1865 to the Present

HSTM 3333 Technology and Society in World History (or approved substitute Core IV-Western Culture) ³ 3

World Culture

ANTH 4623 Approaches to Cross-Cultural Human Problems (or approved substitute Core IV-World Culture) ³ 3

Core Area V: First-Year Experience

Choose one course ³ 3

Total Credit Hours 40-50

¹ MATH 1823, MATH 2423, MATH 2433, and MATH 2443 sequence can be substituted for MATH 1914, MATH 2924, and MATH 2934.

² Major support requirements that also satisfy University General Education requirements.

³ To be chosen from the University-Wide General Education Approved Course List. Three of these hours must be upper-division (3000-4000). See list in the Class Schedule.

Free Electives

Electives to bring total applicable hours to the minimum total required for the degree including a minimum of 40 upper-division hours.

Suggested Semester Plan of Study

Bachelor of Science in Environmental Engineering accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org>, under the General Criteria and the Environmental Engineering and Similarly Named Program Criteria.

In order to progress in your curriculum in the Gallogly College of Engineering, and as a specific graduation requirement, a grade of C or better is required in each course in the curriculum, including all prerequisite courses.

Admission to the accelerated program is by application and requires a minimum major GPA of 3.20 and an overall GPA of 3.00. Once admitted, students must maintain an overall GPA of 3.00 during the bachelors. Students may enter the accelerated program based on the undergraduate degree pattern offered in the year they first enrolled in the Oklahoma State System of Higher Education or later. Students are eligible for graduate status upon graduation with the Bachelor of Science in Environmental Engineering.

Two college-level courses in a single world language are required; this may be satisfied by successful completion of 2 years in a single world language in high school. Students who must take a language at the University will have an additional 6-10 hours of coursework.

Freshman

⁷ See CEES Undergraduate Student Handbook for the list of Track electives.

⁸ Dependent upon whether a student chooses the thesis or non-thesis option: Non-thesis students will take two, 3-credit hour graduate level electives. Thesis students will take CEES 5021 and CEES 5980 (5-credit hours).

⁹ Graduate level elective must be chosen from the list of MES electives maintained by the department and approved by the Graduate College.

¹⁰ Shared courses: up to 9 hours may count toward both the bachelors and masters degrees. If less hours are shared, then total hours for the degree will increase. Options include: CEES 4253, CEES 4263, CEES 5114, CEES 5324, or Professional Elective(s). If CEES 5114 is

taken as a shared course in the Senior year, then a graduate elective will substitute for the CEES 5114 requirement in the Fifth year.

Courses designated as Core I, II, III, IV or V are part of the General Education curriculum. Students must complete a minimum of 40 hours of General Education courses, chosen from the approved list.

Civil Engineering: Geotechnical Engineering, M.S.

Minimum Total Hours (Thesis): 30

Minimum Total Hours (Non-Thesis): 30

Program Code: M190 Q282

All elective courses are subject to the following restrictions: (i) one 3000G course outside CEES may be used toward the degree; (ii) no more than 9 credits of 4000G courses from CEES, including required core courses, may count toward the master's degree; (iii) no more than 12 credits of 4000G courses from all departments, including CEES, may count toward the master's degree; and (iv) no more than 9 hours from departments outside CEES may count toward the master's degree.

The School limits the number of transfer credit hours to nine.

General Requirements for all Master’s Degrees

The master’s degree requires the equivalent of *at least* two semesters of satisfactory graduate work and additional work as may be prescribed for the degree.

All coursework applied to the master’s degree must carry graduate credit.

Master’s degree programs which require a thesis consist of *at least* 30 credit hours. All non-thesis master’s degree programs require *at least* 30 credit hours.

Credit transferred from other institutions must meet specific criteria and is subject to certain limitations.

Courses completed through correspondence study may *not* be applied to the master’s degree.

To qualify for a graduate degree, students must achieve an overall grade point average of 3.0 or higher in the degree program coursework and in all resident graduate coursework attempted. A student must also have at least a 3.0 in all coursework (including undergraduate coursework if any).

Additional information for master’s degree students may be found in the Graduate College Bulletin.

¹ MS Env. Engr. students may choose elective courses in civil engineering, environmental engineering, environmental science, mathematics, meteorology, computer science, and/or related subjects. Graduate courses not listed here may also be used as electives with the advisor's prior approval.

General Requirements for all Master's Degrees

The master's degree requires the equivalent of *at least* two semesters of satisfactory graduate work and additional work as may be prescribed for the degree.

All coursework applied to the master's degree must carry graduate credit.

Master's degree programs which require a thesis consist of *at least* 30 credit hours. All non-thesis master's degree programs require *at least* 30 credit hours.

Credit transferred from other institutions must meet specific criteria and is subject to certain limitations.

Courses completed through correspondence study may *not* be applied to the master's degree.

To qualify for a graduate degree, students must achieve an overall grade point average of 3.0 or higher in the degree program coursework and in all resident graduate coursework attempted. A student must also have at least a 3.0 in all coursework (including undergraduate coursework if any).

Additional information for master's degree students may be found in the Graduate College Bulletin.

Choose a minimum of 6 hours of coursework outside the department.

Dissertation Research

CEES 6980	Research for Doctoral Dissertation	2-41
-----------	------------------------------------	------

Total Credit Hours	90
---------------------------	-----------

General Requirements for Doctoral Degrees

A student should expect to spend at least the equivalent of three full academic years beyond the bachelor's degree to obtain the doctoral degree. During this period the student will take appropriate graduate coursework, successfully complete the general examination, and successfully defend and submit the final dissertation.

All coursework applied to the doctoral degree must carry graduate credit.

The doctoral degree requires at least 90 post-baccalaureate hours, including both formal coursework and hours of research.

The minimum hour requirement for a specific doctoral degree program cannot be waived.

No more than one-half of the credit hours, both OU and overall, excluding Research for Doctoral Dissertation (6980), may be *S/U*-graded coursework.

The student must be in residence at OU for at least two consecutive 16-week semesters during the pursuit of the doctoral degree while enrolled and engaged in coursework or research activities as prescribed by the major academic unit.

For more detailed regulations and requirements for Doctoral degrees, please consult the Graduate College Bulletin: <http://www.ou.edu/gradcollege/forms/bulletin>

General Information

School History

Graduate instruction and research in computer science began in 1969 at the University of Oklahoma with the creation of a unit called Information and Computing Sciences. This unit was under the direct supervision of the Provost until 1972, when it became part of the College of Engineering. An undergraduate program in computer science was added in 1976, and computer science became an integral part of the School of Electrical Engineering, which was later renamed as the School of Electrical Engineering and Computer Science. The first MS, degree in computer science was awarded in 1972, the first PhD, in 1973, and the first undergraduate degree in 1979-80. Computer Science remained in the School of Electrical Engineering and Computer Science until 1992, when the School of Computer Science was formed.

Beginning with the Spring 2010 semester, The School of Computer Science moved our operations to Devon Energy Hall. The five-story, 103,000-square-foot Devon Energy Hall has some of the latest in technological advancement in its classrooms, team rooms, teaching labs and research space, providing the best for our students of today and tomorrow.

Program Mission Statement

To generate and disseminate durable knowledge within and around the rapidly evolving discipline of computer science by:

- Educating bachelors, masters, and doctoral degree candidates within our discipline.
- Contributing to the education of degree candidates in related fields, including mathematics, meteorology, computer engineering, industrial and systems engineering, and electrical engineering.
- Generating knowledge in theoretical and applied topics within and around our discipline and disseminating the results.
- Contributing to professional societies within and around our discipline.
- Producing graduates who are highly sought by industry, government and universities.

Programs & Facilities

Research & Teaching Laboratories

The primary research and teaching laboratories of the School of Computer Science are located in Devon Energy Hall, which was opened in 2010, with additional facilities located nearby in the Engineering Quad. These labs support research and instruction in areas including algorithms & high-performance computing; artificial intelligence/machine

learning; bioinformatics, computational biology, and neuroscience; computer security & cryptography; databases & data mining; networks & networking; and visualization & visual analytics.

Computer Science Assistantships & Scholarships

The School of Computer Science is able to support many students with various scholarships through University, Gallogly College of Engineering, and Computer Science program-specific opportunities. The requirements for these scholarships vary from merit-based to financial need. The department takes pride in the fact that many of the scholarships available to current and prospective students are set up by CS alumni. All scholarships for Computer Science are housed in and managed by the Scholarships Office and the OU Student Financial Center via the CASH portal. Graduate teaching and/or research assistantships (GTAs/GRAs) may be granted to Doctoral/Ph.D. and Masters/M.S. students in the program, with priority issued to high-achieving graduate students who have progressed further into their respective graduate program and who have established consistent rapport with faculty. Any interest in a graduate assistantship should be initially directed to the student's faculty advisor or desired faculty advisor. Admission to the program does not guarantee financial assistance.

Computer Science Software Studio

The Computer Science Software Studio provides student the opportunity to:

- Work on approved out-of-class projects with state-of-the-art software and hardware tools
- Be a part of collaborative teams
- Gain additional hands-on experience
- Participate in software competitions
- Connect with and learn from professionals in your field
- Contribute to both app and game development
- Enjoy tech talks and seminars

Undergraduate

Computer Science Program Educational Objectives (PEO)

- Graduates succeed in problem-solving professions using computer science expertise.
- Graduates succeed in software design and development careers.
- Graduates may pursue and complete advanced degrees in computer science or other fields.

Computer Science Undergraduate Student Outcomes

- Analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions.
- Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.
- Communicate effectively in a variety of professional contexts.
- Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
- Function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline.

The program criterion pertaining to Student Outcomes for Computer Science programs is as follows:

- Apply computer science theory and software development fundamentals to produce computing-based solutions.

Bachelor of Science

The Computer Science (p. 1352) Bachelor of Science provides a broad and flexible undergraduate curriculum. In addition to the general university requirements in the humanities and sciences, computer science students take courses covering the fundamentals of the discipline; courses in mathematics, natural science; and computer science. Bachelor of Science in Computer Science accredited by the Computing Accreditation Commission of ABET, <https://www.abet.org>, under the General Criteria and the Computer Science and Similarly Named Computing Programs Program Criteria.

Minors

Students who wish to pursue a minor in computer science are strongly encouraged to check their proposed program with either the Williams Student Services Center for the College of Engineering (325-4096, Felgar Hall - Rm 112) or Dr. Deborah A. Trytten (dtrytten@ou.edu, Devon Energy Hall - Rm 252).

- Computer Science Minor (p. 1355)
- Computational Technology Minor (p. 1356)

Computer Science, Bachelor of Science/Master of Science

The accelerated Computer Science Bachelor of Science/Master of Science (p. 1357) program allows students to pursue a graduate degree in conjunction with the undergraduate degree requirements. Bachelor of Science in Computer Science accredited by the Computing Accreditation Commission of ABET, <https://www.abet.org>, under the General Criteria and the Computer Science and Similarly Named Computing Programs Program Criteria.

Graduate

Master of Science

The Computer Science, Master of Science (p. 1360) degree is designed for those wishing to improve their professional competence or to prepare for work towards a doctoral degree.

Doctoral Program

The Computer Science (p. 1361) doctoral degree program aims to prepare and develop professionals capable of conducting and directing research within the discipline of computer science.

Courses

C S 1213 Programming for Non-Majors with Python 3 Credit Hours

Prerequisite: Mathematics 1503 or concurrent enrollment. Introduction to the design and implementation of computer programs in the language Python. We will cover data types, control flow, iterations, functions, and the use of external libraries for text processing, graphics, image manipulation, web programming and others. Emphasis on problem solving with examples drawn from diverse disciplines. (F, Sp)

C S 1313 Programming for Non-Majors with C 3 Credit Hours

Prerequisite: MATH 1523 or concurrent enrollment. Introduction to the design and implementation of computer programs. Emphasis on problem solving. Topics include: variables and constants, arithmetic and Boolean expressions, conditional statements, loops, procedures and functions, arrays, standard libraries, input and output, structures, and program documentation. (F, Sp)

C S 1321 Java for Programmers 1 Credit Hour

Prerequisite: Departmental Permission; and Math 1523 or MATH 1743 or equivalent or concurrent enrollment, or placement into Math 1823 or higher. Introduction to computer programming using the Java programming language for students who are already proficient in another programming language. Topics include: variables and constants, arithmetic and Boolean expressions, conditional statements, repetition, methods, arrays, linear and binary search, basic sorting algorithms, object-oriented programming, documentation, and testing. Students may not take this class after passing CS 2334. (F, Sp)

C S 1323 Introduction to Computer Programming for Programmers 3 Credit Hours

Prerequisite: Departmental Permission; and Math 1523 or MATH 1743 or equivalent or concurrent enrollment, or placement into Math 1823 or higher. Introduction to the design and implementation of computer software with an emphasis on abstraction and program organization for students with some prior programming experience. Topics include: variables and constants, arithmetic and Boolean expressions, conditional statements, repetition, methods, arrays, linear and binary search, basic sorting algorithms, object-oriented programming, documentation, and testing. Students may not take this class after passing CS 2334. (F, Sp)

C S 1324 Introduction to Computer Programming for Non-Programmers 4 Credit Hours

Prerequisite: Departmental Permission; and Math 1523 or MATH 1743 or equivalent or concurrent enrollment, or placement into Math 1823 or higher. Introduction to the design and implementation of computer software with an emphasis on abstraction and program organization for students with no prior programming experience. Topics include: variables and constants, arithmetic and Boolean expressions, conditional statements, repetition, methods, arrays, linear and binary search, basic sorting algorithms, object-oriented programming, documentation, and testing. Students may not take this class after passing CS 2334. (F, Sp)

C S 2334 Programming Structures and Abstractions 4 Credit Hours

Prerequisite: C S 1323 or 1321 or 1324, and MATH 1523 or higher. The design and implementation of computer programs using disciplined methodologies. Use of several abstract data types. Software reuse through encapsulation, composition, aggregation, inheritance, polymorphism, and generics. Topics include recursion, GUI development, file processing, and unit testing. A program design tool will be used. Introduction to ethics in computer science, including philosophical ethics theories. Discussion of intellectual property rights and privacy. (F, Sp)

C S 2413 Data Structures 3 Credit Hours

Prerequisite: C S 2334 and MATH 1823 or 1914; and C S 2813 or MATH 2513, or concurrent enrollment in C S 2813 or MATH 2513. Representation, analysis and implementation of data structures and associated algorithms including: algorithm complexity, sorting algorithms, lists, stacks, queues, search trees (AVL, Red-Black, Splay, 2-3), Heaps, Graphs, and Hashing. Written communications required in some projects. Ethical issues and tools and techniques used in writing secure applications will also be discussed. The primary programming language is C++ with a debugging tool. (F, Sp)

- C S 2414 Data Structures** **4 Credit Hours**
Prerequisite: C S 2334 and MATH 1823 or 1914; and C S 2813 or MATH 2513, or concurrent enrollment in C S 2813 or MATH 2513. Representation, analysis and implementation of data structures and associated algorithms including: algorithm complexity, sorting algorithms, lists, stacks, queues, search trees (AVL, Red-Black, Splay, 2-3), Heaps, Graphs, and Hashing. Written communications required in some projects. Ethical issues and tools and techniques used in writing secure applications will also be discussed. The primary programming language is C++ with a debugging tool. (F, Sp)
- C S 2614 Computer Organization** **4 Credit Hours**
Prerequisite: CS 2334. An introduction to the architecture, organization and design of uniprocessor-based computer systems. Topics include processor, control and memory design and organization, pipelining and vector processing, computer arithmetic, I/O organization, and computer systems security. (F, Sp)
- C S 2813 Discrete Structures** **3 Credit Hours**
Prerequisite: C S 2334; MATH 2423 or MATH 2924 as prerequisite or concurrent enrollment. Introduction to the theory of discrete structures useful in computer science. Topics include combinatorics, relations, functions, computational complexity, recurrences, and graph theory. (F, Sp)
- C S 2970 Special Topics/Seminar** **1-3 Credit Hours**
Special Topics. 1 to 3 hours. May be repeated; Maximum credit nine hours. Special topics course for content not currently offered in regularly scheduled courses. May include library and/or laboratory research, and field projects. (Irreg.)
- C S 3113 Introduction to Operating Systems** **3 Credit Hours**
Prerequisite: C S 2413 or C S 2414, and C S 2813 or MATH 2513, and C S 2614 or ECE 3223. An introduction to the major concepts and techniques of designing and implementing operating systems including: memory management, process management, information management, and computer security. Principles of performance evaluation. Class projects require the design and implementation of software systems. A UNIX family operating system will be used. (F)
- C S 3203 Software Engineering** **3 Credit Hours**
Prerequisite: C S 2413 or CS 2414, and C S 2813 or MATH 2513. Methods and tools for software specification, design, implementation, testing, code management and documentation. Emphasis on architectural modularity, encapsulation of software objects, and current industrial software development processes. Students will make reasoned choices among software components. Study of professional ethics, responsibility, and legal issues. No student may obtain credit for CS 3203 and C S 5213. (F, Sp)
- C S 3323 Principles of Programming Languages** **3 Credit Hours**
Prerequisite: C S 2413 or C S 2414, and C S 2813 or MATH 2513, and ENGL 3153 or BC 2813 or ENGR 2002 as a prerequisite or concurrent enrollment. An introduction to theoretical foundations and paradigms of programming languages. Topics include basic concepts such as lexical analysis, syntax analysis, type systems and semantics, some practical issues such as memory management and exception handling, and programming paradigms such as imperative programming, object-oriented programming, functional programming and scripting. (Sp)
- C S 3440 Mentored Research Experience** **3 Credit Hours**
0 to 3 hours. Prerequisite: ENGL 1213 or EXPO 1213, and permission of instructor; may be repeated; maximum credit 12 hours. For the inquisitive student to apply computer science in a project under the mentorship of a faculty member. Student and instructor should complete an Undergraduate Research & Creative Projects (URCP) Mentoring Agreement and file it with the URCP office. Not for honors credit. . (F, Sp, Su)
- C S 3450 Undergraduate Research** **3 Credit Hours**
0 to 3 hours. Prerequisite: (CS 2413 or CS 2414 and CS 2813 or Math 2513) and permission of instructor; may be repeated, maximum credit 6 hours. For the inquisitive student to perform computer science research or creative activity under the mentorship of a faculty member. Not for honors credit. (F, Sp, Su)
- C S 3823 Theory of Computation** **3 Credit Hours**
Prerequisite: CS 2413 and CS 2813 or MATH 2513 or CS 5005 or DSA 5005. Introduction to abstract machine theory and formal language theory. Topics include Turing machines, finite/pushdown automata, deterministic versus nondeterministic computations, context-free grammars, and mathematical properties of these systems. (F)
- C S 3960 Honors Reading** **1-3 Credit Hours**
1 to 3 hours. Prerequisite: admission to Honors Program. May be repeated; maximum credit six hours. Consists of topics designated by the instructor in keeping with the student's major program. Covers materials not usually presented in the regular courses. (F, Sp)
- C S 3970 Honors Seminar** **1-3 Credit Hours**
1 to 3 hours. Prerequisite: admission to Honors Program. May be repeated with change of topic; maximum credit eight hours. Projects covered will vary. Deals with concepts not usually presented in regular coursework. (Irreg.)
- C S 3980 Honors Research** **1-3 Credit Hours**
1 to 3 hours. Prerequisite: admission to Honors Program. May be repeated with change of subject matter; maximum credit six hours. Provides an opportunity for the gifted Honors candidate to work on a special project in the student's field. (F, Sp, Su)
- C S 3990 Independent Study** **1-3 Credit Hours**
1 to 3 hours. Prerequisite: permission of instructor and junior standing. May be repeated once with change of content. Independent study may be arranged to study a subject not available through regular course offerings. (F, Sp, Su)
- C S 4013 Artificial Intelligence** **3 Credit Hours**
(Slashlisted with C S 5013) Prerequisite: CS 2413 or CS 5005, and CS 2813 or CS 4005 or MATH 2513. Study of the methods of search, knowledge representation, heuristics, and other aspects of automating the solution of problems requiring intelligence. No student may earn credit for both 4013 and 5013. (Sp)
- C S 4023 Introduction to Intelligent Robotics** **3 Credit Hours**
(Slashlisted with C S 5023) Prerequisite: C S 2413, and C S 2813 or MATH 2513. History of intelligent robotics; functional models approach; reactive robots; ethology for robotics; architectures and methodologies; implementation; sensing; hybrid deliberative/reactive robotics; multi-robot systems; navigation; topological path planning; metric path planning; localization and mapping. No student may earn credit for both 4023 and 5023. (F)

- C S 4033 Machine Learning Fundamentals 3 Credit Hours**
(Slashlisted with C S 5033) Prerequisites: C S 2413, and C S 2813 or MATH 2513, and MATH 4753 or ISE 3293 or MATH 4743, and MATH 3333, and MATH 3113 or MATH 3413. Topics include decision trees, relational learning, neural networks, Bayesian learning, reinforcement learning, multiple-instance learning, feature selection, learning appropriate representations, clustering, and kernel methods. No student may earn credit for both 4033 and 5033. (F)
- C S 4053 Computer Graphics 3 Credit Hours**
(Slashlisted with C S 5053) Prerequisite: C S 2413, and C S 2813 or MATH 2513, and MATH 3333. An introduction to computer graphics. Topics include coordinate systems, transformations, rendering in both two and three dimensions, and graphical programming. No student may earn credit for both 4053 and 5053. (F)
- C S 4063 Human Computer Interaction 3 Credit Hours**
(Slashlisted with CS 5063) Prerequisite: C S 2413, and C S 2813 or MATH 2513. An introduction to human-computer interaction and graphical user interfaces. Topics include principles of human-computer interaction, human perceptual and cognitive abilities, user interface analysis and design, window systems, and social implications of computing. Current user interface programming tools will be described and used. Oral presentations are required for some assignments. No student may earn credit for both 4063 and 5063. (Sp)
- C S 4113 Distributed Operating Systems 3 Credit Hours**
(Slashlisted with C S 5113) Prerequisite: C S 3113, and Mathematics 4753 or Industrial Engineering 3293 or Mathematics 4743 or Engineering 3293. Continuation of study from 3113. Advanced topics and examples and simulation techniques used in performance evaluation. No student may earn credit for both 4113 and 5113. (Sp)
- C S 4133 Data Networks 3 Credit Hours**
(Slashlisted with 5133) Prerequisite: 3113 or permission of instructor. Comprehensive treatment of data networking principles including: layered protocol design and their functions, tools for performance analysis, multi-access communication, routing and flow control. No student may earn credit for both 4133 and 5133. (F)
- C S 4173 Computer Security 3 Credit Hours**
(Slashlisted with C S 5173) Prerequisite: CS 3113. An introduction to computer security. Topics include applied cryptography, access control, programming and software security, operating system security, network security protocols, and the legal and ethical aspects of security software. (F)
- C S 4273 Capstone Design Project 3 Credit Hours**
Prerequisite: C S 3203, and C S major or C S minor. Students working in teams implement a significant software product, including design documents, user's guide, and process reports. Emphasis is on data abstraction and reusable components. Students will make reasoned choices among software components. Students will practice oral/written communication skills, learn about professional social issues and responsibilities. No student may obtain credit for C S 4273 and C S 5213. (F, Sp) [V].
- C S 4281 Engineering Co-Op Program 1 Credit Hour**
(Crosslisted with AME, CH E, CEES, ECE, EPHY, ISE and BME 4281) Prerequisite: Departmental permission and junior standing. May be repeated; maximum credit 6 hours. The Co-Op program provides students an opportunity to enhance their education via career exploration in related professional work experiences. Course assignments help students articulate their experiences by completing journals; mid-term paper; final paper and/or final presentation. Faculty receive an evaluation from the student's Co-Op supervisor who monitors performance. Faculty collaborate with the Co-Op supervisor to ensure student success. (F, Sp, Su)
- C S G4323 Compiler Construction 3 Credit Hours**
Prerequisite: 2413 and 3823. Introduction to the theory and implementation of programming language compilers and interpreters. Class projects require the design of medium scale software systems. (Sp)
- C S 4410 Programming Competition 0 Credit Hours**
Prerequisite: Permission of Instructor. Prepare students to participate in regional, national, and international computer programming competitions. Students will work in teams to solve challenging computer programming problems. (F, Sp)
- C S G4413 Algorithm Analysis 3 Credit Hours**
(Crosslisted with DSA 4413) Prerequisites: C S 2413 and C S 2813; or MATH 2513; or C S 5005. Design and analysis of algorithms and measurement of their complexity. This course introduces various algorithm design strategies: divide and conquer, greedy principle and dynamic programming to solve a variety of problems using algorithms of various types - deterministic and randomized, serial and parallel, centralized and decentralized, program based and circuit based. (F)
- C S 4433 Computational Methods in Discrete Optimization 3 Credit Hours**
(Slashlisted with C S 5433) Prerequisite: MATH 3333 and C S 4413 or concurrent enrollment in 4413. Linear programming: simplex method for LP problems, degeneracy and anticycling strategies, duality theory and complementary slackness conditions, revised simplex method, sensitivity analysis and simplex method for general LP problems. Network optimization: the transshipment problem, network simplex method, shortest path algorithms, the maximum flow problem, and the primal dual method. No student may earn credit for both 4433 and 5433. (F, Sp)
- C S 4473 Parallel, Distributed, and Network Programming 3 Credit Hours**
(Slashlisted with C S 5473) Prerequisite: CS 3113 and CS 4413. Parallel and distributed architectures, algorithms, programming paradigms and network communication protocols and programming. Topics include asynchronous/synchronous computation, GPU architectures, load balancing, memory hierarchies, other parallel and distributed models of computation, concepts about computer networks, including internet protocol stack and internet architecture, and socket programming using TCP and UDP. No student may earn credit for both 4473 and 5473. (Sp)
- C S G4513 Database Management Systems 3 Credit Hours**
(Crosslisted with DSA 4513) Prerequisites: C S 2413 and C S 2813; or MATH 2513; or C S 5005. The design and implementation of a DBMS including data models, query languages, entity-relationship diagrams, functional dependencies, normalization, storage structures, access methods, query processing, security and transaction management, and applications. The impact of databases on individuals, organizations, and society, and legal and professional responsibilities including security and privacy will be discussed. A commercial DBMS is used. Students practice written communication skills. (F)

- C S G4613 Computer Architecture** **3 Credit Hours**
(Crosslisted with ECE 4613) Prerequisite: ECE 3223 or C S 2614 or C S 2613. Covers basic concepts of computer system design and communication between components, along with current and historical examples of computer architecture. (F, Sp)
- C S 4723 Neural Data Science** **3 Credit Hours**
(Slashlisted with C S 5723) Prerequisite: Computer Programming (CS 1213 or CS 1313 or CS 1321 or CS 1323 or CS 1324) and Statistics (ECE 2523 or ISE 3293 or Math 4743 or Math 4753); or permission of instructor. This course will introduce the fundamental concepts of neural data analysis and its implementation using computer programming. Topics include statistical modeling, connectivity analysis, time-frequency analysis, and pattern recognition. No student may earn credit for both 4723 and 5723. (F)
- C S 4733 Computer Vision for Autonomous Vehicles** **3 Credit Hours**
(Slashlisted with C S 5733) Prerequisite: C S 2413 or C S 2414 or C S 5005; and MATH 3333; or permission of instructor. This course delves into the foundational principles of mathematics and the practical implementation of state-of-the-art autonomous navigation algorithms, specifically within the domains of self-driving cars, delivery robots, and autonomous aerial vehicles such as drones. Positioned within the field of robotics, it explores various aspects of autonomous navigation, covering motion planning, computer vision, localization, and mapping. No student may earn credit for both 4733 and 5733. (F)
- C S 4743 Scientific Computing I** **3 Credit Hours**
(Slashlisted with C S 5743) Prerequisite: MATH 3333. Interaction between applications, architectures, and algorithms. Review of linear algebra, serial, pipelined vector processors, cluster of processors. Measures of performance of parallel algorithms. Parallel algorithms for the solution of linear systems. No student may earn credit for both 4743 and 5743. (F)
- C S 4823 Cryptography** **3 Credit Hours**
(Slashlisted with 5823) Prerequisite: 3823 and 4413. Elementary number theory, time complexity for doing arithmetic, finite fields, RSA, discrete logarithm and Diffie-Hellman, zero-knowledge protocols and oblivious transfer. Basic elliptic curve cryptosystems, elliptic curve factorization and primality proving. No student may earn credit for both 4823 and 5823. (Sp)
- C S 4910 Senior Reading and Research** **1-3 Credit Hours**
1 to 3 hours. Prerequisite: senior standing, permission of instructor. May be repeated with change of subject matter; maximum credit six hours. Individually supervised reading and research in computing science for gifted seniors. (F, Sp, Su)
- C S 4970 Undergraduate Seminar** **1-3 Credit Hours**
0 to 3 hours. May be repeated with change of subject matter; maximum credit three hours. A special type of seminar necessitated by the rapidly changing nature of modern data processing information science and computing sciences. (Irreg.)
- C S 4973 Special Topics** **3 Credit Hours**
Prerequisite: 2413 and permission of instructor. May be repeated with change of subject matter; maximum credit nine hours. A special topics course necessitated by the rapidly changing nature of computer sciences. Topics offered under this number will be accepted as approved Computer Science electives for Computer Science majors. (Irreg.)
- C S 4990 Independent Study** **1-3 Credit Hours**
1 to 3 hours. Prerequisite: Senior standing and permission of instructor. May be repeated; maximum credit nine hours but total credit applicable to any degree may be limited. Individual or group research and development projects involving original laboratory, analytical or theoretical investigations and syntheses. Specific objectives and work requirements are established by prior agreement of the instructor and student. Students should expect to spend at least 48 hours for each credit hour and to submit appropriate reports or papers (F, Sp, Su).
- C S 5005 Computing Structures** **5 Credit Hours**
(Crosslisted with DSA 5005) Prerequisite: CS 2334, MATH 1914 or MATH 1823 or with permission of graduate liaison. This course has three parts: discrete mathematics, object-oriented programming in C++, and data structures in C++. As part of the discrete mathematics students will be introduced to combinatorics, logic, relations, functions, computational complexity, automata, and graph theory. Students will be introduced to the fundamentals of object-oriented programming and learn to design, build, and analyze data structures using object-oriented principles and techniques. Credit hours earned for this course cannot be used to fulfill degree requirements for the B.S., M.S. or Ph.D. programs in computer science. (Irreg.)
- C S 5013 Artificial Intelligence** **3 Credit Hours**
(Slashlisted with C S 4013) Prerequisite: graduate standing and C S 2413 or C S 5005, and C S 2813 or C S 4005 or MATH 2513. Study of the methods of search, knowledge representation, heuristics, and other aspects of automating the solution of problems requiring intelligence. No student may earn credit for both 4013 and 5013. (Sp)
- C S 5023 Introduction to Intelligent Robotics** **3 Credit Hours**
(Slashlisted with C S 4023) Prerequisite: graduate standing and C S 2413, and C S 2813 or MATH 2513. History of intelligent robotics; functional models approach; reactive robots; ethology for robotics; architectures and methodologies; implementation; sensing; hybrid deliberative/reactive robotics; multi-robot systems; navigation; topological path planning; metric path planning; localization and mapping. No student may earn credit for both 4023 and 5023. (F)
- C S 5033 Machine Learning Fundamentals** **3 Credit Hours**
(Slashlisted with C S 4033) Prerequisite: Graduate standing and C S 2413; C S 2813 or MATH 2513; MATH 4753 or ISE 3293 or MATH 4743; MATH 3333; and MATH 3113 or MATH 3413. Topics include decision trees, relational learning, neural networks, Bayesian learning, reinforcement learning, multiple-instance learning, feature selection, learning appropriate representations, clustering, and kernel methods. No student may earn credit for both 4033 and 5033. (F)
- C S 5043 Advanced Machine Learning** **3 Credit Hours**
Prerequisite: Graduate standing; MATH 3333; MATH 4743 or MATH 4753 or ENGR 3293 or ISE 3293; and C S 4033/5033 or C S 5073; or permission of the instructor. Topics include deep learning, deep networks, convolutional neural networks, recurrent neural networks, transformers, autoencoders, generative adversarial networks, and explainable deep learning. (Irreg.)
- C S 5053 Computer Graphics** **3 Credit Hours**
(Slashlisted with C S 4053) Prerequisite: graduate standing and C S 2413, and C S 2813 or MATH 2513, and MATH 3333. An introduction to computer graphics. Topics include coordinate systems, transformations, rendering in both two and three dimensions, and graphical programming. No student may earn credit for both 4053 and 5053. (F)

- C S 5063 Human Computer Interaction 3 Credit Hours**
(Slashlisted with CS 4063) Prerequisite: Graduate standing and C S 2413, and C S 2813 or MATH 2513; or departmental permission. An introduction to human computer interaction and graphical user interfaces. Topics include principles of human computer interaction, human perceptual and cognitive abilities, user interface analysis and design, window systems, and social implications of computing. Current user interface programming tools will be described and used. Oral presentations are required for some assignments. No student may earn credit for both 4063 and 5063. (Sp)
- C S 5073 Artificial Neural Networks Evolution 3 Credit Hours**
Prerequisite: CS 2413 and CS 2813, or CS 5005, and MATH 3333. Overview of computational intelligence and artificial evolution, artificial neural networks and artificial evolution, introduction to artificial life and neuro-evolution, and evolutionary robotics. (F)
- C S 5093 Visual Analytics 3 Credit Hours**
Prerequisite: permission of instructor. Exploration and analysis of complex information through visual interactive computational tools and techniques. Topics include analytic reasoning, sense-making, knowledge dissemination, data representation and transformation, visual abstraction, coordinated interaction, visual query languages, spatiotemporal visualization, and applications of visual analysis. (Sp)
- C S 5113 Distributed Operating Systems 3 Credit Hours**
(Slashlisted with C S 4113) Prerequisite: Graduate standing, C S 3113; and MATH 4753, ISE 3293, or MATH 4743. Advanced topics, examples, and simulation techniques used in performance evaluation. No student may earn credit for both 4113 and 5113. (Sp)
- C S 5133 Data Networks 3 Credit Hours**
(Slashlisted with 4133) Prerequisite: 3113 or 5004 or permission of instructor. Comprehensive treatment of data networking principles including: layered protocol designs and their functions, tools for performance analysis, multi-access communication, routing and flow control. No student may earn credit for both 4133 and 5133. (F)
- C S 5143 Network Design and Management 3 Credit Hours**
Prerequisite: 4133 or 5133, or equivalent. Basic concepts in networks; modeling and evaluation techniques; network analysis: delay, loss and throughput, centralized network design; distributed network design, network reliability; applications to local area wireless, wide area, multi-service networking, etc.; network management: SNMP, OSI management, distributed network management and architectures. (Sp)
- C S 5173 Computer Security 3 Credit Hours**
(Slashlisted with C S 4173) Prerequisite: CS 3113. An introduction to computer security. Topics include applied cryptography, access control, programming and software security, operating system security, network security protocols, and the legal and ethical aspects of security software (F)
- C S 5183 Wireless and Mobile Networks 3 Credit Hours**
Prerequisite: Graduate standing, CS 4133/5133; MATH 4743 or MATH G4753 or ISE 3293 or ECE 2523 or permission of instructor. This course provides a systematic view of designing and securing wireless mobile computing systems and networks. It covers system and security elements from the physical layer all the way to the application layer in wireless mobile computing. (Sp)
- C S 5213 Software Engineering Processes 3 Credit Hours**
Prerequisite: graduate standing, C S 3113 or C S 3823 or C S 5005. No student may obtain credit for C S 4263 or C S 4273 and CS 5213. Effective processes for software requirements specification, planning, design, documentation, development, review, defect tracking, testing, product delivery, and product evaluation. Emphasis on resource tracking and software quality. Students work in teams to develop, deliver, and evaluate software products. (Sp)
- C S 5293 Text Analytics 3 Credit Hours**
Prerequisite: C S 2413 or C S 5005; CS 2813 or MATH 2513; and MATH 4743 or MATH 4753 or ISE 3293 or ISE 5013. The course covers the design and implementation of algorithms to extract useful knowledge from text to support decision making, including methods to obtain data sets, understanding data formats, detecting duplicates, cleaning data sets, tagging, indexing, search, evaluating algorithms, classification, clustering, topic modeling, and entity resolution. (Sp)
- C S 5413 Computational Complexity 3 Credit Hours**
Prerequisite: 4413 and 3823 or 5813. Computational complexity theory dealing with various models of computation and a detailed analysis of P and NP hard problems. (Sp)
- C S 5433 Computational Methods in Discrete Optimization 3 Credit Hours**
(Slashlisted with C S 4433) Prerequisite: MATH 3333 and C S 4413 or concurrent enrollment in 4413. Linear programming: simplex method for LP problems, degeneracy and anticycling strategies, duality theory and complementary slackness conditions, revised simplex method, sensitivity analysis and simplex method for general LP problems. Network optimization: the transshipment problem, network simplex method, shortest path algorithms, the maximum flow problem, and the primal dual method. No student may earn credit for both 4433 and 5433. (F)
- C S 5463 Advanced Computer Architecture 3 Credit Hours**
(Crosslisted with ECE 5463) Prerequisite: C S 4613. The design of modern programmable computer systems with emphases on exploiting parallelism at all levels, designing within constraints, including energy consumption, and the impact of architecture on software design. Covers state of the art computer architecture, case studies and trends. (Sp)
- C S 5473 Parallel, Distributed, and Network Programming 3 Credit Hours**
(Slashlisted with C S 4473) Prerequisite: Graduate standing, C S 3113, and C S 4413. Parallel and distributed architectures, algorithms, programming paradigms and network communication protocols and programming. Topics include asynchronous/synchronous computation, GPU architectures, load balancing, memory hierarchies, other parallel and distributed models of computation, concepts about computer networks, including internet protocol stack and internet architecture, and socket programming using TCP and UDP. No student may earn credit for both 4473 and 5473. (Sp)
- C S 5483 Network Science 3 Credit Hours**
Prerequisite: C S 4413 or DSA 4413 or permission of instructor. Topics to be covered include fundamental algorithms for network analysis, investigating properties of networks, learning community detection methods, understanding network inference methods, understanding dynamics of networks, percolation, resilience, spreading phenomenon, social influence, and cascades. A variety of application contexts will be used, including physical, informational, biological, cognitive, and social systems. (F)

- C S 5513 Advanced Database Management 3 Credit Hours**
Prerequisite: 4513. An advanced course dealing with both current database applied research subjects and theoretical aspects of relational databases. Selected topics such as distributed databases, object-oriented databases, real-time databases, and multimedia databases will be discussed. (Sp)
- C S 5593 Data Mining 3 Credit Hours**
Prerequisite: graduate standing and permission from the instructor or department. Covers the process, concepts and techniques in data mining, including advanced techniques that deal with Big Data. It provides students with the necessary background to conduct data mining tasks for real world problems. The topics covered include understanding and preprocessing data, classification, association analysis, cluster analysis, anomaly detection, and Big Data mining. (F)
- C S 5613 Computer Networks and Distributed Processing 3 Credit Hours**
Prerequisite: 4613. Provides a comprehensive treatment of the analysis and design of computer networks. Data communication techniques and distributed processing in a network architecture will be examined. (Sp)
- C S 5703 Machine Learning Practice 3 Credit Hours**
(Crosslisted with DSA 5703) Prerequisite: Graduate standing; C S 4013/5013, C S 5593, ISE/DSA 5103; or permission of instructor. Machine learning is the data-driven process of constructing mathematical models that can be predictive of data observed in the future. In this course, we will study the use of a range of supervised, semi-supervised and unsupervised methods to solve both classification and regression problems. (F)
- C S 5713 Computational Learning Theory 3 Credit Hours**
Prerequisite: Departmental Permission and C S 4413 or DSA 4413. Topics of machine learning theory. Learning using membership queries, equivalence queries, version spaces, decision trees, perceptrons. Probably approximately correct (PAC) learning, Occam algorithms, VC-dimension, sample sizes for distribution-independent learning. Representation issues, proper learning, reductions, intractability, learning in the realizable case, agnostic learning. Noise models, statistical queries, PAC learning under noise. Adversarially robust learning against poisoning attacks and against adversarial examples. (F)
- C S 5723 Neural Data Science 3 Credit Hours**
(Slashlisted with C S 4723) Prerequisite: Graduate standing or permission of instructor. This course will introduce the fundamental concepts of neural data analysis and its implementation using computer programming. Topics include statistical modeling, connectivity analysis, time-frequency analysis, and pattern recognition. No student may earn credit for both 4723 and 5723. (F)
- C S 5733 Computer Vision for Autonomous Vehicles 3 Credit Hours**
(Slashlisted with C S 4733) Prerequisite: Graduate standing or permission of instructor. This course delves into the foundational principles of mathematics and the practical implementation of state-of-the-art autonomous navigation algorithms, specifically within the domains of self-driving cars, delivery robots, and autonomous aerial vehicles such as drones. Positioned within the field of robotics, it explores various aspects of autonomous navigation, covering motion planning, computer vision, localization, and mapping. No student may earn credit for both 4733 and 5733. (F)
- C S 5743 Scientific Computing I 3 Credit Hours**
(Slashlisted with C S 4743) Prerequisite: graduate standing and MATH 3333 and AME 3723 or MATH 4073 or ENGR 3723 or C S 3723. Interaction between applications, architectures, and algorithms. Review of linear algebra, serial, pipelined vector processors, cluster of processors. Measures of performance of parallel algorithms. Parallel algorithms for the solution of linear systems. No student may earn credit for both 4743 and 5743. (F)
- C S 5753 Scientific Computing II 3 Credit Hours**
Prerequisite: 5743. Special research topics in scientific computing. Possible topics include optimization algorithms, time series modeling, Kalman filtering techniques, and multivariate statistical techniques. (Sp)
- C S 5813 Formal Languages 3 Credit Hours**
Prerequisite: 3823. Theory of formal languages. Mathematical modeling of natural or artificial objects, events, and phenomena. Topics include systems for linear/nonlinear objects, their language-theoretical properties, and the related machine theory. (F)
- C S 5823 Cryptography 3 Credit Hours**
(Slashlisted with 4823) Prerequisite: 3823 and 4413. Elementary number theory, time complexity for doing arithmetic, finite fields, RSA, discrete logarithm and Diffie-Hellman, zero-knowledge protocols and oblivious transfer. Basic elliptic curve cryptosystems, elliptic curve factorization and primality proving. No student may earn credit for both 4823 and 5823. (Sp)
- C S 5833 Blockchains & Cryptocurrencies 3 Credit Hours**
Prerequisite: Departmental Permission and C S 3823 or C S 4413. This course attempts to bridge the gap in the technical understanding of blockchain architectures and their applications as a currency. Specifically, this course will address the following fundamental questions and more: How does Bitcoin work and what makes it different? How secure are Bitcoins? How anonymous are Bitcoin users? What applications can be built using Bitcoin as a platform? (Sp)
- C S 5880 Graduate Project 2-6 Credit Hours**
2 to 6 hours. Prerequisite: Graduate standing and permission of department. For students electing the non-thesis project option. Students will plan and carry out a project in computer science under the direction of their project committee. Students must take at least 6 credit hours of CS 5880 over one or more semesters; only the first 6 credits will count towards the non-thesis project program requirement. (F, Sp, Su)
- C S 5903 Graduate Perspectives on Computing 3 Credit Hours**
Prerequisite: Graduate standing and permission of department. A broad survey of principles, pathways, practices, and research in computer science. Topics include foundations and current computing research on systems, theory, artificial intelligence & machine learning, and people & data; ethics, integrity, social implications, and professional practices in computing; and essential skills and tools for computing research and practice. (F, Sp)
- C S 5960 Directed Readings 1-3 Credit Hours**
1 to 3 hours. Prerequisite: graduate standing and permission of department. May be repeated; maximum credit twelve hours. Directed readings and/or literature reviews under the direction of a faculty member. (F, Sp, Su)
- C S 5970 Graduate Seminar 1-3 Credit Hours**
Prerequisite: permission of instructor. May be repeated with a change of subject matter; maximum credit six hours. Selected topics of current research interest not covered by regularly scheduled coursework. (F, Sp, Su)

C S 5980 Research for Master's Thesis 2-9 Credit Hours

Variable enrollment, two to nine hours; maximum credit applicable toward degree, six hours. (F, Sp, Su)

C S 5990 Independent Studies 1-3 Credit Hours

1 to 3 hours. Prerequisite: graduate standing, permission of instructor. May be repeated with change of topic; maximum graduate credit nine hours. Supervised individual reading and research in computer science for graduate students. (F, Sp, Su)

C S 6960 Directed Readings 1-3 Credit Hours

1 to 3 hours. Prerequisite: graduate standing or permission of instructor. May be repeated; maximum credit six hours. Directed readings and/or literature review under the direction of a faculty member. (Irreg.)

C S 6970 Special Topics/Seminar 1-3 Credit Hours

1 to 3 hours. Prerequisite: graduate standing or permission of instructor. May be repeated; maximum credit 12 hours. Special topics or seminar course for content not currently offered in regularly scheduled courses. May include library and/or research and field projects. (Irreg.)

C S 6980 Research for Doctoral Dissertation 2-16 Credit Hours

2 to 16 hours. Prerequisites: Graduate standing and permission of instructor; may be repeated. Directed research culminating in the completion of the doctoral dissertation. (F, Sp, Su)

C S 6990 Independent Study 1-3 Credit Hours

1 to 3 hours. Prerequisite: Graduate standing and permission of instructor. May be repeated; maximum credit nine hours. Contracted independent study for a topic not currently offered in regularly scheduled courses. Independent study may include library and/or laboratory research and field projects. (Irreg.)

Faculty

Last Name	First/Middle Name	Middle init.	OU	Title(s), date(s) appointed	Degrees Earned, Schools, Dates Completed
Abdulhak	Mansoor		2023	ASSISTANT PROFESSOR OF COMPUTER SCIENCE, 2023	PhD, Univ Malaya, 2013; MS, Univ Technology Malaysia, 2006; BS, Osmania University, 2004
Antonio	John		1999	PROFESSOR OF COMPUTER SCIENCE, 1999; HOWARD & SUZANNE KAUFFMAN CHAIR IN ENGINEERING, 2014; INTERIM DEAN OF MEWBOURNE COLLEGE OF EARTH & ENERGY, 2022	PhD, Texas A&M Univ, 1989; MS, Texas A&M Univ, 1986; BS, Texas A&M Univ, 1984
Atiqzaman Mohammed			2001	PROFESSOR OF COMPUTER SCIENCE, 2003; EDITH KINNEY GAYLORD PRESIDENTIAL PROFESSOR, 2009	PhD, Univ of Manchester, 1987; MS, Univ of Manchester, 1984; BS, Bangladesh Univ Engr & Tech, 1982
Cheng	Qi		2001	PROFESSOR OF COMPUTER SCIENCE, 2014; WILLIAMS COMPANY FOUNDATION PRESIDENTIAL PROFESSOR, 2014	PhD, Univ of Southern California, 2001; MS, Fudan Univ, 1995; BS, Nankai Univ, 1992

Dhall	Sudarshan	D	1980	Professor Emeritus of Computer Science, 2017	PhD, Univ. of Illinois at Urbana-Champaign, 1977; MS, Univ. of Illinois at Urbana-Champaign, 1972; MA, Dehli University, 1968; BA, Panjab University, 1956
Diochnos	Dimitrios	I	2019	ASSISTANT PROFESSOR OF COMPUTER SCIENCE, 2019	PhD, Univ of Illinois at Chicago, 2013; MS, Univ of Athens, 2007; BS, Univ of Athens, 2004
Ebert	David	S	2020	PROFESSOR OF COMPUTER SCIENCE & ELECTRICAL COMPUTER ENGINEERING, 2020; GALLOGLY CHAIR #3, 2020; ASSOCIATE VP OF RESEARCH & PARTNERSHIPS, 2020; DIRECTOR - DATA INSTITUTE FOR SOCIETAL CHALLENGES, 2020	PhD, Ohio State Univ, 1991; MS, Ohio State Univ, 1987; BS, Ohio State Univ, 1986
Fagg	Andrew	H	2004	ASSOCIATE PROFESSOR OF COMPUTER SCIENCE, 2004; BRIAN E. & SANDRA O'BRIEN PRESIDENTIAL PROFESSOR, 2017	PhD, Univ of Southern California, 1996; MS, Univ of Southern California, 1991; BS, Carnegie Mellon Univ, 1989
Fang	Song		2018	ASSISTANT PROFESSOR OF COMPUTER SCIENCE, 2018	PhD, Univ of South Florida, 2018; MS, Beijing Univ of Posts & Telecommunications, 2013; BS, South China Univ of Technology, 2011
Gruenwald	Gia Loi	L	1991	SAMUEL ROBERTS NOBLE PRESIDENTIAL PROFESSOR, 1998; PROFESSOR OF COMPUTER SCIENCE, 2002; DAVID W. FRANKE PROFESSOR OF COMPUTER SCIENCE, 2006	PhD, Southern Methodist Univ, 1990; MS, Univ of Houston, 1983; BS, Univ of Saigon, 1978
Habibi	Golnaz		2022	ASSISTANT PROFESSOR OF COMPUTER SCIENCE, 2022	PhD, Rice Univ, 2015; MS, Tarbiat Modares Univ-Tehran, 2007; BS, Toosi Univ-Tehran, 2005
Hougen	Dean		2001	ASSOCIATE PROFESSOR OF COMPUTER SCIENCE, 2007; INTERIM DIRECTOR OF COMPUTER SCIENCE, 2022	PhD, Univ of Minnesota, 1998; BS, Univ of Minnesota, 1988

Khanmohamr Sabi		2021	ASSISTANT PROFESSOR OF COMPUTER SCIENCE, 2021	PhD, State Univ of New York-Binghamton, 2016; MS, Univ of Hertfordshire, 2012; BS, Univ of Tabriz-Iran, 2010	Park	Ji Hwan		2021	ASSISTANT PROFESSOR OF COMPUTER SCIENCE, 2021	PhD, Stony Brook Univ, 2017; MS, Korea Advanced Institute of Science & Technology, 2006; BS, Hongik Univ, 2004
Lakshmi varal Sivaramakris		1978	Professor Emeritus of Computer Science, 2019	PhD, Indian Institute of Science, 1973; ME, Indian Institute of Science, 1969; BE, Indian Institute of Science 1967; BSc, Univ. of Madres, 1964	Quadri	Ghulam J		2024	ASSISTANT PROFESSOR OF COMPUTER SCIENCE, 2024	PhD, Univ of South Florida, 2021; MS, Univ of South Florida, 2017; BS, Univ of Mumbai, 2012
Lan	Chao	2020	ASSISTANT PROFESSOR OF COMPUTER SCIENCE, 2020	PhD, Univ of Kansas, 2017; MS, Nanjing Univ of Posts & Telecommunications, 2011; BS, Nanjing Univ of Posts & Telecommunications, 2008	Radhakrishna Sridhar			1990	PROFESSOR OF COMPUTER SCIENCE, 2002; INTERIM ASSOCIATE DEAN FOR PARTNERSHIPS, 2022	PhD, Louisiana State Univ, 1990; MS, Louisiana State Univ, 1987; MLIS, Louisiana State Univ, 1986; BS, Univ of South Alabama, 1985; BSC, Univ of Madras, 1983
Lin	Beiyu	2024	ASSISTANT PROFESSOR OF COMPUTER SCIENCE, 2024	PhD, Washington State Univ, 2020; MS, Washington State Univ, 2015; MS, SUNY-Stony Brook, 2013; BS, Shanghai Maritime Univ, 2011	Thulasiraman Krishnaian			1994	Professor/Hitachi Chair Emeritus of Computer Science, 2017	PhD, Indian Institute of Technology, 1968; MS, Univ of Madras, 1965; BE, Univ of Madras, 1963
Maiti	Anindya	2020	ASSISTANT PROFESSOR OF COMPUTER SCIENCE, 2020	PhD, Wichita State Univ, 2018; MS, Wichita State Univ, 2014; BS, Vellore Institute of Technology, 2012	Trytten	Deborah		1992	ASSOCIATE PROFESSOR OF COMPUTER SCIENCE, 1998; ASSOCIATE PROFESSOR OF WOMENS' AND GENDER STUDIES, 2014; PRESIDENT'S ASSOCIATES PRESIDENTIAL PROFESSOR, 2015	PhD, Michigan State Univ, 1992; MS, Michigan State Univ, 1988; MS, Michigan State Univ, 1984; BS, Albion College, 1982
McGovern	Amy	2005	PROFESSOR OF COMPUTER SCIENCE, 2018; PROFESSOR OF METEOROLOGY, 2020; LLOYD G. & JOYCE AUSTIN PRESIDENTIAL PROFESSORSHIP, 2020	PhD, Univ of Massachusetts-Amherst, 2002; MS, Univ of Massachusetts-Amherst, 1998; BS, Carnegie Mellon Univ, 1996	Veras	Richard M		2021	ASSISTANT PROFESSOR OF COMPUTER SCIENCE, 2021	PhD, Carnegie Mellon Univ, 2017; MS, Carnegie Mellon Univ, 2016; BS, Univ of Texas-Austin, 2011
Moussa	Marmar	2023	ASSISTANT PROFESSOR OF COMPUTER SCIENCE, 2023	PhD, Univ of Connecticut, 2019; MS, Univ of Connecticut, 2018; MS, Alexandria Univ, 2004; BS, Alexandria Univ.	Weaver	Christopher E		2008	ASSOCIATE PROFESSOR OF COMPUTER SCIENCE, 2014	PhD, Univ of Wisconsin, 2006; MS, Univ of Wisconsin, 1997; BS, Michigan State Univ, 1991
Mudduluru	Sanjana	2023	ASSISTANT PROFESSOR OF COMPUTER SCIENCE, 2023	PhD, Univ of Oklahoma, 2023; MS, Univ of Oklahoma, 2018; BS, Jawaharlal Nehru Technological Univ, 2015	Zhao	Shangqing		2021	ASSISTANT PROFESSOR OF COMPUTER SCIENCE, 2021	PhD, Univ of South Florida, 2021; MS, Henan Polytechnic Univ, 2015; BS, Fujian Agriculture & Forestry Univ, 2010
Pan	Chongle	2018	ASSOCIATE PROFESSOR OF COMPUTER SCIENCE, 2018; ASSOCIATE PROFESSOR OF MICROBIOLOGY AND PLANT BIOLOGY, 2018	PhD, Univ of Tennessee, 2006; BS, East China Normal Univ, 2001						

Computer Science, B.S.

Minimum Total Credit Hours: 120

Overall GPA - Combined and OU: 2.00

Major GPA - Combined and OU: 2.00

Curriculum GPA - Combined and OU: 2.00

Program Code: B235

This program has changes pending State Regents approval for 2024/25. These pending changes are not reflected here.

Bachelor of Science in Computer Science is accredited by the Computing Accreditation Commission of ABET, <https://www.abet.org>, under the General Criteria and the Computer Science and Similarly Named Computing Programs Program Criteria.

In order to progress in your curriculum in the Gallogly College of Engineering, and as a specific graduation requirement, a **grade of C or better** is required in each course in the curriculum, including all prerequisite courses.

Major Requirements

Code	Title	Credit Hours
Required Courses		
Choose one of the following:		1-4
C S 1323	Introduction to Computer Programming for Programmers	
C S 1321	Java for Programmers	
C S 1324	Introduction to Computer Programming for Non-Programmers	
C S 2334	Programming Structures and Abstractions	4
C S 2413	Data Structures	3
C S 2813	Discrete Structures	3
or MATH 2513	Discrete Mathematical Structures	
C S 2614	Computer Organization	4
C S 3323	Principles of Programming Languages	3
C S 3113	Introduction to Operating Systems	3
C S 3203	Software Engineering	3
C S 3823	Theory of Computation	3
C S 4173	Computer Security	3
C S 4413	Algorithm Analysis	3
C S 4513	Database Management Systems	3
C S 4273	Capstone Design Project	3
C S 4473	Parallel, Distributed, and Network Programming	3
C S Electives		
Choose 12 credits of approved C S electives from a list maintained by the department (p. 1355)		12
Total Credit Hours		54-57

Major Support Requirements

Code	Title	Credit Hours
Math		
MATH 2924	Differential and Integral Calculus II	4
MATH 3333	Linear Algebra I	3
Choose one of the following:		3
ECE 2523	Probability, Statistics and Random Processes	
ISE 3293	Applied Engineering Statistics	

MATH 4743	Introduction to Mathematical Statistics	
MATH 4753	Applied Statistical Methods	
Technical Electives		9
Choose 9 credits of approved technical electives from a list maintained by the department. (p. 1355)		
Additional College Requirements		
ENGR 1411	Pathways to Engineering Thinking ¹	1
ENGR 2002	Professional Responsibilities and Skills of Engineers and Scientists	2
Total Credit Hours		22

¹ Engineering transfer students may take ENGR 3511 in place of ENGR 1411.

General Education and College Requirements

Courses designated as Core I, II, III, IV, or V are part of the General Education curriculum. Students must complete a minimum of 40 hours of General Education courses, chosen from the approved list, including at least one upper-division Gen. Ed. course outside of the student's major. **Courses graded P/NP will not apply.**

A grade of C or better is required in each course in the curriculum, including all prerequisite courses.

UNIVERSITY-WIDE GENERAL EDUCATION (MINIMUM 40 HOURS) AND COLLEGE REQUIREMENTS

Code	Title	Credit Hours
Core Area I: Symbolic and Oral Communication		
<i>English Composition</i>		
ENGL 1113	Principles of English Composition	3
ENGL 1213	Principles of English Composition	3
or EXPO 1213	Expository Writing	
<i>Language (0-10 hours in the same language)</i>		
This requirement can be met by two years of the same language in high school:		0-10
Beginning Course (0-5 hours)		
Beginning Course, continued (0-5 hours)		
<i>Mathematics (minimum 3 hours)</i>		
MATH 1914	Differential and Integral Calculus I (Core I) 1,2	4
Core Area II: Natural Science (minimum 7 hours, including one laboratory)		
<i>Natural Science</i>		
Natural Science elective ³		3
<i>Natural Science with lab</i>		
Choose one natural science elective from a different discipline, with lab		4
Core Area III: Social Science		
P SC 1113	American Federal Government	3
Choose one course ⁴		3
Core Area IV: Arts & Humanities		
<i>Artistic Forms</i>		
Choose one course ⁴		3
<i>Western Culture</i>		

HIST 1483	United States to 1865	3
or HIST 1493	United States, 1865 to the Present	
Choose one course (excluding HIST 1483 and HIST 1493) ⁴		3
<i>World Culture</i>		
Choose one course ⁴		3
Core Area V: First-Year Experience		
Choose one course ⁴		3
Total Credit Hours		38-48

¹ MATH 1823, MATH 2423, and MATH 2433 sequence can be substituted for MATH 1914 and MATH 2924.

² Major support requirements that also satisfy University General Education requirements.

³ Courses taken to fulfill the Natural Science requirement must be chosen from the University-Wide General Education Approved Course List (Core II). At least one of the Natural Science courses must be a non-Physics course. All science courses must be for science or engineering majors and come from the natural science elective list maintained by the department.

⁴ To be chosen from the University-Wide General Education Approved Course List. Three of these hours must be upper-division (3000-4000).

Free Electives

Electives to bring total applicable hours to the minimum total required for the degree including a minimum of 40 upper-division hours.

Suggested Semester Plan of Study

Bachelor of Science in Computer Science is accredited by the Computing Accreditation Commission of ABET, <https://www.abet.org>, under the General Criteria and the Computer Science and Similarly Named Computing Programs Program Criteria.

In order to progress in your curriculum in the Gallogly College of Engineering, and as a specific graduation requirement, a grade of C or better is required in each course in the curriculum, including all prerequisite courses.

Two college-level courses in a single world language are required; this may be satisfied by successful completion of 2 years in a single world language in high school. Students who must take language at the University will have an additional 6-10 hours of coursework.

Freshman

First Semester		Credit Hours
ENGL 1113	Principles of English Composition (Core I)	3
MATH 1914	Differential and Integral Calculus I (Core I) ¹	4
ENGR 1411	Pathways to Engineering Thinking ²	1
Choose one of the following:		1-4
C S 1323	Introduction to Computer Programming for Programmers	
C S 1321	Java for Programmers	
C S 1324	Introduction to Computer Programming for Non-Programmers	
Approved Elective, First-Year Experience (Core V) ⁴		3
Approved Elective, Artistic Forms (Core IV) ⁴		3
Credit Hours		15-18

Second Semester

ENGL 1213	Principles of English Composition (Core I)	3
or EXPO 1213	or Expository Writing	
MATH 2924	Differential and Integral Calculus II ¹	4
C S 2334	Programming Structures and Abstractions	4
Approved Elective, Natural Science (Core II) ⁵		3
Credit Hours		14

Sophomore

First Semester

ENGR 2002	Professional Responsibilities and Skills of Engineers and Scientists	2
C S 2413	Data Structures	3
P SC 1113	American Federal Government (Core III)	3
C S 2813	Discrete Structures	3
or MATH 2513	or Discrete Mathematical Structures	
Approved Elective, Social Science (Core III) ⁴		3
Credit Hours		14

Second Semester

C S 2614	Computer Organization	4
C S 3323	Principles of Programming Languages	3
Open Elective ³		0-3
Approved Elective, Natural Science w/lab (Core II)		4
Choose one of the following:		3
ECE 2523	Probability, Statistics and Random Processes	
ISE 3293	Applied Engineering Statistics	
MATH 4743	Introduction to Mathematical Statistics	
MATH 4753	Applied Statistical Methods	
Credit Hours		14-17

Junior

First Semester

C S 3113	Introduction to Operating Systems	3
C S 3203	Software Engineering	3
C S 3823	Theory of Computation	3
Approved Technical Elective (p. 1355)		3
Open Elective ³		3
Credit Hours		15

Second Semester

MATH 3333	Linear Algebra I	3
Approved C S Elective (p. 1355)		3
Approved Technical Electives (p. 1355)		6
Approved Elective, Western Culture (Core IV) ⁴		3
Credit Hours		15

Senior

First Semester

C S 4173	Computer Security	3
C S 4413	Algorithm Analysis	3
C S 4513	Database Management Systems	3
Approved C S Electives (p. 1355)		6
Credit Hours		15

Second Semester

C S 4273	Capstone Design Project	3
----------	-------------------------	---

C S 4473	Parallel, Distributed, and Network Programming	3
Approved C S Elective (p. 1355)		3
HIST 1483 or HIST 1493	United States to 1865 (Core IV) or United States, 1865 to the Present	3
Approved Elective, World Culture (Core IV) ⁴		3
Credit Hours		15
Total Credit Hours		120

¹ MATH 1823, MATH 2423 and MATH 2433 sequence can be substituted for MATH 1914 and MATH 2924. MATH 1523 will have to be taken by students who are not ready to start MATH 1823 or MATH 1914. **Note:** See an advisor in the Arts and Sciences Advising Center (EL 124) about a possible minor in mathematics.

² Engineering transfer students may take ENGR 3511 in place of ENGR 1411.

³ Open electives should bring the total number of credits for the degree to 120-121. Physical education classes cannot be open electives.

⁴ To be chosen from the University-Wide General Education Approved Course List. Three of these hours must be upper-division (3000-4000). See list in the Class Schedule.

⁵ Courses taken to fulfill the Natural Science requirement must be chosen from the University-Wide General Education Approved Course List (Core II). At least one of the Natural Science courses must be a non-Physics course. All science courses must be for science or engineering majors. Laboratory Core II requirement must be met. Courses must come from a department maintained list.

Computer Science Elective Course Lists

Courses designated as Core I, II, III, IV or V are part of the General Education curriculum. Students must complete a minimum of 40 hours of General Education courses, chosen from the approved list.

Students should read the Gallogly College of Engineering Scholastic Regulations posted on the WSSC website.

APPROVED C S ELECTIVES

Code	Title	Credit Hours
C S 4013	Artificial Intelligence	3
C S 4023	Introduction to Intelligent Robotics	3
C S 4033	Machine Learning Fundamentals	3
C S 4053	Computer Graphics	3
C S 4063	Human Computer Interaction	3
C S 4113	Distributed Operating Systems	3
C S 4133	Data Networks	3
C S 4323	Compiler Construction	3

ASTR 1523	Life in the Universe	3

Other classes approved by the C S Undergraduate Committee

Computer Science, Minor

Minimum Total Credit Hours: 18

Minimum Upper-Division Hours: 6

Program Code: N235

The requirements for a minor must be completed concurrently with the major degree requirements.

No minor may be added by completing courses after receiving the bachelor's degree.

Students must complete at least nine (9) minor hours in residence at the University of Oklahoma.

At least 6 credit hours will be in upper division courses (3000 or 4000 level).

A minimum grade of C is required in all courses which are applied to the minor and in all prerequisite courses for the minor. Courses in the minor may be taken at most 3 times.

Students with significant experience in computer programming can get credit for C S 1323 from the Advanced Standing Examination.

Students must complete prerequisites for all courses.

Required Courses

Code	Title	Credit Hours
MATH 1823	Calculus and Analytic Geometry I ¹	
MATH 2423	Calculus and Analytic Geometry II ¹	
C S 2813	Discrete Structures	3
	or MATH 2513 Discrete Mathematical Structures	
	Choose 6 hours of upper division CS coursework	6
	Choose 9 hours of CS coursework	9
Total Credit Hours		18

¹ MATH 1823 as well as MATH 2423 are required for the minor, but they do not count as CS courses.

Minors are available to all undergraduate students at OU. If the minor is officially declared, successfully completed, and noted on the graduation application, the student's transcript will so indicate at the time the bachelor's degree is posted.

Computational Technology, Minor

Minimum Total Credit Hours: 18

Minimum Upper-Division Hours: 6

Program Code: N230

The requirements for a minor must be completed concurrently with the major degree requirements.

No minor may be added by completing courses after receiving the bachelor's degree.

Students must complete at least nine (9) minor hours in residence at the University of Oklahoma.

9 credits from a single selected cognate discipline (JMC, LIS, MIS, or GIS), at least 6 of which are at the upper division (3000 or 4000 level), and one mathematics course chosen to complement the cognate discipline.

A minimum grade of C is required in all courses which are applied to the minor and in all prerequisite courses for the minor.

Gallogly College of Engineering academic policies regarding repeating courses apply.

Students must complete prerequisites for all courses.

Required Courses

Code	Title	Credit Hours

C S 4273	Capstone Design Project	3
C S 5473	Parallel, Distributed, and Network Programming	3
C S Electives		
Choose 12 credits of approved C S Science Electives from a list maintained by the department (p. 1360)		12
Total Credit Hours		54-57

Major Support Requirements

Code	Title	Credit Hours
Math		
MATH 2924	Differential and Integral Calculus II	4
MATH 3333	Linear Algebra I	3
Choose one of the following:		3
ECE 2523	Probability, Statistics and Random Processes	
ISE 3293	Applied Engineering Statistics	
MATH 4743	Introduction to Mathematical Statistics	
MATH 4753	Applied Statistical Methods	
Choose 9 credits of approved technical electives from a list maintained by the department. (p. 1360)		9
Additional College Requirements		
ENGR 1411	Pathways to Engineering Thinking ¹	1
ENGR 2002	Professional Responsibilities and Skills of Engineers and Scientists	2
Total Credit Hours		22

¹ Engineering transfer students may take ENGR 3511 in place of ENGR 1411.

Graduate Requirements

Up to 12 hours of graduate-level courses (as approved by the department) can be shared/double-counted and fulfill requirements in both the B.S. and M.S. portions of the Accelerated Degree Program.

No more than three courses at the C S G4000 level are permitted. No more than 3 credit hours of C S 5990 are permitted (students who have the graduate liaison's approval to complete a project option may take 6 hours). No more than 6 credit hours of Special Topics in Computer Science are permitted (even with a change in subject).

Thesis Option

Code	Title	Credit Hours
Core Courses		
C S 4413	Algorithm Analysis (or equivalent as approved by the graduate liaison)	3
C S 4513	Database Management Systems (or equivalent as approved by the graduate liaison)	3
Four courses selected from a list of approved Graduate C S Electives maintained by the School of Computer Science (p. 1360)		12

Electives

General Education and College Requirements

Courses designated as Core I, II, III, IV, or V are part of the General Education curriculum. Students must complete a minimum of 40 hours of General Education courses, chosen from the approved list, including at least one upper-division Gen. Ed. course outside of the student's major. **Courses graded P/NP will not apply.**

A grade of C or better is required in each course in the curriculum, including all prerequisite courses.

UNIVERSITY-WIDE GENERAL EDUCATION (MINIMUM 40 HOURS) AND COLLEGE REQUIREMENTS

Code	Title	Credit Hours
Core Area I: Symbolic and Oral Communication		
<i>English Composition</i>		
ENGL 1113	Principles of English Composition	3
ENGL 1213	Principles of English Composition	3
	or EXPO 1213 Expository Writing	
<i>Language (0-10 hours in the same language)</i>		
	This requirement can be met by two years of the same language in high school:	0-10
	Beginning Course (0-5 hours)	
	Beginning Course, continued (0-5 hours)	

Mathematics (minimum 3 hours)

MATH 1914	Differential and Integral Calculus I (Core I)	4
	1,2	

Core Area II: Natural Science (minimum 7 hours, including one laboratory)

<i>Natural Science</i>		
	Natural Science Elective	3
<i>Natural Science with lab</i>		
	Choose one natural science elective from a different discipline, with lab ³	4

Core Area III: Social Science

P SC 1113	American Federal Government	3
	Choose one course ⁴	3

Core Area IV: Arts & Humanities

<i>Artistic Forms</i>		
	Choose one course ⁴	3
<i>Western Culture</i>		
HIST 1483	United States to 1865	3
	or HIST 1493 United States, 1865 to the Present	
	Choose one course (excluding HIST 1483 and HIST 1493) ⁴	3

<i>World Culture</i>		
	Choose one course ⁴	3

Core Area V: First-Year Experience

	Choose one course ⁴	3
--	--------------------------------	---

Total Credit Hours		38-48
---------------------------	--	--------------

¹ MATH 1823, MATH 2423, and MATH 2433 sequence can be substituted for MATH 1914 and MATH 2924.

² Major support requirements that also satisfy University General Education requirements.

³ Courses taken to fulfill the Natural Science requirement must be chosen from the University-Wide General Education Approved Course List (Core II). At least one of the Natural Science courses must be a non-Physics course. All science courses must be for science or engineering majors and come from the natural science elective list maintained by the department.

⁴ To be chosen from the University-Wide General Education Approved Course List. Three of these hours must be upper-division (3000-4000).

Free Electives

Electives to bring total applicable hours to the minimum total required for the degree including a minimum of 40 upper-division hours.

Suggested Semester Plan of Study

Bachelor of Science in Computer Science is accredited by the Computing Accreditation Commission of ABET, <https://www.abet.org>, under the General Criteria and the Computer Science and Similarly Named Computing Programs Program Criteria.

In order to progress in your curriculum in the Gallogly College of Engineering, and as a specific graduation requirement, a grade of C or better is required in each course in the curriculum, including all prerequisite courses.

Two college-level courses in a single world language are required; this may be satisfied by successful completion of 2 years in a single world

language in high school. Students who must take language at the University will have an additional 6-10 hours of coursework.

Students may enter the accelerated program based on the undergraduate degree pattern offered in the year they first enrolled in the Oklahoma State System of Higher Education or later.

Students are eligible for graduate status upon graduation with the Bachelor of Science in Computer Science.

Total Credit Hours 138-141

¹ MATH 1823, MATH 2423, and MATH 2433 sequence can be substituted for MATH 1914 and MATH 2924. MATH 1523 will have to be taken by students who are not ready to start MATH 1823 or MATH 1914.

² Engineering transfer students may take ENGR 3511 in place of ENGR 1411.

³ Open electives should bring the total number of credits for the Bachelor degree up to 120. Physical education courses cannot be used for open electives.

⁴ To be chosen from the University-Wide General Education Approved Course List. Three of these hours must be upper-division (3000-4000). See list in the Class Schedule.

⁵ All science courses must be for science or engineering majors. Courses must come from a departmentally maintained list.

⁶ Four electives must be chosen from an approved list maintained by the School of Computer Science.

⁷ No more than three credit hours of C S 5990 are allowed (students who have graduate liaison's approval to complete a project option may take 6 hours).

⁸ Thesis option requires a total of six hours of 5000-level electives and six hours of C S 5980. Non-thesis option requires a total of 15 hours of 5000-level electives.

Courses designated as Core I, II, III, IV or V are part of the General Education curriculum. Students must complete a minimum of 40 hours of General Education courses, chosen from the approved list.

General Requirements for all Master's Degrees

The master's degree requires the equivalent of *at least* two semesters of satisfactory graduate work and additional work as may be prescribed for the degree.

All coursework applied to the master's degree must carry graduate credit.

Master's degree programs which require a thesis consist of *at least* 30 credit hours. All non-thesis master's degree programs require *at least* 30 credit hours.

Credit transferred from other institutions must meet specific criteria and is subject to certain limitations.

Courses completed through correspondence study may *not* be applied to the master's degree.

To qualify for a graduate degree, students must achieve an overall grade point average of 3.0 or higher in the degree program coursework and in all resident graduate coursework attempted. A student must also have at least a 3.0 in all coursework (including undergraduate coursework if any).

Additional information for master's degree students may be found in the Graduate College Bulletin.

Computer Science, M.S. Approved Courses List

For the most current list of approved courses, please consult the School of Computer Science.

Approved Core C S Courses

Code	Title	Credit Hours
C S 4613	Computer Architecture (taken for graduate credit)	3
C S 5013	Artificial Intelligence	3
C S 5033	Machine Learning Fundamentals	3
C S 5113	Distributed Operating Systems	3
C S 5133	Data Networks	3
C S 5173	Computer Security	3

C S 5813	Formal Languages	3

¹ C S 5213 is not available to C S majors who complete C S 4273 in the B.S. program for Computer Science at OU; C S 4273 is considered the undergraduate course equivalent of C S 5213.

Computer Science, Ph.D.

Minimum Total Hours: 90

Program Code: D235 R146

Program Requirements

Code	Title	Credit Hours
A minimum of 45 credit hours beyond the bachelor's degree, which must include the following: ^{1,2}		
C S 4413	Algorithm Analysis (or equivalent, as approved by the graduate liaison)	45-60
C S 4513	Database Management Systems (or equivalent, as approved by the graduate liaison)	
Choose 4 courses (12 hours) selected from the following: (p. 1361)		12
C S 4613	Computer Architecture	
C S 5013	Artificial Intelligence	
C S 5033	Machine Learning Fundamentals	
C S 5113	Distributed Operating Systems	
C S 5133	Data Networks	

C S 5173	Computer Security	
C S 5213	Software Engineering Processes	
C S 5473	Parallel, Distributed, and Network Programming	
C S 5813	Formal Languages	
Dissertation Research		
C S 6980	Research for Doctoral Dissertation (minimum 30 hours)	30-45
Total Credit Hours		90

¹ Up to 30 hours of coursework from prior master's work can be used to satisfy the minimum 45 hours. The decision of which courses to use toward the course credit hours is for the student's advisory committee to decide.

² No more than 6 hours of independent studies (including C S 5990 and/or C S 6990) can be counted toward the required minimum 45 hours of coursework.

General Requirements for Doctoral Degrees

A student should expect to spend at least the equivalent of three full academic years beyond the bachelor's degree to obtain the doctoral degree. During this period the student will take appropriate graduate coursework, successfully complete the general examination, and successfully defend and submit the final dissertation.

All coursework applied to the doctoral degree must carry graduate credit.

The doctoral degree requires at least 90 post-baccalaureate hours, including both formal coursework and hours of research.

The minimum hour requirement for a specific doctoral degree program cannot be waived.

No more than one-half of the credit hours, both OU and overall, excluding Research for Doctoral Dissertation (6980), may be S/U-graded coursework.

The student must be in residence at OU for at least two consecutive 16-week semesters during the pursuit of the doctoral degree while enrolled and engaged in coursework or research activities as prescribed by the major academic unit.

For more detailed regulations and requirements for Doctoral degrees, please consult the Graduate College Bulletin: <http://www.ou.edu/gradcollege/forms/bulletin>

Program in Data Science and Analytics

Charles Nicholson, Director
Carson Engineering Center Room 107
202 W. Boyd St.
Norman, OK 73019
Phone: (405) 325-3721
cnicholson@ou.edu

General Information

Data Science and Analytics is the development of analytical models and methods to extract new knowledge from vast, complex data. Organizations large and small employ data scientists to determine

profitable lines of business, characterize customers, evaluate and predict risks, improve operational efficiencies, predict system performance and perform complex simulations. Graduates in Data Science and Analytics will have the skills to design and build tools to extract, assimilate and analyze data, and the systems understanding to predict and enhance future performance for enterprises across all domains of the private and public sectors.

Undergraduate

Undergraduate Certificate

The Certificate in Data Science and Analytics will provide students with data science concepts and knowledge in a formal, stand-alone certificate format. The courses for this program are developed specifically for this certificate for undergraduate students enrolled in degree programs within Gallogly College of Engineering or the Mewbourne College of Earth and Energy. This certificate is intended to provide the level of data literacy required by the companies that recruit engineering and geoscience majors at the University of Oklahoma. Modern organizations are driven by the insights derived through extracting and analyzing the large quantities of data generated within and outside their organization. In order to accomplish this, employees must have a fair degree of understanding of data management, technology, and analytics. Hence, engineering students must acquire these skills so that they can help their organizations create analytical and statistical value.

Please contact the College's Williams Student Services Center (WSSC) for information about adding the certificate, or for guidance on course selection. The WSSC is located in 112 Felgar Hall | (405) 325-4096 | coewssc@ou.edu

Graduate

Master of Science

The Data Science and Analytics, Master of Science (p. 1368) program merges expertise and knowledge from the Schools of Computer Science and Industrial and Systems Engineering. Students will develop a strong foundation in the theory and application of data science, including machine learning, optimization modeling, and artificial intelligence, that will give them the skills to harness big data.

Graduate Certificate

Through the Graduate Certificate in Data Science and Analytics (p. 1368) students will build their data science and analytics skill set to enhance their current position or to allow them to seek new positions in the field.

Doctor of Philosophy

The Data Science and Analytics, Doctor of Philosophy (p. 1369) program will allow students to examine more deeply the fundamentals, theory, and application of Algorithmic, Systems, and Statistically thinking to extract knowledge from data that arises in various application domains. The graduates of the program will be prepared to engage in creative research and development in academia or industry.

Student Resources

The DSA Office is here for our students from application to graduation.

The information on this page will help orientate our new students by providing links to student groups, campus offices and contact information. While also providing current students all the information and forms they need for enrollment through to graduation. In addition to our credit-based offerings, OU DSAI provides non-degree learning and

development opportunities and certifications for working professionals, and collaborative engagement with industry partners. For more information, visit our Industry Engagement page.

Guidance can be found via: Felgar Hall, Room 213 | (405) 325-6417 | datascience@ou.edu

Courses

DSA 3013 Machine Learning for Data Science 3 Credit Hours

Prerequisite: CS 1213 or CS 1313 or CS 1321 or CS 1323 or CS 1324, and departmental permission. Machine Learning for Data Science provides a broad overview of widely accepted and state-of-the-art machine learning approaches to automatically extract information from a variety of data types. This course will include conceptual background on data, methods, and application approaches; coverage of issues of data security, privacy, and ethics related to machine learning; and practical, hands-on exercises. (Irreg.)

DSA 3023 Big Data Engineering 3 Credit Hours

Prerequisite: DSA 3013, and CS 1213 or CS 1313 or CS 1321 or CS 1323 or CS 1324, and departmental permission. Students in this course will develop basic ability to design, build, and implement data pipeline systems to allow efficient access to data and databases. Several topics will be covered including data wrangling, data ingestion, and storage engines. Cloud based systems for data processing and distributed computing will also be discussed. (Irreg.)

DSA 4003 Applied Data Science 3 Credit Hours

Prerequisite: DSA 3013 and DSA 3023, and CS 1213 or CS 1313 or CS 1321 or CS 1323 or CS 1324; and departmental permission. In this course you will complete multiple larger-scale team projects on real-world complex data sets. The projects will allow you to develop and continue to refine your skills in problem identification, data visualization, data wrangling, data organization, machine learning, communication, and presentation. (Irreg.)

DSA G4413 Algorithm Analysis 3 Credit Hours

(Crosslisted with C S 4413) Prerequisites: C S 2413 and C S 2813; or MATH 2513; or DSA 5005; and departmental permission. Design and analysis of algorithms and measurement of their complexity. This course introduces various algorithm design strategies—divide and conquer, greedy principle and dynamic programming—to solve a variety of problems using algorithms of various types: deterministic and randomized, serial and parallel, centralized and decentralized, and program based and circuit based. (F)

DSA G4513 Database Management Systems 3 Credit Hours

(Crosslisted with C S 4513) Prerequisites: C S 2413 and C S 2813; or MATH 2513; or DSA 5005; and departmental permission. The design and implementation of a DBMS including data models, query languages, entity-relationship diagrams, functional dependencies, normalization, storage structures, access methods, query processing, security and transaction management, and applications. The impact of databases on individuals, organizations, and society, and legal and professional responsibilities including security and privacy will be discussed. A commercial DBMS is used. Students practice written communication skills. (F)

DSA 5001 Data Analytics and Media 1 Credit Hour

Prerequisites: Departmental permission; graduate standing. This course covers the application of data analytics to the media environment. Students will learn the application and usage of data analytics in media and its effectiveness; and how data analytics provides research tools to collect audiences' opinion on political, social, public issues, and consumers' responses to the brand. (Irreg.)

DSA 5005 Computing Structures 5 Credit Hours

(Crosslisted with C S 5005) Prerequisite: CS 2334, MATH 1914 or MATH 1823 or with permission of graduate liaison. This course has three parts: discrete mathematics, object-oriented programming in C++, and data structures in C++. As part of the discrete mathematics students will be introduced to combinatorics, logic, relations, functions, computational complexity, automata, and graph theory. Students will be introduced to the fundamentals of object-oriented programming and learn to design, build, and analyze data structures using object-oriented principles and techniques. Credit hours earned for this course cannot be used to fulfill degree requirements for the B.S., M.S. or Ph.D. programs in computer science. (Irreg.)

DSA 5011 Introduction to R 1 Credit Hour

Prerequisites: departmental permission; graduate standing. R is a free open source statistical programming language used by professionals in every field and industry. This introductory course aims to provide students with the fundamentals of R and R Studio. Instead of passively watching videos, students will apply R to solve real data problems while receiving instant and personalized feedback that guides them to the correct solution. (Irreg.)

DSA 5013 Fundamentals of Engineering Statistical Analysis 3 Credit Hours

(Crosslisted with ISE 5013) Prerequisite: graduate standing. Introduction to probability, expectation, discrete and continuous distributions, sampling and descriptive statistics, parameter estimation, and statistical tests to aid decision making. The student will learn analysis techniques for verification of systems parameters. (F, Sp)

DSA 5021 Data Analytics Applied to Meteorology Data 1 Credit Hour

Prerequisites: departmental permission; graduate standing. This course focuses on meteorology data that is stored regularly in space and time, so-called gridded data. For example, satellite or forecast data that is stored in a specific latitude-longitude grid, and available at uniform increments in time. Analysis of gridded data is abetted by programming in Python, offering an array syntax that exploits the uniformity of data. (Irreg.)

DSA 5031 Econometrics for DSA 1 Credit Hour

Prerequisite: Graduate standing and departmental permission. The main goal of this course is to learn a set of econometrics tools that can be applied in empirical research related to economic issues. The course will emphasize applying different estimation techniques, or quasi-experimental methods, to establish causal relationships in observational data. (Irreg.)

DSA 5041 Advanced R 1 Credit Hour

Prerequisite: Graduate standing in DSA/C S/ISE and DSA 5011, or departmental permission. R is a free open source statistical programming language used by professionals in every field and industry. This course will provide students with detailed knowledge of R and R Studio. Instead of passively watching videos, students will apply R to solve real data problems while receiving instant and personalized feedback that guides them. (Irreg.)

- DSA 5051 Data Visualization 1 Credit Hour**
Prerequisite: Graduate standing in DSA/C S/ISE and departmental permission; DSA 5103 and DSA 4513 recommended. Aspiring data scientists need to be able to communicate the stories of data to communities of interest. This usually requires the depiction of data in visualizations. The course combines an overview of best practices for visualizations with practical knowledge, including the use of Tableau and how to gather user requirements. (Irreg.)
- DSA 5061 Python for Data Science and Analytics 1 Credit Hour**
Prerequisite: Graduate standing, C S 1313 or C S 1323, and departmental permission. This course introduces core programming basics, including data types, control structures, and algorithm development with functions via the Python programming language for students without prior programming experience. The course discusses the fundamental principles of Object-Oriented Programming and their application in data science and analytics. (Irreg.)
- DSA 5103 Intelligent Data Analytics 3 Credit Hours**
(Crosslisted with ISE 5103) Prerequisite: graduate standing or permission of instructor; ISE 3293 or ISE 5013; CS 1313 or CS 1323. In our society, data is rapidly increasing in volume, velocity, and variety. At the same time computing power and the sophistication of data analysis techniques are increasing. However, even with the expanding capabilities, businesses and organizations often find themselves "data rich, but information poor." Intelligent Data Analysis is a holistic approach to addressing real-world data intensive problems that integrates human intuition with data analysis tools to best draw out meaningful insights. To this end, the course has four underlying themes: defining the Problem, understanding and coping with Data, selecting and using appropriate Analytical Tools, and discovering and communicating the Insight. Techniques covered include data cleansing and pre-processing, exploratory analysis and visualization, dimension reduction, linear and logistic regression, decision trees, and clustering. This course will introduce students to a powerful open source statistical programming language (R) and include extensive hands-on data analysis and team projects. (F)
- DSA 5113 Advanced Analytics and Metaheuristics 3 Credit Hours**
(Crosslisted with ISE 5113) Prerequisite: ISE 5013, graduate standing or permission of Instructor. Explores advanced techniques for addressing complex optimization problems. Focus is on formulating mathematical models and developing problem solving strategies using methods in the context of Data Science and Analytics. Topics include continuous and combinatorial optimization with an emphasis on both traditional and modern heuristic techniques. (Sp)
- DSA 5133 Energy Analytics 3 Credit Hours**
(Crosslisted with ISE 5133) Prerequisite: Graduate standing or permission of instructor. In today's data-driven world, the ability to extract knowledge and create successful future energy projections is critical for the energy sectors. In this regard, data science body of knowledge promises a strong set of analytical tools that can be used for demand/supply forecasting and price prediction. This course aims at teaching the students the fundamentals of data analysis and interpretation. (F)
- DSA 5203 Time Series Analysis 3 Credit Hours**
Prerequisite: DSA/ISE/C S graduate standing or Departmental permission. This course will cover data mining and time series analysis. Modules include: statistical estimation, transformations and decomposition of time series, quantifying correlation structure in standard models, forecasting methods, linear least squares method, and volatility models. Students will utilize MATLAB Time Series Tool Box and open source programs in R. (Irreg.)
- DSA 5303 Financial Engineering Analytics 3 Credit Hours**
Prerequisite: departmental permission or DSA/ISE/C S graduate standing. Course focuses on use of optimization and stochastic models to solve portfolio optimization problems; price derivative securities including energy and weather derivatives; and applications of financial engineering, including algorithmic trading, financial networks, pricing of real options, and the use of machine learning in pricing. Data driven models and big data mining in financial engineering will be also discussed. (Irreg.)
- DSA 5403 Bayesian Statistics 3 Credit Hours**
Prerequisite: Departmental permission or DSA graduate standing. Course topics are models, probability, Bayes' Rule and R; inference to a binomial probability; and the generalized linear model. (Irreg.)
- DSA 5503 Healthcare Analytics 3 Credit Hours**
(Crosslisted with ISE 5503) Prerequisite: Graduate standing and ISE 3293 or ISE/DSA 5013. This course gives an overview of the primary concepts and methods towards developing artificial intelligence (AI)-enabled healthcare systems. We will focus on foundational methods in machine learning and data analytics for prediction and pattern recognition, and apply them to specific areas in medicine and healthcare including, but not limited to, disease diagnosis, patient treatments and their outcomes prediction. (Sp)
- DSA 5703 Machine Learning Practice 3 Credit Hours**
(Crosslisted with C S 5703) Prerequisite: Graduate standing; C S 4013/5013, C S 5593, or ISE/DSA 5103; or permission of instructor. Machine learning is the data-driven process of constructing mathematical models that can be predictive of data observed in the future. In this course, we will study the use of a range of supervised, semi-supervised and unsupervised methods to solve both classification and regression problems. (F)
- DSA 5900 Professional Practice 1-4 Credit Hours**
1 to 4 hours. Prerequisite: Completed or concurrent enrollment in DSA 5103, DSA 5113, DSA 4413, and DSA 4513. Graduate standing and departmental permission. May be repeated; maximum credit four hours. Participation in a professional experience with an approved project sponsor and topic. A written report detailing the responsibilities and results of the experience is required upon completion along with an oral presentation. (F, Sp, Su)
- DSA 5970 Special Topics/Seminar 1-3 Credit Hours**
1 to 3 hours. Prerequisite: permission of instructor. May be repeated with a change of subject matter; maximum credit 12 hours. Selected topics of current research interest not covered by regularly scheduled coursework. (F, Sp, Su) (Irreg.)
- DSA 5980 Research for Master's Thesis 2-9 Credit Hours**
2 to 9 hours. Prerequisite: Graduate standing and departmental permission. Variable enrollment, two to nine hours; maximum credit applicable toward degree, six hours. (F, Sp, Su)
- DSA 5990 Independent Study 1-3 Credit Hours**
1 to 3 hours. Prerequisite: Graduate standing and permission of instructor. May be repeated; maximum credit nine hours. Contracted independent study for a topic not currently offered in regularly scheduled courses. Independent study may include library and/or laboratory research and field projects. (Irreg.)
- DSA 6980 Research for Doctoral Dissertation 2-16 Credit Hours**
2 to 16 hours. Prerequisite: Graduate standing and permission of instructor; may be repeated. Directed research culminating in the completion of the doctoral dissertation. (F, Sp, Su)

Faculty

Last Name	First/Middle Name	Middle init.	OU Service start	Title(s), date(s) appointed	Degrees Earned, Schools, Dates Completed
Barker	Kash		2011	PROFESSOR OF INDUSTRIAL AND SYSTEMS ENGINEERING, 2021; DAVID L. BOREN PROFESSOR, 2020; PROFESSOR DATA SCIENCE AND ANALYTICS	PhD, Univ of Virginia, 2008; MS, Univ of Oklahoma, 2004; BS, Univ of Oklahoma, 2002
Beattie	Matt			Adjunct Professor	PhD, University of Oklahoma
Dhall	Sundarshan			Professor Emeritus	Ph.D., Computer Science, Univ of Illinois; MS, Mathematics, Univ of Illinois; MA, Delhi Univ, Delhi, India
Diochnos	Dimitrios			Assistant Professor	PhD, Univ of Illinois at Chicago MS, Univ of Athens BS, Univ of Athen
Ebert	David			Professor of Electrical and Computer Engineering and the Director of the Data Institute for Societal Challenges.	PhD, Computer Science, The Ohio State Univ; MS, Computer Science, The Ohio State Univ; BS, Computer Science, The Ohio State Univ
Fagg	Andrew			Presidential Associates Presidential Professor and Associate Professor of Computer Science and Bioengineering	Postdoctoral Research Associate, Univ of Massachusetts Amherst; PhD, Univ of Southern California; MS, Univ of Southern California; BS, Carnegie Mellon Univ
Fiedler	Brian			Professor Emeritus. Meteorology	B.S., Physics, M.I.T., 1978 Ph.D., Astro-Geophysics, Univ of Colorado, 1982
Ghosh	Pallab			Associate Professor of Economics	Ph.D., Syracuse University, 2014
Gonzalez	Andres			Assistant Professor. Industrial and Systems Engineering.	Ph.D., Civil Engineering, Rice Univ; Ph.D., Engineering, Universidad de los Andes; Six Sigma Black-Belt, Arizona State Univ; M.Eng., Industrial Engineering, Universidad de los Andes; B.Sc. Physics, Universidad de los Andes
Gruenwald	Gia Loi	L	1991		SAMUEL ROBERTS NOBLE PRESIDENTIAL PROFESSOR, 1998; PROFESSOR OF COMPUTER SCIENCE, 2002; DAVID W. FRANKE PROFESSOR OF COMPUTER SCIENCE, 2006
Habibi	Golnaz			Assistant Professor in Computer Science.	PhD, Computer Science, Rice Univ, Houston, TX; MS, Electrical and Control Engineering, Tarbiat Modares Univ, Tehran; BS, Electrical and Control Engineering, K.N. Toosi Univ, Tehran
Hemmati	Soheil	M	2023	Assistant Professor of Industrial and Systems Engineering	Ph.D Industrial and Systems Engineering, University of Florida, M.S. Industrial Engineering, Sharif University of Technology, B.S. Industrial Engineering, Sharif Universtiy of Technology
Hougen	Dean		2001	ASSOCIATE PROFESSOR OF COMPUTER SCIENCE, 2007; INTERIM DIRECTOR OF COMPUTER SCIENCE, 2022	PhD, Univ of Minnesota, 1998; BS, Univ of Minnesota, 1988
Khanmoham	Sina			Assistant Professor in Computer Science	PhD, Systems Science, State Univ of New York at Binghamton; MSc, Manufacturing Management, Univ of Hertfordshire; BSc, Computer Science, University of Tabriz
Kirstetter	Pierre			Associate Professor. School of Meteorology	PhD, 2008, Meteorology, Grenoble Alps Univ, Grenoble, France; MSc, 2005, Environmental Sciences, Grenoble Alps Univ, France; M.Eng, 2004, Civil Engineering and Environmental Science, Grenoble Institute of Technology, France

Kumar	Naveen			Assistant Professor in Management Information Systems	PhD, Industrial Engineering, Univ of Washington, Seattle (2006); Graduate Certificate Holder (2004), Global Trade, Transportation & Logistics (GTTL), Univ of Washington, Seattle; MS, Industrial Engineering, Univ of Washington, Seattle (2003); MS, Industrial Engineering, Univ of Tennessee, Knoxville (2002)
Kyprioti	Aikaterini	P	2022	Assistant Professor, School of Civil Engineering and Environmental Science	Ph.D. Unvierstiy of Notre Dame; M.S. University of Notre Dame; B.S. Aristotle University of Thessaloniki, Greece
Lakshmi	VaralS			Professor Emeritus	PhD, Electrical Engineering, Indian Institute of Science; ME, Applied Electronics and Servos, Indian Institute of Science; BE, Electrical Technology, Indian Institute of Science; BS, Physics, Univ of Madras
Lan	Chao			Assistant Professor in Computer Science.	PhD, Computer Science, Univ of Kansas MS, Nanjing Univ of Posts and Telecommunication, China BS, Nanjing Univ of Posts and Telecommunication, China
Li	Yifu			Assistant Professor	Ph.D., Industrial and Systems Engineering, Virginia Tech; B.S., Industrial and Systems Engineering, Virginia Tech
Maiti	Anindya			Assistant Professor in Computer Science	PhD in Electrical Engineering and Computer Science, Wichita State Univ; MS in Electrical Engineering, Wichita State Univ; BTech in Computer Science, Vellore Institute of Tech
Malhotra	Pankhuri			Affiliated DSA Faculty, Assistant Professor of Marketing	Ph.D Information Systems, University of Illinois; MSC Business Analytics and Operations Research, University of Manchester; BSC Physics University of Delhi, Miranda House
Moussa	Marmar		2023	Assistant Professor Computer Science and Engineering	PhD. Computer Science and Engineering, University of Connecticut; M.S. Computer Science and Engineering, University of Connecticut; M.S. Computer Science and Engineering, Alexandria University; B.S. Computer Science, Alexandria University
Mudduluru	Sanjana		2023	Assistant Professor, Computer Science	PhD. Computer Science, University of Oklahoma; M.S. Computer Science, University of Oklahoma; BTech, Jawaharlal Nehru Technological University
Nicholson	Charles		2013	DIRECTOR OF DATA SCIENCE AND ANALYTICS INSTITUTE, 2023; ASSOCIATE PROFESSOR OF INDUSTRIAL AND SYSTEMS ENGINEERING, 2019; ASSOCIATE PROFESSOR DATA SCIENCE AND ANALYTICS	PhD, Southern Methodist Univ, 2010; MS, Univ of North Texas, 2002; BS, Univ of North Texas, 1999
Pan	Chongle			Associate Professor of Computer Science and Microbiology	PhD, Univ of Tennessee, Knoxville; BS, East China Normal Univ
Park	Ji Hwan			Assistant Professor, School of Computer Science	PhD, Computer Science, Stony Brook Univ, Stony Brook, NY; MS, Digital Media, KAIST, Daejeon, South Korea; BS, Computer Engineering, Hongik Univ, Seoul, South Korea
Pei	Jin-Song		2002	Associate Professor, Civil Engineering & Environmental Science	Ph.D. Columbia University, New York; MS Engineering, Nanyang Technological University Singapore; BS Engineering Xi'an Jiaotong University, Xi'an, China
Radhakrishna	Aridhar		1990	PROFESSOR OF COMPUTER SCIENCE, 2002; INTERIM ASSOCIATE DEAN FOR PARTNERSHIPS, 2022	PhD, Louisiana State Univ, 1990; MS, Louisiana State Univ, 1987; MLIS, Louisiana State Univ, 1986; BS, Univ of South Alabama, 1985; BSC, Univ of Madras, 1983

Razzaghi	Talayeh		ASSISTANT PROFESSOR	PhD, Univ of Central Florida; MS, Sharif Univ of Technology, Iran; BS, Univ of Tehran, Iran
Roh	Byeong-Min	2022	Assistant Professor, Mechanical Engineering	PhD. Mechanical Engineering, The Pennsylvania State University; M.S. Mechanical Engineering, The Pennsylvania State University; M.S. Industrial Engineering, The Pennsylvania State University; B.S. Manufacturing Systems & Design Engineering, Northumbria University at Newcastle, UK; B.S. Manufacturing Systems & Design Engineering, Seoul National University of Science and Technology
Shehab	Randa	1997	PROFESSOR OF INDUSTRIAL AND SYSTEMS ENGINEERING, 2009; ADJUNCT PROFESSOR OF WOMEN'S AND GENDER STUDIES, 2013; NETTIE VINCENT BOGGS PROFESSOR OF ENGINEERING, 2014; CO-DIRECTOR DATA SCIENCE AND ANALYTICS	PhD, Univ of Oklahoma, 1995; MS, Univ of Oklahoma, 1993; BS, Univ of Oklahoma, 1989
Stewart	Wayne		Lecturer, Mathematics	PhD, University of Auckland, 2007
Trafalis	Theodore B	1991	PROFESSOR OF INDUSTRIAL AND SYSTEMS ENGINEERING, 2002; ADJUNCT PROFESSOR OF METEOROLOGY, 2008; PROFESSOR DATA SCIENCE AND ANALYTICS	PhD, Purdue Univ, 1989; MS, Purdue Univ, 1984; BS, Athens, 1982
Veras	Richard	2021	Assistant Professor, Electrical and Computer Engineering	Ph.D Electrical and Computer Engineering, Carnegie Mellon University; M.S. Electrical and Computer Engineering, Carnegie Mellon University; B.S. Mathematics, The University of Texas at Austin; B.S. Computer Science, The University of Texas at Austin

Yoon	Doyle	2003	ASSOCIATE PROFESSOR OF JOURNALISM AND MASS COMMUNICATION, 2009; ASSOCIATE PROFESSOR DATA SCIENCE AND ANALYTICS, 2017; GRADUATE DIRECTOR, 2023	PhD, Univ of Missouri, 2003; MA, Univ of Missouri, 1999; BA, Sogang Univ, 1989
Zamani Esfahlani	Farnaz	2023	Assistant Professor, Biomedical Engineering	Ph.D Systems Science, State University of New York at Binghamton; M.S. Biomedical Engineering, State University of New York at Binghamton; B.A. Clinical Psychology, University of Tabriz

Data Science and Analytics, Undergraduate Certificate

Minimum Total Credit Hours: 15

Program Code: T103

Students must be enrolled as undergraduates in the Gallogly College of Engineering or the Mewbourne College of Earth and Energy. All courses counted toward the certificate must be completed with a C or better.

Code	Title	Credit Hours
Required Courses		
Choose one of the following:		3-4
C S 1213	Programming for Non-Majors with Python	
C S 1313	Programming for Non-Majors with C	
C S 1323	Introduction to Computer Programming for Programmers	
C S 1324	Introduction to Computer Programming for Non-Programmers	
Program Core		
DSA 3013	Machine Learning for Data Science	3
DSA 3023	Big Data Engineering	3
DSA 4003	Applied Data Science	3
Program Electives		
Choose three hours of approved elective(s) from list of courses maintained by Program in Data Science and Analytics (p. 1367)		3

² Approved for graduate credit.

General Requirements for all Master's Degrees

The master's degree requires the equivalent of *at least* two semesters of satisfactory graduate work and additional work as may be prescribed for the degree.

All coursework applied to the master's degree must carry graduate credit.

Master's degree programs which require a thesis consist of *at least* 30 credit hours. All non-thesis master's degree programs require *at least* 30 credit hours.

Credit transferred from other institutions must meet specific criteria and is subject to certain limitations.

Courses completed through correspondence study may *not* be applied to the master's degree.

To qualify for a graduate degree, students must achieve an overall grade point average of 3.0 or higher in the degree program coursework and in all resident graduate coursework attempted. A student must also have at least a 3.0 in all coursework (including undergraduate coursework if any).

Additional information for master's degree students may be found in the Graduate College Bulletin.

Data Science and Analytics, Graduate Certificate

Minimum Total Hours: 15

Program Code: G302, G303 (Online)

The Graduate Certificate in Data Science and Analytics provides a mechanism for full-time working students to pursue expertise in this rapidly growing discipline. Through a certificate, they will build their data science and analytics skill set to enhance their current position or to allow them to seek new positions in the field. A total of 15 hours is required for the certificate.

Certificate Requirements

Code	Title	Credit Hours
At least 6 hours from the core courses listed below:		
DSA/C S 5005	Computing Structures	6

DSA/C S 4513 Database Management Systems ¹	
DSA/C S 4413 Algorithm Analysis ¹	
DSA/ISE 5013 Fundamentals of Engineering Statistical Analysis	
DSA/ISE 5103 Intelligent Data Analytics	
DSA/ISE 5113 Advanced Analytics and Metaheuristics	
7-9 hours chosen from a set of elective courses approved by the graduate liaison	7-9
Total Credit Hours	15

¹ 4000-level courses must be taken at the graduate/G level in order to apply to completion of the graduate certificate.

A graduate *certificate* is not a graduate *degree*. A graduate degree represents a program of independent inquiry beyond the depth of coursework alone, while a graduate certificate represents a set of courses only.

- All courses must be taken at OU. No transfer credit will apply.
- No course substitutions are permitted for graduate certificates.
- Coursework applied to a graduate certificate cannot be more than five years old as of the semester the graduate certificate is awarded.
- Students must earn a grade point average of 3.00 or higher on all coursework applied to the graduate certificate.

Data Science and Analytics, Ph.D.

Minimum Total Hours: 90

Program Code: D272, D273 (Online)

Program Requirements

Code	Title	Credit Hours
Core Courses (20 hours) ¹		
DSA/ISE 5013	Fundamentals of Engineering Statistical Analysis ²	3
DSA/ISE 5103	Intelligent Data Analytics ²	3
DSA/ISE 5113	Advanced Analytics and Metaheuristics ²	3
DSA/C S 5005	Computing Structures ²	5
DSA/C S 4413	Algorithm Analysis	3
DSA/C S 4513	Database Management Systems ²	3
Guided Electives ³		25
Dissertation Research		
DSA 6980	Research for Doctoral Dissertation	2-45
Total Credit Hours		90

¹ With approval of the graduate liaison, other graduate-level coursework may substitute for core courses on the basis of undergraduate, graduate, or professional background.

² One or more of these courses may be substituted with additional electives based on equivalent prior coursework.

³ Guided Electives could be transferred from graduate work and this decision is made by the students' doctoral committee members.

notes

- A minimum of 45 credit hours of coursework and a maximum of 45 credit hours of dissertation research DSA 6980 is required.
- A maximum of 30 credit hours of coursework can be transferred from prior graduate work and this decision is made by the students' doctoral committee members.
- A maximum of 6 S/U-graded credit hours is allowed as part of the 45 credit hours of coursework.

General Requirements for Doctoral Degrees

A student should expect to spend at least the equivalent of three full academic years beyond the bachelor's degree to obtain the doctoral degree. During this period the student will take appropriate graduate coursework, successfully complete the general examination, and successfully defend and submit the final dissertation.

All coursework applied to the doctoral degree must carry graduate credit.

The doctoral degree requires at least 90 post-baccalaureate hours, including both formal coursework and hours of research.

The minimum hour requirement for a specific doctoral degree program cannot be waived.

No more than one-half of the credit hours, both OU and overall, excluding Research for Doctoral Dissertation (6980), may be S/U-graded coursework.

The student must be in residence at OU for at least two consecutive 16-week semesters during the pursuit of the doctoral degree while enrolled and engaged in coursework or research activities as prescribed by the major academic unit.

For more detailed regulations and requirements for Doctoral degrees, please consult the Graduate College Bulletin: <http://www.ou.edu/gradcollege/forms/bulletin>

General Information

The School of Electrical and Computer Engineering has a tradition of technological leadership demonstrated since its inception in 1906 at the University of Oklahoma. Historical highlights of the school include:

- 1906: Moved from Applied Science to College of Engineering
- 1972: Computer Science combined into the school
- 1992: Electrical Engineering and Computer Science split and became separate schools within the College of Engineering

- 1996: Curriculum reorganized to support both Electrical Engineering degrees and Computer Engineering degrees; the school was renamed the School of Electrical and Computer Engineering.

The faculty of the School of Electrical and Computer Engineering (ECE) is committed to excellence in teaching, quality research in selected areas of leading-edge technology, and the professional development of students.

Having Electrical Engineering and Computer Engineering in a single school offers the student an exciting combination of technologies with which to meet the design problems of the twenty-first century and an opportunity to develop hands-on skills at the device and system levels. Each degree is based on class offerings from both specialties within ECE, augmented by classes from the School of Computer Science and the Department of Engineering. With this balance, the student is prepared to handle both hardware and software design and analysis topics. Engineering research and career applications include bioengineering, communications, computer architecture, solid state devices and materials, electric power and radio frequency systems, image and signal processing, instrumentation and control systems, and linear and digital electronics.

Electrical and Computer Engineering Mission Statement

The mission of the School of Electrical and Computer Engineering is to provide a high-quality educational experience for undergraduate and graduate students.

Programs & Facilities

Labs & Facilities

Excellent facilities are available for advanced studies in digital systems, power systems, medical imaging, digital signal processing, intelligent transportation systems, alternate energy, GPS, weather radar and instrumentation, communication, opto-electronics and solid state electronics. The school operates and maintains a microprocessor lab, a power systems simulator lab, a digital signal processing lab and other instructional and research laboratories. The facilities are used to provide "hands-on" experience for students.

Quantum Device Laboratory

Unique to OU, the Quantum Device Laboratory is working on quantum engineered semiconductor structures at sub-nanometer scale for realizing functional devices and sub-systems with support from NSF, DoD, and DoE.

Scholarships

The school annually awards many scholarships to students with superior records to help defray the cost of their education. These scholarships are awarded on the basis of merit and need.

Undergraduate

Electrical Engineering

Program Educational Objectives (PEO)

The overarching *Educational Objectives* of the Electrical Engineering program are that our graduates will:

1. Be successfully engaged in their careers, leveraging specialized knowledge of Electrical Engineering
2. Pursue and apply new knowledge to solve constrained problems and develop new opportunities

3. Contribute to society through professional and ethical application of technology

We expect our BS Electrical Engineering graduates to successfully demonstrate abilities appropriate to these objectives within the first three-to-five years of receiving their Baccalaureate Degree in Electrical Engineering.

Computer Engineering

Program Educational Objectives (PEO)

The overarching *Educational Objectives* of the Computer Engineering program are that our graduates will:

1. Be successfully engaged in their careers, leveraging specialized knowledge of Computer Engineering
2. Pursue and apply new knowledge to solve constrained problems and develop new opportunities
3. Contribute to society through professional and ethical application of technology

We expect our BS Computer Engineering graduates to successfully demonstrate abilities appropriate to these objectives within the first three-to-five years of receiving their Baccalaureate Degree in Computer Engineering.

Electrical and Computer Engineering Undergraduate Student Outcomes

1. an ability to identify, formulate and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgement to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies

Bachelor of Science

Students enrolled in the School of Electrical and Computer Engineering (ECE) are offered a choice of two Bachelor of Science degrees. Curricula are designed to give a thorough understanding of the physical principals, the design process and the current technology in the student's chosen discipline.

- Computer Engineering, Bachelor of Science (p. 1378)¹
- Electrical Engineering, Bachelor of Science (p. 1380)²

¹ Bachelor of Science in Computer Engineering accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org>, under the General Criteria and the Electrical, Computer,

Communications, Telecommunication(s) and Similarly Named Program Criteria.

² Bachelor of Science in Electrical Engineering accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org>, under the General Criteria and the Electrical, Computer, Communications, Telecommunication(s) and Similarly Named Program Criteria.

Minor

The Electrical and Computer Engineering Minor (p. 1382) allows students with similar math/science backgrounds to progress deeply into ECE subject areas that have strong relevance to their Major Degree and Career Objectives.

Accelerated Bachelor of Science/Master of Science

The Accelerated Bachelor of Science/Master of Science programs allow students to pursue a graduate degree in conjunction with the undergraduate degree requirements.

- Computer Engineering, B.S./Computer Science, M.S. (p. 1383)
- Computer Engineering, B.S./Electrical and Computer Engineering, M.S. (p. 1386)
- Electrical Engineering, B.S./Electrical and Computer Engineering, M.S. (p. 1389)

Graduate

Graduate students have an opportunity to select a research topic in one of the many exciting research programs being pursued by our faculty. In many cases, these research programs have funding to support the student participants during the period of their thesis studies.

Master of Science

Electrical and Computer Engineering, Master of Science (p. 1392)

Doctoral Program

Electrical and Computer Engineering, Ph.D. (p. 1392)

Courses

ECE 2214 Digital Design 4 Credit Hours

Prerequisite: MATH 1823 or MATH 1914. Number systems, Boolean algebra, minimization procedures, combinational logic functions, introduction to sequential logic design, finite state machines and clocked (synchronous) sequential circuits. Analysis, synthesis and implementation are appropriately emphasized. (F, Sp)

ECE 2523 Probability, Statistics and Random Processes 3 Credit Hours

Prerequisite: ECE major or minor; MATH 2433 or MATH 2924. Covers the role of statistics in electrical and computer engineering and includes substantial exposure to applications appropriate to the discipline: basic probability; random variables, vectors and processes; time averages, expectations and laws of large numbers; stationarity, autocorrelation and spectral analysis; minimum mean squared error estimation; detection and linear filtering; IID, Markov, independent increment, counting, Gaussian and Poisson random processes. (F, Sp)

ECE 2713 Digital Signals and Filtering 3 Credit Hours

Prerequisite: ENGR 1411 or ENGR 3511 or concurrent enrollment; CS 1313 or CS 1321 or CS 1323 or CS 1324 or concurrent enrollment; and MATH 2423 or 2924. Digital signals and filter, discrete Fourier A and Z transforms, sampling. (F, Sp)

ECE 2723 Electrical Circuits I 3 Credit Hours

Prerequisites: ECE 2713 or concurrent enrollment in ECE 2713; MATH 2423 or 2924; PHYS 2524. Introduction to circuit elements and the laws of electrical science. Loop and nodal analysis solution methods. Thevenin and Norton equivalent circuits. Superposition and source transformation methods. Laplace transform analysis of electrical circuits. Guest lectures introducing advanced topics. (F, Sp)

ECE 2970 Special Topics/Seminar 1-3 Credit Hours

1 to 3 hours. Prerequisite: Permission of instructor. May be repeated; maximum credit nine hours. Special topics or seminar course for content not currently offered in regularly scheduled courses. May include library and/or laboratory research and field projects. (Irreg.)

ECE 3113 Energy Conversion I 3 Credit Hours

Prerequisite: ECE 2723 and ECE 3613. Survey of methods of energy conversion; field-energy force relationships, equations of motion, incremental motion transducers, transformer theory; introduction to rotating machines. (Sp)

ECE 3223 Microprocessor System Design 3 Credit Hours

Prerequisite: ECE 3773 or concurrent enrollment. Review of clocked sequential circuits; MSI/LSI devices and applications, including registers, busing, combinational functions; use of microprocessors and logic design using microprocessors. Emphasizes assembly of full functional units into workable systems. (F, Sp)

ECE 3323 Introduction to Solid State Electronic Devices 3 Credit Hours

Prerequisite: 3613. Introduction to quantum mechanics, crystal properties and growth of semiconductors, energy bands in solids, charge carriers in semi-conductors, excess carriers in semiconductors, and introduction to diodes and transistors. (F, Sp)

ECE 3440 Mentored Research Experience 3 Credit Hours

0 to 3 hours. Prerequisites: ENGL 1113 or equivalent, and permission of instructor. May be repeated; maximum credit 12 hours. For the inquisitive student to apply the scholarly processes of the discipline to a research or creative project under the mentorship of a faculty member. Student and instructor should complete an Undergraduate Research & Creative Projects (URCP) Mentoring Agreement and file it with the URCP office. Not for honors credit. (F, Sp, Su)

ECE 3613 Electromagnetic Fields I 3 Credit Hours

Prerequisite: ECE 2723 and MATH 2443 or MATH 2934 and Mathematics 3113. Electrostatic and magnetostatic fields and sources, boundary conditions; introduction to Laplace's and Poisson's equations; quasi-stationary and time-varying fields; Maxwell's equations and circuit concepts. (F, Sp)

ECE 3723 Electrical Circuits II 3 Credit Hours

Prerequisites: ECE 2713, ECE 2723; and MATH 3113 or concurrent enrollment in MATH 3113. Analysis of electrical circuits in both time and frequency domains. Continuation of AC circuit theory, use of two port network theorems, impulse response, convolution, and differential equations. Laplace and Fourier transform analysis of electrical circuits. (F, Sp)

ECE 3773 Electrical and Computer Engineering Circuits Laboratory 3 Credit Hours

Prerequisite: ECE 2214 and either ECE 3723 or concurrent enrollment in ECE 3723. Electrical laboratory procedures, circuit construction, debug and experimental Confirmation of the principles of circuit theory. Introduction to use of laboratory instrumentation, including skills in the use of the oscilloscope in the evaluation of DC and AC circuits. Use and application of diodes, operational amplifiers and programmable logic devices. (F, Sp)

- ECE 3793 Signals and Systems** **3 Credit Hours**
Prerequisites: ECE 2713, ECE 2723, MATH 3113; and MATH 3333 or concurrent enrollment in MATH 3333. Linear systems; time domain analysis; frequency domain analysis; Fourier, Laplace and Z-transforms; introduction to communications and control. (F, Sp)
- ECE 3813 Introductory Electronics** **3 Credit Hours**
Prerequisites: ECE 2713, and ECE 2723; CHEM 1315; and MATH 2443 or 2934 or concurrent enrollment in MATH 2443 or 2934. Small and large signal characteristics and models of electronic devices; analysis and design of elementary electronic circuits. (F, Sp)
- ECE 3873 Electrical and Computer Engineering Electronics Laboratory** **3 Credit Hours**
Prerequisite: ECE 2523, ECE 3723, ECE 3773, ECE 3813, and ENGR 2002 or ENGR 2003. Electronic analog circuit design, simulation, construction, debugging and measurement of circuit behavior and noise using advanced instrumentation techniques; statistics-based circuit reliability theory; independent design skills development and technical writing. (F, Sp)
- ECE 3960 Honors Reading** **1-3 Credit Hours**
Prerequisite: admission to Honors program. May be repeated; maximum credit six hours. Consists of topics designated by the instructor in keeping with the student's major program. Covers materials not usually presented in the regular courses. (F, Sp, Su)
- ECE 3970 Honors Seminar** **1-3 Credit Hours**
Prerequisite: Admission to Honors program. May be repeated; maximum credit six hours. Projects covered will vary. Deal with concepts not usually presented in regular coursework.
- ECE 3980 Honors Research** **1-3 Credit Hours**
Prerequisite: admission to Honors program. May be repeated; maximum credit six hours. provides an opportunity for the gifted Honors candidate to work on a special project in the student's field. (F, Sp, Su)
- ECE 3990 Independent Study** **1-3 Credit Hours**
1 to 3 hours. Prerequisite: permission of instructor and junior standing. May be repeated once with change of content. Independent study may be arranged to study a subject not available through regular course offerings. (F, Sp, Su)
- ECE G4113 Analysis of Electrical Transmission** **3 Credit Hours**
Prerequisite: 3113. Transmission and distribution of electrical energy, particularly addressing electrical transmission systems in the competitive energy market. (F)
- ECE 4213 Digital Signal Processing** **3 Credit Hours**
(Slashlisted with 5213) Prerequisite: 3793. Discrete-time linear systems, finite duration impulse response digital filters, finite work length effects, spectral analysis, fast Fourier-transforms, two-dimensional signal processing and applications. No student may earn credit for both 4213 and 5213. (F)
- ECE 4273 Digital Design Laboratory** **3 Credit Hours**
Prerequisite: Graduate standing, or ECE 3223 and ECE 3873. Design of digital systems with integrated circuits and MSI/LSI and microprocessor interfacing. (F, Sp)
- ECE 4281 Engineering Co-Op Program** **1 Credit Hour**
(Crosslisted with AME, BME, C S, CEES, CH E, EPHY and ISE 4281)
Prerequisite: Departmental permission and junior standing. May be repeated; maximum credit 6 hours. The Co-Op program provides students an opportunity to enhance their education via career exploration in related professional work experiences. Course assignments help students articulate their experiences by completing journals; mid-term paper; final paper and/or final presentation. Faculty receive an evaluation from the student's Co-Op supervisor who monitors performance. Faculty collaborate with the Co-Op supervisor to ensure student success. (F, Sp, Su)
- ECE 4363 Optical Engineering** **3 Credit Hours**
(Slashlisted with ECE 5363) Prerequisite: ECE 3793. Underlying theory and design of optical systems. Interference, diffraction and coherence phenomena will be examined as a basis for studying the limits of optical system performance. Other topics include a detailed study of polarization, the interaction of light with various media and geometrical optics. No student may earn credit for both 4363 and 5363. (Sp)
- ECE 4383 IC Fabrication Technology I** **3 Credit Hours**
(Slashlisted with ECE 5383) Prerequisite: 3323. A treatment of the theory and processes involved in the fabrication of integrated circuits. No student may earn credit in both 4383 and 5383. (F)
- ECE G4413 Introduction to Control System Engineering** **3 Credit Hours**
Prerequisite: 3793. Analysis and synthesis of control systems; control systems performance and applications. (F)
- ECE 4433 Measurement and Automation** **3 Credit Hours**
(Slashlisted with ECE 5433) Prerequisite: ECE 3793 or instructor permission or systems course in another major. Fundamentals of data acquisition and control. A series of design projects in data acquisition, logging and real-time analysis. Includes machine vision and image processing as well as vibration, motion and real-time control. No student may earn credit for both 4433 and 5433. (F)
- ECE G4523 Introduction to Communication Theory** **3 Credit Hours**
Prerequisite: ECE 2523 and ECE 3793. An introductory treatment of statistical communication theory; description of a random process by auto-correlation and power spectral density functions, sources and properties of electrical noise, the effects of modulation, detection And filtering on signal information content, bandwidth and signal-to-noise ratio. (Sp)
- ECE 4603 Radar Imaging** **3 Credit Hours**
(Slashlisted with ECE 5603) Prerequisite: senior standing or permission of instructor; ECE 3793. Course coverage includes radar signal models and phase histories, the types of processing steps used to focus radar data into high-resolution imagery, and fundamental behaviors and performance metrics of radar imaging. Course also investigates various radar imaging algorithms applied to range-Doppler imaging, synthetic aperture radar (SAR), inverse SAR, and angle-of-arrival (spatial) imaging. No student may earn credit for both 4603 and 5603. (Sp)
- ECE G4613 Computer Architecture** **3 Credit Hours**
(Crosslisted with C S 4613) Prerequisite: ECE 3223 or C S 2614 or C S 2613. Covers basic concepts of computer system design and communication between components, along with current and historical examples of computer architecture. (F, Sp)

- ECE 4623 Computer Hardware Design 3 Credit Hours**
(Slashlisted with 5623) Prerequisite: 3223. Design of modern digital computing circuits, computer arithmetic, number systems, state machines, control units, data transfer, bus interfacing, VHDL language elements and usage, circuit simulation. No student may earn credit for both 4623 and 5623. (F)
- ECE 4643 Radio Frequency and Microwave Engineering 3 Credit Hours**
(Slashlisted with ECE 5643) Prerequisite: ECE 3613. Analysis of radio frequency (RF) and microwave components, circuits and systems using modern engineering tools and measurement instruments. No student may earn credit for both 4643 and 5643. (Sp)
- ECE 4653 Digital Radar Systems 3 Credit Hours**
(Slashlisted with ECE 5653) Prerequisite: ECE 3793. Modern and next-generation radar systems, with an emphasis on the digital receiver and post processing that follows the RF front-end. Several off-the-shelf receiver case studies will be conducted. These will focus on analog-to-digital converter (ADC) selection followed by software defined radio (SDR) concepts for field programmable gate array (FPGA) implementation. These receivers may also be used for communication systems and have other broad applications. No student may earn credit for both 4653 and 5653. (F)
- ECE 4663 Radar Engineering 3 Credit Hours**
(Crosslisted with METR 4663; Slashlisted with 5663) Prerequisite: Grade of C or better in 3613, or permission. Introduction to radar system designs and applications with emphasis on weather radar; radar system architecture and their functionalities and limitations of subsystems; theories of radar detection and estimation in a noisy and cluttered environment; existing technologies and advanced techniques to improve radar performance. No student may earn credit in both 4663 and 5663. (F)
- ECE 4693 Antennas 3 Credit Hours**
(Slashlisted with ECE 5693). Prerequisite: ECE 3613 and ECE 4703 or permission of instructor. Introduction to antenna theory and design. Course covers design, construction, and measurement of antennas including, but not limited to the following specific types; dipoles, loops, aperture, microstrip, and broadband antennas, as well as array theory. No student may earn credit for both 4693 and 5693. (Sp)
- ECE 4703 Electromagnetic Fields and Wave Propagation 3 Credit Hours**
(Slashlisted with ECE 5703). Prerequisite: ECE 3613. Maxwell's Equations, time-harmonic fields, plane waves, reflections on interfaces, waveguides and transmission lines, radiation, and antenna basics. No student may earn credit for both 4703 and 5703. (F, Sp)
- ECE 4733 RF & Microwave Filter Design 3 Credit Hours**
(Slashlisted with ECE 5733) Prerequisite: instructor permission. Introduction to advanced filter design. The use of filters is very widespread in all aspects of communication and radar systems. At the end of the semester, a student that has successfully embraced the subject will be able to design, fabricate, and test filters, using a range of different technologies and methods. No student may earn credit for both 4733 and 5733. (Sp)
- ECE 4773 Laboratory (Special Projects) 3 Credit Hours**
Prerequisite: 4273 or concurrent enrollment in 4273. Individually supervised special engineering problems of experimental nature. Laboratory (F, Sp) [V].
- ECE G4813 Electronics 3 Credit Hours**
Prerequisite: ECE 3813 and ECE 3873. Analysis and design of electronic circuits such as multi-stage amplifiers, feedback amplifiers, oscillators and power amplifiers. (Sp)
- ECE G4823 Engineering Principles of the Human Body 3 Credit Hours**
Prerequisites: ECE 2723, PHYS 2514, MATH 2423 or 2924. Introduction to the foundational engineering approach to analyzing the human body's anatomy and physiological function. Topics include muscle and forces, fluid dynamics of the lungs and cardiovascular system, electrical signals in the body, and vision and optics of the eye. (Sp)
- ECE 4833 VLSI Digital System Design 3 Credit Hours**
(Slashlisted with ECE 5833) Prerequisite: ECE 3223 and ECE 3873. An introduction to Very-Large-Scale Integrated (VLSI) systems design methods; complementary Metal-Oxide Semiconductor (CMOS) technology emphasized. VLSI Computer Aided Design (CAD) tools and CMOS layout rules and techniques. Project oriented. No student may earn credit for both 4833 and 5833. (F)
- ECE 4853 Biomedical Signals and Systems 3 Credit Hours**
(Slashlisted with ECE 5853) Prerequisite: ECE 3723 and ECE 3793, or equivalent courses in electrical circuits and signal processing, or permission of instructor. Comprehensive coverage of topics related to signals in humans. Emphasis on using engineering tools to interpret signals and underlying physiological principles. Focus on emerging engineering technologies, physiological knowledge and clinical application. No student may earn credit for both 4853 and 5853. (Sp)
- ECE 4863 Bioinstrumentation 3 Credit Hours**
Prerequisite: ECE 3723 or ECE 4813 or permission of instructor. A comprehensive coverage of topics related to principles, applications and design of medical instruments widely used in hospitals and clinical research. Emphasis is placed on general design concepts, discussions on a great variety of medical devices and medical device safety issues. Materials cover different levels and various aspects of human systems, such as heart, brain, circulation, respiration. (F, Sp)
- ECE 4960 Directed Readings 1-4 Credit Hours**
1 to 4 hours. Prerequisite: good standing in University; permission of instructor and dean. May be repeated; maximum credit four hours. Designed for upper-division students who need opportunity to study a specific problem in greater depth than formal course content permits. (Irreg.)
- ECE 4970 Special Topics/Seminar 1-3 Credit Hours**
1 to 3 hours. Prerequisite: Senior standing or permission of instructor. May be repeated; maximum credit nine hours. Special topics or seminar course for content not currently offered in regularly scheduled courses. May include library and/or laboratory research and field projects. (Irreg.)
- ECE 4973 Special Topics 3 Credit Hours**
Prerequisite: Varies with course content. May be repeated with change of subject; maximum credit six hours in combination with 4990. Devoted to special topics in Electrical and Computer Engineering not covered in the current curriculum. (F, Sp, Su)
- ECE 4990 Special Studies 1-3 Credit Hours**
Prerequisite: Senior standing and permission. May be repeated with change of subject matter; maximum credit six hours in combination with 4973. Devoted to supervised individual studies of special topics (S/U Graded) in Electrical and Computer Engineering. (F, Sp, Su)
- ECE 5123 Wireless Communications 3 Credit Hours**
Prerequisite: 3793 or permission. Wireless communications principles, multiple access techniques, wireless networking, and systems and standards. (F)

- ECE 5153 Emerging Topics in LTE-Advanced and 5G 3 Credit Hours**
Prerequisite: Graduate standing. This course will train students to master the latest developments in the rapidly evolving landscape in wireless cellular networks, preparing them for working on emerging as well as near future wireless technologies. Focuses on selected topics for research and development of LTE-A and 5G cellular networks, such as PHY and MAC layer techniques suitable LTE-A & 5G; network densification techniques. (Sp)
- ECE 5183 Quantum Information Theory 3 Credit Hours**
Prerequisite: linear algebra. Introductory course of quantum information theory. Topics covered include quantum state, quantum measurement, quantum channels, No-Cloning Theorem, Bell's inequalities, entanglement, quantum dense coding, quantum teleportation, distance measures, quantum entropy, quantum mutual information, information of quantum channels. (F)
- ECE 5213 Digital Signal Processing 3 Credit Hours**
(Slashlisted with 4213) Prerequisite: 3793. Discrete-time linear systems, finite duration impulse response digital filters, infinite impulse response digital filters, finite word length effects, spectral analysis, fast Fourier-transforms, two-dimensional signal processing and applications. No student may earn credit for both 4213 and 5213. (F)
- ECE 5223 Estimation and Identification 3 Credit Hours**
Prerequisite: 5403 and 5523. Estimation and filtering, optimal filtering, modeling, parametric and nonparametric identification methods. (Sp)
- ECE 5273 Digital Image Processing 3 Credit Hours**
Prerequisite: 3793 or permission of instructor. This course covers the theory, methods, and applications of image enhancement, image restoration, image compression, image segmentation, image representation and description, and image recognition and interpretation. (Sp)
- ECE 5303 Solid State Electronics I 3 Credit Hours**
Prerequisite: 3323. Principles and applications of electronic properties of solids for devices with particular emphasis on semiconductor junction, bulk and field effect devices. (F)
- ECE 5323 Opto-Electronics I 3 Credit Hours**
Prerequisite: 3323 or Engineering 2313. Introduction to phenomenological and quantum mechanical theory of solids; introduction to lasers and masers with particular emphasis on the physical mechanisms underlying interactions between electromagnetic radiation and atomic systems. (F, Sp)
- ECE 5343 Quantum Structures and Devices 3 Credit Hours**
Prerequisite: ECE 3323 or permission of instructor. Theory and application of KP method, strain effects, electrical and optical properties of quantum structures, semiconductor quantum devices including quantum well infrared photodetectors, quantum cascade and interband cascade lasers, type-II superlattice detectors. (Sp)
- ECE 5363 Optical Engineering 3 Credit Hours**
(Slashlisted with 4363; Crosslisted with BME 5363) Prerequisite: ECE 3793. Underlying theory and design of optical systems. Interference, diffraction, and coherence phenomena will be examined as a basis for studying the limits of optical system performance. Other topics include a detailed study of polarization, the interaction of light with various media, and geometrical optics. No student may earn credit for both 4363 and 5363. (Sp)
- ECE 5383 IC Fabrication Technology I 3 Credit Hours**
(Slashlisted with ECE 4383) Prerequisite: 3323. A treatment of the theory and processes involved in the fabrication of integrated circuits. No student may earn credit for both 4383 and 5383. (F)
- ECE 5393 Integrated Circuit Fabrication Technology II 3 Credit Hours**
Prerequisite: ECE 5383. Students will gain hands-on experiences of cleanroom technologies of the semiconductor industry, including epitaxial crystal growth, photolithography, and some techniques such as SEM. (Sp)
- ECE 5403 Linear Systems Analysis 3 Credit Hours**
Prerequisite: Math 3333. In-depth background course in methods of linear analysis in systems engineering. Topics include least squares methods, singular value decomposition, continuous and discrete time linear dynamical systems, controllability and state transfer. (F)
- ECE 5413 Control Theory 3 Credit Hours**
Prerequisite: 4413, 5403. Controllability, optimal control and dynamic programming, LQR, observability, linear estimation and Kalman filter, realization theory. (Sp)
- ECE 5423 Power System Protection 3 Credit Hours**
Prerequisite: Graduate Standing and ECE 3113 (ECE 4113 is also preferred) or permission of instructor. This course facilitates a study into the main protection system elements and their design fundamentals for modern power systems. It covers the operating principles of different types of fault sensing and interrupting components as well as coordination strategies and device settings for typical power system configurations including: generator, transformer, busbar, transmission line and distribution feeder protection. (Sp, Irreg.)
- ECE 5433 Measurement and Automation 3 Credit Hours**
(Slashlisted with ECE 4433) Prerequisite: Graduate standing and ECE 3793, or instructor permission, or systems course in another major. Fundamentals of data acquisition and control. A series of design projects in data acquisition, logging and real-time analysis. Includes machine vision and image processing as well as vibration, motion and real-time control. No student may earn credit for both 4433 and 5433. (F)
- ECE 5463 Advanced Computer Architecture 3 Credit Hours**
(Crosslisted with C S 5463) Prerequisite: graduate standing. The design of modern programmable computer systems with emphases on exploiting parallelism at all levels, designing within constraints including energy consumption, and the impact of architecture on software design. Covers state of the art computer architecture, case studies and trends. (Sp)
- ECE 5513 Communication Theory 3 Credit Hours**
Prerequisite: 4523. Probability theory, stochastic processes, detection, extraction and predictions of signals in noise. (F)
- ECE 5523 Random Signals 3 Credit Hours**
Prerequisite: Graduate standing, ECE 2523, ECE 3793, or permission of instructor. This course explores random signals from two perspectives: random variables and random processes. Topics include probability, single and double random variables, and random vectors; concepts of stationarity and ergodicity; random signals as an input into linear systems and the statistical properties of their outputs; random signal parameters; and quality of estimators. (F)
- ECE 5553 Telecommunications Technology 3 Credit Hours**
Prerequisite: 3793. The ways and means by which voice, data and video traffic are moved long distances. Topics include data networks, telephone systems, video, and optical systems. (F)
- ECE 5583 Information Theory and Probabilistic Programming 3 Credit Hours**
Prerequisite: Graduate standing, and ECE 4523 or equivalent. Introductory course in information theory. Topics include asymptotic equipartition property, entropy, Fano's inequality, Huffman coding, lossy source coding theory, and channel coding theory. (F)

- ECE 5603 Radar Imaging 3 Credit Hours**
(Slashlisted with ECE 4603) Prerequisite: graduate standing or permission of instructor; ECE 3793. Course coverage includes radar signal models and phase histories, the types of processing steps used to focus radar data into high-resolution imagery, and fundamental behaviors and performance metrics of radar imaging. Course also investigates various radar imaging algorithms applied to range-Doppler imaging, synthetic aperture radar (SAR), inverse SAR, and angle-of-arrival (spatial) imaging. No student may earn credit for both 4603 and 5603. (Sp)
- ECE 5623 Computer Hardware Design 3 Credit Hours**
(Slashlisted with 4623) Prerequisite: 3223. Design of modern digital computing circuits, computer arithmetic, number systems, state machines, control units, data transfer, bus interfacing, VHDL language elements and usage, circuit simulation. No student may earn credit for both 4623 and 5623. (F)
- ECE 5643 Radio Frequency and Microwave Engineering 3 Credit Hours**
(Slashlisted with ECE 4643) Prerequisite: Graduate standing. Analysis of radio frequency (RF) and microwave components, circuits, and systems using modern engineering tools and measurement instruments. No student may earn credit for both 4643 and 5643. (Sp)
- ECE 5653 Digital Radar Systems 3 Credit Hours**
(Slashlisted with ECE 4653). Prerequisite: ECE 3793. Modern and next-generation radar systems, with an emphasis on the digital receiver and post processing that follows the RF front-end. Several off-the-shelf receiver case studies will be conducted. These will focus on analog-to-digital converter (ADC) selection followed by software defined radio (SDR) concepts for field programmable gate array (FPGA) implementation. These receivers may also be used for communication systems and have other broad applications. No student may earn credit for both 4653 and 5653. (F)
- ECE 5663 Radar Engineering 3 Credit Hours**
(Crosslisted with METR 5663; Slashlisted with 4663) Prerequisite: Grade of C or better in 3613, or permission of instructor. Introduction to radar system designs and applications with emphasis on weather radar; radar system architecture and their functionalities and limitations of subsystems; theories of radar detection and estimation in a noisy and cluttered environment; existing technologies and advanced techniques to improve radar performance. No student may earn credit in both 4663 and 5663. (F)
- ECE 5673 Weather Radar Theory and Practice 3 Credit Hours**
(Slashlisted with 4673, Crosslisted with METR 5673) Prerequisite: graduate standing, grade of C or better in Math 3113 and Physics 2524, or permission of instructor. Introduction to electromagnetic waves and propagation through the atmosphere, radar design trade-offs, antennas, transmitters, and coherent receivers; analysis of radar signals as noise-corrupted stochastic processes, with emphasis on digital signal processing for Doppler spectrum and moment estimation; implementation of processing algorithms using actual Doppler radar data. No student may earn credit for both 4673 and 5673. (F)
- ECE 5683 Weather Radar Applications 3 Credit Hours**
(Crosslisted with METR 5683) Prerequisite: graduate standing in Meteorology or Engineering, or permission of instructor. Interpretation of meteorological structures using weather radar. Introduces scatter from hydrometeors and refractive index variations. Presentation of quantitative precipitation estimation methods based on the radar reflectivity factor, attenuation, and dual-polarization observations. Also includes the fundamental concepts of clear-air echoes and the estimation of winds under non-precipitation conditions. (Sp)
- ECE 5693 Antennas 3 Credit Hours**
(Slashlisted with ECE 4693) Prerequisites: ECE 3613, ECE 4703, and permission of instructor. Introduction to antenna theory and design. Course covers design, construction, and measurement of antennas including, but not limited to the following specific types; dipoles, loops, aperture, microstrip, and broadband antennas, as well as array theory. No student may earn credit for both 4693 and 5693. (Sp)
- ECE 5703 Electromagnetic Fields and Wave Propagation 3 Credit Hours**
(Slashlisted with ECE 4703) Prerequisite: Graduate standing, ECE 3613 and permission of instructor. Maxwell's Equations, time-harmonic fields, plane waves, reflections on interfaces, waveguides and transmission lines, radiation, and antenna basics. No student may earn credit for both 4703 and 5703. (F, Sp)
- ECE 5723 Radar Signal Processing 3 Credit Hours**
Prerequisite: ECE 3793 or equivalent. Radar fundamentals: radar range equation, waveforms, detection and matched filtering, ambiguity functions. Processing and Applications: Pulse-Doppler radar, synthetic aperture radar (SAR), moving target indication (MTI), space time adaptive processing (STAP). (Sp)
- ECE 5733 RF & Microwave Filter Design 3 Credit Hours**
(Slashlisted with ECE 4733) Prerequisite: instructor permission. Introduction to advanced filter design. The use of filters is very widespread in all aspects of communication and radar systems. At the end of the semester, a student that has successfully embraced the subject will be able to design, fabricate, and test filters, using a range of different technologies and methods. No student may receive credit for both 4733 and 5733. (Sp)
- ECE 5833 VLSI Digital System Design 3 Credit Hours**
(Slashlisted with ECE 4833) Prerequisite: ECE 3223 and ECE 3873. An introduction to Very-Large-Scale Integrated (VLSI) systems design methods; complementary Metal-Oxide Semiconductor (CMOS) technology emphasized. VLSI Computer Aided Design (CAD) tools and CMOS layout rules and techniques. Project oriented. No student may earn credit for both 4833 and 5833. (F)
- ECE 5843 Medical Imaging Systems 3 Credit Hours**
Prerequisite: 3793 or Fourier transforms, or permission. Fundamental principles of medical image formation, image acquisition and image quality evaluation, Major medical imaging modalities, such as radiography, fluoroscopy, computed tomography, ultrasound, MRI, and nuclear medicine will be introduced. Clinical applications and limitations of each modality will also be analyzed. (Sp)
- ECE 5853 Biomedical Signals and Systems 3 Credit Hours**
(Slashlisted with 4853, Crosslisted with BME 5853) Prerequisites: ECE 3723 and ECE 3793, or equivalent course in electrical circuits and signal processing, or permission of instructor. Comprehensive coverage of topics related to signals in humans. Emphasis on using engineering tools to interpret signals and underlying physiological principles. Focus on emerging engineering technologies, physiological knowledge and clinical application. No student may earn credit for both 4853 and 5853. (Sp)
- ECE 5863 Bioinstrumentation 3 Credit Hours**
(Crosslisted with BME 5863) Prerequisite: ECE 4213 or permission of instructor. A comprehensive coverage of topics related to principles, applications, and design of medical instruments widely used in hospitals and clinical research. Emphasis is placed on general design concepts, discussions on a great variety of medical devices, and medical device safety issues. Materials cover different levels and various aspects of human systems, such as heart, brain, circulation, and respiration. (F, Sp)

ECE 5873 Advanced VLSI Design and Applications 3 Credit Hours

Prerequisite: ECE 4833 or ECE 5833. Design of sophisticated digital integrated circuits; special purpose architectures used where appropriate; silicon compiler and hardware description language used; project oriented. (Sp)

ECE 5880 Professional Internship 1-3 Credit Hours

1 to 3 hours. Prerequisite: graduate standing and 12 credit hours toward graduate degree. May be repeated; maximum credit six hours; grade equivalent to B or better required. Professional technical internship training in electrical and computer engineering, as part of M.S. or PhD degree requirements. A written report to be graded by a member of the graduate faculty is required. (F, Sp, Su)

ECE 5960 Directed Readings 1-3 Credit Hours

1 to 3 hours. Prerequisite: graduate standing and permission of department. May be repeated; maximum credit twelve hours. Directed readings and/or literature reviews under the direction of a faculty member. (F, Sp, Su)

ECE 5970 Special Topics/Seminar 1-3 Credit Hours

1 to 3 hours. Prerequisite: Graduate standing or permission of instructor. May be repeated; maximum credit nine hours. Special topics or seminar course for content not currently offered in regularly scheduled courses. May include library and/or laboratory research and field projects. (Irreg.)

ECE 5973 Special Topics in Electrical and Computer Engineering 3 Credit Hours

(Crosslisted with BME 5973) Prerequisite: Graduate standing and permission of instructor. May be repeated with change of content; maximum credit 12 hours. Selected topics of current research interest not covered by regularly scheduled coursework. (F, Sp, Su)

ECE 5980 Research for Master's Thesis 2-9 Credit Hours

Variable enrollment, permission of instructor required, two to nine hours; credit required for degree, six hours. (F, Sp, Su)

ECE 5990 Special Studies 1-3 Credit Hours

1 to 3 hours. Prerequisite: graduate standing or permission. May be repeated with change of subject matter; maximum credit nine hours. Devoted to special topics in electrical engineering not covered in the regular curriculum or to supervised individual study. (F, Sp, Su)

ECE 6613 Weather Radar Polarimetry 3 Credit Hours

(Crosslisted with METR 6613) Prerequisite: graduate standing. Provides fundamentals and principles of weather radar polarimetry through understanding wave scattering and propagation in geophysical media subject to turbulent mixing and filled with hydrometers and other objects. The relations between polarimetric radar observables and physical parameters will be established. The methods and algorithms for retrieving cloud and precipitation microphysics for weather quantification and forecast will be introduced. (F)

ECE 6813 Advanced Topics in Biomedical Engineering 3 Credit Hours

Prerequisite: 5843. May be repeated with change of content; maximum credit 12 hours. In-depth studies in biomedical engineering. Focus will be on advanced optoelectronic biomedical technologies, such as bioinstrumentation, biomedical imaging modalities. Students will learn the knowledge behind current technology and also research and development methods of applying future technology to clinical and biomedical applications. (Sp)

ECE 6950 Research in Electrical and Computer Engineering 1-4 Credit Hours

1 to 4 hours. Prerequisite: graduate standing and permission of instructor in Electrical and Computer Engineering. May be repeated; maximum credit 24 hours. Research in electrical and computer engineering occurring prior to the General Examination. (F, Sp, Su)

ECE 6960 Directed Readings 1-3 Credit Hours

1 to 3 hours. Prerequisite: graduate standing or permission of instructor. May be repeated; maximum credit six hours. Directed readings and/or literature review under the direction of a faculty member. (Irreg.)

ECE 6970 Special Topics/Seminar 1-3 Credit Hours

1 to 3 hours. Prerequisite: graduate standing or permission of instructor. May be repeated; maximum credit 12 hours. Special topics or seminar course for content not currently offered in regularly scheduled courses. May include library and/or research and field projects. (Irreg.)

ECE 6980 Research for Doctoral Dissertation 2-16 Credit Hours

2 to 16 hours. Prerequisites: Graduate standing and permission of instructor; may be repeated. Directed research culminating in the completion of the doctoral dissertation. (F, Sp, Su)

ECE 6990 Independent Study 1-3 Credit Hours

1 to 3 hours. Prerequisite: Graduate standing and permission of instructor. May be repeated; maximum credit nine hours. Contracted independent study for a topic not currently offered in regularly scheduled courses. Independent study may include library and/or laboratory research and field projects. (Irreg.)

Faculty

Last Name	First/Middle Name	Middle init.	OU Service start	Title(s), date(s) appointed	Degrees Earned, Schools, Dates Completed
Barnes	Ronald		2007	ASSOCIATE PROFESSOR OF ELECTRICAL AND COMPUTER ENGINEERING, 2013; GERALD TUMA PRESIDENTIAL PROFESSOR, 2016	PhD, Univ of Illinois, 2005; MS, Univ of Illinois, 2002; BS, Univ of Oklahoma, 1998
Cheng	Szeming		2006	ASSOCIATE PROFESSOR OF ELECTRICAL AND COMPUTER ENGINEERING AT TULSA, 2013; ASSOCIATE PROFESSOR OF ELECTRICAL AND COMPUTER ENGINEERING, 2017; WILLIAM H. BARKOW PRESIDENTIAL PROFESSOR, 2018	PhD, Texas A&M Univ, 2004; MS, Univ of Hawaii, 2000; MPhil, Hong Kong Univ of Sci & Tech, 1997; BEng, Univ of Hong Kong, 1995
Cruz	Joao	R	1982	PROFESSOR OF ELECTRICAL AND COMPUTER ENGINEERING, 1992; TILLEY CHAIR IN ELECTRICAL ENGINEERING, 2002	PhD, Univ of Houston, 1980; MS, Univ of Houston, 1977; BS, Univ of Porto, 1974

Fitzmorris	Cliff	W	2018	ASSISTANT PROFESSOR OF ELECTRICAL AND COMPUTER ENGINEERING, 2018; ADJUNCT INSTRUCTOR OF CIVIL ENGINEERING AND ENVIRONMENTAL SCIENCE, 2010	MS, Univ of Oklahoma, 1995; BS Univ of Oklahoma, 1988	McCann	Patrick		1990	GEORGE LYNN CROSS RESEARCH PROFESSOR OF ELECTRICAL AND COMPUTER ENGINEERING, 2006; HENRY J. FREEDE M.D. PROFESSOR OF ENGINEERING, 2010	PhD, Mass Inst of Tech, 1990; BS, Univ of California Berkeley, 1981
Fulton	Caleb		2011	ASSOCIATE PROFESSOR OF ELECTRICAL AND COMPUTER ENGINEERING, 2018; CIMMS FELLOW, 2012; PRESIDENT'S ASSOCIATES PRESIDENTIAL PROFESSOR, 2017	PhD, Purdue Univ, 2011; BS, Purdue Univ, 2006	Metcalf	Justin	G	2018	ASSISTANT PROFESSOR OF ELECTRICAL AND COMPUTER ENGINEERING, 2018	PhD, Univ of Kansas, 2015; MS, Univ of Kansas, 2011; BS, Kansas State Univ, 2006
Goodman	Nathan		2011	CIMMS FELLOW, 2012; DIRECTOR OF RESEARCH, ADVANCED RADAR RESEARCH CENTER, 2015; PROFESSOR OF ELECTRICAL AND COMPUTER ENGINEERING, 2016	PhD, Univ of Kansas, 2002; MS, Univ of Kansas, 1997; B, Univ of Kansas, 1995	Moses	Paul	S	2017	ASSISTANT PROFESSOR OF ELECTRICAL AND COMPUTER ENGINEERING, 2017	PhD, Curtin Univ of Tech, 2012; BS, Curtin Univ of Tech, 2006
Havlicek	Joseph		1997	PROFESSOR OF ELECTRICAL AND COMPUTER ENGINEERING, 2007; WILLIAMS COMPANIES FOUNDATION PRESIDENTIAL PROFESSOR, 2009; GERALD TUMA PRESIDENTIAL PROFESSOR, 2017	PhD, Univ of Texas, 1996; MS, Virginia Tech, 1988; BS, Virginia Tech, 1986	Qiu	Yuchen		2008	ASSISTANT PROFESSOR OF ELECTRICAL AND COMPUTER ENGINEERING, 2016	PhD, Univ of Oklahoma, 2013; ME, Xi'an Jiaotong Univ, 2008; BE, Xi'an Jiaotong Univ, 2005
Imran	Ali		2014	ASSISTANT PROFESSOR OF ELECTRICAL AND COMPUTER ENGINEERING, 2014	PhD, Univ of Surrey, 2011; MS, Univ of Surrey, 2007; BS, Univ of Engineering & Tech	Refai	Hazem	H	2001	DIRECTOR, EMC TEST LAB, 2008; PROFESSOR OF ELECTRICAL AND COMPUTER ENGINEERING AT TULSA, 2012; WILLIAMS CHAIR IN TELECOMMUNICATIONS NETWORKING, 2017; WILLIAMS PROFESSOR IN TELECOMMUNICATIONS NETWORKING	PhD, Univ of Oklahoma, 1999; MS, Univ of Oklahoma, 1993; BS, Aleppo, 1987
Jiang	Ning		2007	ASSOCIATE PROFESSOR OF ELECTRICAL AND COMPUTER ENGINEERING, 2012; OKLAHOMA GAS AND ELECTRIC CO. PROFESSOR OF ELECTRICAL ENGINEERING, 2012	PhD, Univ of Texas, 2005; MS, Univ of Texas, 1998; M Engr, Chinese Acad of Science, 1994; BSc, Tsinghua Univ, 1991	Ruyle	Jessica		2011	ASSISTANT PROFESSOR OF ELECTRICAL AND COMPUTER ENGINEERING, 2011; CIMMS FELLOW, 2012	PhD, Univ of Illinois, 2011; MS, Univ of Illinois, 2008; BS, Texas A&M Univ, 2006
Liu	Hong		2000	CHARLES B. JR. AND JEAN SMITH CHAIR IN ELECTRICAL AND COMPUTER ENGINEERING, 2000; GEORGE LYNN CROSS RESEARCH PROFESSOR OF ELECTRICAL AND COMPUTER ENGINEERING, 2007	PhD, Worcester Polytechnic Inst., 1992; MS, Beijing Inst. of Posts & Telecom, 1982; BS, Beijing Polytechnic Univ, 1977	Salazar-Cerreño	Jorge	L	2015	CIMMS FELLOW, 2015; ASSISTANT PROFESSOR OF ELECTRICAL AND COMPUTER ENGINEERING, 2015	PhD, Univ of Massachusetts, 2012; MA, Univ of Puerto Rico, 2002; BS, Universidad Privada Antenor Orrego, 1994
						Shi	Zhisheng		1997	PROFESSOR OF ELECTRICAL AND COMPUTER ENGINEERING, 2006; GERALD TUMA PRESIDENTIAL PROFESSOR, 2008	PhD, Inst Albert-Ludwig Univ Freiburg; MS, Jilin Univ, 1987; BS, Jilin Univ, 1984
						Sigmarsson	Hjalti		2011	ASSOCIATE PROFESSOR OF ELECTRICAL AND COMPUTER ENGINEERING, 2018; GERALD TUMA PRESIDENTIAL PROFESSOR, 2018; CIMMS FELLOW, 2012	PhD, Purdue Univ, 2010; MS, Purdue Univ, 2005; BS, Univ of Iceland, 2003

Sluss	James Jr.	1997	REGENTS PROFESSOR OF ELECTRICAL AND COMPUTER ENGINEERING, 2017	PhD, Univ of Virginia, 1989; MS, Univ of Virginia, 1986; BS, Marshall Univ, 1984	
Tang	Choon Yik	2006	ASSOCIATE PROFESSOR OF ELECTRICAL AND COMPUTER ENGINEERING, 2013; GERALD TUMA PRESIDENTIAL PROFESSOR, 2016	PhD, Univ of Michigan, 2003; MS, Oklahoma State Univ, 1997; BS, Oklahoma State Univ, 1996	
Weng	Binbin	2015	CLEANROOM ENGINEER, 2015; ASSISTANT PROFESSOR OF ELECTRICAL AND COMPUTER ENGINEERING, 2018	MS, Zhejiang Univ, 2008; BS, Zhejiang Univ, 2005	
Yang	Rui	Q	2007	PROFESSOR OF ELECTRICAL AND COMPUTER ENGINEERING, 2007	PhD, Nanjing Univ, 1987; MS, Nanjing Univ, 1984; BS, Zhejiang Univ, 1982
Yearly	Mark	2002	CIMMS FELLOW, 2007; C. B. HUDSON/TORCHMARK PRESIDENTIAL PROFESSOR, 2010; PROFESSOR OF ELECTRICAL AND COMPUTER ENGINEERING, 2012; DIRECTOR, DEFENSE, SECURITY AND INTELLIGENCE RESEARCH INITIATIVE, 2015	PhD, Texas A&M Univ, 1999; MS, Texas A&M Univ, 1994; BS, Texas A&M Univ, 1992	
Yu	Tian You	2002	CIMMS FELLOW, 2007; ADJUNCT ASSOCIATE PROFESSOR OF METEOROLOGY, 2008; GERALD TUMA PRESIDENTIAL PROFESSOR, 2012; PROFESSOR OF ELECTRICAL AND COMPUTER ENGINEERING, 2012	PHD, Univ of Nebraska, 2000; MS, National Central Univ, 1992; BS, National Central Univ, 1990	
Zhang	Yan	2006	CIMMS FELLOW, 2007; PROFESSOR OF ELECTRICAL AND COMPUTER ENGINEERING, 2018; PRESIDENT'S ASSOCIATES PRESIDENTIAL PROFESSOR, 2015	PhD, Univ of Nebraska, 2004; MSEE, Beijing Inst of Tech, 2001; BS, Beijing Inst of Tech, 1998	

Computer Engineering, B.S.

Minimum Total Credit Hours: 129

Overall GPA - Combined and OU: 2.00

Major GPA - Combined and OU: 2.00

Curriculum GPA - Combined and OU: 2.00

Program Code: B225

This program has changes pending State Regents approval for 2024/25. These pending changes are not reflected here.

Bachelor of Science in Computer Engineering accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org>, under the General Criteria and the Electrical, Computer, Communications, Telecommunication(s) and Similarly Named Program Criteria.

In order to progress in your curriculum in the Gallogly College of Engineering, and as a specific graduation requirement, a **grade of C** or better is required in each course in the curriculum, including all prerequisite courses.

Major Requirements

Code	Title	Credit Hours
Required Courses		
ECE 2214	Digital Design	4
ECE 2713	Digital Signals and Filtering	3
ECE 2723	Electrical Circuits I	3
ECE 2523	Probability, Statistics and Random Processes	3
ECE 3723	Electrical Circuits II	3
ECE 3773	Electrical and Computer Engineering Circuits Laboratory	3
ECE 3813	Introductory Electronics	3
ECE 3223	Microprocessor System Design	3
ECE 3793	Signals and Systems	3
ECE 3873	Electrical and Computer Engineering Electronics Laboratory	3
ECE 4273	Digital Design Laboratory	3
ECE 4613	Computer Architecture	3
ECE 4773	Laboratory (Special Projects)	3
Total Credit Hours		40

Major Support Requirements

Code	Title	Credit Hours
Math and Science		
MATH 2924	Differential and Integral Calculus II	4
MATH 2934	Differential and Integral Calculus III	4
MATH 3113	Introduction to Ordinary Differential Equations	3
MATH 3333	Linear Algebra I	3
PHYS 2524	General Physics for Engineering and Science Majors	4

Technical Electives

Choose two ECE/C S 3000-4000-level courses ¹	6
Choose two ECE/C S 4000-level or higher courses ¹	6

Professional Elective

Choose one course from approved list maintained by the department ¹	3
--	---

Additional College Requirements		
ENGR 1411	Pathways to Engineering Thinking ²	1
ENGR 2002	Professional Responsibilities and Skills of Engineers and Scientists	2
C S 1323	Introduction to Computer Programming for Programmers	3
C S 2334	Programming Structures and Abstractions	4
C S 2813	Discrete Structures	3
C S 2413	Data Structures	3
Total Credit Hours		49

¹ Electives to be selected from list available in the ECE Office, DEH-150. **Note:** One of the four technical electives must be an approved ECE course.

² Engineering transfer students may take ENGR 3511 in place of ENGR 1411.

General Education and College Requirements

Courses designated as Core I, II, III, IV, or V are part of the General Education curriculum. Students must complete a minimum of 40 hours of General Education courses, chosen from the approved list, including at least one upper-division Gen. Ed. course outside of the student's major. **Courses graded P/NP will not apply.**

A grade of C or better is required in each course in the curriculum, including all prerequisite courses.

UNIVERSITY-WIDE GENERAL EDUCATION (MINIMUM 40 HOURS) AND COLLEGE REQUIREMENTS

Code	Title	Credit Hours
Core Area I: Symbolic and Oral Communication		
<i>English Composition</i>		
ENGL 1113	Principles of English Composition	3
ENGL 1213	Principles of English Composition	3
or EXPO 1213	Expository Writing	
<i>Language (0-10 hours in the same language)</i>		
This requirement can be met by two years of the same language in high school:		0-10
Beginning Course (0-5 hours)		
Beginning Course, continued (0-5 hours)		
<i>Mathematics</i>		
MATH 1914	Differential and Integral Calculus I (Core I) 1,2	4
Core Area II: Natural Science (including one laboratory)		
PHYS 2514	General Physics for Engineering and Science Majors (Core II) ²	4
CHEM 1315	General Chemistry (Core II-Lab) ²	5
or CHEM 1335	General Chemistry I: Signature Course	
Core Area III: Social Science		
P SC 1113	American Federal Government	3
Choose one course ³		3
Core Area IV: Arts & Humanities		
<i>Artistic Forms</i>		
Choose one course ³		3
<i>Western Culture</i>		

HIST 1483	United States to 1865	3
or HIST 1493	United States, 1865 to the Present	
Choose one course (excluding HIST 1483 and HIST 1493) ³		3
<i>World Culture</i>		
Choose one course ³		3
Core Area V: First-Year Experience		
Choose one course ³		3
Total Credit Hours		40-50

¹ MATH 1823, MATH 2423, MATH 2433, and MATH 2443 sequence can be substituted for MATH 1914, MATH 2924, and MATH 2934.

² Major support requirements that also satisfy University General Education requirements.

³ To be chosen from the University-Wide General Education Approved Course List. Three of these hours must be upper-division (3000-4000). See list in the Class Schedule.

Free Electives

Electives to bring total applicable hours to the minimum total required for the degree including a minimum of 40 upper-division hours.

Suggested Semester Plan of Study

Bachelor of Science in Computer Engineering accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org>, under the General Criteria and the Electrical, Computer, Communications, Telecommunication(s) and Similarly Named Program Criteria.

In order to progress in your curriculum in the Gallogly College of Engineering, and as a specific graduation requirement, a grade of C or better is required in each course in the curriculum, including all prerequisite courses.

Two college-level courses in a single world language are required; this may be satisfied by successful completion of 2 years in a single world language in high school. Students who must take a language at the University will have an additional 6-10 hours of coursework.

Freshman

First Semester		Credit Hours
ENGL 1113	Principles of English Composition (Core I)	3
CHEM 1315	General Chemistry (Core II-Lab) ¹	5
MATH 1914	Differential and Integral Calculus I (Core I) ²	4

Electrical and Computer Engineering, Minor

Minimum Total Credit Hours: 19

Minimum Upper-Division Hours: 9

Program Code: N350

The requirements for a minor must be completed concurrently with the major degree requirements.

No minor may be added by completing courses after receiving the bachelor's degree.

Students must complete at least nine (9) minor hours in residence at the University of Oklahoma.

At least 9 credit hours will be in upper division courses (3000 or 4000 level).

Students must complete prerequisites for all courses.

Required Courses

Choose 9 hours of upper division ECE coursework		9
Total Credit Hours		19

¹ Introductory prerequisites ENGR 1411/ENGR 3511 waived for non-Engineering candidates.

Minors are available to all undergraduate students at OU. If the minor is officially declared, successfully completed, and noted on the graduation application, the student's transcript will so indicate at the time the bachelor's degree is posted.

Computer Engineering, B.S./Computer Science, M.S.

Minimum Total Credit Hours: 147-150

Overall GPA - Combined and OU: 3.25

Major GPA - Combined and OU: 3.25

Curriculum GPA - Combined and OU: 3.25

Program Code: A225/F235 Q147

This program has changes pending State Regents approval for 2024/25. These pending changes are not reflected here.

Bachelor of Science in Computer Engineering accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org>, under the General Criteria and the Electrical, Computer, Communications, Telecommunication(s) and Similarly Named Program Criteria.

In order to progress in your curriculum in the Gallogly College of Engineering, and as a specific graduation requirement, a **grade of C** or better is required in each course in the curriculum, including all prerequisite courses.

Major Requirements

Electives		
Choose one ECE G4000-level or higher elective ¹		3
Choose one C S G4000-/5000 approved elective ²		3
Additional Requirements		
ENGR 1411	Pathways to Engineering Thinking ³	1
ENGR 2002	Professional Responsibilities and Skills of Engineers and Scientists	2
Total Credit Hours		27

¹ Electives to be selected from list available in the ECE Office, DEH-150.

² Chosen from an approved list of courses maintained by the School of Computer Science. (p. 1361)

³ Engineering transfer students may take ENGR 3511 in place of ENGR 1411.

Graduate Requirements

12 hours of graduate-level coursework are shared between the BS and MS degrees.

No more than three courses at the C S G4000 level are permitted. No more than 3 credit hours of C S 5990 are permitted (students who have the graduate liaison's approval to complete a project option may take 6 hours). No more than 6 credit hours of Special Topics in Computer Science are permitted (even with a change in subject).

Thesis Option

Code	Title	Credit Hours
Core Courses		
C S 4413	Algorithm Analysis (or equivalent as approved by the graduate liaison)	3
C S 4513	Database Management Systems (or equivalent as approved by the graduate liaison)	3
Four courses selected from an approved list maintained by the School of Computer Science (p. 1361)		12
Electives		
Choose any Computer Science graduate class ¹		6
Thesis		
C S 5980	Research for Master's Thesis	6
Total Credit Hours		30

¹ Any C S graduate class including MATH 5743, MATH 4753, MATH 4073, or ECE 4000G or higher as approved by the Computer Science graduate liaison. **Other courses outside C S require prior approval of the graduate liaison.**

Non-Thesis Option

The non-thesis degree is a coursework-only degree; a non-thesis examination is not required.

Code	Title	Credit Hours
Core Courses		
C S 4413	Algorithm Analysis	3
C S 4513	Database Management Systems	3
Four courses selected from a list maintained by the School of Computer Science (p. 1361)		12

Choose 15 hours from any Computer Science graduate class ¹		15
Total Credit Hours		33

¹ Any C S graduate class including MATH 5743, MATH 4753, MATH 4073, or ECE 4000G or higher as approved by the Computer Science graduate liaison. **Other courses outside C S require prior approval of the graduate liaison.**

General Education and College Requirements

Courses designated as Core I, II, III, IV, or V are part of the General Education curriculum. Students must complete a minimum of 40 hours of General Education courses, chosen from the approved list, including at least one upper-division Gen. Ed. course outside of the student's major. **Courses graded P/NP will not apply.**

A grade of C or better is required in each course in the curriculum, including all prerequisite courses.

UNIVERSITY-WIDE GENERAL EDUCATION (MINIMUM 40 HOURS) AND COLLEGE REQUIREMENTS

Code	Title	Credit Hours
Core Area I: Symbolic and Oral Communication		
<i>English Composition</i>		
ENGL 1113	Principles of English Composition	3
ENGL 1213	Principles of English Composition or EXPO 1213 Expository Writing	3

Choose one course ³		3
Total Credit Hours		40-50

¹ MATH 1823, MATH 2423, MATH 2433, and MATH 2443 sequence can be substituted for MATH 1914, MATH 2924, and MATH 2934.

² Major support requirements that also satisfy University General Education requirements.

³ To be chosen from the University-Wide General Education Approved Course List. Three of these hours must be upper-division (3000-4000). See list in the Class Schedule.

Free Electives

Electives to bring total applicable hours to the minimum total required for the degree including a minimum of 40 upper-division hours.

Suggested Semester Plan of Study

Bachelor of Science in Computer Engineering accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org>, under the General Criteria and the Electrical, Computer, Communications, Telecommunication(s) and Similarly Named Program Criteria.

In order to progress in your curriculum in the Gallogly College of Engineering, and as a specific graduation requirement, a grade of C or better is required in each course in the curriculum, including all prerequisite courses.

Two college-level courses in a single world language are required; this may be satisfied by successful completion of 2 years in a single world language in high school. Students who must take language at the University will have an additional 6-10 hours of coursework.

Students are eligible to enter accelerated program after application is granted for unconditional enrollment in upper-division ECE courses and meeting minimum requirements, including a 3.50 retention and 3.50 combined retention grade point average. Students may enter the accelerated program based on the undergraduate degree pattern offered in the year they first enrolled in the Oklahoma State System of Higher Education or later.

Students are eligible for graduate status upon graduation with the Bachelor of Science in Computer Engineering.

General Education and College Requirements

Courses designated as Core I, II, III, IV, or V are part of the General Education curriculum. Students must complete a minimum of 40 hours of General Education courses, chosen from the approved list, including at least one upper-division Gen. Ed. course outside of the student's major. **Courses graded P/NP will not apply.**

A grade of C or better is required in each course in the curriculum, including all prerequisite courses.

UNIVERSITY-WIDE GENERAL EDUCATION (MINIMUM 40 HOURS) AND COLLEGE REQUIREMENTS

Code	Title	Credit Hours
Core Area I: Symbolic and Oral Communication		
<i>English Composition</i>		
ENGL 1113	Principles of English Composition	3
ENGL 1213	Principles of English Composition	3
or EXPO 1213	Expository Writing	
<i>Language (0-10 hours in the same language)</i>		
This requirement can be met by two years of the same language in high school:		0-10
Beginning Course (0-5 hours)		
Beginning Course, continued (0-5 hours)		
<i>Mathematics</i>		
MATH 1914	Differential and Integral Calculus I (Core I) 1,2	4
Core Area II: Natural Science (including one laboratory)		

PHYS 2514	General Physics for Engineering and Science Majors (Core II) ²	4
CHEM 1315	General Chemistry (Core II-Lab) ²	5
or CHEM 1335	General Chemistry I: Signature Course	
Core Area III: Social Science		
P SC 1113	American Federal Government	3
Choose one course ³		3
Core Area IV: Arts & Humanities		
<i>Artistic Forms</i>		
Choose one course ³		3
<i>Western Culture</i>		
HIST 1483	United States to 1865	3
or HIST 1493	United States, 1865 to the Present	
Choose one course (excluding HIST 1483 and HIST 1493) ³		3
<i>World Culture</i>		
Choose one course ³		3
Core Area V: First-Year Experience		
ENGR 1413	Pathways to Engineering Thinking (Core V-FYE) ⁴	3
Total Credit Hours		40-50

¹ MATH 1823, MATH 2423, MATH 2433, and MATH 2443 sequence can be substituted for MATH 1914, MATH 2924, and MATH 2934.

² Major support requirements that also satisfy University General Education requirements.

³ To be chosen from the University-Wide General Education Approved Course List. Three of these hours must be upper-division (3000-4000). See list in the Class Schedule.

⁴ Transfer students will need to meet the requirements of the first-year experience course as well as the engineering transfer course. Please see your advisor for your specific enrollment.

Free Electives

Electives to bring total applicable hours to the minimum total required for the degree including a minimum of 40 upper-division hours.

Suggested Semester Plan of Study

Bachelor of Science in Electrical Engineering accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org>, under the General Criteria and the Electrical, Computer, Communications, Telecommunication(s) and Similarly Named Program Criteria.

In order to progress in your curriculum in the Gallogly College of Engineering, and as a specific graduation requirement, a grade of C or better is required in each course in the curriculum, including all prerequisite courses.

Two college-level courses in a single world language are required; this may be satisfied by successful completion of 2 years in a single world language in high school. Students who must take a language at the University will have an additional 6-10 hours of coursework.

Students are eligible to enter accelerated program after application is granted for unconditional enrollment in upper-division ECE courses and meeting minimum requirements, including 3.25 retention and 3.25 combined retention grade point averages. Students may enter the accelerated program based on the undergraduate degree pattern offered

in the year they first enrolled in the Oklahoma State System of Higher Education or later.

Students are eligible for graduate status upon graduation with the Bachelor of Science in Electrical Engineering.

Freshman

First Semester		Credit Hours
ENGL 1113	Principles of English Composition (Core I)	3
CHEM 1315	General Chemistry (Core II-Lab) ¹	5
MATH 1914	Differential and Integral Calculus I (Core I-MATH) ²	4
ENGR 1413	Pathways to Engineering Thinking (Core V-FYE) ³	3
Credit Hours		15

Second Semester

ENGL 1213 or EXPO 1213	Principles of English Composition (Core I) or Expository Writing	3
MATH 2924	Differential and Integral Calculus II ²	4
PHYS 2514	General Physics for Engineering and Science Majors (Core II)	4
C S 1313	Programming for Non-Majors with C	3

ECE 5000-level or higher Elective ^{5,6}		3
Professional Elective ⁵		2
Approved Elective, World Culture (Core IV-WDC) ⁴		3
Credit Hours		14

Fifth Year

First Semester

ECE G4000/5000 Electives ⁶		6
Choose one of the following:		3
ECE 5000 or higher Elective		
ECE 5980	Research for Master's Thesis	
Credit Hours		9

Second Semester

Choose one of the following options: ⁷		9-12
Non-Thesis Option:		
5000 or higher Electives (12 hours) ⁶		
Thesis Option:		
ECE 5980	Research for Master's Thesis (3 hours)	
ECE 5000 or higher Electives (6 hours) ⁶		
Credit Hours		9-12
Total Credit Hours		144-147

¹ CHEM 1315 can be substituted with CHEM 1335 (Fall only).

² MATH 1823, MATH 2423, MATH 2433, and MATH 2443 sequence can be substituted for MATH 1914, MATH 2924, and MATH 2934.

³ Transfer students will need to meet the requirements of the first-year experience course as well as the engineering transfer course. Please see your advisor for your specific enrollment.

⁴ To be chosen from the University-Wide General Education Approved Course List. Three of these hours must be upper-division (3000-4000). See list in the Class Schedule.

⁵ Electives to be selected from list available in the ECE Office, DEH-150.

⁶ Fourth and fifth year electives (G4000 or higher, including technical electives for MS) must satisfy MSECE Approved Requirements.

⁷ Thesis option requires nine hours; non-thesis requires 12 hours.

Courses designated as Core I, II, III, IV or V are part of the General Education curriculum. Students must complete a minimum of 40 hours of General Education courses, chosen from the approved list.

Electrical and Computer Engineering, M.S.

Minimum Total Hours (Thesis): 30

Minimum Total Hours (Non-Thesis): 33

Program Code: M350 Q211

- All courses must be G4000 level or higher, or from a list of approved non-ECE G3000 courses (list is maintained in the ECE department).
- No more than 12 hours below the 5000 level may be applied to the degree, of which no more than 9 hours may be ECE coursework below the 5000 level.
- Any cross-listed course must be taken under the ECE prefix. Any slash-listed course must be taken at the graduate level.
- No more than 6 hours of ECE 5990 may be taken.
- No more than 12 hours of ECE 5973 may be taken.

Thesis Option

General Requirements for all Master's Degrees

The master's degree requires the equivalent of *at least* two semesters of satisfactory graduate work and additional work as may be prescribed for the degree.

All coursework applied to the master's degree must carry graduate credit.

Master's degree programs which require a thesis consist of *at least* 30 credit hours. All non-thesis master's degree programs require *at least* 30 credit hours.

Credit transferred from other institutions must meet specific criteria and is subject to certain limitations.

Courses completed through correspondence study may *not* be applied to the master's degree.

To qualify for a graduate degree, students must achieve an overall grade point average of 3.0 or higher in the degree program coursework and in all resident graduate coursework attempted. A student must also have at least a 3.0 in all coursework (including undergraduate coursework if any).

Additional information for master's degree students may be found in the Graduate College Bulletin.

Electrical and Computer Engineering, Ph.D.

Minimum Total Hours: 90

Program Code: D350

Program Requirements

Code	Title	Credit Hours
Area Coursework		
	Choose at least 4 courses in one ECE area from the list of areas and courses maintained in the ECE grad office.	12
Dissertation Research		
ECE 6980	Research for Doctoral Dissertation (6 hours minimum)	6
Electives		
	Additional coursework needed to reach 90 post-baccalaureate hours, as approved by the doctoral advisory committee	72
Total Credit Hours		90

Coursework Requirements

- All courses must carry graduate credit.
- Any G3000 level courses must be from an approved list.
- Maximum 16 hours below 5000 level.
- No more than 12 hours below 5000 level may be ECE coursework.
- Any cross-listed course must be taken with the ECE prefix.
- Any slash-listed course must be taken as graduate level.
- Maximum 9 hours independent/special studies (5990).
- Maximum 12 hours in each of the following categories: ECE 5973, ECE 6973, ECE 5283, ECE 6283.

Additional Requirements

- Prior to attempting the general examination, a student must complete at least 33 credit hours that includes 18 credit hours of ECE courses. These 33 credit hours may include transferred master's degree credit and/or postbaccalaureate graduate credit.

- Students are required to pass the ECE Preliminary Exam. The School of Electrical and Computer Engineering will ensure this requirement is met before defense of the dissertation.
- Students are required to pass the final oral exam.

General Requirements for Doctoral Degrees

A student should expect to spend at least the equivalent of three full academic years beyond the bachelor's degree to obtain the doctoral degree. During this period the student will take appropriate graduate coursework, successfully complete the general examination, and successfully defend and submit the final dissertation.

All coursework applied to the doctoral degree must carry graduate credit.

The doctoral degree requires at least 90 post-baccalaureate hours, including both formal coursework and hours of research.

The minimum hour requirement for a specific doctoral degree program cannot be waived.

No more than one-half of the credit hours, both OU and overall, excluding Research for Doctoral Dissertation (6980), may be S/U-graded coursework.

The student must be in residence at OU for at least two consecutive 16-week semesters during the pursuit of the doctoral degree while enrolled and engaged in coursework or research activities as prescribed by the major academic unit.

For more detailed regulations and requirements for Doctoral degrees, please consult the Graduate College Bulletin: <http://www.ou.edu/gradcollege/forms/bulletin>

General Information

History

The Engineering Physics Program at the University of Oklahoma is one of the oldest of its kind in the nation. Established in 1924, the Engineering Physics program has been accredited by the Accreditation Board for Engineering and Technology since 1953. The program makes use of the extensive teaching and research facilities of both the Gallogly College of Engineering and the Homer L. Dodge Department of Physics and Astronomy in the College of Arts and Sciences.

What is Engineering Physics?

The engineering physicist is interested not only in understanding physical phenomena and the underlying principles, but also in applying this knowledge to the solution of a broad range of challenges. As the miniaturization of transistors, lasers and memory elements continues, understanding of their operation increasingly requires knowledge

of quantum mechanics, statistical mechanics and other aspects of nanoscience.

Mission

The mission of the Engineering Physics Program is to prepare students for careers in areas of technology where the disciplines of physics and engineering intersect. The Program provides an interdisciplinary environment where pure and applied science merge. The curriculum is designed to develop sufficient depth in both engineering skills and physics knowledge to produce engineers who are able to relate fundamental physical principles to practical problems in engineering.

Programs & Facilities

Scholarships

There are many scholarships available to current Engineering Physics students.

Student Organizations

There are many great student organizations at OU for Engineering Physics students.

Undergraduate

Engineering Physics Program Educational Objectives (PEO)

Program Educational Objective 1:

Our graduates will pursue careers as engineers, as physicists, or in other fields where an education in Engineering Physics is advantageous.

Program Educational Objective 2:

Our graduates will be effective problem solvers in their chosen career paths.

Program Educational Objective 3:

Our graduates will engage in life-long learning and professional development activities.

Engineering Physics Undergraduate Student Outcomes

To prepare graduates of the Engineering Physics program to attain these educational objectives, the Engineering Physics curriculum is designed to include the following student outcomes:

1. an ability to apply knowledge of mathematics, science, and engineering;
2. an ability to design and conduct experiments, as well as to analyze and interpret data;
3. an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability;
4. an ability to function on multidisciplinary teams;
5. an ability to identify, formulate, and solve engineering problems;
6. an understanding of professional and ethical responsibility;
7. an ability to communicate effectively;
8. the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context;
9. a recognition of the need for, and an ability to engage in life-long learning;
10. a knowledge of contemporary issues;

11. an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

Engineering Physics, Bachelor of Science

The Engineering Physics Bachelor of Science (p. 1395) curriculum is designed to develop sufficient depth in both engineering skills and physics knowledge to produce engineers capable of working at the cutting edge of developing technologies and contribute to new fields as they emerge. Bachelor of Science in Engineering Physics accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org>, under the General Criteria and the Engineering, General Engineering, Engineering Physics, Engineering Science and Similarly Named Program Criteria.

Graduate

The Engineering Physics, Master of Science (p. 1398) degree program provides coursework and practical experience that prepares students for immediate placement in industrial positions.

Each student in the Engineering Physics, Ph.D. (p. 1398) is assigned an advisory committee who will determine the specific requirements within the guidelines set by the Graduate College and Gallogly College of Engineering.

Courses

- EPHY 3440 Mentored Research Experience 3 Credit Hours**
0 to 3 hours. Prerequisites: ENGL 1113 or equivalent, and permission of instructor. May be repeated; maximum credit 12 hours. For the inquisitive student to apply the scholarly processes of the discipline to a research or creative project under the mentorship of a faculty member. Student and instructor should complete an Undergraduate Research & Creative Projects (URCP) Mentoring Agreement and file it with the URCP office. Not for honors credit. (F, Sp, Su)
- EPHY 3960 Honors Reading 1-3 Credit Hours**
1 to 3 hours. Prerequisite: admission to Honors Program. May be repeated; maximum credit six hours. Consists of topics designated by the instructor in keeping with the student's major program. Cover materials not usually presented in the regular courses. (F, Sp, Su)
- EPHY 3970 Honors Seminar 1-3 Credit Hours**
1 to 3 hours. Prerequisite: admission to Honors Program. May be repeated; maximum credit six hours. Projects covered will vary. Deal with concepts not usually presented in regular coursework. (F, Sp, Su)
- EPHY 3980 Honors Research 1-3 Credit Hours**
1 to 3 hours. Prerequisite: admission to Honors Program. May be repeated; maximum credit six hours. Provides an opportunity for the gifted Honors candidate to work on a special project in the student's field. (F, Sp, Su)
- EPHY 3990 Independent Study 1-3 Credit Hours**
1 to 3 hours. Prerequisite: permission of instructor and junior standing. May be repeated once with change of content. Independent study may be arranged to study a subject not available through regular course offerings. (F, Sp, Su)
- EPHY 4281 Engineering Co-Op Program 1 Credit Hour**
(Crosslisted with AME, CH E, CEES, C S, ECE, ISE and BME 4281)
Prerequisite: Departmental permission and junior standing. May be repeated; maximum credit 6 hours. The Co-Op program provides students an opportunity to enhance their education via career exploration in related professional work experiences. Course assignments help students articulate their experiences by completing journals; mid-term paper; final paper and/or final presentation. Faculty receive an evaluation from the student's Co-Op supervisor who monitors performance. Faculty collaborate with the Co-Op supervisor to ensure student success. (F, Sp, Su)
- EPHY 4960 Directed Readings 1-4 Credit Hours**
1 to 4 hours. Prerequisite: good standing in University; permission of instructor and dean. May be repeated; maximum credit four hours. Designed for upper-division students who need opportunity to study a specific problem in greater depth than formal course content permits. (Irreg.)
- EPHY 4970 Special Topics/Seminar 1-3 Credit Hours**
1 to 3 hours. Prerequisite: Senior standing or permission of instructor. May be repeated; maximum credit nine hours. Special topics or seminar course for content not currently offered in regularly scheduled courses. May include library and/or laboratory research and field projects. (Irreg.)
- EPHY 4990 Special Studies 1-3 Credit Hours**
1 to 3 hours. Prerequisite: Physics 2424 or 2524, integral calculus, permission. May be repeated with change of subject matter; maximum credit six hours. (F, Sp, Su)
- EPHY 5960 Directed Readings 1-3 Credit Hours**
1 to 3 hours. Prerequisite: graduate standing and permission of department. May be repeated; maximum credit twelve hours. Directed readings and/or literature reviews under the direction of a faculty member. (F, Sp, Su)
- EPHY 5970 Special Topics/Seminar 1-3 Credit Hours**
1 to 3 hours. Prerequisite: Graduate standing or permission of instructor. May be repeated; maximum credit nine hours. Special topics or seminar course for content not currently offered in regularly scheduled courses. May include library and/or laboratory research and field projects. (Irreg.)
- EPHY 5980 Research for Master's Thesis 2-9 Credit Hours**
Variable enrollment, two to nine hours; maximum credit applicable toward degree, four hours. (F, Sp, Su)
- EPHY 5990 Special Problems 1-10 Credit Hours**
Prerequisite: permission. May be repeated with change of subject matter; maximum credit four hours for the master's degree, or 10 hours for the doctoral degree. (F, Sp, Su)
- EPHY 6960 Directed Readings 1-3 Credit Hours**
1 to 3 hours. Prerequisite: graduate standing or permission of instructor. May be repeated; maximum credit six hours. Directed readings and/or literature review under the direction of a faculty member. (Irreg.)
- EPHY 6970 Seminar 1-3 Credit Hours**
1 to 3 hours. Prerequisite: permission. May be repeated with change of subject matter; maximum credit four hours for the master's degree, or 10 hours for the doctoral degree. Seminar in Engineering Physics. (F, Sp)
- EPHY 6980 Research for Doctoral Dissertation 2-16 Credit Hours**
2 to 16 hours. Prerequisite: Graduate standing and permission of instructor; may be repeated. Directed research culminating in the completion of the doctoral dissertation. (F, Sp, Su)

EPHY 6990 Independent Study 1-3 Credit Hours

1 to 3 hours. Prerequisite: Graduate standing and permission of instructor. May be repeated; maximum credit nine hours. Contracted independent study for a topic not currently offered in regularly scheduled courses. Independent study may include library and/or laboratory research and field projects. (Irreg.)

Total Credit Hours	41-51

¹ MATH 1823, MATH 2423, MATH 2433, and MATH 2443 sequence can be substituted for MATH 1914, MATH 2924, and MATH 2934.

² With approval of advisor, PHYS 2514, PHYS 2524, and PHYS 1311 and PHYS 1321

may substitute for PHYS 1205, PHYS 1215.

³ Major support requirements that also satisfy University General Education requirements.

⁴ To be chosen from the University-Wide General Education Approved Course List. Three of these hours must be upper-division (3000-4000). See list in the Class Schedule.

Free Electives

Electives to bring total applicable hours to the minimum total required for the degree including a minimum of 40 upper-division hours.

Suggested Semester Plan of Study

Bachelor of Science in Engineering Physics accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org>, under the General Criteria and the Engineering, General Engineering, Engineering Physics, Engineering Science and Similarly Named Program Criteria.

In order to progress in your curriculum in the Gallogly College of Engineering, and as a specific graduation requirement, a grade of C or better is required in each course in the curriculum, including all prerequisite courses.

Two college-level courses in a single world language are required; this may be satisfied by successful completion of 2 years in a single world language in high school. Students who must take language at the University will have an additional 6-10 hours of coursework.

Freshman

First Semester		Credit Hours
ENGL 1113	Principles of English Composition (Core I)	3
MATH 1914	Differential and Integral Calculus I (Core I) ¹	4
PHYS 1205	Introductory Physics I for Physics Majors (Core II-Lab) ²	5
First-Year Experience (Core V) ⁵		3

¹ MATH 1823, MATH 2423, MATH 2433, and MATH 2443 sequence can be substituted for MATH 1914, MATH 2924, and MATH 2934.

² With approval of advisor, PHYS 2514, PHYS 2524, and PHYS 1311 and PHYS 1321 may substitute for PHYS 1205, PHYS 1215.

³ Engineering transfer students may take ENGR 3511 in place of ENGR 1411.

⁴ CHEM 1315 can be substituted with CHEM 1335 (Fall only).

⁵ To be chosen from the University-Wide General Education Approved Course List. Three of these hours must be upper-division (3000-4000). See list in the Class Schedule.

⁶ The 15 hours of engineering electives in an engineering discipline must emphasize engineering design. Electives must be approved by advisor.

⁷ A course numbered 3000 or above from engineering, physics or mathematics. Co-op students may substitute 3 hours of Engineering Co-op Program, on approval of advisor. A 2000- level engineering course may be used if prerequisite for engineering design sequence. Must be approved by advisor.

⁸ A course numbered 3000 or above from engineering or physics. A 2000-level engineering course may be used if it is a prerequisite of a design sequence and the technical elective is not a 2000-level course.
Electives must be approved by Advisor.

Courses designated as Core I, II, III, IV or V are part of the General Education curriculum. Students must complete a minimum of 40 hours of General Education courses, chosen from the approved list.

Engineering Physics, M.S.

Minimum Total Hours (Thesis): 30

Minimum Total Hours (Non-Thesis): 32

Program Code: M372

The balance of courses must be appropriate for the degree and approved by the Engineering Physics Graduate Liaison and Advisory Committee.

Graduate credit cannot be received for any course equivalent to one required in the undergraduate Engineering Physics program.

General Requirements for all Master's Degrees

The master's degree requires the equivalent of *at least* two semesters of satisfactory graduate work and additional work as may be prescribed for the degree.

All coursework applied to the master's degree must carry graduate credit.

Master's degree programs which require a thesis consist of *at least* 30 credit hours. All non-thesis master's degree programs require *at least* 30 credit hours.

Credit transferred from other institutions must meet specific criteria and is subject to certain limitations.

Courses completed through correspondence study may *not* be applied to the master's degree.

To qualify for a graduate degree, students must achieve an overall grade point average of 3.0 or higher in the degree program coursework and in all resident graduate coursework attempted. A student must also have at least a 3.0 in all coursework (including undergraduate coursework if any).

Additional information for master's degree students may be found in the Graduate College Bulletin.

Engineering Physics, Ph.D.

Minimum Total Hours: 90

Additional Coursework		
Coursework or seminars as approved by the advisory committee		0-51
Dissertation Research		

EPHY 6980	Research for Doctoral Dissertation ((2 hours minimum))	2-53
Total Credit Hours		90

¹ May be in related fields at G4000 level or above if approved by the advisory committee and graduate liaison.

Note:

The General Examination can only be taken after passing the internal departmental qualifying exams on Quantum Mechanics, Electrodynamics, and Classical & Statistical Mechanics.

General Requirements for Doctoral Degrees

A student should expect to spend at least the equivalent of three full academic years beyond the bachelor's degree to obtain the doctoral degree. During this period the student will take appropriate graduate coursework, successfully complete the general examination, and successfully defend and submit the final dissertation.

All coursework applied to the doctoral degree must carry graduate credit.

The doctoral degree requires at least 90 post-baccalaureate hours, including both formal coursework and hours of research.

The minimum hour requirement for a specific doctoral degree program cannot be waived.

No more than one-half of the credit hours, both OU and overall, excluding Research for Doctoral Dissertation (6980), may be S/U-graded coursework.

The student must be in residence at OU for at least two consecutive 16-week semesters during the pursuit of the doctoral degree while enrolled and engaged in coursework or research activities as prescribed by the major academic unit.

For more detailed regulations and requirements for Doctoral degrees, please consult the Graduate College Bulletin: <http://www.ou.edu/gradcollege/forms/bulletin>

School of Industrial and Systems Engineering

Shivakumar Raman, Director
Carson Engineering Center Room 124

General Information

Industrial and Systems engineering is vital to providing solutions to complex problems in wide-ranging fields including manufacturing, transportation, technology, healthcare, aerospace, and supply chain management; and our talented faculty and students lead the way in research efforts in these areas and many others. Industrial and Systems engineers improve, integrate, inform and innovate. While most engineers work with products or processes, ISEs work on a broad range of problems involving both people and technology. Companies seek ISEs for their

expertise in understanding, evaluating and improving the performance of entire technical and business systems. ISE graduates find employment in more industry sectors than any other type of engineer. Our graduates can be found working in a wide range of jobs and locations, from Wall Street financial firms to Silicon Valley start-ups and fields that include aerospace, manufacturing, energy, healthcare, entertainment, risk management, logistics, defense, and retail/wholesale distribution.

Mission Statement

The mission of the School of Industrial and Systems Engineering is to produce graduates with the capability to make systems productive through optimization and integration of processes, resources, and information.

Programs & Facilities

Research Centers

There are a number of research opportunities for faculty and students at several research centers operated by the school, the college, and the University.

Laboratories

Many of the laboratory facilities used by ISE students are used in association with elective coursework selected by students. Most labs are available by permission 24-hours a day.

Student Organizations

ISE students have the opportunity to participate in a number of student organizations.

Undergraduate

Accreditation

The Bachelor of Science in Industrial and Systems Engineering accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org>, under the General Criteria and the Industrial Engineering and Similarly Named Engineering Programs Program Criteria. This means that our program meets the quality standards set for the programs in the engineering discipline.

Industrial and Systems Engineering Program Educational Objectives (PEO)

Our Industrial and Systems Engineering undergraduate program is preparing our recent graduates to meet the following objectives:

1. Our alumni will have successful careers strengthened by knowledge of industrial and systems engineering methods and principles.
2. Our alumni will be emerging or established leaders among their peers.
3. Our alumni will be engaged in activities of life-long learning and professional development through willingness to take on challenges and learning opportunities.

Industrial & Systems Engineering Student Learning Outcomes

Through our Industrial and Systems Engineering undergraduate curriculum students will attain the following learning outcomes:

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.

2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. an ability to communicate effectively with a range of audiences.
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Bachelor of Science

The Bachelor of Science in Industrial and Systems Engineering undergraduate curriculum is designed to provide students with an outstanding professional educational experience that is practical, modern, and progressive. The Bachelor of Science in Industrial and Systems Engineering accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org>, under the General Criteria and the Industrial Engineering and Similarly Named Engineering Programs Program Criteria. A number of undergraduate options allow students to focus on a number of elective paths.

- Industrial and Systems Engineering (p. 1406)
- Analytics (p. 1408)
- Pre-Medicine (p. 1410)

Accelerated Programs

Programs leading to Master of Science degrees in Industrial and Systems Engineering or Master of Business Administration degrees also are available to outstanding undergraduate students. The Bachelor of Science in Industrial and Systems Engineering accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org>, under the General Criteria and the Industrial Engineering and Similarly Named Engineering Programs Program Criteria.

- Industrial and Systems Engineering, B.S./M.S. (p. 1413)
- Industrial and Systems Engineering: Analytics, B.S./M.S. (p. 1422)
- Industrial and Systems Engineering: Analytics, B.S./Data Science and Analytics, M.S. (p. 1425)
- Industrial and Systems Engineering, B.S./Master of Business Administration (p. 1419)

Graduate

Graduate programs offer students a number of paths to pursue in their graduate program, focusing on theory, methodology, and application in the classroom as well as in their research.

- Industrial and Systems Engineering (traditional and online), Master of Science (p. 1427)
- Industrial and Systems Engineering, Ph.D. (p. 1429)

Courses

ISE 2303 Design and Manufacturing Process 3 Credit Hours

(Crosslisted with AME 2303) Prerequisite: AME 2113 or CEES 2113 or ENGR 2113. Mechanical and physical properties of engineering materials. Introduction to design concepts, manufacturing processes and equipment used in engineering. (Sp)

ISE 2311 Computer Aided Design and Graphics Laboratory for Industrial Engineers 1 Credit Hour

Corequisite: 2303. Provides students with a basic understanding of technical graphics communication and computer-aided design for industrial engineering applications. By using computer-aided design/drafting software, SolidWorks/autoCAD, students will learn basic principles of engineering graphics and geometric modeling to assist in design problem visualization and planning. (Sp)

ISE 2823 Enterprise Engineering 3 Credit Hours

Introduction to the industrial engineering role as enterprise system integrator. Systems concepts, modeling and analysis; integrated product/service and operational process design; productivity and quality improvement; computer technology insertion; project, operations, and global supply chain management. (F)

ISE 2913 Introduction to Python for Analytics and Engineering 3 Credit Hours

Prerequisite: CS 1323 or equivalent, or special permission. This course serves as a fundamental introduction to programming using Python, with a particular focus on applications in the fields of analytics and engineering. Python has become cornerstone language in these disciplines due to its versatility, simplicity, and extensive library support. Students will learn the essential of Python programming, laying a strong foundation for more advance topics in data analytics. (Sp)

ISE 2960 Directed Reading 1-3 Credit Hours

Directed Reading. 1 To 3 Hours. Prerequisite: Engineering 1112; Permission Of The Department; Special Permission Card Required. May Be Repeated; Maximum Credit Three Hours. Individual Project Studies For University College Students In Industrial Engineering. (F)

ISE 3293 Applied Engineering Statistics 3 Credit Hours

Prerequisite: MATH 2433 or MATH 2924. Introduction to probability, one and higher dimensional random variates, function of random variables, expectation, discrete and continuous distributions, sampling and descriptive statistics, parameter estimation, use of statistical packages. (F, Sp)

ISE 3304 Design and Manufacturing II 4 Credit Hours

Prerequisite: 2303, 2311, Civil Engineering and Environmental Science 2153 (or concurrent enrollment) Or Aerospace and Mechanical Engineering 3143 (or concurrent enrollment). Dimensioning and tolerancing; tolerances-type, design and specification; assembly and fit design; tolerance standards, process planning-precedence representation in machining, operation and machine sequencing; jigs and fixtures-design and analysis; time and cost estimation for machining; automation; process/system integration. Laboratory (F)

ISE 3440 Mentored Research Experience 3 Credit Hours

0 to 3 hours. Prerequisites: ENGL 1113 or equivalent, and permission of instructor. May be repeated; maximum credit 12 hours. For the inquisitive student to apply the scholarly processes of the discipline to a research or creative project under the mentorship of a faculty member. Student and instructor should complete an Undergraduate Research & Creative Projects (URCP) Mentoring Agreement and file it with the URCP office. Not for honors credit. (F, Sp, Su)

- ISE 3813 Statistical Computing 3 Credit Hours**
Prerequisite: ISE 2913 and Math 3333. This course provides an introduction to statistical computing using the R programming language. R is a powerful tool for statistical analysis, data visualization, and data manipulation. Students will learn how to perform statistical computations and data analysis using R, making it a valuable skill for careers in analytics and engineering. (F)
- ISE 3913 Introduction to Machine Learning and Data Analytics 3 Credit Hours**
Prerequisite: ISE 2913 or C S 1323 or special permission. This course provides a foundational understanding of machine learning and data analytics within the context of engineering and complex systems. Students will learn key concepts and techniques, including data preprocessing, anomaly detection, regression, classification, and time series analysis. The course emphasizes practical applications of machine learning and analytics and their significance in various industries. (Sp)
- ISE 3960 Honors Reading (HONORS) 1-3 Credit Hours**
1 to 3 Hours. Prerequisite: Admission to Honors Program. May be repeated; maximum credit six hours. Consists of topics designated by the instructor in keeping with the Student's major program. Covers materials not usually presented in the regular courses. (F, Sp, Su)
- ISE 3970 Honors Seminar 1-3 Credit Hours**
1 to 3 hours. Prerequisite: admission to Honors program. May be repeated; maximum credit six hours. Projects covered will vary. Deals with concepts not usually presented in regular coursework. (Irreg.)
- ISE 3980 Honors Research (HONORS) 1-3 Credit Hours**
1 to 3 hours. Prerequisite: Admission to Honors Program. May be repeated; maximum credit six hours. Will provide an opportunity for the gifted Honors candidate to work at a special project in the student's field. (F, Sp, Su)
- ISE 3990 Special Topics 1-3 Credit Hours**
1 to 3 hours. Directed study for undergraduates. (F, Sp, Su)
- ISE 4113 Spreadsheet Dec Support Sys 3 Credit Hours**
Prerequisite: I E/ISE 4623 or concurrent enrollment, and CS 1313 or CS 1321 or CS 1323 or CS 1324, or permission of instructor. Covers all aspects of spreadsheet-based software functionality that are relevant to decision-making. Microsoft Excel is used as the subject tool. Students will learn advanced functions of Excel that are available through the spreadsheet interface, the Visual Basic language and its integration with the spreadsheet environment, principles of decision-support systems studied in a variety of applications, including facility layout, and warehousing. (F)
- ISE G4223 Fundamentals of Engineering Economy 3 Credit Hours**
Prerequisite: MATH 2423 or 2924 or permission of the department. Development and use of time value of money interest formulas. Inflation considerations and bond problems. Bases for comparison of alternatives, present worth, annual worth, rate of return and savings-investment ratio methods. Decision-making among independent, dependent, capital-constrained and un-equal lived projects. Depreciation methods and their effect on corporate income taxes, leading to after-tax cash flow analysis. Benefit-cost and cost effectiveness analysis. (Sp)
- ISE 4281 Engineering Co-Op Program 1 Credit Hour**
(Crosslisted with AME, CH E, CEES, C S, EPHY, ECE and BME 4281)
Prerequisite: Departmental permission and junior standing. May be repeated; maximum credit 6 hours. The Co-Op program provides students an opportunity to enhance their education via career exploration in related professional work experiences. Course assignments help students articulate their experiences by completing journals; mid-term paper; final paper and/or final presentation. Faculty receive an evaluation from the student's Co-Op supervisor who monitors performance. Faculty collaborate with the Co-Op supervisor to ensure student success. (F, Sp, Su)
- ISE 4302 Systems Thinking 2 Credit Hours**
Systems thinking is a way of making sense of the world's complexity by studying whole systems and studying the relationships both among systems and among the integral part of the system. As systems engineering problems are typically complex and often embedded in complex contexts, determining effective solutions can be difficult. Systems thinking is based on systems theory and systems sciences. (Sp)
- ISE G4333 Production Systems/Operations 3 Credit Hours**
Prerequisite: ISE 2823 and ISE 4623, or permission of instructor. Operations-oriented topics for production systems. Supply chain process (tactical planning, operational scheduling and sequencing, management and planning, and demand promising). Customer service process; E-Business and information technology applications for production systems. (F)
- ISE 4383 Systems Evaluation 3 Credit Hours**
(Slashlisted with ISE 5383) Prerequisite: ISE 4223, ISE 4563, and ISE 4633. Focuses on the development and evaluation of alternate system and process designs. Development of system goals, requirements, and performance measures; ranking of alternatives and decision analysis techniques. Review and development of trade studies. Applications in facility layout, maintenance, supply chain, and other contexts. No student may earn credit for both 4383 and 5383. (F)
- ISE 4393 Capstone Design Project 3 Credit Hours**
Prerequisite: ISE 4333 or ISE 3913, ISE 4383, ISE 4663, and ISE 4853. Restricted to graduating Industrial & Systems Engineering students; to be taken in the last semester. Current problems drawn from production and service organizations will be presented by personnel from these organizations. Students will solve these problems under the guidance of their instructor, using industrial engineering methodology. (F, Sp) [V].
- ISE 4553 Data-Driven Decision Making I 3 Credit Hours**
(Slashlisted with ISE 5553) Prerequisite: ISE 3293. Fundamentals of statistical models for describing engineering systems and processes. Analysis of variance, multiple regression, logistic regression, time series, clustering. Emphasis is placed on decision making. No student may earn credit for both 4553 And 5553. (F)
- ISE 4563 Quality & Reliability Engineering 3 Credit Hours**
(Slashlisted with ISE 5563) Prerequisite: ISE 3293 and ISE 4553. The use of statistical methods for quality control and improvement in product and process environments, as well as introductory applied probability for component and system reliability. Topics include philosophies of quality management, control chart theory and application, process capability, and performance metrics of reliability. Focus is given to decision making in engineering systems. No student may earn credit for both 4563 and 5563. (Sp)

- ISE 4623 Deterministic Systems Models 3 Credit Hours**
Prerequisite: I E/ISE 2823. Problem solving using analytical models: theory, methodology, and application. Topics include linear programming, simplex algorithm and sensitivity analysis, integer programming, and dynamic programming. Practical applications in transportation networks, project management and scheduling, deterministic inventory models, decision making, and systems integration. Solution methods using computer software. (F)
- ISE 4633 Probabilistic Systems Models 3 Credit Hours**
Prerequisite: I E 3293 or ISE 3293 AND I E 4623 or ISE 4623. Problem solving using stochastic models: theory, methodology, and application. Topics include probability distributions, Poisson processes, Markov chains and Markov decision processes, queuing theory, and Monte Carlo simulation. Practical applications in probabilistic inventory models, maintenance activities, decision making, and systems integration. Solution methods using computer software. (Sp)
- ISE 4663 Systems Analysis Using Simulation 3 Credit Hours**
(Slashlisted with ISE 5663) Prerequisite: ISE 3293 or ISE 5013 or DSA 5013. Implements the science of systems analysis through the use of simulation modeling and statistical analysis; inclusive of time study analysis for performing input modeling tasks. Laboratory. No student may earn credit for both 4663 and 5663. (F)
- ISE G4804 Ergonomics in Systems Design 4 Credit Hours**
Prerequisite: junior standing or permission of instructor. Human-systems integration, considering the impacts of the physical structure, the information flow, and the environmental conditions on human performance. Students learn how to design, evaluate and improve systems from the perspective of the human(s) working in and impacted by the system. (Sp)
- ISE 4853 Data-Driven Decision Making II 3 Credit Hours**
(Slashlisted with ISE 5853) Prerequisite: ISE 4553 and ISE 4804 or ISE 3913. Experimental methodology for empirical decision making. Includes the development of empirical hypotheses, designs, performance criteria, and analyses. Techniques for empirical reporting. The measurement of human performance is typically the vehicle used for students in this course. No student may earn credit for both 4853 and 5853. (F)
- ISE 4913 Advanced Machine Learning and Data Analytics 3 Credit Hours**
Prerequisite: ISE 3913. This advanced course builds upon the foundation established in the introductory course, delving deeper into machine learning and data analytics. Students will explore advanced machine learning algorithms, deep learning, natural language processing, reinforcement learning, big data analytics, and specialized topics like Generative Adversarial Networks (GANs). Ethical considerations, societal implications, and future trends are integral components of the course. (F)
- ISE 4960 Directed Readings 1-4 Credit Hours**
1 to 4 hours. Prerequisite: good standing in University; permission of instructor and dean. May be repeated; maximum credit four hours. Designed for upper-division students who need opportunity to study a specific problem in greater depth than formal course content permits. (Irreg.)
- ISE 4970 Special Topics/Seminar 1-3 Credit Hours**
1 to 3 hours. Prerequisite: permission of instructor. May be repeated with change of content; maximum credit twelve hours. Special topics in the various fields of industrial engineering -- data analysis, engineering financial analysis, human factors, manufacturing, operations research, production, simulation, sustainability, systems. (Irreg.)
- ISE 4990 Special Studies 1-3 Credit Hours**
1 to 3 hours. Prerequisite: senior standing. May be repeated once; maximum credit six hours. Directed study for undergraduates. (F, Sp, Su)
- ISE 5013 Fundamentals of Engineering Statistical Analysis 3 Credit Hours**
(Crosslisted with DSA 5013) Prerequisite: graduate standing. Introduction to probability, expectation, discrete and continuous distributions, sampling and descriptive statistics, parameter estimation, and statistical tests to aid decision making. The student will learn analysis techniques for verification of systems parameters. (F, Sp)
- ISE 5023 Systems Optimization 3 Credit Hours**
Prerequisite: graduate standing. Introduction to basic systems models and their solution with modern computer packages. Emphasis on modeling, computer solution, and sensitivity analysis with limited reference to model theory and development of algorithmic methods. (F)
- ISE 5033 Systems Engineering 3 Credit Hours**
Prerequisite: graduate standing. The complexities of systems, design, sustainment, and modernization in the context of systems engineering. (Irreg.)
- ISE 5103 Intelligent Data Analytics 3 Credit Hours**
(Crosslisted with DSA 5103) Prerequisite: graduate standing or permission of instructor; ISE 3293 or ISE 5013; CS 1313 or CS 1323. In our society, data is rapidly increasing in volume, velocity, and variety. At the same time computing power and the sophistication of data analysis techniques are increasing. However, even with the expanding capabilities, businesses and organizations often find themselves "data rich, but information poor." Intelligent Data Analysis is a holistic approach to addressing real-world data intensive problems that integrates human intuition with data analysis tools to best draw out meaningful insights. To this end, the course has four underlying themes: defining the Problem, understanding and coping with Data, selecting and using appropriate Analytical Tools, and discovering and communicating the Insight. Techniques covered include data cleansing and pre-processing, exploratory analysis and visualization, dimension reduction, linear and logistic regression, decision trees, and clustering. This course will introduce students to a powerful open source statistical programming language (R) and include extensive hands-on data analysis and team projects. (F)
- ISE 5113 Advanced Analytics and Metaheuristics 3 Credit Hours**
(Crosslisted with DSA 5113) Prerequisite: ISE 5013, graduate standing or permission of Instructor. Explores advanced techniques for addressing complex optimization problems. Focus is on formulating mathematical models and developing problem solving strategies using methods in the context of Data Science and Analytics. Topics include continuous and combinatorial optimization with an emphasis on both traditional and modern heuristic techniques. (Sp)
- ISE 5123 Software Tools-Dec Support 3 Credit Hours**
Prerequisite: Computer Science 1313 or 1323, or permission of instructor. Covers an integrated set of software tools that is used in development of a wide variety of decision models and support systems. Students will learn Python programming language and several of its major libraries. Applications will be developed in data extraction and processing, and development of statistical, simulation, and optimization models. (Irreg.)

- ISE 5133 Energy Analytics** **3 Credit Hours**
(Crosslisted with DSA 5133) Prerequisite: Graduate standing or permission of instructor. In today's data-driven world, the ability to extract knowledge and create successful future energy projections is critical for the energy sectors. In this regard, data science body of knowledge promises a strong set of analytical tools that can be used for demand/supply forecasting and price prediction. This course aims at teaching the students the fundamentals of data analysis and interpretation. (F)
- ISE 5293 Cost Engineering** **3 Credit Hours**
(Crosslisted with ELM 5293) Prerequisite: Graduate standing. This course will discuss the application of scientific principles and techniques to problems of cost estimating, cost control, business planning, profitability analysis, project management, and planning and scheduling. It will provide an understanding of both the tools and models that can be used throughout the design, development, and support phases, and examine the trade-offs between system performance and life-cycle cost. (Su)
- ISE 5373 Intro to Additive Manufacturing** **3 Credit Hours**
Prerequisite: Graduate standing or permission of instructor. Students will be exposed to Additive Manufacturing (AM, also 3D Printing, Rapid Prototyping, and Direct Digital Manufacturing) in a holistic but highly technical manner. Topics include an overview of relevant AM technologies and their importance in many branches of industry (i.e., medical, aerospace, automotive, etc.), as well as the field's origins, growth, and future directions. (Sp)
- ISE 5383 Systems Evaluation** **3 Credit Hours**
(Slashlisted with ISE 4383) Prerequisite: permission of department. Focuses on the development and evaluation of alternate system and process designs. Development of system goals, requirements, and performance measures; ranking of alternatives and decision analysis techniques. Review and development of trade studies. Applications in facility layout, maintenance, supply chain, and other contexts. (F) No student may earn credit for both 4383 and 5383.
- ISE 5503 Healthcare Analytics** **3 Credit Hours**
(Crosslisted with DSA 5503) Prerequisite: Graduate Standing and ISE 3293 or DSA/ISE 5013. This course gives an overview of the primary concepts and methods towards developing artificial intelligence (AI)-enabled healthcare systems. We will focus on foundational methods in machine learning and data analytics for prediction and pattern recognition, and apply them to specific areas in medicine and healthcare including, but not limited to, disease diagnosis, patient treatments and their outcomes prediction. (Sp)
- ISE 5543 Decision Analysis** **3 Credit Hours**
(Crosslisted with ELM 5543) Prerequisite: Graduate standing. This course provides the fundamentals of decision analysis and explores how analyzing risk can be incorporated into good decision making. Normative approaches to making decisions when uncertainty exists are central to this course. Topics covered include structuring decision problems, developing alternatives, single and multiple objectives, utility theory, risk tolerance, data-driven and subjective probability, and psychological pitfalls. (F)
- ISE 5553 Data-Driven Decision Making I** **3 Credit Hours**
(Slashlisted with ISE 4553) Prerequisite: ISE 3293 or ISE 5013. Fundamentals of statistical models for describing engineering systems and processes. Analysis of variance, multiple regression, logistic regression, time series, clustering. Emphasis is placed on decision making. No student may earn credit for both 4553 and 5553. (F)
- ISE 5563 Quality & Reliability Engineering** **3 Credit Hours**
(Slashlisted with ISE 4563) Prerequisite: ISE 3293 or ISE 5013 and ISE 4553 or ISE 5553. The use of statistical methods for quality control and improvement in product and process environments, as well as introductory applied probability for component and system reliability. Topics include philosophies of quality management, control chart theory and application, process capability, and performance metrics of reliability. Focus is given to decision making in engineering systems. No student may earn credit for both 4563 and 5563. (Sp)
- ISE 5613 Multicriteria Optimization** **3 Credit Hours**
Prerequisite: 4623. Survey of developments and applications of theory and methods pertinent to decision making under conflicting criteria. Goal programming and interactive methods for multicriteria mathematical programming will be emphasized with applications. (Irreg.)
- ISE 5633 Supply Chain Mgt & Transport** **3 Credit Hours**
Prerequisite: graduate standing or by permission. Introduces transportation and supply chain concepts along with the important issues in supply chain system design and operation. Students learn how to formulate and analyze systems models for supply chain systems using information technology skills and decision support systems. (Irreg.)
- ISE 5643 Engineering Optimization** **3 Credit Hours**
Prerequisite: ISE 4623 or permission. Basic computational tools for solving nonlinear unconstrained and constrained optimization problems arising in engineering practice. Emphasis is on models and methods applicable to problems in engineering design, process operations, control, production planning, manufacturing and management. (Irreg.)
- ISE 5663 Systems Analysis Using Simulation** **3 Credit Hours**
(Slashlisted with ISE 4663) Prerequisite: Graduate standing, and ISE 3293 or ISE 5013 or DSA 5013. Implements the science of systems analysis through the use of simulation modeling and statistical analysis, including time study analysis for performing input modeling tasks. No student may earn credit for both 4663 and 5663. (F)
- ISE 5693 Simulation Modeling and Analysis** **3 Credit Hours**
Prerequisite: Graduate standing; ISE 3293 or ISE 5013. This course is an advanced study of simulation methodology. Emphasis will be given to modeling of discrete event systems. Provides theoretical and practical experience in building and running computer simulation models of industrial systems. Teaches statistical methods for analyzing the output from a simulation. (Sp)
- ISE 5713 Engineering Project Management** **3 Credit Hours**
Prerequisite: ISE 3293 or ISE 5013 or permission of instructor. Review of the various technical and managerial aspects of project management. Introduction to extensions of CPM and PERT. Specific topics include network development and analysis, precedence constraints, resource allocation, time-cost trade-off, heuristics, criticality index, computer applications, design and analysis of engineering projects, and optimization techniques for project scheduling. (Irreg.)
- ISE 5743 Mgt of Engineering Function** **3 Credit Hours**
Prerequisite: 2823 or graduate standing. Explores major concepts of engineering management and how to apply these concepts in managing the engineering function in an enterprise. Intensive analysis of the specialized problems of engineering organizations which include technical human power. Procedures and design for the control of engineering projects. Specific examples and cases of management problems and experiences are used. A research project is required that involves at least one of the functions of engineering management. (Irreg.)

- ISE 5753 Organization Systems** **3 Credit Hours**
Prerequisite: graduate standing or permission. The organization is examined as a complex of subsystems to accomplish production or service objectives. Individuals as members of the subsystems are examined as human factor elements in contributing to the analysis of effectiveness and efficiency of systems. Organizations are viewed from a macro standpoint with emphasis on engineering organizations. Current trends and cases are reviewed with case presentations required. A research project evaluating and organization is required from an engineering management viewpoint. (Irreg.)
- ISE 5763 Project Management Methods** **3 Credit Hours**
Prerequisite: Graduate standing and ISE 3293 or ISE 5013. This course provides the fundamentals of project management. Projects are temporary, unique endeavors that produce a product, service, or result. Organizations in both the public and private sectors use projects to achieve strategic objectives. Projects have distinct start and end dates, and so have a life cycle. We will examine life cycle through project selection, team organization, execution, and closure. (Su)
- ISE 5773 Systems Requirements and Architecting** **3 Credit Hours**
(Crosslisted with ELM 5773) Prerequisite: Graduate standing. This course provides the fundamentals of systems engineering by offering an overview of the discipline and then focusing on the management of system requirements and developing how a system will meet them. We will discuss the definition of systems, the system development life cycle, and the systems engineering method. Topics include Detail design, requirement analysis and decomposition, and system architecting. (F)
- ISE 5783 Project Leadership** **3 Credit Hours**
Prerequisite: Graduate standing in ISE or DSA. This course is designed to help everyone improve their ability to lead when in formal leadership roles and when in roles where influence is needed to achieve high-performing teams. This course is to prepare students to exercise leadership as influencers when in not in formal leadership roles, and to be able to excel as leaders. (F)
- ISE 5813 Advanced Human Factors and Ergonomics** **3 Credit Hours**
Prerequisite: ISE 4804 and graduate standing. Analysis, design, and evaluation of human behaviors and decision-making processes in simple and complex systems. Integration of human factors, human computer interaction, and systems engineering. (Sp)
- ISE 5823 Exercise Physiology** **3 Credit Hours**
(Crosslisted with HES 5823) Prerequisite: 4824; Zoology 3104 or 3133; Physiology 5016 or 5019; or permission. Advanced study of physiological responses, regulatory mechanisms and adaptations of human performance and health; factors affecting performance and health; and training and evaluative techniques. (F)
- ISE 5853 Data-Driven Decision Making II** **3 Credit Hours**
(Slashlisted with 4853) Prerequisite: 4553 and 4804. Experimental methodology for empirical investigation. Includes the development and measurement of empirical hypotheses, designs, performance criteria, and analyses. Techniques for empirical reporting. The measurement of human performance is typically the vehicle used for students in this course. No student may earn credit for both 4853 and 5853. (F)
- ISE 5893 Models Based Systems Engineering** **3 Credit Hours**
Prerequisite: graduate standing. Models Based System Engineering (MBSE) is concerned with the application of modeling and simulation techniques to the design, analysis, verification, and validation of complex systems throughout their lifecycle. Students will be exposed to principles, processes and tools necessary to develop and manage model-based representations of complex systems, enabling a holistic and integrated approach to systems engineering. (Sp)
- ISE 5960 Directed Readings** **1-3 Credit Hours**
1 to 3 hours. Prerequisite: graduate standing and permission of department. May be repeated; maximum credit twelve hours. Directed readings and/or literature reviews under the direction of a faculty member. (F, Sp, Su)
- ISE 5970 Seminar-Industrial Engineering** **1-3 Credit Hours**
1 to 3 hours. Prerequisite: graduate standing or permission. May be repeated with change of content; maximum credit 12 hours. Special topics in the various fields of industrial engineering, engineering, economy, operations research, ergonomics, production, manufacturing, simulation, engineering statistics and computer systems. (Irreg.)
- ISE 5980 Research for Master's Thesis** **2-9 Credit Hours**
Variable enrollment, two to nine hours; maximum credit applicable toward degree, six hours. (F, Sp, Su)
- ISE 5990 Special Studies** **1-4 Credit Hours**
1 to 4 hours. Prerequisite: senior standing, permission. May be repeated; maximum credit six hours. (F, Sp, Su)
- ISE 6623 Nonlinear Programming** **3 Credit Hours**
Prerequisite: Graduate standing and ISE 4623. Theory and computational aspects of nonlinear optimization problems. Topics include: applications and problem formulation, convexity, Kuhn-Tucker conditions, duality, quadratic programming, unconstrained optimization techniques, direct search method, penalty function, optimization methods, feasible direction methods, separable programming, geometric programming. (Irreg.)
- ISE 6960 Directed Readings** **1-3 Credit Hours**
1 to 3 hours. Prerequisite: graduate standing or permission of instructor. May be repeated; maximum credit six hours. Directed readings and/or literature review under the direction of a faculty member. (Irreg.)
- ISE 6970 Special Topics/Seminar** **1-3 Credit Hours**
1 to 3 hours. Prerequisite: graduate standing or permission of instructor. May be repeated; maximum credit 12 hours. Special topics or seminar course for content not currently offered in regularly scheduled courses. May include library and/or research and field projects. (Irreg.)
- ISE 6980 Research for Doctoral Dissertation** **2-16 Credit Hours**
2 to 16 hours. Prerequisite: Graduate standing and permission of instructor; may be repeated. Directed research culminating in the completion of the doctoral dissertation. (F, Sp, Su)
- ISE 6990 Special Studies** **1-9 Credit Hours**
1 to 9 hours. Prerequisite: Graduate standing. May be repeated with change of content; maximum credit 9 hours. Special problems in the various fields of industrial and systems engineering. Special studies in data analytics, systems modeling and design, computational optimization, logistics and supply chain management, human-system integration, engineering education, advanced manufacturing, or biomedical manufacturing. In addition, students may need information relating to problem-specific disciplines such as weather, energy, sustainability, and psychology. (F, Sp, Su)

Faculty

Last Name	First/Middle Name	Middle init.	OU Service start	Title(s), date(s) appointed	Degrees Earned, Schools, Dates Completed
Ahsan	Manjurul	Md.	2024	Research Assistant Professor	PhD, University of Oklahoma, 2023; M.S. Lamar University, 2018

Allen	Janet	K	2009	PROFESSOR OF INDUSTRIAL AND SYSTEMS ENGINEERING, 2009; JOHN AND MARY MOORE CHAIR IN ENGINEERING, 2009	PhD, Univ of California, Berkeley, 1973; BS, Mass Inst of Technology, 1987
Barker	Kash		2011	PROFESSOR OF INDUSTRIAL AND SYSTEMS ENGINEERING, 2021; DAVID L. BOREN PROFESSOR, 2020; PROFESSOR DATA SCIENCE AND ANALYTICS	PhD, Univ of Virginia, 2008; MS, Univ of Oklahoma, 2004; BS, Univ of Oklahoma, 2002
Bevans	Benjamin		2024	Research Assistant Professor	PhD., Virginia Tech, 2024; B.S. University of Nebraska, 2020
Dodd	Owen	T	2018	ASSISTANT PROFESSOR OF INDUSTRIAL AND SYSTEMS ENGINEERING, 2018	PhD, Univ of Oklahoma, 2013; BS, Univ of Oklahoma, 2004
Gonzalez Huertas	Andres	D	2017	ASSISTANT PROFESSOR OF INDUSTRIAL AND SYSTEMS ENGINEERING, 2017	PhD, Universidad de los Andes, 2017; PhD, Rice Univ, 2017; MS, Universidad de los Andes, 2012; BS, Universidad de los Andes, 2009
Hemmati	M. Soheil		2023	Assistant Professor of Industrial and Systems Engineering, 2023	Ph.D., University of Florida, 2013; M.S., Sharif University of Technology, 2006; B.S., Sharif University of Technology, 2003
Kang	Ziho		2014	ASSOCIATE PROFESSOR OF INDUSTRIAL AND SYSTEMS ENGINEERING, 2020	PhD, Purdue Univ, 2012; MS, Purdue Univ, 2006; BS, Korea Univ, 2001
Landers	Thomas		1998	PROFESSOR-EMERITUS OF INDUSTRIAL AND SYSTEMS ENGINEERING, 2019	PhD, Texas Tech Univ, 1985; MS, Texas Tech Univ, 1973; BS, Texas Tech Univ, 1972
Li	Yifu		2020	ASSISTANT PROFESSOR DATA SCIENCE AND ANALYTICS, 2020; ASSISTANT PROFESSOR OF INDUSTRIAL AND SYSTEMS ENGINEERING, 2020	PhD, MS, Virginia Tech, 2020; BS, Virginia Tech, 2016
Nicholson	Charles		2013	DIRECTOR OF DATA SCIENCE AND ANALYTICS INSTITUTE, 2023; ASSOCIATE PROFESSOR OF INDUSTRIAL AND SYSTEMS ENGINEERING, 2019; ASSOCIATE PROFESSOR DATA SCIENCE AND ANALYTICS	PhD, Southern Methodist Univ, 2010; MS, Univ of North Texas, 2002; BS, Univ of North Texas, 1999
Pulat	Pakize	Simin	1985	PROFESSOR-EMERITUS OF INDUSTRIAL AND SYSTEMS ENGINEERING, 2018	PhD, North Carolina St Univ, 1984; MS, North Carolina St Univ, 1977; BS, Middle East Tech Univ, 1975
Raman	Shivakumar		1988	SAMUEL ROBERTS NOBLE PRESIDENTIAL PROFESSOR, 1999; DAVID ROSS BOYD PROFESSOR OF INDUSTRIAL AND SYSTEMS ENGINEERING, 2004; MORRIS R. PITTMAN PROFESSOR, 2019	PhD, Pennsylvania State Univ, 1989; MS, Univ of Texas Arlington, 1985; B Engr, Shivaji Univ, 1983
Razzaghi	Talayeh		2019	ASSISTANT PROFESSOR OF INDUSTRIAL AND SYSTEMS ENGINEERING, 2019	PhD, Univ. of Central Florida, 2014; MS, Sharif Univ. of Tech, 2007; BS, Univ. of Tehran, 2005
Riensch	Alex		2024	Research Assistant Professor	PhD. Virginia Tech, 2024; B.S. University of Nebraska, 2019
Roh	Byeong-Min		2022	Assistant Professor of Industrial and Systems Engineering, 2022	Ph.D., Mechanical Engineering, The Pennsylvania State University 2022; M.S., Mechanical Engineering, The Pennsylvania State University 2021; M.S., Industrial Engineering, The Pennsylvania State University, 2017; B.S., Manufacturing Systems & Design Engineering, Northumbria University at Newcastle, UK 2014; B.S., Manufacturing Systems & Design Engineering, Seoul National University of Science and Technology, 2014
Ruiz	Cesar		2022	Assistant Professor of Industrial and Systems Engineering, 2022	Ph.D., University of Arkansas, 2020; M.S. University of Arkansas, 2018; B.A., ESEN, 2014
Shehab	Randa		1997	PROFESSOR OF INDUSTRIAL AND SYSTEMS ENGINEERING, 2009; ADJUNCT PROFESSOR OF WOMEN'S AND GENDER STUDIES, 2013; NETTIE VINCENT BOGGS PROFESSOR OF ENGINEERING, 2014; CO-DIRECTOR DATA SCIENCE AND ANALYTICS	PhD, Univ of Oklahoma, 1995; MS, Univ of Oklahoma, 1993; BS, Univ of Oklahoma, 1989

Trafalis	Theodore B	1991	PROFESSOR OF INDUSTRIAL AND SYSTEMS ENGINEERING, 2002; ADJUNCT PROFESSOR OF METEOROLOGY, 2008; PROFESSOR DATA SCIENCE AND ANALYTICS	PhD, Purdue Univ, 1989; MS, Purdue Univ, 1984; BS, Athens, 1982
Zhu	Rui	2021	ASSISTANT PROFESSOR OF INDUSTRIAL AND SYSTEMS ENGINEERING, 2021	PhD, The Pennsylvania State Univ, August 2021; MS, Harbin Inst of Technology, 2017; BS, Harbin Inst of Technology, 2014

ISE 4383	Systems Evaluation	3
ISE 4663	Systems Analysis Using Simulation	3
ISE 4853	Data-Driven Decision Making II	3
ISE 4393	Capstone Design Project	3
ISE Elective		
Choose a three hour approved ISE elective ¹		3
Total Credit Hours		54

¹ To be chosen from an approved list of ISE electives available in the ISE office, CEC 116.

Major Support Requirements

Code	Title	Credit Hours
Math and Science		
MATH 2924	Differential and Integral Calculus II	4
MATH 2934	Differential and Integral Calculus III	4
Math Elective - Choose from approved list ¹		3
PHYS 2524	General Physics for Engineering and Science Majors	4
ISE Technical Elective		
Choose a three hour ISE Technical Elective from approved list maintained by the department		3
Additional College Requirements		
ENGR 1411	Pathways to Engineering Thinking ²	1
ENGR 2002	Professional Responsibilities and Skills of Engineers and Scientists	2
C S 1323	Introduction to Computer Programming for Programmers	3
or C S 1313	Programming for Non-Majors with C	
ENGR 2431	Electrical Circuits	1
ENGR 2461	Thermodynamics	1
ENGR 3441	Fluid Mechanics	1
CEES 2113	Statics	3
CEES 2153	Mechanics of Materials	3
Total Credit Hours		33

¹ Chosen from an approved list maintained by the department. Options include MATH 2513, MATH 3113, MATH 3333, MATH 3413, and MATH 4433.

² Engineering transfer students may take ENGR 3511 in place of ENGR 1411.

General Education and College Requirements

Courses designated as Core I, II, III, IV, or V are part of the General Education curriculum. Students must complete a minimum of 40 hours of General Education courses, chosen from the approved list, including at least one upper-division Gen. Ed. course outside of the student's major. **Courses graded P/NP will not apply.**

A grade of C or better is required in each course in the curriculum, including all prerequisite courses.

Industrial and Systems Engineering, B.S.

Minimum Total Credit Hours: 127

Overall GPA - Combined and OU: 2.00

Major GPA - Combined and OU: 2.00

Curriculum GPA - Combined and OU: 2.00

Program Code: B524

This program has changes pending State Regents approval for 2024/25. These pending changes are not reflected here.

Bachelor of Science in Industrial and Systems Engineering accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org>, under the General Criteria and the Industrial Engineering and Similarly Named Engineering Programs Program Criteria.

In order to progress in your curriculum in the Gallogly College of Engineering, and as a specific graduation requirement, a **grade of C or better** is required in each course in the curriculum, including all prerequisite courses.

Major Requirements

Code	Title	Credit Hours
Required Courses		
ISE 2823	Enterprise Engineering	3
ISE 2311	Computer Aided Design and Graphics Laboratory for Industrial Engineers	1
ISE 2303	Design and Manufacturing Process	3
ISE 3293	Applied Engineering Statistics	3
ISE 3304	Design and Manufacturing II	4
ISE 4113	Spreadsheet Dec Support Sys	3
ISE 4553	Data-Driven Decision Making I	3
ISE 4623	Deterministic Systems Models	3
ISE 4223	Fundamentals of Engineering Economy	3
ISE 4563	Quality & Reliability Engineering	3
ISE 4633	Probabilistic Systems Models	3
ISE 4804	Ergonomics in Systems Design	4
ISE 4333	Production Systems/Operations	3

UNIVERSITY-WIDE GENERAL EDUCATION (MINIMUM 40 HOURS) AND COLLEGE REQUIREMENTS

Code	Title	Credit Hours
Core Area I: Symbolic and Oral Communication		
<i>English Composition</i>		
ENGL 1113	Principles of English Composition	3
ENGL 1213	Principles of English Composition	3
or EXPO 1213	Expository Writing	
<i>Language (0-10 hours in the same language)</i>		
This requirement can be met by two years of the same language in high school:		0-10
Beginning Course (0-5 hours)		
Beginning Course, continued (0-5 hours)		
<i>Mathematics</i>		
MATH 1914	Differential and Integral Calculus I (Core I) 1,2	4
Core Area II: Natural Science (including one laboratory)		
PHYS 2514	General Physics for Engineering and Science Majors (Core II) ²	4
CHEM 1315	General Chemistry (Core II-Lab) ²	5
or CHEM 1335	General Chemistry I: Signature Course	
Core Area III: Social Science		
P SC 1113	American Federal Government	3
Choose one course ³		3
Core Area IV: Arts & Humanities		
<i>Artistic Forms</i>		
Choose one course ³		3
<i>Western Culture</i>		
HIST 1483	United States to 1865	3
or HIST 1493	United States, 1865 to the Present	
Choose one course (excluding HIST 1483 and HIST 1493) ³		3
<i>World Culture</i>		
Choose one course ³		3
Core Area V: First-Year Experience		
Choose one course ³		3
Total Credit Hours		40-50

¹ MATH 1823, MATH 2423, MATH 2433, and MATH 2443 sequence can be substituted for MATH 1914, MATH 2924, and MATH 2934.

² Major support requirements that also satisfy University General Education requirements.

³ To be chosen from the University-Wide General Education Approved Course List. Three of these hours must be upper-division (3000-4000). See list in the Class Schedule.

Free Electives

Electives to bring total applicable hours to the minimum total required for the degree including a minimum of 40 upper-division hours.

Suggested Semester Plan of Study

Bachelor of Science in Industrial and Systems Engineering accredited by the Engineering Accreditation Commission of ABET, <https://>

www.abet.org, under the General Criteria and the Industrial Engineering and Similarly Named Engineering Programs Program Criteria.

In order to progress in your curriculum in the Gallogly College of Engineering, and as a specific graduation requirement, a grade of C or better is required in each course in the curriculum, including all prerequisite courses.

Two college-level courses in a single world language are required; this may be satisfied by successful completion of 2 years in a single world language in high school. Students who must take language at the University will have an additional 6-10 hours of coursework.

Freshman

First Semester		Credit Hours
ENGL 1113	Principles of English Composition (Core I)	3
CHEM 1315	General Chemistry (Core II-Lab) ¹	5

C S 2413	Data Structures	3
6 hours of C S Electives chosen from an approved list ²		6
Total Credit Hours		41

¹ Engineering transfer students may take ENGR 3511 in place of ENGR 1411.

² To be chosen from the C S Elective list available in the ISE office, CEC 116. C S 3203 and C S 4513 are recommended electives.

General Education and College Requirements

Courses designated as Core I, II, III, IV, or V are part of the General Education curriculum. Students must complete a minimum of 40 hours of General Education courses, chosen from the approved list, including at least one upper-division Gen. Ed. course outside of the student's major. **Courses graded P/NP will not apply.**

A grade of C or better is required in each course in the curriculum, including all prerequisite courses.

UNIVERSITY-WIDE GENERAL EDUCATION (MINIMUM 40 HOURS) AND COLLEGE REQUIREMENTS

Code	Title	Credit Hours

Courses designated as Core I, II, III, IV, or V are part of the General Education curriculum. Students must complete a minimum of 40 hours of General Education courses, chosen from the approved list.

Admission requirements vary with medical schools. Students should consult with advisors in the Pre-Medical Professions Advising Office each semester (Cate 1, Room 416, or call 405-325-2457) as well as the Williams Student Services Center to ensure completion of the necessary prerequisite courses. This may include additional coursework not required for this specific undergraduate degree program in Industrial and Systems Engineering. Note: Most medical schools require PHYS 1311 and PHYS 1321.

ISE 5980	Research for Master's Thesis Graduate Elective ⁶	
Credit Hours		9
Total Credit Hours		138

¹ Courses taken to fulfill the Natural Science requirement must be chosen from the University-Wide General Education Approved Course List (Core II). At least one of the Natural Science courses must be a non-Physics course. All science courses must be for science or

engineering majors and come from the natural science elective list maintained by the department.

² MATH 1823, MATH 2423, MATH 2433, and MATH 2443 sequence can be substituted for MATH 1914, MATH 2924, and MATH 2934.

³ Transfer students will need to meet the requirements of the first-year experience course as well as the engineering transfer course. Please see your advisor for your specific enrollment.

⁴ To be chosen from the University-Wide General Education Approved Course List. Three of these hours must be upper-division (3000-4000). See list in the Class Schedule.

⁵ These courses are dual-counted, fulfilling requirements for both the undergraduate and graduate Industrial Engineering degrees.

⁶ To be chosen from an approved list of IE electives that carry graduate credit available in the ISE office, CEC 124

⁷ Must be approved by the Thesis Committee in accordance with current Master of Science requirements available in the ISE office, CEC 124.

Courses designated as Core I, II, III, IV, or V are part of the General Education curriculum. Students must complete a minimum of 40 hours of General Education courses, chosen from the approved list.

Approved Math Electives

Code	Title	Credit Hours
MATH 3113	Introduction to Ordinary Differential Equations	3
MATH 3333	Linear Algebra I	3
MATH 3413	Physical Mathematics I	3
MATH 4433	Introduction to Analysis I	3

Industrial and Systems Engineering, B.S./ Data Science and Analytics, M.S.

² Major support requirements that also satisfy University General Education requirements.

³ To be chosen from the University-Wide General Education Approved Course List. Three of these hours must be upper-division (3000-4000). See list in the Class Schedule.

⁴ Courses taken to fulfill the Natural Science requirement must be chosen from the University-Wide General Education Approved Course List (Core II). At least one of the Natural Science Courses must be a non-Physics course. All science courses must be for science or engineering majors and come from the natural science elective list maintained by the department.

⁵ Transfer students will need to meet the requirements of the first-year experience course as well as the engineering transfer course. Please see your advisor for your specific enrollment.

Free Electives

Electives to bring total applicable hours to the minimum total required for the degree including a minimum of 40 upper-division hours.

Suggested Semester Plan of Study

Bachelor of Science in Industrial and Systems Engineering accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org>, under the General Criteria and the Industrial Engineering and Similarly Named Engineering Programs Program Criteria.

In order to progress in your curriculum in the Gallogly College of Engineering, and as a specific graduation requirement, a grade of C or better is required in each course in the curriculum, including all prerequisite courses.

Admission to the accelerated program is by application and requires a minimum OU GPA and combined GPA of 3.0. Students may enter the accelerated program based on the undergraduate degree pattern offered in the year they first enrolled in the Oklahoma State System of

Higher Education or later. Students are eligible for graduate status upon graduation with the Bachelor of Science in Industrial Engineering.

Two college-level courses in a single world language are required; this may be satisfied by successful completion of 2 years in a single world language in high school. Students who must take language at the University will have an additional 6-10 hours of coursework.

Courses designated as Core I, II, III, IV or V are part of the General Education curriculum. Students must complete a minimum of 40 hours of General Education courses, chosen from the approved list.

² Engineering transfer students may take ENGR 3511 in place of ENGR 1411.

Graduate Requirements

13 hours of graduate level ISE courses that satisfy MBA requirements can be shared between BS and MBA degrees.

A student who actively and satisfactorily participates in all Prelude activities will receive a grade of 'S' for B AD 5010. A student who does not satisfactorily participate in 75% of Prelude Week will be required to participate in a make-up session within the first two weeks of the semester. Failure to complete a make-up session will result in a grade of 'U' for B AD 5010, resulting in cancellation of the student's enrollment in the MBA program.

ISE 4393	Capstone Design Project	3
ISE 5033	Systems Engineering ¹	3
or ISE 5813	Advanced Human Factors and Ergonomics	
Total Credit Hours		54

¹ These 9 credits are dual-counted, fulfilling requirements for both the undergraduate and graduate Industrial and Systems Engineering degrees.

Major Support Requirements

Code	Title	Credit Hours
Math and Science		
MATH 2924	Differential and Integral Calculus II	4
MATH 2934	Differential and Integral Calculus III	4
MATH 2513	Discrete Mathematical Structures	3
PHYS 2524	General Physics for Engineering and Science Majors	4
Additional College Requirements		
ENGR 1411	Pathways to Engineering Thinking ¹	1
C S 1323	Introduction to Computer Programming for Programmers	3
ENGR 2431	Electrical Circuits	1
ENGR 2461	Thermodynamics	1
ENGR 3441	Fluid Mechanics	1
CEES 2113	Statics	3
CEES 2153	Mechanics of Materials	3

C S 2334	Programming Structures and Abstractions	4
C S 2413	Data Structures	3
6 hours of C S Electives chosen from an approved list ²		6
Total Credit Hours		41

¹ Engineering transfer students may take ENGR 3511 in place of ENGR 1411.

² To be chosen from the C S Elective list available in the ISE office, CEC 116. C S 3203 and C S 4513 are recommended electives.

Graduate Requirements

Thesis Option

Code	Title	Credit Hours
Electives		
Choose 15 hours from a list maintained by the academic unit and approved by the graduate college (p. 1429) ¹		15
Thesis		
ISE 5980	Research for Master's Thesis	6
Total Credit Hours		21

¹ The thesis option requires 15 hours of electives, from a list maintained by the department and approved by the Graduate College. At least 6 hours must be in Industrial and Systems Engineering. Up to 9 hours may be non-ISE courses.

Non-Thesis Option

Code	Title	Credit Hours
Electives		
Choose 21 hours from a list maintained by the academic unit and approved by the graduate college (p. 1429) ¹		21
Total Credit Hours		21

¹ The non-thesis option requires 21 hours of electives from a list maintained by the department and approved by the Graduate College. At least 12 hours must be in Industrial and Systems Engineering. Up to 9 hours may be non-ISE courses.

- **NOTE: No more than 6 credit hours of 4000-level graduate courses may be applied to the degree. These courses must be outside ISE and approved for graduate credit. No 3000-level or lower courses may be applied to the degree.**

General Education and College Requirements

Courses designated as Core I, II, III, IV, or V are part of the General Education curriculum. Students must complete a minimum of 40 hours of General Education courses, chosen from the approved list, including at least one upper-division Gen. Ed. course outside of the student's major. **Courses graded P/NP will not apply.**

A grade of C or better is required in each course in the curriculum, including all prerequisite courses.

UNIVERSITY-WIDE GENERAL EDUCATION (MINIMUM 40 HOURS) AND COLLEGE REQUIREMENTS

Code	Title	Credit Hours
Core Area I: Symbolic and Oral Communication		
<i>English Composition</i>		
ENGL 1113	Principles of English Composition	3
ENGL 1213	Principles of English Composition	3
or EXPO 1213	Expository Writing	
<i>Language (0-10 hours in the same language)</i>		
This requirement can be met by two years of the same language in high school:		0-10
Beginning Course (0-5 hours)		
Beginning Course, continued (0-5 hours)		
<i>Mathematics</i>		
MATH 1914	Differential and Integral Calculus I (Core I)	4
	1,2	
Core Area II: Natural Science (including one laboratory)		
PHYS 2514	General Physics for Engineering and Science Majors (Core II) ²	4
CHEM 1315	General Chemistry (Core II-Lab) ²	5
or CHEM 1335	General Chemistry I: Signature Course

Choose one course ³		3
Core Area IV: Arts & Humanities		
<i>Artistic Forms</i>		
Choose one course ³		3
<i>Western Culture</i>		
HIST 1483	United States to 1865	3
or HIST 1493	United States, 1865 to the Present	
Choose one course (excluding HIST 1483 and HIST 1493) ³		3
<i>World Culture</i>		
Choose one course ³		3
Core Area V: First-Year Experience		
Choose one course ³		3
Total Credit Hours		40-50

¹ MATH 1823, MATH 2423, MATH 2433, and MATH 2443 sequence can be substituted for MATH 1914, MATH 2924, and MATH 2934.

² Major support requirements that also satisfy University General Education requirements.

³ To be chosen from the University-Wide General Education Approved Course List. Three of these hours must be upper-division (3000-4000). See list in the Class Schedule.

Free Electives

Electives to bring total applicable hours to the minimum total required for the degree including a minimum of 40 upper-division hours.

Suggested Semester Plan of Study

Bachelor of Science in Industrial and Systems Engineering accredited by the Engineering Accreditation Commission of ABET, <https://>

www.abet.org, under the General Criteria and the Industrial Engineering and Similarly Named Engineering Programs Program Criteria.

In order to progress in your curriculum in the Gallogly College of Engineering, and as a specific graduation requirement, a grade of C or better is required in each course in the curriculum, including all prerequisite courses.

Two college-level courses in a single world language are required; this may be satisfied by successful completion of 2 years in a single world language in high school. Students who must take language at the University will have an additional 6-10 hours of coursework.

Admission to the accelerated program is by application and requires a minimum OU GPA and combined GPA of 3.25. Students may enter the accelerated program based on the undergraduate degree pattern offered in the year they first enrolled in the Oklahoma State System of Higher Education or later.

Students are eligible for graduate status upon graduation with the Bachelor of Science in Industrial Engineering.

General Requirements for all Master's Degrees

The master's degree requires the equivalent of *at least* two semesters of satisfactory graduate work and additional work as may be prescribed for the degree.

All coursework applied to the master's degree must carry graduate credit.

Master's degree programs which require a thesis consist of *at least* 30 credit hours. All non-thesis master's degree programs require *at least* 30 credit hours.

Credit transferred from other institutions must meet specific criteria and is subject to certain limitations.

Courses completed through correspondence study may *not* be applied to the master's degree.

To qualify for a graduate degree, students must achieve an overall grade point average of 3.0 or higher in the degree program coursework and in all resident graduate coursework attempted. A student must also have at least a 3.0 in all coursework (including undergraduate coursework if any).

Additional information for master's degree students may be found in the Graduate College Bulletin.

DSA 5011	Introduction to R	1
DSA 5013	Fundamentals of Engineering Statistical Analysis	3
DSA 5021	Data Analytics Applied to Meteorology Data	1
DSA 5031	Econometrics for DSA	1
DSA 5041	Advanced R	1
DSA 5051	Data Visualization	1
DSA 5061	Python for Data Science and Analytics	1
DSA 5103	Intelligent Data Analytics	3
DSA 5113	Advanced Analytics and Metaheuristics	3
DSA 5133	Energy Analytics	3
DSA 5203	Time Series Analysis	3
DSA 5303	Financial Engineering Analytics	3
DSA 5403	Bayesian Statistics	3
DSA 5703	Machine Learning Practice	3
Other graduate electives can be allowed with the graduate liaison and advisor's prior approval.		

Industrial and Systems Engineering, Ph.D.

Minimum Total Hours: 90

Program Code: D526

Program Requirements

Code	Title	Credit Hours
Statistics		
Choose one of the following courses:		3
ISE 5013	Fundamentals of Engineering Statistical Analysis	
ISE 5553	Data-Driven Decision Making I	
ISE 5853	Data-Driven Decision Making II	
ISE 5103	Intelligent Data Analytics	
Modeling		
ISE 5023	Systems Optimization	3
or ISE 5663	Systems Analysis Using Simulation	
Systems Engineering		
ISE 5033	Systems Engineering	3
or ISE 5813	Advanced Human Factors and Ergonomics	
Additional Requirements		
Elective Coursework (at least 9 hours as approved by the advisory conference committee and graduate committee)		9
Additional Coursework		30-44
Dissertation Research		
ISE 6980	Research for Doctoral Dissertation (minimum 28 hours)	28-42
Total Credit Hours		90

Notes:

At least 12 credit hours of coursework must be taken in Industrial and Systems Engineering at the 5000-level or above.

At least 3 credit hours must be 6000-level courses in Industrial and Systems Engineering. This can include ISE 6990 Special Studies when approved by the Advisory Conference Committee.

The program requires between 18 and 30 hours of coursework beyond the M.S. Transferable hours are limited to 44.

General Requirements for Doctoral Degrees

A student should expect to spend at least the equivalent of three full academic years beyond the bachelor's degree to obtain the doctoral degree. During this period the student will take appropriate graduate coursework, successfully complete the general examination, and successfully defend and submit the final dissertation.

All coursework applied to the doctoral degree must carry graduate credit.

The doctoral degree requires at least 90 post-baccalaureate hours, including both formal coursework and hours of research.

The minimum hour requirement for a specific doctoral degree program cannot be waived.

No more than one-half of the credit hours, both OU and overall, excluding Research for Doctoral Dissertation (6980), may be *S/U*-graded coursework.

The student must be in residence at OU for at least two consecutive 16-week semesters during the pursuit of the doctoral degree while enrolled and engaged in coursework or research activities as prescribed by the major academic unit.

For more detailed regulations and requirements for Doctoral degrees, please consult the Graduate College Bulletin: <http://www.ou.edu/gradcollege/forms/bulletin>

WEITZENHOFFER FAMILY COLLEGE OF FINE ARTS

122 Fred Jones Art Center
540 Parrington Oval
Norman, OK 73019-3021

Administrative Officers

Mary Margaret Holt, M.F.A., Dean, John W. and Mary D. Nichols Chair,
Regents and Presidential Professor of Dance
Michael Bearden, Director, School of Dance
Brian Britt, M.M., Associate Dean and Associate Professor of Music
Ashton Byrum, M.F.A., Director, A. Max Weitzenhoffer School of Musical
Theatre
Alison Fields, Ph.D., Acting Director, OU School of Visual Arts
Pete Froslic, M.F.A., Interim Associate Dean and Professor of Art
Harold Mortimer, D.M.A., Associate Dean and Associate Professor of
Musical Theatre
Jonathan Nichol, Ph.D., Director, School of Music
Stan Renard, Ph.D., Associate Dean and Coordinator of Arts Management
& Entrepreneurship Programs
Yuanting Zhao, Director, Peggy Dow Helmerich School of Drama

General Information

The College of Fine Arts includes the Schools of Dance, Music, the Peggy Dow Helmerich School of Drama, the A. Max Weitzenhoffer School of Musical Theatre, and the OU School of Visual Arts. Each unit offers degree programs at the undergraduate level. In addition, the schools of Dance, Music and Visual Arts offer graduate degree programs.

History/Mission

The Weitzenhoffer Family College of Fine Arts, originally organized as the School of Fine Arts in 1903, was the fourth college to be founded at The University of Oklahoma. Today, the college includes the Schools of Dance, Music, the Peggy Dow Helmerich School of Drama, the A. Max Weitzenhoffer School of Musical Theatre, and the OU School of Visual Arts, and is the largest and most comprehensive fine arts program in the state of Oklahoma. The program has an annual enrollment of approximately 1,000 fine arts majors and a full-time faculty of more

than 100 nationally and internationally recognized educators, artists, performers, scholars, and technicians. More than 400 performances and exhibitions are presented within the college each academic year.

The Weitzenhoffer Family College of Fine Arts, an integral part of the University of Oklahoma, recognizes the universal language of the arts and its crucial role in creating and sustaining a vibrant, culturally diverse environment. The College is committed to a standard of excellence in the fine arts encompassing the University's mandate for teaching, research/creative activity, and service. The faculty, staff, and students are dedicated to the promotion of the arts within the state of Oklahoma, the nation, and the international community.

Optional Opportunities

Minors

The college offers the following minors; Art, Art History, Dance History, Theatre, Music, Instrumental Jazz, Commercial Music, and Arts Management & Entrepreneurship. Any student wishing to declare a minor should do so in the Fine Arts Dean's Office, 122 Fred Jones Center. Requirements for a minor must be completed prior to graduation.

Students must audition and be accepted as a Music Minor or Jazz Minor before it may be declared. Acceptance in any given studio area is on a space available basis.

Undergraduate Certificate

The School of Visual Arts offers an undergraduate certificate in Museum Studies.

Honors Degrees

All of the bachelor's degree programs offered by the Weitzenhoffer Family College of Fine Arts are available to qualified students as honors degree programs. Students may graduate with Latin Honorifics (cum Laude, Magna cum Laude, Summa cum Laude) if they successfully meet the GPA requirements in addition to their regular degree program requirements. Please refer to the Honors College (p. 1617) section of this catalog for specific information regarding research opportunities and admission into the Honors College for a special notation on your final transcript.

Concurrent/Second Degrees

Students may work toward the completion of more than one degree.

If a student has graduated and is coming back for a second degree:

- A student who has a bachelor's degree from OU or another accredited institution satisfies all general education requirements, except possibly P SC 1113 and HIST 1483 or HIST 1493. The Oklahoma State Regents for Higher Education policy requires that all students graduating with a bachelor's degree from an Oklahoma state institution must complete U.S. Government (P SC 1113) and U.S. History (HIST 1483 or HIST 1493).
- The student must choose a degree different from that of the prior degree(s).
- The student must have at least 30 credit hours in residence at OU and in the Weitzenhoffer Family College of Fine Arts.
- The student must meet all University and college residency requirements.
- The student must complete all of the published requirements for the second degree.

- They must complete a minimum of 30 hours for the second degree after graduating with the first degree. The 30 hours must be in addition to the total number of hours completed by the student for the first degree.
- At least 15 hours of the 30 must be completed at the 3000-4000 level.
- The student must complete an Application for Graduation.
- The student will receive a diploma for the second degree and have it noted on the transcript.

If a student is pursuing concurrent degrees:

- The student must choose a degree different from that of the other degree(s).
- The student must complete all of the published requirements for both degrees.
- They must have at least 30 credit hours in residence at OU and in the Weitzenhoffer Family College of Fine Arts.
- The student must complete at least 30 hours for the second degree that are not used for the first degree. Academic Advisors in each college will verify what is counting toward each degree.
- At least 15 hours of the 30 must be completed at the 3000-4000 level.
- The student must complete a minimum of 150 hours – 55 hours (40+15) of upper-division course work between the two degrees, 64 hours [40+24] if one of the degrees is in the College of Arts and Sciences.
- The student must be cleared for graduation for both degrees in the same semester.
- The student must file an Application for Graduation for both degrees. The student will receive two diplomas.
- Once a student has been cleared with an undergraduate degree, the rules for a second degree go into effect, even though the student never actually left the University.

Double Major Policy

In the School of Music, students may work toward the completion of more than one major. All requirements for each major must be completed including a second capstone. If there are fewer than 30 additional hours, the student will be awarded one diploma for the first major listed, but the transcript will indicate both majors. Residency requirements must also be fulfilled.

Double majors will not be granted in the OU Schools of Visual Arts, Dance, Drama and Musical Theatre.

Programs Offered

Upon satisfactory completion of the prescribed studies, the candidate will be recommended for the degree of

- College of Fine Arts Administrated Programs (p. 1440)
 - Arts Management and Entrepreneurship for Fine Arts Majors, Minor (p. 1440)
 - Arts Management and Entrepreneurship for Non-Fine Arts Majors, Minor (p. 1441)
 - Arts Management (Online), M.A. (p. 1441)
 - Arts Management Department List (p. 1441)
 - Arts Management and Entrepreneurship, Graduate Certificate (p. 1442)
 - Arts Management and Entrepreneurship Elective Lists (p. 1442)

- School of Dance (p. 1443)
 - Ballet Pedagogy, B.F.A. (p. 1447)
 - Ballet Performance, B.F.A. (p. 1450)
 - Modern Dance Performance, B.F.A. (p. 1452)
 - Dance History, Minor (p. 1454)
 - Dance, M.F.A. in Dance (p. 1455)
- Peggy Dow Helmerich School of Drama (p. 1455)
 - Theatre: Acting Emphasis, B.F.A. (p. 1463)
 - Theatre: Costume Design Emphasis, B.F.A. (p. 1465)
 - Theatre: Dramaturgy Emphasis, B.F.A. (p. 1468)
 - Dramaturgy Departmental Course Lists (p. 1470)
 - Theatre: Lighting Design Emphasis, B.F.A. (p. 1471)
 - Theatre: Scenic Design Emphasis, B.F.A. (p. 1473)
 - Theatre: Sound Design Emphasis, B.F.A. (p. 1475)
 - Theatre: Stage Management Emphasis, B.F.A. (p. 1478)
 - Theatre, Minor (p. 1480)
 - Drama, M.A. (p. 1480)
- School of Music (p. 1481)
 - Music: Instrumental Jazz, B.A. (p. 1514)
 - Music, B.A. (p. 1517)
 - Composition, B.Mus. (p. 1519)
 - Organ, B.Mus. (p. 1522)
 - Piano, B.Mus. (p. 1524)
 - Piano Pedagogy, B.Mus. (p. 1526)
 - Voice, B.Mus. (p. 1529)
 - W/P/S:Brass & Percussion, B.Mus. (p. 1531)
 - W/P/S:Harp, B.Mus. (p. 1534)
 - W/P/S:Strings & Guitar, B.Mus. (p. 1536)
 - W/P/S:Woodwinds, B.Mus. (p. 1539)
 - Music, B.M.A. (p. 1541)
 - Instrumental Music Education, B.M.Ed. (p. 1544)
 - Vocal Music Education, B.M.Ed. (p. 1547)
 - Commercial Music, Minor (p. 1551)
 - Instrumental Jazz, Minor (p. 1551)
 - Music, Minor (p. 1552)
 - Choral Conducting, M.M. (p. 1552)
 - Instrumental Conducting, M.M. (p. 1553)
 - Music Composition, M.M. (p. 1553)
 - Music Theory, M.M. (p. 1554)
 - Music Theory Course List (p. 1555)
 - Musicology, M.M. (p. 1555)
 - Organ: Standard, M.M. (p. 1555)
 - Organ: Church Music, M.M. (p. 1556)
 - Organ: Technology, M.M. (p. 1556)
 - Piano: Performance, M.M. (p. 1557)
 - Piano: Performance and Pedagogy, M.M. (p. 1558)
 - Voice: Opera, M.M. (p. 1558)
 - Voice: Performance, M.M. (p. 1559)
 - Wind, Percussion, String, M.M. (p. 1560)
 - Conducting, M.M.Ed. (p. 1560)
 - General Music Education, M.M.Ed. (p. 1561)
 - Instrumental, M.M.Ed. (p. 1563)
 - Piano Pedagogy, M.M.Ed. (p. 1563)

- Conducting, D.M.A. (p. 1564)
- Music Composition, D.M.A. (p. 1565)
- Piano, D.M.A. (p. 1566)
- Organ, D.M.A. (p. 1567)
- Voice, D.M.A. (p. 1568)
- Wind, Percussion, String, D.M.A. (p. 1569)
- Music Education, Ph.D. (p. 1569)
- A. Max Weitzenhoffer School of Musical Theatre (p. 1571)
 - Musical Theatre Performance, B.F.A. (p. 1575)
- OU School of Visual Arts (p. 1577)
 - Art, B.A. (p. 1597)
 - Art History, B.A. (p. 1599)
 - Art, Technology & Culture, B.F.A. (p. 1601)
 - Studio Arts, B.F.A. (p. 1603)
 - Visual Communication, B.F.A. (p. 1604)
 - Art, Minor (p. 1606)
 - Art History, Minor (p. 1607)
 - Museum Studies, Undergraduate Certificate (p. 1607)
 - Art History, M.A. (p. 1607)
 - Art and Technology, M.A. (p. 1608)
 - Art, M.F.A. in Art (p. 1608)
 - Art History: Art of the American West, Ph.D. (p. 1609)
 - Art History: European Art, Ph.D. (p. 1610)
 - Art History: Native American Art, Ph.D. (p. 1610)
 - Critical Issues in Art History, Ph.D. (p. 1611)

Special Facilities

Facilities at the OU School of Visual Arts include classrooms, large well-equipped instructional studios, darkrooms, a technology-based fabrication lab, installation spaces, video and film editing rooms, digital photography labs, and the Lightwell Gallery exhibition space. Separate from the Fred Jones Jr. Art Center, a 5,000 sq. ft. ceramics facility is located on the University's south campus near the Lloyd Noble Arena and features state-of-the-art equipment and kilns to handle all types of ceramic production. A 12,000 sq. ft. graduate studio facility is located northwest of campus. Media and library resources include a slide/media library containing over 150,000 slides; University of Oklahoma Bizzell Library, is the largest research library in the state of Oklahoma containing almost 4 million volumes; and the Fine Arts Library houses books and periodicals on art, art history and design as well as on music, dance, drama and musical theatre. The Charles M. Russell Center for the Study of Art of the American West provides an extensive library on western art and a unique opportunity to study with authorities in the field.

The Fred Jones Jr. Museum of Art, adjacent to the OU School of Visual Arts, is one of the finest university art museums in America. Each year the museum sponsors a variety of speakers and numerous exhibitions. The Mary and Howard Lester wing of the museum permanently houses the "Weitzenhoffer Collection of French Impressionism." The wing also includes galleries for other selections from the Museum's permanent collection, an auditorium, an orientation room, and classrooms.

The Donald W. Reynolds Performing Arts Center, formerly known as Holmberg Hall, includes a 700-seat performance hall featuring a domed ceiling, modern acoustical features and a stage tower. An 18,000-square-foot facility on the west side of Holmberg Hall for the School of Dance

includes state-of-the-art dance studios, a Pilates studio, warm-up areas, offices, and a gallery/reception area.

The Fine Arts Center provides the perfect setting for collaborative efforts in production and theatrical training. In addition to the 600-seat Elsie C. Brackett Theatre and the 250-seat Weitzenhoffer Theatre, the center contains two fully equipped dance studios and one practice studio. Classrooms, make-up room, scene and costume studios, and dressing rooms used by drama, dance, and musical theatre comprise a facility in which our students can work and learn to their fullest potential.

The School of Music is housed in three buildings: Stanley B. Catlett, Sr. Music Center, Holmberg Hall, and Carpenter Hall. The Catlett Music Center contains administrative offices, faculty offices and studios, rehearsal suites, classrooms, MIDI labs, the Grant Fine Arts Library, a recording studio, and three performance halls, including the Paul F. Sharp Concert Hall, Morris R. Pitman Recital Hall, and Grayce B. Kerr Gothic Hall (for organ and other performances). Holmberg Hall houses faculty offices and the Auditorium, a theatrical stage used by the OU Opera Theater for its productions. Studios for the voice, piano, and musical theatre faculty members are currently located in Carpenter Hall.

Undergraduate Study Student Responsibilities

Academic Advising Staff

Elizabeth Nunley, M.S., Director of Academic Advising
Shuang Liang, M.A., Academic Advisor

Carmen Marcom, Academic Advisor

Nicholas Bartell, Academic Advisor

Academic advisors are available to assist students in planning their programs of study; however, *it is the responsibility of the individual student to make informed decisions to ensure academic success and timely graduation.* Therefore, it is critical that students know and understand the following:

- Their academic standing based on the retention standards of the Weitzenhoffer Family College of Fine Arts;
- The degree requirements checksheets (p. 1431) as published by the Office of Academic Publications;
- Keep apprised of their degree completion progress via Degree Navigator;
- Academic deadlines, as listed on the University academic calendar;
- All rules and regulations that govern enrollment and graduation;
- University policies and procedures;
- When and where to go for assistance and to make use of the many resources provided by the University;
- Accept their course invitation and access important information via *Artifacts* at canvas.ou.edu.
- Students who have questions regarding policies, procedures, or resources should contact one of the academic advisors.

Admission and Retention

Freshman

The freshman year at the University of Oklahoma is spent in University College, which is not a degree-recommending college. Students must be formally accepted into a degree program before they may declare a fine arts major. Refer to audition and/or portfolio information below. Transfer

to the Weitzenhoffer Family College of Fine Arts from University College is automatic once the following conditions have been met:

- a declared Fine Arts major;
- 24 combined retention hours earned (excluding any remedial credit hours), and
- OU and Combined Retention of GPAs of 2.50; 2.75 for Bachelor of Music Education majors.

Audition and Portfolio

All dance, drama, music and musical theatre majors *must* audition and be officially accepted into a degree program before being allowed to enroll in classes. Drama majors who have taken previous acting classes at another institution and who wish to be placed in an acting class beyond the freshman level, must audition for placement.

Readmission Policy

A fine arts major who has not been enrolled in the college for two consecutive semesters (excluding summer) or more, must reapply to the school of their major for readmission. This reapplication must include an audition or portfolio/scholarly materials review and submission of support materials as applicable. The student must check with the appropriate school for additional information and requirements pertinent to the readmission process. The student must also apply for readmission to the University through OU Admissions.

Retention

Students are admissible to the Weitzenhoffer Family College of Fine Arts *in good standing* once they have completed 24 hours (excluding any remedial credit hours), have a minimum 2.50 GPA, 2.75 for Bachelor of Music Education majors (includes both OU retention and combined retention), and have declared a fine arts major. Students must earn a grade of C or better in each course in the school of their major. Musical Theatre majors must earn a grade of C or better in all courses taken within the College of Fine Arts.

Academic Performance/Probation

In order to be in good academic standing in the Weitzenhoffer Family College of Fine Arts, students must maintain a minimum 2.50 GPA, 2.75 for Bachelor of Music Education majors (includes both OU retention and combined retention). Students who do not meet the minimum GPA criteria required by the college will be placed on probation. These students are required to complete an Academic Performance/Probation Contract with the Director of Academic Advising in the Weitzenhoffer Family College of Fine Arts Dean's Office. The Academic Performance Contract is designed to be student-specific, dependent upon each student's individual circumstances.

Students who do not fulfill the requirements of their Academic Performance Contract will be dismissed from the Weitzenhoffer Family College of Fine Arts.

Enrollment Restriction Policy for Probationary Students

Probationary students will be restricted to a maximum of 12 hours per semester. Exceptions will be made only at the discretion of the Dean or the Director of Academic Advising.

Performance Restriction Policy for Probationary Students

Probationary students may not be cast in productions or enroll in/perform Junior or Senior recitals until they have returned to good academic standing.

Dismissal

Students who have been dismissed from the Weitzenhoffer Family College of Fine Arts will have an enrollment stop placed on their records by the college and are not allowed to enroll in fine arts courses designed and/or designated for majors only. Any advance enrollment will be canceled. To continue at the University of Oklahoma, the student must make an appointment and meet with an advisor in the Academic Advising Resource Center. Students who have been dismissed from the college twice are unlikely to be readmitted to the college.

Review Process if Ineligible for Admission or Retention

The review process is: (a) written petition to the dean; (b) letters of support from the director/faculty of the school or department; and (c) dean accepts or rejects petition. There is no further appeal except to the Provost.

Transfer Students

Transfer students admitted to the Weitzenhoffer Family College of Fine Arts may pick up a copy of their Transfer Credit Evaluation Document from their academic advisor. Faculty will review transfer coursework in the student's major and determine how those transfer credits will apply toward a baccalaureate degree from the college. *A Course Substitution Form must be completed for all unequated fine arts major specific transfer courses.* The academic advisor in the Dean's office is responsible for informing students of transferability of unequated General Education core requirements. The University's General Education Transfer Course Evaluation Form will be completed by the academic advisor for unequated transfer courses as appropriate.

- In the event that a lower-division transfer course is used as a substitution for an upper-division requirement at the University, a student may be required to complete additional upper-division hours for graduation.
- A minimum of 60 semester hours must be earned at an accredited (4-year) institution for a baccalaureate degree.

For further regulations regarding transfer students, refer to the opening pages of this catalog as well as in subsequent sections for the College of Fine Arts.

Enrollment and Grade Information

Academic Course Load

Students may enroll in a maximum of 19 credit hours of work in one semester. The minimum requirement for full-time status is 12 hours. To enroll in more than 19 hours, permission must be obtained from the academic advisor in the Dean's office or School of Music Academic Advisor, depending on the student's major. Students must have a minimum combined GPA of 3.0 in order to receive overload permission. The Overload Petition form is available on the college website under Resources/Student Resources/Forms.

Advisement

Students registered in the Weitzenhoffer Family College of Fine Arts must be advised by their academic advisor prior to each enrollment. An Academic Advisement Form is completed and signed by the advisor during the conference. The advisor then removes the student's advising hold in the enrollment system. Once the advising hold has been removed and all enrollment stops have been cleared, students may finalize their enrollment schedule in the online system. Students will schedule their advising appointment via iadvise.ou.edu.

Fine Arts Orientation

Undergraduate fine arts students are required to complete an online orientation session after they have earned 24 hours and are in their first semester in the College of Fine Arts. The session covers college policies and procedures, the advisement and enrollment process within the college and graduation issues. Instructions for completing the college online orientation are sent to students via OU email.

Math Policy

The Weitzenhoffer Family College of Fine Arts requires all declared fine arts students complete their college level math course within the first four semesters of enrollment at OU. Transfer students or newly declared fine arts majors who have not completed their college level math requirement will have two semesters in which to complete the requirement. Students who fail to meet this requirement will be restricted from upper-division fine arts courses except by permission of their Director and the Dean.

Completion of this requirement is tracked by the Fine Arts Dean's office. Students will receive a notification via OU email one semester prior to their deadline for fulfilling this requirement. Some schools within the college include this policy as part of their scholarship stipulations.

Change of Major

Students wishing to change their major must contact the academic advisor for the new major. Prior to completing a change of major request in the College of Fine Arts, the student must meet the admissions criteria as outlined in the admission and retention section.

Students wishing to change to a major in another college must meet the admission requirements and be accepted by that college before the major can be changed. The new college will complete the change of major/college request.

Grade Information

A student must have a grade of C or higher in each course in their major. Each hour of A, B, C and D carries a grade point value as follows: A = 4, B = 3, C = 2, and D = 1. Grades of I, F and U as well as grades P and S carry no grade point value. They are not figured in the computation of a student's grade point average except for grades of F.

Fine Arts students are required to make a C or better in all courses taken within their respective schools. When a course has been repeated and the second grade was lower than the first, the higher grade will be used toward fulfilling graduation requirements. For additional information on the impact of repeat coursework on the student's GPA, the student should consult with their academic advisor.

Dean's Honor Roll

The Weitzenhoffer Family College of Fine Arts Honor Roll is compiled at the close of each fall and spring semester. It includes students who have completed at least 12 grade point hours and have earned an average GPA of 3.50 or higher for the semester.

Pass/No Pass Option

Students in the Weitzenhoffer Family College of Fine Arts may present, for graduation, a maximum of 16 elective hours completed under the pass/no pass option. Courses completed under the pass/no pass option may not be used to fulfill the University-Wide General Education requirements, major requirements, or major support requirements.

Advanced Standing

Students who feel they have a sufficient knowledge of the subject matter of a course offered by the University may take an advanced standing examination for undergraduate credit in the course. Please reference the Admissions section of this catalog for further information on the regulations governing advanced standing credit. Students who have received a grade other than a W in any course, may not subsequently take the same course by advanced standing.

Self-Paced Courses (Correspondence)

University of Oklahoma regulations pertaining to the acceptance of self-paced courses (correspondence) from other institutions must be met before such work may be applied toward the degree. The candidate for a degree must meet the college residence requirement. Regulations and specific criteria pertaining to students in the Weitzenhoffer Family College of Fine Arts are as follows:

- Students may enroll in self-paced (correspondence) courses any time by contacting the College of Professional and Continuing Studies.
- A student may enroll in a maximum of six hours of self-paced courses at one time.
- If students are concurrently enrolled in self-paced courses and in-residence credit, the total number of hours for one semester may not exceed the recommended maximum shown under Academic Course Load.
- A student must be in good academic standing in order to receive permission to enroll in self-paced courses.
- A student must secure written permission from the academic advisor in the Dean's office on the self-paced course application form.
- Music Education majors may not enroll in EDSP 3053 as a self-paced course.
- Undergraduate students within their last 30 hours are prohibited from enrolling in self-paced courses to satisfy degree requirements.

Forgiveness Policy

The Forgiveness Policy instituted by the Oklahoma State Regents for Higher Education and the University of Oklahoma, consists of three components: the repeat policy, the reprieve policy and the academic renewal policy. Please reference the Admissions information in the front of this catalog for further information on these policies. Questions concerning this policy should be directed to one of the academic advisors.

Music Education Teacher Certification

Students pursuing the Bachelor of Music Education degree in either vocal music education or instrumental music education must be admitted to the Teacher Preparation Program in the College of Education prior to enrollment in the required course sequence.

- Students should apply to the Teacher Preparation Program at the end of the sophomore year.
- Students complete and submit an Admission to the Teacher Preparation Program form to the Fine Arts Dean's office.
- To be eligible for admission, students must complete a minimum of 24 hours of general education coursework with a 2.75 GPA from the University approved list with C or better grades in the following areas: ENGL 1113, ENGL 1213 or EXPO 1213, Natural Science without lab; Natural Science with lab; Math; P SC 1113; ANTH 1113/PSY 1113/SOC 1113; HIST 1483 or HIST 1493; Humanities.

- Students must also meet one of the six performance criteria noted below:
 - Minimum 3.00 GPA in all general education courses, a minimum of 30 hours.
 - 22 or higher on the ACT, including the writing portion.
 - 1120 or higher on the SAT, including the essay portion with no less than a 5 on Reading, a 4 on Analysis, and a 5 on Writing.
 - Score at or above the level designated by the State Regents for math, reading, and writing on the Praxis.
 - Possess a bachelor's degree from an institution accredited by an organization recognized by the U.S. Department of Education and approved by the Oklahoma State Regents for Higher Education.
 - Pass the Oklahoma General Education Test, OGET. Test results must be turned in with their admission form.
- Meet with Music Education faculty to complete additional forms as required (subject to change by University and State Regents).

Students must have a minimum 2.75 OU retention and combined retention GPAs in order to be admitted to the Teacher Preparation Program coursework, to graduate and to be certified. Students with a GPA between 2.50 and 2.74 may petition the MUED faculty for an exemption to begin their Teacher Preparation coursework, but will be placed on Academic Probation by the College of Fine Arts until such time as their GPA is raised to the required 2.75 for graduation. Exemptions cannot be granted for students with less than a 2.50 GPA in their OU retention and combined retention GPAs. GPA exemptions approved by the MUED faculty does not guarantee admission to the Teacher Preparation Program in the College of Education.

Academic Appeals

For information and procedures on academic appeals, please refer to the section on Academic Appeals Boards in the Admissions section of this catalog. You may also refer to the Academic Integrity Office, <https://www.ou.edu/integrity/students>. The College of Fine Arts Academic Appeals Petition form with guidelines and instructions is available on the college website under Resources/Student Resources/Forms.

Petitions

Any departure by a student from the curriculum requirements and scholastic rules must be approved by the School and College via a petition and must not conflict with existing University regulations. Petitions should be submitted in a timely manner since time restrictions can preclude their consideration.

Petition forms in the Weitzenhoffer Family College of Fine Arts are available in the dean's office and on the college website under Resources/Student Resources/Forms. The *general petition* form may be used for requesting:

- exceptions to graduation/degree requirements;
- extensions of Incomplete grades;
- waiver of the residency policy; and
- waiver of the ten-year limitation policy.

In addition, petitions are available to *Add a Course after the Deadline*, *Drop a Course after the Deadline*, and a *Petition for Enrollment Overload* (refer to information under Academic Course Load).

Graduation Requirements

The responsibility for meeting all graduation requirements lies with the student.

The following requirements must be met in order to graduate with a bachelor's degree from the Weitzenhoffer Family College of Fine Arts:

- Student must have an OU retention and combined retention grade point average of 2.50 or higher. Bachelor of Music Education majors must have an OU retention and combined retention grade point average of 2.75 or higher.
- Student must successfully complete the minimum semester hours required for the degree inclusive of general education, major course work, and electives.
- Student must earn a C or better in each course in their major.
- Student must complete a minimum of 40 hours of upper-division coursework (3000-4000).
- Student must complete a minimum of 40 hours of general education requirements as outlined by the college and the University.
- Student must complete a minimum of 40 hours of liberal arts coursework (80 hours for Bachelor of Arts degrees) as outlined by the Oklahoma State Regents for Higher Education for undergraduate degrees.
- Student must complete a minimum of 60 hours at accredited senior (4-year) institutions.
- Student must complete one general education course at the upper-division level (3000-4000) outside the student's major.
- All college specific and University residency rules must be met.
- Student must be listed as a Weitzenhoffer Family College of Fine Arts student at the time of graduation.
- Student must complete a senior graduation check with one of the academic advisors in their next to last semester.

General Education Requirements

Students are required to satisfy the University-wide General Education course requirements as outlined in the General Information section of this catalog. *Courses used to satisfy these requirements should be chosen from the University-wide General Education Approved Courses.* Always use the Search feature on the enrollment program to find current general education course options when enrolling each semester.

- The University requires a minimum of 40 hours of General Education coursework.
- Students must take at least one upper-division (3-4000 level) General Education approved course outside the student's major.

Some Weitzenhoffer Family College of Fine Arts degrees require specific general education courses be completed for certain core areas. Please refer to the appropriate degree sheet.

Residence Requirements

Residency is defined as coursework taken through any University of Oklahoma campus excluding correspondence courses.

- Candidates for an undergraduate degree must complete a minimum of 30 hours in residence at the University of Oklahoma and in the Weitzenhoffer Family College of Fine Arts.
- At least 24 hours of upper-division major credit applied toward the degree must be earned in residence as a declared Dance, Music,

Musical Theatre, Drama or BA in Art or Art History major, with the exception of –

- A minimum of 15 hours of upper-division major credit must be earned in residence if a declared Bachelor of Arts in Music major.
- A minimum of 30 hours of upper-division major credit applied toward the degree must be earned in residence as a declared BFA in Art or BFA in Visual Communication major.
- A student must be listed as a Weitzenhoffer Family College of Fine Arts student at the time of graduation.
- Capstone courses must be taken in residence.

Ten-Year Limitation Rules

The following rules must be met.

- Please refer to the Weitzenhoffer Family College of Fine Arts Readmission Policy.
- A student in the Weitzenhoffer Family College of Fine Arts may elect to graduate under the degree plan in effect at the time of their first enrollment in the state system provided they complete the work for a degree within a maximum of 10 calendar years from the time of their first enrollment in the state system. If the work for a degree covers a period longer than 10 years, the college, in consultation with the student, will determine the degree plan to be in effect for that student's graduation.
- Students returning to college whose coursework is more than 10 years old, will follow the policy outlined below in addition to the Readmission policy:
 - Decisions will be made on a case by case basis at the discretion of the individual Schools.
 - Students will not be allowed to complete degree plans that have been deleted (refers to a deletion formally approved by the State Regents).
 - Students who wish to use coursework in the area of their specialization that is older than 10 years, must petition the School of their major for validation of those courses on a course by course basis after they have been readmitted to a degree plan.
 - Students must petition the School of their major to follow an expired degree plan (refers to a degree plan of a particular year that is more than 10 years old).
 - Students who have 20 hours or less remaining under an expired degree plan will receive consideration in being allowed to complete said plan (includes old GPA requirements).
 - Students who have more than 20 hours to complete under an expired degree plan, normally must follow the current year's degree plan and GPA requirements.

School of Dance

- Students wishing to be readmitted to the School of Dance after a 10-year period must audition and be reaccepted.
- If accepted, the audition committee will determine the degree plan the student is to follow (ballet performance or pedagogy, or modern dance performance), as well as the technical level of their courses.
- General college policy rules apply beyond this point.

Peggy Dow Helmerich School of Drama

- Students wishing to be readmitted to the School of Drama after a 10-year period must audition or present a portfolio/scholarly materials for review, as appropriate to their major area.

- At the audition or portfolio review a decision on whether to accept the student will be made. Following acceptance, appropriate course placement within the curriculum will be determined as well as the emphasis/track the student is to follow.
- General college policy rules apply beyond this point.

School of Music

- Students wishing to be readmitted to the School of Music after a 10-year period must audition and be accepted.
- If accepted, the audition committee will determine the degree plan the student is to follow (BA, BMA, BME, BM), and the level of their applied lessons.
- General college policy rules apply beyond this point.

A. Max Weitzenhoffer School of Musical Theatre

- Students wishing to be readmitted to the School of Musical Theatre after a 10-year period must audition and be accepted.
- If accepted, appropriate course placement within the curriculum will be determined.
- General college policy rules apply beyond this point.

OU School of Visual Arts

- Students wishing to be readmitted to the OU School of Visual Arts after a 10-year period must schedule a portfolio review.
- At the portfolio review a decision on whether to accept the student will be made. Following acceptance, a decision will be made as to which area of specialization the student is admitted, as well as appropriate course placement within the curriculum.
- General college policy rules apply beyond this point.

Graduate Study

Refer to the Graduate tabs within the pages of this catalog for information concerning graduate work.

- College of Fine Arts Administrated Programs (p. 1440)
- School of Dance (p. 1443)
- Peggy Dow Helmerich School of Drama (p. 1455)
- School of Music (p. 1481)
- School of Visual Arts (p. 1577)

Scholarship Information

Students who are majors in the Weitzenhoffer Family College of Fine Arts are encouraged to apply for scholarship support. A number of scholarships and awards are available to qualified students each academic year. Applications for scholarships and awards are available through one.ou.edu to students each spring semester and are awarded for the next academic year. The individual Schools within the Weitzenhoffer Family College of Fine Arts award scholarships based on specific criteria regarding a student's major, talent, merit or need. Initial scholarship considerations and offers are made following admission auditions in the spring. On occasion, the Dean's office grants minimal scholarships to students who have exhausted all other financial resources. Scholarships awarded by the dean are based on merit, special financial need, and unusual circumstances. Additional non-departmental scholarships and financial aid are available through the University of Oklahoma Office of Financial Aid Services through one.ou.edu. The scholarship application deadline for incoming freshmen and transfer

students begins in early December. The deadline for current students is early February. Visit scholarships.ou.edu for complete details.

Courses

AMGT 2013 Marketing in the Arts 3 Credit Hours

Any entrepreneurial or organizational role in the professional arts industry calls for an understanding of negotiation (advocating for an outcome with multiple parties) and marketing (advocating for one's mission, service, or product). This course explores the basics of negotiations and marketing. There is a particular emphasis on social media and engagement. (Irreg.)

AMGT 3013 Fundraising for the Arts 3 Credit Hours

Prerequisite: Junior standing. An exploration of approaches to the development of capital for projects, whether for artists to arts organizations, including techniques for the facilitation of individual donations, corporate and foundation contributions, and government grants. Students will learn important frameworks and tools for organizing a number of possible avenues of financial support, including workback and follow-up schedules. (Irreg.)

AMGT 3023 Entrepreneurial Mindset in the Arts 3 Credit Hours

Prerequisite: AMGT 2013 and AMGT 3013. This course is designed for students who are intent on developing artistic sustainability, entrepreneurial success, and creative/social change. A career in tomorrow's art industry benefits from a mindset that welcomes change, fast-paced decision-making, and a rock-solid foundation of values, work ethic, and reasoning. This hands-on course is delivered through exercises and mini-projects dealing with ideation, action, marketing, pitching, and strategy. (Irreg.)

AMGT 3440 Mentored Research Experience 3 Credit Hours

0 to 3 hours. Prerequisites: ENGL 1113 or equivalent, and permission of instructor. May be repeated; maximum credit 12 hours. For the inquisitive student to apply the scholarly processes of the discipline to a research or creative project under the mentorship of a faculty member. Student and instructor should complete an Undergraduate Research & Creative Projects (URCP) Mentoring Agreement and file it with the URCP office. Not for honors credit. (F, Sp, Su)

AMGT 4030 Internship I in the Arts 1-3 Credit Hours

1 to 3 hours. (Slashlisted with AMGT 5030) Prerequisite: Junior standing or permission of the instructor; May be repeated; Maximum credit: six hours. Students arrange for and work in a focused professional work experience. No student may earn credit for both 4030 and 5030. (Irreg.)

AMGT 4173 Artist Management 3 Credit Hours

(Slashlisted with AMGT 5173) Prerequisite: Junior standing. This course explores the role, importance, and function of artist managers and artistic teams. How they impact the career of the artist and their brand. Students will examine the principles of leadership dynamics and motivation to focus and empower current and potential managers. This course provides the tools necessary to manage artists' careers across various artistic disciplines. No student may earn credit for both 4173 and 5173. (Sp)

AMGT 4213 Arts Incubation Lab 3 Credit Hours

(Slashlisted with 5213) Prerequisite: Student must be declared as a Arts Management and Entrepreneurship minor; AMGT 3023; permission of instructor. This course is based on experiential learning and runs concurrently with an external competitive program for entrepreneurial projects in the professional arts marketplace. Students in this course will have the opportunity to build on the basics of entrepreneurship and management skills acquired within the courses of the undergraduate minor in Arts Management and Entrepreneurship. No student may earn credit for both 4213 and 5213. (Su)

AMGT 4970 Special Topics/Seminar 1-3 Credit Hours

1 to 3 hours. Prerequisite: Senior standing or permission of instructor. May be repeated; maximum credit nine hours. Special topics or seminar course for content not currently offered in regularly scheduled courses. May include library and/or laboratory research and field projects. (Irreg.)

AMGT 4990 Independent Study 1-3 Credit Hours

1 to 3 hours. Prerequisite: Senior standing and permission of instructor. May be repeated; maximum credit nine hours. Contracted independent study for a topic not currently offered in regularly scheduled courses. Independent study may include library and/or laboratory research and field projects. (Irreg.)

AMGT 5013 Overview of Arts Management and Entrepreneurship 3 Credit Hours

Prerequisite: graduate standing. This class will present an overview and historical perspective of the field of arts entrepreneurship and management. Readings will be supplemented by guest speakers and visits to professional organizations, enhancing the student's understanding of the diversity of the professional opportunities in arts administration and arts management. (Irreg.)

AMGT 5030 Internship I in The Arts 1-3 Credit Hours

1 to 3 hours. (Slashlisted with AMGT 4030) Prerequisite: Graduate standing, AMGT 5013, and permission of instructor; may be repeated, maximum 6 credits. Students arrange for and work in a focused professional work experience. No student may earn credit for both 4030 and 5030. (Irreg.)

AMGT 5033 Entrepreneurial Mindset in the Arts 3 Credit Hours

Prerequisite: Graduate standing, AMGT 5013 or concurrent enrollment, and departmental permission. This course is designed for students who are intent on developing artistic sustainability, entrepreneurial success, and creative/social change. A career in tomorrow's art industry benefits from a mindset that welcomes change, fast-paced decision-making, and a rock-solid foundation of values, work ethic, and reasoning. This course is delivered through various arts-focused exercises/projects dealing with ideation, action, marketing, pitching, plans and strategy. (F, Sp)

AMGT 5173 Artist Management 3 Credit Hours

(Slashlisted with AMGT 4173) Prerequisite: Graduate standing, AMGT 5013, and permission of instructor. This course explores the role and importance and function of artist managers and artistic teams, and how they impact the career of the artist and their brand. Students will examine the principles of leadership dynamics and motivation to focus and empower current and potential managers. This course provides the tools necessary to manage artists' careers across various artistic disciplines. No student may earn credit for both 4173 and 5173. (Sp)

AMGT 5213 Arts Incubation Lab 3 Credit Hours

(Slashlisted with AMGT 4213) Prerequisite: Graduate standing, AMGT 5013, and permission of instructor. This course is based on experiential learning and runs concurrently with an external competitive program for entrepreneurial projects in the professional arts marketplace. Students in this course will have the opportunity to build on the basics of entrepreneurship and management skills acquired within the courses of the Graduate Certificate in Arts Management and Entrepreneurship. No student may earn credit for both 4213 and 5213.

- AMGT 5223 Marketing in the Arts 3 Credit Hours**
Prerequisite: Graduate standing, AMGT 5013 or concurrent enrollment, and departmental permission. This course will examine the challenges of audience development and discussion of the role of art in contemporary society. This course will explore the basics of negotiations (distributive and integrative bargaining) before delving into current examples in the arts industry and explores the basics of marketing (planning, implementation, analysis) as well as how these principles relate to social media. (F, Sp)
- AMGT 5233 Financial Management and Budgeting in the Arts 3 Credit Hours**
Prerequisite: Graduate standing, AMGT 5013 or concurrent enrollment, and departmental permission. This class will examine financial models, accounting, and contractual practices of successful cultural-based organizations. Arts managers are expected to understand how to apply best financial management and budgeting practices to cultural organizations. This course provides an overview of best practices to budgeting for artistic ideas for entrepreneurs and will explore long-range planning implications and budget forecasting models for arts organizations. (F, Sp)
- AMGT 5243 Leadership and Strategic Thinking in the Arts 3 Credit Hours**
Prerequisite: Graduate standing, AMGT 5013 or concurrent enrollment, and departmental permission. This course is for students who are intent on developing sustainability and use design-thinking strategies to achieve their goals as entrepreneurial artists or by serving culture-based organizations. The course provides best strategic practices for leaders of arts organizations, encouraging students to determine the importance of planning and decision-making, and will address the importance of strategic thinking, change management, and leadership. (F, Sp)
- AMGT 5263 Fundraising and Development in the Arts 3 Credit Hours**
Prerequisite: Graduate standing, AMGT 5013 or concurrent enrollment, and departmental permission. This course explores approaches to the development of capital for projects, whether for artists or arts organizations, including techniques for facilitation of individual donations, corporate/foundation contributions, and government grants. Students will learn important frameworks and tools for organizing avenues of financial support, including workback and follow-up schedules, drafting appeal letters, managing deadlines, cultivating requests, and writing with key governing values. (F, Sp, Su)
- AMGT 5273 Innovative Approaches to Museum Leadership 3 Credit Hours**
Prerequisite: Graduate standing and Arts Management majors only. This course prepares students to lead effectively in the constantly evolving museum landscape. It cultivates the field knowledge, professional skills, and innovative mindset necessary to practice leadership at all organizational levels. Students will be introduced to the organizational structures, policies, and practices of museum governance, including topics such as museum mission, strategy, and administration. (Sp)
- AMGT 5283 The Global Arts Market 3 Credit Hours**
Prerequisite: Graduate standing and Arts Management majors only. This course offers an in-depth exploration of the art business world. It equips students with practical understanding of the various aspects of the art industry, including galleries, auction houses, art fairs, foundations, museums, and artist collectives. Through the analysis of case studies and real-world examples, students will learn about the economic, legal, and ethical considerations underpinning the art market. (F)
- AMGT 5853 Theatre Management 3 Credit Hours**
Prerequisite: Graduate standing, AMGT 5013 or concurrent enrollment, and majors only or permission of Program Director. This course focuses on the study of the fundamental operations of commercial, professional non-profit, stock, dinner, and university theatre in the United States. Reserved for students in the OU Online MA in Arts Management. (F, Sp)
- AMGT 5960 Directed Readings 1-3 Credit Hours**
1 to 3 hours. Prerequisite: graduate standing or permission of instructor. May be repeated; maximum credit six hours. Directed readings and/or literature review on selected topics under the direction of a faculty member. (Irreg.)
- AMGT 5970 Special Topics/Seminar 1-3 Credit Hours**
1 to 3 hours. Prerequisite: Graduate standing or permission of instructor. May be repeated; maximum credit nine hours. Special topics or seminar course for content not currently offered in regularly scheduled courses. May include library and/or laboratory research and field projects. (Irreg.)
- AMGT 5990 Independent Study 1-3 Credit Hours**
1 to 3 hours. Prerequisite: Graduate standing and permission of instructor; May be repeated; maximum credit nine hours. Contracted independent study for a topic not currently offered in regularly scheduled courses. Independent study may include library and/or laboratory research and field projects. (Irreg.)
- F A 1523 Weitzenhoffer Family College of Fine Arts Perspectives 3 Credit Hours**
An examination of Visual Arts, Dance, Drama, Music, and Musical Theatre regarding their relationship and impact on history, culture, and society. Students will gain an understanding of the value and impact fine arts can have on society. Geared towards Fine Arts majors, students will interact with fellow students and faculty from all disciplines within the College of Fine Arts. (F) [V-FYE].
- F A 2970 Fine Arts Seminar 1-2 Credit Hours**
May be repeated; maximum credit eight hours. Content varies. Interdisciplinary seminar course for Fine Arts. Deals with concepts not usually presented in regular coursework and/or special creative situations, performance opportunities or projects. (Irreg.)
- F A 3440 Mentored Research Experience 3 Credit Hours**
0 to 3 hours. Prerequisites: ENGL 1113 or equivalent, and permission of instructor. May be repeated; maximum credit 12 hours. For the inquisitive student to apply the scholarly processes of the discipline to a research or creative project under the mentorship of a faculty member. Student and instructor should complete an Undergraduate Research & Creative Projects (URCP) Mentoring Agreement and file it with the URCP office. Not for honors credit. (F, Sp, Su)
- F A 3960 Honors Reading 1-3 Credit Hours**
1 to 3 hours. Prerequisite: admission to Honors Program. May be repeated with change of subject; maximum credit six hours. Will consist of either reading topics or independent study designated by the instructor in keeping with the student's major program. (F, Sp, Su)
- F A 3970 Honors Seminar 1-3 Credit Hours**
1 to 3 hours. Prerequisite: admission to Honors Program, junior or senior standing. May be repeated with change of subject; maximum credit six hours. The projects covered will vary. The content will deal with concepts not usually presented in regular coursework. (Irreg.)
- F A 3980 Honors Research 1-3 Credit Hours**
1 to 3 hours. Prerequisite: admission to Honors Program. May be repeated with change of subject; maximum credit six hours. Will provide an opportunity for the gifted Honors candidate to work at a special project in the student's field. (F, Sp, Su)

F A 3990 Independent Study **1-3 Credit Hours**
1 to 3 hours. Prerequisite: permission of instructor and junior standing. May be repeated once with change of content. Independent study may be arranged to study a subject not available through regular course offerings. (F, Sp, Su)

F A 4960 Directed Readings **1-4 Credit Hours**
1 to 4 hours. Prerequisite: good standing in University; permission of instructor and dean. May be repeated; maximum credit four hours. Designed for upper-division students who need opportunity to study a specific problem in greater depth than formal course content permits. (Irreg.)

F A 4970 Fine Arts Seminar **1-2 Credit Hours**
(Slashlisted with 5970) 1 to 2 hours. Prerequisite: junior standing or permission of instructor. May be repeated; maximum credit eight hours. Content varies. Interdisciplinary seminar course for Fine Arts. Deals with concepts not usually presented in regular coursework and/or special creative situations, performance opportunities or projects. No student may earn credit for the same topic for both 4970 and 5970. (Irreg.)

F A 4990 Independent Study **1-3 Credit Hours**
1 to 3 hours. Prerequisite: Senior standing and permission of instructor. May be repeated; maximum credit nine hours. Contracted independent study for a topic not currently offered in regularly scheduled courses. Independent study may include library and/or laboratory research and field projects. (Irreg.)

F A 5960 Directed Readings **1-3 Credit Hours**
1 to 3 hours. Prerequisite: graduate standing and permission of department. May be repeated; maximum credit twelve hours. Directed readings and/or literature reviews under the direction of a faculty member. (F, Sp, Su)

F A 5970 Fine Arts Seminar **1-2 Credit Hours**
(Slashlisted with 4970) 1 to 2 hours. Prerequisite: graduate standing. May be repeated; maximum credit eight hours. Content varies. Interdisciplinary seminar course for Fine Arts. Deals with concepts not usually presented in regular coursework and/or special creative situations, performance opportunities or projects. No student may earn credit for the same topic for both 4970 and 5970. (Irreg.)

F A 5990 Independent Study **1-3 Credit Hours**
1 to 3 hours. Prerequisite: Graduate standing and permission of instructor. May be repeated; maximum credit nine hours. Contracted independent study for a topic not currently offered in regularly scheduled courses. Independent study may include library and/or laboratory research and field projects. (Irreg.)

College of Fine Arts Administrated Programs

Minors

The Weitzenhoffer Family College of Fine Arts offers minors in Arts Management and Entrepreneurship:

- Arts Management and Entrepreneurship for Fine Arts Majors, Minor (p. 1440)
- Arts Management and Entrepreneurship for Non-Fine Arts Majors, Minor (p. 1441)

Master of Arts

The Arts Management (Online), M.A. (p. 1441) is a 30 credit hours program that combines coursework with two immersive practicum

experiences that can be completed within a 15-month time frame. Thus, the program culminates with two significant practicums rooted in real-market work experience, allowing students to expand their personal network with successful arts entrepreneurs, artists, arts organizations, and philanthropists, while applying the knowledge, skills, and frameworks learned throughout the program to the workplace.

Graduate Certificate

The Arts Management and Entrepreneurship Graduate Certificate (p. 1442) is available to students in Weitzenhoffer Family College of Fine Arts. The curriculum is designed to enable students with industry knowledge and navigational skills in a dynamic arts environment through the strength of synthesizing ideologies and integrative thinking between both the fine arts and business. The strengths found in empathy, exploration, and interdisciplinary research are emphasized in the fine arts history courses detailing how artists and creatives drew inspiration from different ideologies, cultures, and thought. The general sequence of courses will teach students how to think critically, develop adaptive strategies, and negotiate positions in a creative environment.

Arts Management and Entrepreneurship for Fine Arts Majors, Minor

Minimum Total Credit Hours: 15

Program Code: N071

The requirements for a minor must be completed concurrently with the major degree requirements. No minor may be added by completing courses after receiving the bachelor's degree.

The minor must be officially declared in the Fine Arts Dean's/Student Services Office.

No single course may be used by a student to satisfy a major requirement and a minor requirement.

A minimum of 9 hours must be upper division courses.

- Students must earn a minimum grade of C in each course.
- A minimum GPA of 2.50 (OU and overall) is required in the minor coursework.

Required Courses

General Requirements for all Master's Degrees

The master's degree requires the equivalent of *at least* two semesters of satisfactory graduate work and additional work as may be prescribed for the degree.

All coursework applied to the master's degree must carry graduate credit.

Master's degree programs which require a thesis consist of *at least* 30 credit hours. All non-thesis master's degree programs require *at least* 30 credit hours.

Credit transferred from other institutions must meet specific criteria and is subject to certain limitations.

Courses completed through correspondence study may *not* be applied to the master's degree.

To qualify for a graduate degree, students must achieve an overall grade point average of 3.0 or higher in the degree program coursework and in all resident graduate coursework attempted. A student must also have at least a 3.0 in all coursework (including undergraduate coursework if any).

Additional information for master's degree students may be found in the Graduate College Bulletin.

Choose an Arts Management elective from the approved list maintained by the department. (p. 1442) 2

Total Credit Hours 12

A graduate *certificate* is not a graduate *degree*. A graduate degree represents a program of independent inquiry beyond the depth of coursework alone, while a graduate certificate represents a set of courses only.

- All courses must be taken at OU. No transfer credit will apply.
- No course substitutions are permitted for graduate certificates.
- Coursework applied to a graduate certificate cannot be more than five years old as of the semester the graduate certificate is awarded.
- Students must earn a grade point average of 3.00 or higher on all coursework applied to the graduate certificate.

General Information

Since its inception 60 years ago, the School of Dance has established a national reputation for its excellence in training in ballet and modern dance techniques, for its production values and for the quality of its graduates. Firmly rooted in a performance-oriented philosophy, the school is composed of 10 faculty members, two ballroom dance instructors, two Pilates body conditioning instructors, six accompanists, two full-time musicians, two graduate teaching assistants and approximately 80 majors. Students develop their technical and expressive gifts guided by a faculty representing an unusually fine blend of professional and academic excellence. Students work in a pre-professional environment dedicated to their development as performers, artists and educated individuals. During completion of the University's general education requirements, dance students learn about related arts from theoretical, historical and theatrical perspectives, while simultaneously perfecting their skills as emerging dance artists. Oklahoma Festival Ballet and Contemporary Dance Oklahoma provide performance opportunities on campus and throughout the state and region through fully produced performances, laboratory performances and lecture demonstrations. In addition, a production choreographed by students is presented on an annual basis. International tours are another important aspect of our students' experience.

The School of Dance is housed in the Donald W. Reynolds Performing Arts Center. This beautiful, state of the art facility includes two large dance studios, a Pilates body conditioning studio, a physical therapy room, faculty and staff offices, archive room, a gallery/reception area and the exquisitely renovated performance hall (formerly historic Holmberg Hall). Additional studios are housed in the adjacent Fine Arts Center as are the production facilities for Elsie C. Brackett Theatre and the School of Drama. This combination of facilities ensures that our students have the best possible environment in which to develop their technical, expressive and intellectual gifts and move toward professional careers.

Programs for Excellence

The BFA and MFA programs include performance requirements. Oklahoma Festival Ballet and Contemporary Dance Oklahoma, resident performing companies of the School of Dance, provide numerous, diverse performing opportunities for dance majors in both disciplines. Each company gives an annual series of performances on campus in our home theatres. Company members also present the annual Young Choreographers' Showcase each January. Additional performance opportunities exist through musicals and operas, in addition to lecture demonstrations in public schools, informal studio concerts and state, regional and international tours. Our companies have been honored with 14 invitational performance tours to Taiwan, Japan, France, Paraguay, Ecuador, Austria, China and Mexico.

Our companies have been chosen for the National American College Dance Festival Gala Performance at The Kennedy Center for the Performing Arts as well as receiving awards at the regional ACDF conferences (South Central). In addition, the companies have been featured in *Dance Magazine*, *Pointe Magazine*, the *New York Times* and the foreign press. The companies perform original works as well as others by Balanchine, Robbins, Kylián, Joffrey, Stevenson, de Mille, Petipa, Pilobolus, Sonia Dawkins, Gerald Arpino, Donald McKayle, Mark Dendy, Trey McIntyre, Rena Butler, Sidra Bell and Alejandro Cerrudo. Guest performers, choreographers, scholars and teachers visit the School of Dance each semester enriching students' experience and aiding in their preparation for the profession. Participation by dancers of diverse cultural and ethnic backgrounds is encouraged.

Scholarship Information

A number of merit based scholarships are available through the School. These include Barnett Foundation Scholarships, tuition waivers, the Mark Allen Everett Scholarship, the Indian Ballerina Scholarships, Dance Partners Scholarships and others. For specific scholarships and deadlines, contact the School of Dance at (405) 325-4051 or visit scholarships.ou.edu.

Undergraduate Study

The School of Dance offers undergraduate degree programs in classical ballet (with performance or pedagogy as an emphasis) and modern dance.

- Ballet Pedagogy, B.F.A. (p. 1447)
- Ballet Performance, B.F.A. (p. 1450)
- Modern Dance Performance, B.F.A. (p. 1452)

Admission

The School of Dance follows the admission requirements of the University of Oklahoma and the Weitzenhoffer Family College of Fine Arts. However, admission to a dance degree program also requires attendance at an audition on campus or on our annual, national audition tour. The entrance audition also serves as a placement class. All class assignments are based on proficiency. For specific audition dates and information, please visit <http://dance.ou.edu/apply> or contact the School of Dance administrative office (405) 325-4051.

Degree Requirements

Dance majors are advised concerning course enrollment and advancement in the degree program by an academic advisor each semester. All regulations and degree requirements are available in the

School of Dance Office, 1000 Reynolds Performing Arts Center and online.

Dance History Minor

The School of Dance offers a Minor in Dance History (p. 1454) that is open to all undergraduates in the university. For additional information, please contact the School of Dance office or the Weitzenhoffer Family College of Fine Arts Dean's office.

Graduate Study

The Master of Fine Arts in Dance (p. 1455) emphasizes either performance, choreography, or pedagogy. Graduate applicants must submit a graduate application to the University of Oklahoma Graduate College. Applicants must also submit a portfolio containing professional performance, choreography, and/or teaching prior to an invitation to interview and audition for the School of Dance. An audition and interview will be scheduled following graduate faculty review of the video and application materials. Please contact Graduate Liaison Roxanne Lyst, rlyst@ou.edu, for further information.

Courses

DANC 1212 Ballet Technique I 2 Credit Hours

May be repeated; maximum credit four hours. Practice of ballet technique at beginning level. This course does not count for major credit in the School of Dance. (F, Sp, Su)

DANC 1312 Modern Technique I 2 Credit Hours

May be repeated; maximum credit four hours. Practice of modern dance technique at the beginning level. This course does not count for major credit in the School of Dance. (F, Sp, Su)

DANC 1411 Stage Makeup for the Dancer 1 Credit Hour

To develop skill in the application of basic stage makeup for the dancer, including character analysis and traditional styles. (Irreg.)

DANC 1713 Understanding Dance 3 Credit Hours

A course in dance appreciation covering all aspects of various theatrical dance styles. (F, Sp) [IV-AF].

DANC 1813 Introduction to Non-Western Dance Forms 3 Credit Hours

An abbreviated examination of the history, evolution, and significance of dance in three regions of the non-western world which possess very distinct dance cultures. (F, Sp) [IV-WDC].

DANC 1911 Rehearsal and Production 1 Credit Hour

Prerequisite: open to dance majors only. May be repeated; maximum credit four hours. Study, practice and participation in every phase of dance production work and management. Laboratory (F, Sp, Su)

DANC 1913 Music for Dancers 3 Credit Hours

This course is designed to increase the dancer's understanding of rhythm, notation of rhythm, musical forms and styles. Music from Western and Non-Western cultural practices as well as from varying historical periods will be explored. Students will make music together in the classroom to gain a deeper understanding of these topics. (F, Sp)

DANC 2212 Ballet Technique II 2 Credit Hours

Prerequisite: permission of instructor. May be repeated; maximum credit eight hours. Continuation of 1212. (F, Sp, Su)

DANC 2213 Intermediate Ballet Technique 3 Credit Hours

Prerequisite: Majors only; permission of instructor; May be repeated; maximum credit 9 hours. Class includes participation in a complete ballet barre and center including adagio, pirouettes, petit allegro and grande allegro. The emphasis will be on the practice and principles of the classical ballet vocabulary. Students will be expected to develop and demonstrate the ability to perform the movements with proper body alignment and a sense of artistic expression. (F, Sp)

DANC 2241 Pointe Class 1 Credit Hour

Prerequisites: Majors only; permission of instructor. Corequisite: must be enrolled in a ballet technique class. May be repeated; maximum credit 4 hours. Technique and practice on pointe to build strength and proficiency for ballet. (F, Sp)

DANC 2292 Ballet Company Apprentice 2 Credit Hours

Prerequisite: Majors only; permission of instructor. May be repeated; maximum credit eight hours. A practical analysis and application of the original and classical ballet repertoire. (F, Sp, Su)

DANC 2312 Modern Technique II 2 Credit Hours

Prerequisite: Majors only; permission of instructor. May be repeated; maximum credit eight hours. Continuation of 1312. (F, Sp)

DANC 2313 Intermediate Modern Technique 3 Credit Hours

Prerequisite: Majors only; permission of instructor; May be repeated; maximum credit 12 hours. Intermediate modern dance technique emphasizes skill refinement, increased vocabulary, and performance capabilities. Class includes floor work, inversions, dynamic movement through space, turns and jumps. (F, Sp)

DANC 2321 Dance Improvisation 1 Credit Hour

Prerequisite: majors only; permission of instructor. May be repeated; maximum credit four hours. An introduction to improvisation as a creative and choreographic tool. Students will develop the ability to comprehend, apply, and manipulate movement in order to craft creative impulses. Also explores how to convey concepts and meaning, informing and inspiring others through various methods of non-verbal communication. (F, Sp)

DANC 2392 Modern Company Apprentice 2 Credit Hours

Prerequisite: Majors only; permission of instructor. May be repeated; maximum credit 10 hours. A practical analysis and application of the past and present choreographic dance works within the modern dance area. (F, Sp, Su)

DANC 2412 Pilates Body Conditioning 2 Credit Hours

May be repeated; maximum credit eight hours. The philosophy of awareness in movement and a total body/mind workout based on the methods developed by Joseph Pilates over 75 years ago. This method is one of physical and mental conditioning designed to work every muscle in the body in an efficient and balanced manner. (F, Sp)

DANC 2512 Ballroom Dancing I 2 Credit Hours

May be repeated; maximum credit eight hours. Instruction in traditional and popular social dances, as well as social skill and etiquette. Includes instruction in the basic ballroom dances of cha-cha, salsa, swing, tango, and waltz. Dancers take the basic skills and introduce new dances and rhythms with an added emphasis on dancing technique. (F, Sp)

- DANC 2522 Ballroom Dancing II** 2 Credit Hours
Prerequisite: 2512 or permission of instructor. May be repeated; maximum credit eight hours. Intermediate-level ballroom dancing which builds on the basic skills of the dancer and introduces new dances and rhythms with an added emphasis on dancing techniques. Includes instruction in the foxtrot, rumba, samba, and east and west coast swings. A brief review of basic skills is presented at the beginning of the semester. (F, Sp)
- DANC 2612 Belly Dance** 2 Credit Hours
May be repeated three times; maximum credit eight hours. A course on one of the forms of dance from the Middle East, belly dancing, as referred to in North America. The class will focus on learning the technique of the dance as well providing the history of the form. (F, Sp)
- DANC 2632 Elements of Dance Composition** 2 Credit Hours
Prerequisite: Majors only; permission of instructor. Theoretical and practical experience with the principles of composition in the area of expressive movement. (Irreg.)
- DANC 2712 Body Science for Dancers** 2 Credit Hours
An introduction to human anatomy and body mechanics through the study of skeletal alignment and movement efficiency in dance training, teaching and performance. This course is only open to Dance majors, and is intended to be taken during the second semester of the freshman year or the first semester of the sophomore year. (Irreg.)
- DANC 2970 Special Topics** 1-3 Credit Hours
1 to 3 hours. Prerequisite: May be repeated; Maximum credit nine hours. Special topics course for content not currently offered in regularly scheduled courses. May include library and/or laboratory research, and field projects. (Irreg.)
- DANC 3213 Ballet Technique III** 3 Credit Hours
Prerequisite: Majors only; permission of instructor; May be repeated; maximum credit 24 hours. Class includes participation in an advanced ballet barre and center including adagio, pirouettes, petit allegro and grande allegro. The emphasis will be on the practice and advanced principles of the classical ballet vocabulary. Students will be expected to develop and demonstrate the ability to perform the movements with proper body alignment, musicality, and a sense of artistic expression. (F, Sp, Su)
- DANC 3272 Performance Practices in Ballet** 2 Credit Hours
Prerequisite: Majors only; permission of instructor. An introduction to and participation in performance practices in character dance and pantomime in ballet training. Emphasis on the practice, principles and style of character dance and its function as an integral part of classical ballet repertory and the use of pantomime and acting techniques for dancers. Students learn character dance technique and choreography from the classical repertoire as well as practicing individual role development through character studies culminating in the use of pantomime vocabulary and expressive movement. (Irreg.)
- DANC 3292 OU Ballet Company** 2 Credit Hours
Prerequisite: Majors only; permission of instructor. May be repeated; maximum credit 16 hours. Rehearsal and performance with the OU Ballet Company. Laboratory (F, Sp, Su)
- DANC 3313 Modern Technique III** 3 Credit Hours
Prerequisite: Majors only; permission of instructor; May be repeated; maximum credit 24 hours. Modern Technique III emphasizes advanced skill refinement and creative exploration of performance capabilities. Class includes advanced floor work, inversions, improvisation, composition, large movement through space, large turns and jumps. (F, Sp, Su)
- DANC 3392 Contemporary Dance Oklahoma** 2 Credit Hours
Prerequisite: Majors only; permission of instructor. May be repeated; maximum credit 16 hours. Rehearsal and performance with the Contemporary Dance Oklahoma. (F, Sp, Su)
- DANC 3412 Pilates Equipment** 2 Credit Hours
Prerequisite: 2412 and permission of the instructor. May be repeated; maximum credit eight hours. Using Pilates equipment, the class foundation is built on that developed by Joseph Pilates as a method of physical and mental conditioning to work every muscle in one's body in an efficient and balanced manner. The basis throughout the semester is that philosophy of awareness in movement and a total body/mind workout. (F, Sp)
- DANC 3440 Mentored Research Experience** 3 Credit Hours
0 to 3 hours. Prerequisites: ENGL 1113 or equivalent, and permission of instructor. May be repeated; maximum credit 12 hours. For the inquisitive student to apply the scholarly processes of the discipline to a research or creative project under the mentorship of a faculty member. Student and instructor should complete an Undergraduate Research & Creative Projects (URCP) Mentoring Agreement and file it with the URCP office. Not for honors credit. (F, Sp, Su)
- DANC 3632 Dance Composition** 2 Credit Hours
Prerequisite: Majors only; permission of instructor. Theoretical and practical experience with the principles of composition in the area of expressive movement. (Irreg.)
- DANC 3743 Dance History: Early Roots** 3 Credit Hours
Prerequisite: junior standing or permission of instructor. A survey of the development of dance from pre-historic eras in western civilization through ancient cultures in Egypt, Greece and Rome. Investigations continue through Medieval, Renaissance and Baroque periods up to the evolution of Romantic ballet in the nineteenth century. (F) [IV-WC]
- DANC 3753 Dance History: Three Centuries of Development** 3 Credit Hours
Prerequisite: junior standing or permission of instructor. From nineteenth-century Romanticism, this course traces the development of western theatrical dancing through the current season. (Sp) [IV-WC]
- DANC 3813 History of World Dance** 3 Credit Hours
Prerequisite: junior standing or permission of instructor. An examination of the history, evolution and significance of dance in regions which possess very distinct dance cultures throughout the non-European world. (Irreg.) [IV-WDC]
- DANC 3960 Honors Reading** 1-3 Credit Hours
1 to 3 hours. Prerequisite: admission to Honors Program. May be repeated with change of subject; maximum credit six hours. Consists of either reading topics or independent study designated by the instructor in keeping with the student's major program. Covers materials not usually presented in the regular courses. (F, Sp, Su)
- DANC 3970 Honors Seminar** 1-3 Credit Hours
1 to 3 hours. Prerequisite: admission to Honors Program, junior or senior standing. May be repeated with change of subject; maximum credit six hours. The projects covered will vary. Deals with concepts not usually presented in regular coursework. (Irreg.)
- DANC 3980 Honors Research** 1-3 Credit Hours
1 to 3 hours. Prerequisite: admission to Honors Program. May be repeated with change of subject; maximum credit six hours. Provides an opportunity for the gifted Honors candidate to work at a special project in the student's field. (F, Sp, Su)

- DANC 3990 Independent Study** **1-3 Credit Hours**
1 to 3 hours. Prerequisite: permission of instructor and junior standing. May be repeated once with change of content. Independent study may be arranged to study a subject not available through regular course offerings. (F, Sp, Su)
- DANC G4022 Ballet Repertoire** **2 Credit Hours**
Prerequisite: Majors only; permission of instructor. Research and analysis of some of the works of the basic classical repertoire insofar as story contents. Musical and choreographic approaches are used by renowned choreographers. (Irreg.)
- DANC 4213 Ballet Technique IV** **3 Credit Hours**
Prerequisite: Majors only; permission of instructor; May be repeated; maximum credit 24 hours. Class includes participation in an advanced ballet barre and center including adagio, pirouettes, petit allegro and grande allegro. The emphasis will be on the strict practice and advanced principles of the classical ballet vocabulary. Students will be expected to demonstrate at an advanced level the ability to perform the movements with proper body alignment, musicality, and sense of artistic expression. (F, Sp)
- DANC 4241 Pas de Deux** **1 Credit Hour**
Prerequisite: Majors only; permission of instructor. May be repeated; maximum credit 2 hours. Basic techniques of partnering and being a partner in ballet performance. (Irreg.)
- DANC 4313 Modern Technique IV** **3 Credit Hours**
Prerequisite: DANC 3313; Majors only; permission of instructor; May be repeated; maximum credit 24 hours. Modern Technique IV emphasizes advanced and complex skill refinement and creative approaches to performance capabilities. Class includes advanced floor work, inversions, improvisation, composition, musicality, large movements through space, large jumps and turns. (F, Sp, Su)
- DANC 4612 Ballet Choreography** **2 Credit Hours**
Prerequisite: Majors only; permission of instructor. Study and practice in the principles of ballet composition, with emphasis on Romantic, Classical, Neoromantic and Neoclassical choreography. (Irreg.)
- DANC 4721 Senior Capstone Lecture** **1 Credit Hour**
Prerequisite: Senior standing and permission of department; majors only. Professional preparation for a career in dance and related fields. Students will develop material relevant to a professional career in the industry. Topics include: goal setting, professional correspondence documents, interview techniques, audition preparation, applying for graduate school, video sample creation. Student and instructor initiated discussions with working professionals will explore the role of the dancer in the professional industry. (F) [V].
- DANC 4722 Senior Capstone Project** **2 Credit Hours**
Prerequisite: DANC 4721 or concurrent enrollment; senior standing; Permission of department required; majors only. An advanced, individual project which demonstrates mastery of skills and knowledge in the student's area of interest. Taken in the senior year, the project will be selected under advisement, guided by the appropriate faculty member(s) and include required submission of a written component. (F, Sp) [V].
- DANC G4812 Teaching of Ballet Technique** **2 Credit Hours**
Prerequisite: twelve hours of ballet or permission. Comprehensive study of the basic ballet exercises and body positions. Terminology and discussions on anatomy for the dancer. Experience in teaching of ballet. (Irreg.)
- DANC G4821 Teaching Practicum - Ballet** **1 Credit Hour**
Prerequisite: Majors only; DANC 4812. May be repeated; maximum credit three hours. Teaching children's ballet classes of various levels. Student will teach an average of twelve classes per semester, and meet with the supervising professor following observation of teaching assignments. (F, Sp)
- DANC 4832 Methods in Teaching Dance** **2 Credit Hours**
Prerequisite: Majors only; permission of instructor. Methods of teaching through the creative approach. Progressions in teaching dance studies and techniques. (Irreg.)
- DANC G4851 Practical Experience in Teaching Modern Dance** **1 Credit Hour**
Prerequisite: 4832. May be repeated; maximum credit three hours. Practical teaching experience in modern dance or creative dance for children. (F, Sp)
- DANC 4960 Directed Readings** **1-4 Credit Hours**
1 to 4 hours. Prerequisite: good standing in University; permission of instructor and dean. May be repeated; maximum credit four hours. Designed for upper-division students who need opportunity to study a specific problem in greater depth than formal course content permits. (Irreg.)
- DANC 4970 Special Topics/Seminar** **1-3 Credit Hours**
1 to 3 hours. Prerequisite: Senior standing or permission of instructor. May be repeated; maximum credit nine hours. Special topics or seminar course for content not currently offered in regularly scheduled courses. May include library and/or laboratory research and field projects. (Irreg.)
- DANC 4990 Special Studies** **1-6 Credit Hours**
1 to 6 hours. Prerequisite: Departmental permission; May be repeated with change of subject matter; maximum credit eight hours. Variable as to subject and credit for areas of specialty and/or interest not otherwise provided in the standard offering of courses. (F, Sp, Su)
- DANC 5023 Introduction to Graduate Study in Dance** **3 Credit Hours**
Prerequisite: graduate standing. Developing research, organizational and refined skills for scholarly writing. Establishing a foundation to analyze existing materials in the dance field for purposes of debate and theory construction. Providing clarification of MFA in Dance expectations and defining a direction/program of study which will enrich knowledge within the discipline. (Irreg.)
- DANC 5090 Graduate Special Studies** **1-6 Credit Hours**
1 to 6 hours. Prerequisite: permission. May be repeated; maximum credit six hours. A special creative or research project course in any phase of dance adapted to the individual student. (F, Sp)
- DANC 5224 Graduate Ballet Technique** **4 Credit Hours**
Prerequisite: Graduate standing and departmental permission; May be repeated; maximum credit 12 hours. Intensive study of dance techniques for proficiency in performance and teaching. (F, Sp, Su)
- DANC 5292 Advanced Ballet Company Class** **2 Credit Hours**
Prerequisite: graduate standing, permission of adviser. Continued enrollment based on performance; maximum credit ten hours. A rehearsal situation which provides the special training required in performance. It is conducted in a practicum-laboratory situation aimed at the advanced graduate student. Laboratory (F, Sp)
- DANC 5322 Advanced Dance Improvisation** **2 Credit Hours**
Prerequisite: Graduate standing and Master of Fine Arts in Dance majors only. Development of advanced skills, tools, and conceptualization around dance improvisation and its application to the creative process of choreography. (F)

DANC 5324 Graduate Modern Dance Technique 4 Credit Hours

Prerequisite: Graduate standing and departmental permission; May be repeated; maximum credit 12 hours. Intensive practice of modern dance techniques for proficiency in performance and teaching. (F, Sp)

DANC 5392 Advanced Modern Dance Company Class 2 Credit Hours

Prerequisite: graduate standing, permission of adviser. Continued enrollment based on performance; maximum credit ten hours. A rehearsal situation which provides the special training required in performance. It is conducted in a practicum-laboratory situation aimed at the graduate student. Laboratory (F, Sp)

DANC 5613 Graduate Choreography 3 Credit Hours

Prerequisite: Graduate standing; DANC 3632 or DANC 4612, or departmental permission; May be repeated; maximum credit 6 hours. Practical application of principles of choreography in original production projects. (F, Sp)

DANC 5713 History of World Dance 3 Credit Hours

Prerequisite: Graduate standing, departmental permission, and Master of Fine Arts in Dance majors only. An examination of the history, evolution, and significance of dance in regions which possess very distinct dance cultures throughout the non-European world. (Irreg.)

DANC 5743 Dance History: Early Roots 3 Credit Hours

Prerequisite: graduate standing or permission of instructor. A survey of the development of dance from pre-historic eras in western civilization through ancient cultures in Egypt, Greece and Rome. Investigations continue through Medieval, Renaissance and Baroque periods up to the evolution of Romantic ballet in the nineteenth century. Will have additional meeting times, research and written assignments. (F)

DANC 5753 Dance History: Three Centuries of Development 3 Credit Hours

Prerequisite: graduate standing or permission of instructor. Development of western theatrical dancing from nineteenth-century Romanticism through the current season. Will have additional meetings, research and written assignments. (Sp)

DANC 5813 Advanced Teaching of Dance 3 Credit Hours

Prerequisite: Graduate standing. This course is designed to provide different voices and diverse points of view on teaching dance within higher education through reading assignments, discussions, and practical applications. (Irreg.)

DANC 5913 Graduate Project in Dance 3 Credit Hours

Prerequisite: permission. May be repeated with change of subject matter; maximum credit six hours. Study and practice in assuming full responsibility of a project in the area of dance. (F, Sp, Su)

DANC 5960 Directed Readings 1-3 Credit Hours

1 to 3 hours. Prerequisite: graduate standing and permission of department. May be repeated; maximum credit twelve hours. Directed readings and/or literature reviews under the direction of a faculty member. (F, Sp, Su)

DANC 5970 Special Topics/Seminar 1-3 Credit Hours

1 to 3 hours. Prerequisite: Graduate standing or permission of instructor. May be repeated; maximum credit nine hours. Special topics or seminar course for content not currently offered in regularly scheduled courses. May include library and/or laboratory research and field projects. (Irreg.)

DANC 5980 Research for Master's Thesis 2-9 Credit Hours

Variable enrollment, two to nine hours; maximum credit applicable toward degree, four hours. (F, Sp, Su)

DANC 5990 Independent Study 1-3 Credit Hours

1 to 3 hours. Prerequisite: Graduate standing and permission of instructor. May be repeated; maximum credit nine hours. Contracted independent study for a topic not currently offered in regularly scheduled courses. Independent study may include library and/or laboratory research and field projects. (Irreg.)

Dance History, Minor

Minimum Total Credit Hours: 19

Minimum Upper-Division Hours: 9

Curriculum GPA - Combined and OU: 2.50

Program Code: N269

The requirements for a minor must be completed concurrently with the major degree requirements.

No minor may be added by completing courses after receiving the bachelor's degree.

No single course may be used by a student to satisfy a major requirement and a minor requirement.

Students must earn a minimum grade of C in each course.

A minimum of 9 hours must be upper division dance history courses.

Of the required coursework, at least 12 of the 19 credit hours must be completed in residency at the University of Oklahoma.

No courses counted toward the minor may be taken Pass/ No Pass.

The Minor in Dance History is available to all undergraduate students at OU except those majoring in dance.

- Students must achieve a minimum 2.50 GPA (OU and overall) in the minor coursework.

Required Courses

Students must successfully complete at least 19 hours of coursework in dance history and ballet or modern dance technique, including 9 hours of upper division Dance History courses, and at least 2 semesters of courses in Ballet and/or Modern Dance technique. The following specific requirements must be met:

Code	Title	Credit Hours
DANC 1713	Understanding Dance	3
DANC 1813	Introduction to Non-Western Dance Forms	3
DANC 3743	Dance History: Early Roots	3
DANC 3753	Dance History: Three Centuries of Development	3
DANC 3813	History of World Dance	3
Choose a minimum of two semesters from the following technique classes:		4-6
DANC 1212	Ballet Technique I	
DANC 1312	Modern Technique I	
DANC 2212	Ballet Technique II (with instructor's permission)	
DANC 2312	Modern Technique II (with instructor's permission)	
DANC 2313	Intermediate Modern Technique (with Instructors Permission)	
DANC 3213	Ballet Technique III (with Instructors Permission)	
DANC 3313	Modern Technique III (with Instructors Permission)	
DANC 2512	Ballroom Dancing I	
Total Credit Hours		19

If the minor is officially declared and approved, successfully completed, and noted on the graduation application, the student's transcript will so indicate at the time the bachelor's degree is posted.

Dance, M.F.A. in Dance

Minimum Total Hours (Thesis): 58

Program Code: M265

This program has changes pending Regents approval for 2024-25. These pending changes are not reflected here.

Total Credit Hours **58**

General Requirements for all Master's Degrees

The master's degree requires the equivalent of *at least* two semesters of satisfactory graduate work and additional work as may be prescribed for the degree.

All coursework applied to the master's degree must carry graduate credit.

Master's degree programs which require a thesis consist of *at least* 30 credit hours. All non-thesis master's degree programs require *at least* 30 credit hours.

Credit transferred from other institutions must meet specific criteria and is subject to certain limitations.

Courses completed through correspondence study may *not* be applied to the master's degree.

To qualify for a graduate degree, students must achieve an overall grade point average of 3.0 or higher in the degree program coursework and in all resident graduate coursework attempted. A student must also have at least a 3.0 in all coursework (including undergraduate coursework if any).

Additional information for master's degree students may be found in the Graduate College Bulletin.

General Information

The Peggy Dow Helmerich School of Drama strives to prepare students for professional careers in theatre and the greater entertainment industry. As a vital artistic training unit within a major university, the school believes the student's experience should include all aspects of theatre production along with a strong academic component of theatre history and general education. The school seeks to train and educate theatrical artists, craftspeople, and educators of the future.

Our 11:1 student/faculty ratio in the School of Drama assures the student extensive individual attention and guidance during each step of the program. Visiting artists supplement our resident faculty and staff in providing a wide range of experience for students as part of their growth and training as artists.

The Peggy Dow Helmerich School of Drama is committed to creating an inclusive experience for all our students, faculty, and staff. We believe in the unique qualities of each member of our community. We believe that the greatest art comes from a mix of minds, backgrounds, and experiences.

Mission Statement

The mission of the University of Oklahoma Peggy Dow Helmerich School of Drama is to educate theatre artists, scholars and teachers, preparing them to enter their professions with a knowledge of evolving industry standards; to perpetuate theatrical art by encouraging and nurturing the development of new artistic endeavors; and to provide a variety of theatrical productions and programs of excellence to Oklahoma audiences.

Student Organizations

- LatinArte
- Student Theatre Council
- Black Creative Circle

Programs for Excellence

OU's Helmerich School of Drama is the second oldest dramatic training institution in the nation, and has a long, distinctive history and a reputation for excellence. This performance-based degree is supported by diverse production options performed in our five spaces. An average of two plays, two musicals, three dance productions, and two operas comprise the University Theatre season (nine-month academic year). In the Gilson Lab Theatre and the Studio Theatre in Beatrice Carr Wallace Old Science Hall, another four to six plays are mounted, including student directed productions. Throughout the year, students hone their skills in a professional and challenging production season.

The Helmerich School of Drama has been the birthplace of several world and regional premieres. The school's commitment to new works adds to the exciting atmosphere that permeates the student's academic career.

Students are encouraged to attend a number of professional auditions each year and our local patrons group, the Theatre Guild, provides significant travel grants to assist in this endeavor. The School of Drama is active in the Kennedy Center American College Theatre Festival and the United States Institute for Theatre Technology.

Performance majors must audition each semester for upcoming productions. Auditions are held twice a year, in August for the fall semester, and November for the spring semester. Additional auditions are held as needed for added productions which may include children's theatre shows, directing scenes, student productions and film projects.

Design and stage management assignments are made at the beginning of each semester. In addition, students have opportunities to work as dramaturgs, associate stage managers, audience development assistants, and artisans & technicians in scenery, costume, lighting, properties, and sound.

Special Facilities and Programs

The Helmerich School of Drama administrative offices are located at 121 Wallace Old Science Hall on the North Oval. The University Theatre building—the Rupel J. Jones Fine Arts Center—is at 563 Elm on the northwest corner of the Norman campus. Completed in 1965, the Fine Arts Center contains faculty offices, classrooms, dance studios, construction studios, and storage spaces for scenery, costumes, lights, and properties, the Draheim computer-aided design lab, the 600-seat Elsie C. Brackett Theatre, and the more intimate, flexible 250-seat Weitzenhoffer Theatre. The close proximity to the other Schools in the College gives students easy access to the Fred Jones Jr. Museum of Art, the Fine Arts Library, and the Reynolds Performing Arts Center. In addition to the facilities in the Fine Arts Center, Wallace Old Science Hall houses the 75-seat Gilson Lab Theatre, the 65-seat Studio Theatre, faculty and administrative offices, a design lab, light lab, and the Garner Drama Library.

The season auditions are open to all students in the University. Classes in many aspects of theatre are offered to non-majors for elective credit, and we offer a Theatre Minor.

Scholarship Information

A number of scholarships and awards are available to qualified students. Students should go to scholarships.ou.edu to apply for scholarships. Financial Aid is also available through OU Financial Aid Services. The following drama scholarships are available to qualified students:

- Ben Barnett Scholarships
- Theatre Guild Scholarships
- Resident Tuition Waiver Scholarships
- Non-Resident Tuition Waiver Scholarships
- E. Frank Gilson Professional Development Grant
- Steven Draheim Memorial Lighting Design Scholarship
- E. Frank Gilson Scholarship
- James & Mary Carmichael Scholarship
- Rance & Jean Howard Scholarship
- Lindsay Stewart Stage Management Scholarship
- Amy Elizabeth Boe Character Acting Scholarship
- Peggy Dow Helmerich Drama Scholarships

At the close of each academic year, the School of Drama recognizes individual achievement in an awards ceremony. Many of the awards carry cash prizes. These awards are:

- The Van Heflin Award
- The A. Max Weitzenhoffer Design & Production Award
- Theatre Guild Applause Awards
- Michael Buchwald Award for Costume Construction
- Coopie Mason Artisan Award
- Steven A. Draheim Lighting Design Award
- Rupel J. Jones Directing Award
- Ida Z. Kirk Excellence in Acting Awards

- Charles C. Suggs Stage Management Award
- A. L. Mortensen Award for Technical Excellence
- Helen F. Lauterer Costume Design Award
- Sound Design Award
- Raymond D. Larson Scene Design Award
- Oscar G. Brockett Dramaturgy Award
- Amy Elizabeth Boe Character Acting Awards

Undergraduate Study

Bachelor of Fine Arts

The Helmerich School of Drama offers the Bachelor of Fine Arts degree. The degree is designed to provide the student with a solid foundation in each basic area of the theatre, with an opportunity to begin specialization in the sophomore year. The concentrations are in the following areas:

- Acting (p. 1463)
- Costume Design (p. 1465)
- Dramaturgy (p. 1468)
- Lighting Design (p. 1471)
- Scenic Design (p. 1473)
- Sound Design (p. 1475)
- Stage Management (p. 1478)

Coursework at the undergraduate level includes acting, directing, voice and speech, stage movement and combat, graphics and illustration, stagecraft, costume construction and design, lighting fundamentals and design, scene design, sound techniques and design, theatre history, costume history, dramaturgy, dramatic literature, and theatre and stage management. Students are also encouraged to take advantage of coursework offered by the School of Dance and the A. Max Weitzenhoffer School of Musical Theatre.

Theatre Minor

The School offers a Minor in Theatre (p. 1480) that is open to all undergraduates in the university. For additional information, please contact the Weitzenhoffer Family College of Fine Arts Dean's office.

Admission

The Helmerich School of Drama follows the basic admission requirements of the University of Oklahoma and the Weitzenhoffer Family College of Fine Arts. Please refer to those sections in this catalog for specific details. In addition, admission to the OU School of Drama is by audition and/or interview only and requires an on-campus audition (for acting emphasis) or portfolio review (for all design emphases), and/or interview (for dramaturgy or stage management emphasis). **Students must be officially accepted into the School of Drama by audition and/or interview before being allowed to enroll for classes.**

Degree Requirements

Students are advised each semester concerning enrollments, admission, advancement toward degree, and career options.

Students considering a major in drama should visit <http://drama.ou.edu> or contact the School of Drama Office, Wallace Old Science Hall, Suite 121, for curriculum plans outlining the above program and information covering auditions, admission policies and guidelines, awards and scholarships, and additional regulations, policies and practices.

Graduate Study

Prerequisites for Full Graduate Standing

In addition to meeting the general requirements of the Graduate College, the student should have completed the following undergraduate coursework or its professional equivalent: six hours in acting, six hours in directing, three hours in stagecraft, three hours in costume construction, three hours in costume history, three hours each in scene, costume and lighting design, three hours in dramatic structure and analysis, and six hours in theatre history.

Students with deficiencies in any of these areas may be required to take coursework judged necessary to correct the deficiencies, without receiving graduate credit for the coursework. Once full graduate standing is achieved, the student must maintain a 3.00 grade point average and make satisfactory progress toward the degree to maintain full graduate standing.

Master of Arts

The Master of Arts (p. 1480) is a scholarly degree with emphasis on theatre history, dramatic literature and criticism, and dramaturgy. The program is structured with the student's particular needs and interests in mind. Contact the School of Drama Office for further details: <https://www.ou.edu/finearts/drama/grad>

Courses

DRAM 1114 Costume Construction 4 Credit Hours

The theory and practice of the construction, finishing and handling of stage costumes. Includes practical production applications. Laboratory (F, Sp, Su)

DRAM 1124 Stagecraft 4 Credit Hours

Stagecraft. The Theory And Practice Of The Construction, Painting And Handling Of Scenery And Props. Includes Practical Production Applications. Laboratory (F, Sp, Su)

DRAM 1133 Drawing and Rendering 3 Credit Hours

Exploring methods of using freehand drawing to communicate design ideas. Skill building course: form, shape, color, texture, light. Includes some mechanical drawing. (F, Sp)

DRAM 1134 Stage Lighting and Sound 4 Credit Hours

Prerequisite: Majors only. This course acquaints students with the technical procedures and equipment involved in effective lighting and sound systems for theatrical productions. Emphasis includes safe handling of equipment, understanding basics of electricity and audio, and a hands-on process of working with lighting and sound equipment. Laboratory requirement reinforces concepts taught in class. (F, Sp)

DRAM 1141 Stage Management Seminar I 1 Credit Hour

A weekly forum for sharing insights and solving problems on current production assignments, as well as examining the bigger picture of stage management and theatre in America today. (F, Sp)

DRAM 1411 Makeup 1 Credit Hour

To direct and provide experience in the effective application of makeup materials in creating an impression of character. (F, Sp)

DRAM 1503 Acting for Non-Majors 3 Credit Hours

To develop a beginning understanding and appreciation of the art and skill of acting through the study of acting principles, dramatic scenes, and basic stage techniques. (F, Sp, Su)

- DRAM 1513 Introduction to Acting** **3 Credit Hours**
To acquaint the beginning student with the fundamentals of acting and to explore the basic elements of the actor's art. Explores the physical, vocal, emotional and technical aspects of acting in a format that encourages freedom of imagination and personal growth. (F)
- DRAM 1523 Character Study for the Actor** **3 Credit Hours**
Prerequisite: 1513. To develop and exercise basic acting skills through practical application of the fundamental elements of the actor's art. The student will become familiar with the actor's tools and learn how to utilize them on a rudimentary level. Emphasis will be placed upon characterization and beginning script analysis required for character study. (Irreg.)
- DRAM 1603 Voice And Diction for Non-Majors** **3 Credit Hours**
Improves the student's voice, articulation, pronunciation and expressive intonation for effective communication. (Irreg.)
- DRAM 1612 Introduction to Voice and Movement** **2 Credit Hours**
Prerequisite: School of Drama freshmen performance majors. Skill-based course introduces the student to the foundations of voice and movement for the actor. (F)
- DRAM 1643 Voice and Speech I** **3 Credit Hours**
Prerequisite: 1523. Improves the student's voice, articulation, pronunciation and expressive intonation for effective communication, and performing for the stage. (F)
- DRAM 1713 Understanding Theatre** **3 Credit Hours**
Prerequisite: Non-theatre majors only. A course in theatre appreciation covering the nature and creation of theatre, with opportunity for the students to attend theatrical productions. (F, Sp, Su) [IV-AF].
- DRAM 1731 Dramaturgy Studio 1** **1 Credit Hour**
Prerequisite: Majors only or permission of instructor. A weekly forum to discuss and explore the role of the dramaturg in production in the Helmerich School of Drama as well as industry practices in the United States. (F, Sp)
- DRAM 1811 Music Notation and Score Reading for Stage Managers and Designers** **1 Credit Hour**
Prerequisite: Majors only. Introduces music notation and score reading to stage management and design students who may work on musical theatre, ballet and/or opera in their academic and professional careers. (F)
- DRAM 1911 Rehearsal and Production** **1 Credit Hour**
Prerequisite: open to drama majors only. May be repeated; maximum credit four hours. Study, practice and participation in every phase of dramatic production work and management; attendance and critical discussion of plays. Kinds of service are given unit evaluations in terms of relative difficulty and time consumption. Laboratory (F, Sp, Su)
- DRAM 2013 Introduction to Theatrical Design and Production** **3 Credit Hours**
Prerequisite: Majors only. Explores the processes of theatrical design in the forms of scenery, lighting, sound and costume design as well as stage management and technical direction. Also focuses on the creation of a holistic design approach uniting script analysis, research, visual imagery and storytelling into one single artistic form of communication. (F, Sp)
- DRAM 2052 Traditional Media** **2 Credit Hours**
Prerequisite: DRAM 1133; majors only. Exploration and building of illustrative skills with the traditional art mediums used by theatrical designers. (Sp)
- DRAM 2053 Computer Aided Design I for the Theatre** **3 Credit Hours**
Prerequisite: DRAM 2153 or DRAM 3353. The course will teach students to develop basic design and rendering skills using computer-aided design software currently used in the entertainment industry. (Sp)
- DRAM 2062 Digital Media** **2 Credit Hours**
Prerequisite: DRAM 1133; majors only. A course in basic visual design principles, concepts, and techniques of computer-aided design and rendering for the theatre. (F)
- DRAM 2141 Stage Management Seminar II** **1 Credit Hour**
Prerequisite: 1141 or permission of instructor. A weekly forum for sharing insights and solving problems on current production assignment, as well as examining the bigger picture of stage management and theatre in America today. (F, Sp)
- DRAM 2153 Scene Design** **3 Credit Hours**
Prerequisite: 1124 and 1133. Acquaints the student with the practical and aesthetic principles involved, and provides experience in designing scenery. (F)
- DRAM 2223 Lighting Design** **3 Credit Hours**
Prerequisite: DRAM 1134, majors only. Acquaints the student with advanced design, presentation, visual awareness and "styles" in lighting design. Includes practical production applications. (F)
- DRAM 2233 Introduction to Technical Production** **3 Credit Hours**
Prerequisite: 1114, 1124, and major in drama. Survey of technical production skills in scene technology and costume technology including communications. Shop management and safety. (F)
- DRAM 2243 Draping And Pattern Drafting I** **3 Credit Hours**
Prerequisite: permission of instructor, and sophomore standing. Topics and experiences related to draping skills and pattern drafting for the theatre. Demonstrations and hands-on experience using techniques discussed. Laboratory (F)
- DRAM 2253 Draping and Pattern Drafting II** **3 Credit Hours**
Prerequisite: 2243. Continuation of 2243. Topics and experiences related to draping skills and pattern drafting for the theatre. Demonstrations and hands-on experience using techniques discussed. Laboratory (Sp)
- DRAM 2323 Stage Movement** **3 Credit Hours**
Prerequisite: 1523. To give the drama student an understanding of the use of the body as an expressive instrument through development of flexibility, strength and coordination. (F)
- DRAM 2333 Advanced Stage Movement** **3 Credit Hours**
Prerequisite: 2323 and sophomore standing. Focuses on physicality as a fundamental element of the actor's craft through manipulation of movement to explore emotional truth, create a character or convey the reality of a particular theatrical world to an audience. (Sp)
- DRAM 2343 History of Costume** **3 Credit Hours**
Prerequisite: permission. Acquaints the student with the costumes worn by people of dramatically significant periods and countries. (Sp)
- DRAM 2413 Sound Techniques** **3 Credit Hours**
Prerequisite: Majors only. A course in the fundamentals of theatrical sound and sound technology. (F)
- DRAM 2423 Drafting for the Theatre** **3 Credit Hours**
Prerequisite: DRAM 1133; majors only. Increases the student's skill in the technical craft of drafting as a major communication device of scenery and lighting designers. Course will use international drafting conventions and U.S.I.T.T. standards. (Irreg.)

- DRAM 2451 Lighting Seminar I 1 Credit Hour**
Prerequisite: May be repeated; maximum 2 credit hours; Majors only, sophomore standing or permission. This course will provide opportunity for students to work on their design or production electrician duties in a mentoring environment. Class will also discuss contemporary trends and issues in the theatrical lighting design industry. (F, Sp)
- DRAM 2503 On-Camera Acting for Non-Majors 3 Credit Hours**
Instructs the student on requirements, discipline and basic techniques of performing on camera, with an appreciation of the full process of creating a film or television production. Non-majors course. (F)
- DRAM 2513 Scene Study for the Actor 3 Credit Hours**
Prerequisite: DRAM 1523; Corequisite: DRAM 1643; majors only. Designed to develop the actor's skill through the intensive study and performance of scenes from modern realistic world theatre. Emphasis will be placed upon building a character, milieu study, and scene structure. (F)
- DRAM 2523 Performing Shakespeare 3 Credit Hours**
Prerequisite: 2513 and permission. Designed to develop the actor's skill through the intensive study and performance of scenes and monologues from Shakespeare and other verse drama. Emphasis will be placed upon handling language with believable and appropriate characterization. (Sp)
- DRAM 2643 Voice and Speech II 3 Credit Hours**
Prerequisite: 1643; corequisite: 2523. Develops the actor's vocal instrument as an integrated and organic function of self and character. Focus on the expressive voice with verse texts. (Sp)
- DRAM 2713 Introduction to Fine Arts 3 Credit Hours**
Lectures, illustrated with slides, motion pictures, recordings and readings, surveying the development of the fine arts (architecture, drama, the visual arts and music) from prehistoric times to the present. Background material will include the religious, political and economic conditions and changes affecting the arts. (F) [IV-AF] .
- DRAM 2731 Dramaturgy Studio 2 1 Credit Hour**
Prerequisite: DRAM 1731, Majors only or permission of instructor. A weekly forum to discuss and explore the role of the dramaturg in production in the Helmerich School of Drama as well as industry practices in the United States. (F, Sp)
- DRAM 2733 Introduction to Dramaturgy 3 Credit Hours**
Prerequisite: DRAM 1513 and ENGL 1213/EXPO 1213; majors only; sophomore standing. Introduces students to basic techniques of dramaturgy: research, text analysis, and collaboration for theatrical production. (F, Sp)
- DRAM 2813 Stage Management 3 Credit Hours**
Prerequisite: sophomore standing. Designed to give theatre students the background and skills to function as a stage manager for theatre, dance, or musical productions. An introductory course covering the basics of the stage manager's process from pre-production through closing as well as discussing professional topics such as theatrical unions, production management, and job opportunities. (F)
- DRAM 2821 Design Drafting for Stage Managers 1 Credit Hour**
Prerequisite: Majors only. Acquaints the stage management student to principles related to theatrical drafting, including terminology, fundamentals, and graphic standards. (F)
- DRAM 2970 Special Topics 1-3 Credit Hours**
Special Topics. 1 to 3 hours. May be repeated; Maximum credit nine hours. Special topics course for content not currently offered in regularly scheduled courses. May include library and/or laboratory research, and field projects. (Irreg.)
- DRAM 3043 Computer Aided Design I for the Theatre 3 Credit Hours**
Prerequisite: Majors only and DRAM 2062. The course will teach students to develop design and rendering skills using computer-aided design software currently used in the entertainment industry. (Sp)
- DRAM 3052 Illustration I: Dry Media 2 Credit Hours**
Prerequisite: 1133 and sophomore standing. Studio class intended to facilitate illustration depicting theatre scenery and costume design through the use of colored pencil and pastel media. Focus on the human form clothed for theatre performance and on scenic rendering and/or vignettes. Exercises will stress the effect of light on the objects and the creation of fullness/plasticity. (F)
- DRAM 3053 Computer Aided Design II for the Theatre 3 Credit Hours**
Prerequisite: Majors only and DRAM 3043. Covers the creation and manipulation of 3D objects, and developing those objects as design tools for presentation and visualization of a theatre design. Students will develop skills utilizing 3D visualization software currently used in the entertainment industry. (F)
- DRAM 3063 Projection Design 3 Credit Hours**
Prerequisite: Course is not open to freshman; majors only; DRAM 2153, DRAM 2223, and DRAM 3043. This course explores the art and technique of projection design as it relates to theatrical performance and entertainment use. (Sp)
- DRAM 3141 Stage Management Seminar III 1 Credit Hour**
Prerequisite: 1141, 2141 or permission of instructor. A weekly forum for sharing insights and solving problems on current production assignments, as well as examining the bigger picture of stage management and theatre in America. (F,Sp)
- DRAM 3223 Costume Construction Techniques 3 Credit Hours**
Prerequisite: DRAM 2243, junior standing, majors only. Advanced work in the mechanics and technology of costume builder's draft including practical work in the costume shop. (F)
- DRAM 3323 Stage Movement: Theatrical Intimacy 3 Credit Hours**
Prerequisite: DRAM 2323, junior standing, and departmental permission. Introduces students to the basic principles of acting and staging moments of theatrical intimacy. Course focuses on safety, documentation, and storytelling through theatrical intimacy standards. (Irreg.)
- DRAM 3353 Costume Design 3 Credit Hours**
Prerequisite: 1114. Acquaints students with elementary costume design and construction, historical styles, character evaluation and design sources. (F)
- DRAM 3413 Sound Design 3 Credit Hours**
Prerequisite: junior standing and permission of instructor. Provides theatre students with the basic skills and concepts for designing sound as support for a theatrical production. This is a design course providing the necessary skills in script analysis, research, style, sound resources, and sound scoring. (Irreg.)
- DRAM 3433 Advanced Materials for Stage Scenery and Properties 3 Credit Hours**
Prerequisite: 2233 junior standing and permission of instructor. Application of metals, plastics and non-traditional materials in scenic and properties construction. Emphasis on safety and efficacy. (Sp)

- DRAM 3440 Mentored Research Experience 3 Credit Hours**
0 to 3 hours. Prerequisites: ENGL 1113 or equivalent, and permission of instructor. May be repeated; maximum credit 12 hours. For the inquisitive student to apply the scholarly processes of the discipline to a research or creative project under the mentorship of a faculty member. Student and instructor should complete an Undergraduate Research & Creative Projects (URCP) Mentoring Agreement and file it with the URCP office. Not for honors credit. (F, Sp, Su)
- DRAM 3443 Digital Audio Techniques 3 Credit Hours**
Prerequisite: Majors only; DRAM 2413 and DRAM 3413. This course will provide sound design students with an extended understanding of digital audio. Emphasis is placed on editing and manipulating digital audio, understanding digital audio workstations, and adapting digital audio techniques to digital mixers and other digital audio equipment. (F)
- DRAM 3451 Lighting Seminar II 1 Credit Hour**
Prerequisite: May be repeated; Maximum 2 credit hours; DRAM 2223, DRAM 2451, majors only, and junior standing or permission of instructor. This course builds on skills learned in DRAM 2223 and DRAM 2451 through practical application as a Lighting Designer or Production Electrician. Students will continue to develop skills used in the industry, and class will include focused discussions about contemporary trends and issues in theatrical lighting design and production. (F, Sp)
- DRAM 3513 Performing Departures from Realism 3 Credit Hours**
Prerequisite: 2523 and juried audition. Acquaints students with performance theory and practice for non-realistic plays and forms, exploring the material through exercises, improvisations and performances of scripted scenes. (F)
- DRAM 3523 Performing New Plays 3 Credit Hours**
Prerequisite: 2523 and juried audition. Provides practical experiences for the actor in working with playwrights on new, unpublished plays through performances in scenes, staged readings and through text readings in American acting traditions. (Irreg.)
- DRAM 3533 Advanced Shakespeare Performance 3 Credit Hours**
Prerequisites: majors only; junior status; DRAM 2523 and DRAM 2643. Students must have passed their sophomore jury prior to enrolling in this course. Designed to help the student further their skills in rehearsing and performing Shakespeare and other classical texts. Provides advanced training in verse scansion and form, and increases students' knowledge of lesser-known Shakespearean and other Elizabethan texts. (Sp)
- DRAM 3543 Audition Techniques 3 Credit Hours**
Prerequisite: Majors only, junior standing, DRAM 2523, and juried audition. This course is designed to help advanced undergraduate actors learn, hone, and drill audition techniques for theatrical, film/TV, and commercial auditions at the professional level. (F)
- DRAM 3613 Directing I 3 Credit Hours**
Prerequisite: DRAM 2733; majors only. Consists of lectures, demonstrations and exercises performed by members of the class. Includes, but is not limited to: stage management, dramatic and theatrical values of a play, play analysis and various techniques of directing. Laboratory (F)
- DRAM 3623 Directing II 3 Credit Hours**
Prerequisite: 3613. An intensive study for majors only of the craft and techniques involved in the directing of plays. Special emphasis is placed on script analysis; communication with actors; and practical laboratory work in employing these methods. Scenes from major dramatic works are rehearsed and prepared in class with extensive critique and "in-shop training." Laboratory (Irreg.)
- DRAM 3643 Voice And Speech III 3 Credit Hours**
Prerequisite: 2643, junior standing. Develops the actor's vocal instrument as an integrated function of self and character. Work on dialects. (F)
- DRAM 3713 History of the Theatre I 3 Credit Hours**
Prerequisite: junior standing and permission. Acquaints the student with the development of drama, theatre and production procedures through the ages from 500 B.C. to 1780. (F) [IV-WC].
- DRAM 3723 History of the Theatre II 3 Credit Hours**
Prerequisite: junior standing and permission. Continuation of 3713. Acquaints the student with the development of drama, theatre and production procedures through the ages from 1700 to the present. (Sp) [IV-WC].
- DRAM 3731 Dramaturgy Studio 3 1 Credit Hour**
Prerequisite: DRAM 2731, DRAM 2733 or permission of instructor. A weekly forum to discuss and explore the role of the dramaturg in the Helmerich School of Drama as well as industry practices in the United States. (F, Sp)
- DRAM 3753 Dramatic Structures: Story, Genre, Culture, Theory 3 Credit Hours**
Prerequisite: Majors only and DRAM 2733. What shapes do stories take in theater? This course surveys select dramaturgical structures and theories of dramatic composition across performance histories and cultures. In particular, the course focuses on the relationship between dramatic shapes and how these forms continue to exert their influence today. (Irreg.)
- DRAM 3781 Topics in Dramatic Literature 1 Credit Hour**
Prerequisite: DRAM 2733 and ENGL 1213 or EXPO 1213; Majors only. May be repeated; maximum credit 4 hours. Specialized study in selected topics in dramatic literature. (Irreg.)
- DRAM 3822 Stage Management Studio I 2 Credit Hours**
Prerequisite: 2813 and junior standing. May be repeated; maximum credit four hours. Practical experience in stage management on university theatre productions. Laboratory (F, Sp)
- DRAM 3833 Advanced Stage Management 3 Credit Hours**
Prerequisite: 2813 and major in Drama. Advanced studies of stage management. Topics covered include leadership, team-building, organization, communication, interpersonal relations, problem solving and creating a positive work environment. (Sp)
- DRAM 3910 Advanced Rehearsal and Production 1-2 Credit Hours**
1 to 2 hours. Prerequisite: DRAM 1114, DRAM 1124, and DRAM 1134; majors only. May be repeated; maximum credit four hours. Study and practice in an administrative or supervisory capacity of every phase of dramatic production work and management; attendance and critical discussion of plays. Kinds of service are given unit evaluation in terms of relative difficulty and time consumption. Laboratory (Irreg.)
- DRAM 3960 Honors Reading 1-3 Credit Hours**
1 to 3 hours. Prerequisite: Admission to honors program. May be repeated with change of subject; maximum credit six hours. Consists of either reading topics or independent study designated by the instructor in keeping with the student's major program. Covers materials not usually presented in the regular courses. (F, Sp, Su)
- DRAM 3970 Honors Seminar 1-3 Credit Hours**
1 to 3 hours. Prerequisite: admission to Honors Program. May be repeated; maximum credit six hours. Subjects covered vary. Deals with concepts not usually treated in regular courses. (Irreg.)

- DRAM 3980 Honors Research 1-3 Credit Hours**
1 to 3 hours. Prerequisite: admission to Honors Program. May be repeated with change of subject; maximum credit six hours. Provides an opportunity for the gifted Honors candidate to work at a special project in the student's field. (F, Sp, Su)
- DRAM 3990 Independent Study 1-3 Credit Hours**
1 to 3 hours. Prerequisite: permission of instructor and junior standing. May be repeated once with change of content. Independent study may be arranged to study a subject not available through regular course offerings. (F, Sp, Su)
- DRAM 4023 Model Building 3 Credit Hours**
Prerequisite: DRAM 1133; majors only. Acquaints students with the process of building the scenographic model as it relates to the design process. Lecture and Laboratory (Sp)
- DRAM 4073 Developing the Professional Perspective 3 Credit Hours**
Prerequisite: senior standing. Meant to give the artist the life tools to participate and thrive in an artistic lifestyle. (F)
- DRAM G4113 Scene Painting 3 Credit Hours**
Prerequisite: 1114, 1124, 1133. The study and practice of traditional and new scene painting materials and techniques. Individual scene painting problems in the uses of dry pigments, casein, aniline dyes and texture materials. Laboratory (Sp)
- DRAM 4141 Stage Management Seminar IV 1 Credit Hour**
Prerequisite: 1141, 2141, 3141 or permission of instructor. A weekly forum for sharing problems on current production assignments, as well as examining the bigger picture of stage management and theatre in America today. (F, Sp)
- DRAM 4153 Advanced Scene Design 3 Credit Hours**
Prerequisite: DRAM 3053; majors only. An advanced study in scenic design for a variety of theatrical forms, including multiple scene, unit and single settings for dance, drama, musical theatre and opera. (Irreg.)
- DRAM 4163 Lighting Design II 3 Credit Hours**
Prerequisite: DRAM 2223, majors only, and sophomore standing or permission. This course explores specific design techniques and styles in lighting for drama and dance. Students will investigate the differences of each genre as well as become familiar with contemporary and traditional styles found in both. (Sp)
- DRAM 4173 Concert Lighting 3 Credit Hours**
Prerequisite: Majors only; DRAM 2223 and DRAM 3053. This course explores the foundations of musical concert lighting, exploring the history of the art and the techniques used to create it. Students will develop skills in adapting techniques of modern lighting design to musical concert performance. (Sp)
- DRAM 4213 Lighting Design III 3 Credit Hours**
Prerequisite: DRAM 4163, majors only, and junior standing or permission. This course explores specific design techniques and styles in lighting for opera and musical theatre. Students will investigate the differences of each genre as well as become familiar with contemporary and traditional styles found in both. (F)
- DRAM 4233 Costume Crafts for Theatre 3 Credit Hours**
Prerequisite: DRAM 2243, DRAM 2253; junior standing; majors only. Study of and work with special techniques that employ dying and painting of fabrics and other materials used in costume construction; millinery (construction of headgear). Wig-making and the construction of three-dimensional costume elements such as padding to alter the actor's physical appearance. (Sp)
- DRAM G4243 Costume Shop Management 3 Credit Hours**
Prerequisite: 2233, senior standing and permission of instructor. Instruction and experience in shop management including budgeting of resources, time management, personnel, and organization. (Sp)
- DRAM G4253 History of Decor 3 Credit Hours**
Prerequisite: majors only, junior standing and permission of instructor. Survey of interior and exterior decoration with particular emphasis on theatrical application. (F)
- DRAM 4263 Properties and Set Dressing for Theatre, T.V. and Film 3 Credit Hours**
Prerequisite: DRAM 2233, junior standing. The course will provide a foundation of the skills associated with the role of the Properties Master for Theatre, T.V. and Film. Students will explore topics on materials, fabrication, period styles, project management, and shop supervision. (Sp)
- DRAM 4272 Lighting Production 2 Credit Hours**
Prerequisite: DRAM 1134, and DRAM 2223; majors only. The investigation of various lighting crafts including special effects, three-phase power, and lighting console programming. An in-depth study of the role of the master electrician's duties as they are understood in the industry including: power distribution, hang, load-in, and focus sessions. (Irreg.)
- DRAM G4323 Stage Combat I: Unarmed Stage Combat 3 Credit Hours**
Prerequisite: 2323 and senior standing. Introduces students to the basic principles of unarmed stage combat. Course focuses on safety, emotional commitment and developing proficiency in techniques required for certification by society of American fight directors. (Sp)
- DRAM G4333 Stage Combat: Edged Weaponry 3 Credit Hours**
Prerequisite: 2323 and senior standing. Introduces students to the basic principles of armed stage combat using edged weaponry. Course focuses on safety, emotional commitment and developing proficiency in techniques required for certification by society of American fight directors. (Sp.)
- DRAM G4353 Costume Design II 3 Credit Hours**
Prerequisite: DRAM 2343, DRAM 3353; majors only. Promotes an understanding of style as a design consideration and encourages an awareness of the relationships between theatrical styles and historical styles. (Irreg.)
- DRAM 4363 Costume Design III 3 Credit Hours**
Prerequisite: DRAM 2343, DRAM 3353, DRAM 4353; majors only. To further develop costume design students presentation and illustration skills. Also, allows the student to explore every facet of the design process. (Irreg.)
- DRAM 4413 Advanced Sound Design 3 Credit Hours**
Prerequisite: DRAM 3413. The course builds upon the skills developed in DRAM 3413 to hone critical design practices in the art of Sound Design for the theatre. (F)
- DRAM 4423 Sound Scoring 3 Credit Hours**
Prerequisite: DRAM 1811 and DRAM 3413; majors only. Develops music research and compositional skills necessary to provide music sufficient to support the artistic goals of a theatrical production. (Sp)
- DRAM 4451 Lighting Seminar III 1 Credit Hour**
Prerequisite: May be repeated; maximum 2 credit hours; DRAM 3451, majors only, senior standing or permission. This course builds on skills learned in DRAM 3451 through practical application as a Lighting Designer or Production Electrician. Students will further develop skills used in the industry, and class will include focused discussions about contemporary trends and issues in theatrical lighting design and production (F, Sp)

- DRAM 4513 Professional Preparation** **3 Credit Hours**
Prerequisite: Majors only, junior standing, and DRAM 3543. Teaches the skills necessary for the performer to enter the profession; preparation of photos and resumes, training for interviews, preparation for advanced training programs, and an introduction to issues unique to the business. (Sp)
- DRAM G4523 Acting for the Camera** **3 Credit Hours**
Prerequisite: 2523 and jury auditions. Designed to instruct the student in the requirements, discipline, and basic techniques of working on camera as a professional actor, with an appreciation of the full process of creating a film or television program. All work by the student will be videotaped then subsequently replayed with a critique by the instructor. (Sp)
- DRAM 4533 Master Teachers of Acting** **3 Credit Hours**
Prerequisite: DRAM 2523 and permission of instructor; majors only. A juried audition is required for permission. This is a team-taught course intended for upper-division acting students. The course provides 2-3 weeks each of extensive study of the techniques and methods of six legendary American acting teachers of the Stanislavski method. (Irreg.)
- DRAM 4553 Acting for the Camera II** **3 Credit Hours**
Prerequisite: Majors only and DRAM 4523. Designed to continue instructing the student in the requirements, discipline, strategies, business tools, and techniques of working on camera as a professional actor, building on principles established in DRAM 4523. (Sp)
- DRAM 4563 Showcase** **3 Credit Hours**
Prerequisite: Majors only, senior standing, and DRAM 4523. This course is designed to create a flexible structure within which seniors will accomplish Senior Showcase preparation and acquire professional skills, materials, and strategies necessary for the successful navigation of the Senior Showcase process and their careers in the professional industry. (F)
- DRAM 4643 Advanced Voice Extended Usage** **3 Credit Hours**
Prerequisite: juried auditions. Develop the voice for extended usage in combat, laughing, crying, shouting, screaming, topping extraneous noise, and projecting in large or outdoor venues. The foundations of breath, resonance, and the free and open vocal track will be reviewed. Anatomy and care of the voice will be stressed. Theories of voice training will be explored. Practice skills with monologues and short scenes. (Sp)
- DRAM 4731 Dramaturgy Studio 4** **1 Credit Hour**
Prerequisite: Majors only, DRAM 1731, DRAM 2731, and DRAM 3731; may be repeated; maximum credit two hours. A weekly forum to discuss and explore the role of the dramaturg in production in the Helmerich School of Drama as well as industry practices in the United States. (F, Sp)
- DRAM 4733 Dramaturgy Seminar** **3 Credit Hours**
Prerequisite: DRAM 2733 or departmental permission. Designed to train students to do dramaturgy and literary management as they are currently practiced in American theatre. Develops students' skills in theatre research, writing and script analysis which may be applied to the functions of a dramaturg or other artist in the field. (Irreg.)
- DRAM 4743 US Latinx Theater & Politics: 1950s to Today** **3 Credit Hours**
Prerequisite: Majors only and DRAM 2733 or permission of instructor. This class looks at US-based Latinx theater and performance from the mid-twentieth century to today. In its discussions of artists, productions, aesthetics, themes, and companies, the class notes important contributions from theorists in Latinx studies; students will also consider the sociopolitical contexts that surround and shape Latinx theater and performance. (Irreg.)
- DRAM 4752 Season, Sequence, Script: The Art of Critical Selection** **2 Credit Hours**
Prerequisite: Majors only and DRAM 2733. In this course, students will interact with the season selection process at the School of Drama and develop a roundtable appreciation for literary management, artistic leadership, project curation, and institutional outreach. Students will meet with artistic leaders, produce play reports, and pitch a final project of their own. (Irreg.)
- DRAM G4773 Playwriting I** **3 Credit Hours**
Prerequisite: DRAM 2733 and permission of instructor. Study and practice in playwriting. Acquaints the student with dramatic structure and technical limitations placed upon material written for dramatic production and provides experience in writing for the stage. (F, Sp)
- DRAM G4783 Playwriting II** **3 Credit Hours**
Prerequisite: permission. Study and practice in playwriting. Acquaints the student with dramatic structure and technical limitations placed upon material written for dramatic production and provides experience in writing for the stage. (F, Sp)
- DRAM 4803 Capstone Experience** **3 Credit Hours**
Prerequisite: permission of instructor. Advanced, individual project which demonstrates mastery of skills and knowledge in student's area of interest, selected under advisement and guided by appropriate faculty member(s). Take in the senior year, capstone requires written document, either explanatory or evaluative, of the entire capstone project in appropriate research paper format. (F, Sp, Su) [V].
- DRAM 4810 Performance Practicum** **1-2 Credit Hours**
1 to 2 hours. Prerequisite: Departmental permission. May be repeated; maximum credit 8 hours. Study and practice in process and performance as a cast member, dramaturg, or designer of OU theatre productions. (F, Sp)
- DRAM 4822 Stage Management Studio II** **2 Credit Hours**
Prerequisite: 3822 and senior standing. May be repeated; maximum credit four hours. Practical experience in stage management on university theatre productions. Laboratory (F, Sp)
- DRAM G4853 Theatre Management** **3 Credit Hours**
Prerequisite: Junior standing and departmental permission. A study of the fundamental operations of commercial, professional non-profit, stock, dinner, and university theatre in the United States. (F)
- DRAM 4900 Professional Semester** **3-12 Credit Hours**
3 to 12 hours. Prerequisite: junior or senior standing. Internship with a non-academic theatre (or theatre-related) organization which will augment the students academic experiences. (F, Sp, Su)
- DRAM 4940 Special Topics in Theatre** **2-6 Credit Hours**
2 to 6 hours. Prerequisite: May be repeated with change of content; maximum credit 12 hours; Majors only; junior standing or permission of instructor. Varying topics in the study and practice of theatre and drama not covered in regularly scheduled courses or new developments within the area of expertise. (Irreg.)
- DRAM 4960 Directed Readings** **1-4 Credit Hours**
1 to 4 hours. Prerequisite: good standing in University; permission of instructor and dean. May be repeated; maximum credit four hours. Designed for upper-division students who need opportunity to study a specific problem in greater depth than formal course content permits. (Irreg.)

DRAM 4970 Special Topics/Seminar 1-3 Credit Hours

1 to 3 hours. Prerequisite: Senior standing or permission of instructor. May be repeated; maximum credit nine hours. Special topics or seminar course for content not currently offered in regularly scheduled courses. May include library and/or laboratory research and field projects. (Irreg.)

DRAM 4990 Special Studies 2-6 Credit Hours

2 to 6 hours. Prerequisite: permission. May be repeated with change of subject matter; maximum credit 12 hours. A special creative or research project course on an advanced level in any phase of the theatre or drama adapted to the individual student. (F, Sp, Su)

DRAM 5940 Special Topics in Theatre Drama 2-6 Credit Hours

Prerequisite: graduate standing or permission of instructor. For majors only. May be repeated with change of content; maximum credit nine hours. Varying topics in the study and practice of theatre and drama not covered in regularly scheduled courses or new developments within the area of expertise. (Irreg.)

DRAM 5960 Directed Readings 1-3 Credit Hours

1 to 3 hours. Prerequisite: graduate standing and permission of department. May be repeated; maximum credit twelve hours. Directed readings and/or literature reviews under the direction of a faculty member. (F, Sp, Su)

DRAM 5970 Graduate Seminar 1-4 Credit Hours

1 to 4 hours. Prerequisite: 12 hours of drama and graduate standing or permission. May be repeated with change of subject matter; maximum credit 12 hours. (F, Sp, Su)

DRAM 5980 Research for Master's Thesis 2-9 Credit Hours

Variable enrollment, two to nine hours; maximum credit applicable toward degree, six hours. (F, Sp, Su)

DRAM 5990 Special Studies for Graduate Students 2-6 Credit Hours

2 to 6 hours. Prerequisite: permission. May be repeated with change of subject matter; maximum credit each time six hours. (F, Sp, Su)

Theatre: Acting Emphasis, B.F.A.

Minimum Total Credit Hours: 120-130

Major Hours: 80

Minimum Upper-Division Hours: 40

Upper-Division Hours Within Major: 24

Overall GPA - Combined and OU: 2.50

Program Code: B275 P011

Admission

The Helmerich School of Drama follows the basic admission requirements of the University of Oklahoma and the Weitzenhoffer Family College of Fine Arts. Please refer to those sections in this catalog for specific details. In addition, admission to the OU School of Drama is by audition and/or interview only and requires an on-campus audition (for acting emphasis) or portfolio review (for design or technology emphasis), and/or interview (for dramaturgy or stage management emphasis). **Students must be officially accepted into the School of Drama by audition and/or interview before being allowed to enroll for classes.**

The Bachelor of Fine Arts in Drama degree is designed to provide the student with a solid foundation in each basic area of the theatre, with an opportunity to begin specialization in the sophomore year.

Students must choose one of the following emphasis areas.

- **Acting Emphasis** - Students will audition during the second semester of the freshman year.
- **Costume Design Emphasis** - Emphasis review is required for admission to the design/tech emphasis area at the end of the freshman year.
- **Dramaturgy Emphasis** - Students must apply during the second semester of the freshman year.
- **Lighting Design Emphasis** - Emphasis review is required for admission to the design/tech emphasis area at the end of the freshman year.
- **Scenic Design Emphasis** - Emphasis review is required for admission to the design/tech emphasis area at the end of the freshman year.
- **Sound Design Emphasis** - Emphasis review is required for admission to the design/tech emphasis area at the end of the freshman year.
- **Stage Management Emphasis** - Admission must occur no later than the spring semester of the sophomore year.

Major Requirements

A grade of C or better is required in all courses taken within the School of Drama. Audition/Interview is required for admission to degree program.

Drama Core

Code	Title	Credit Hours

Artistic Forms (Core IV) ^{2,3}	3
Social Science (Core III) ²	3
World Culture (Core IV) ²	3
Beginning Language continued (Core I)	0-5
Credit Hours	12-17
Total Credit Hours	120-130

¹ MATH 1473 is recommended.

² The course taken to fulfill the upper-division General Education requirement outside the major may not be chosen from Drama courses.

³ MTHR 3143 is recommended.

- At least **24 hours of upper-division Drama** credit must be earned in residence as a declared major.
- **Bachelor's degrees require a minimum of 40 hours of upper-division (3000-4000) coursework.**
- This plan of study should not be used in lieu of academic advisement.
- *Unless otherwise stated on the degree sheet, the College of Fine Arts does **not** permit coursework to fulfill more than one degree requirement.*

Theatre: Dramaturgy Emphasis, B.F.A.

Minimum Total Credit Hours: 120-130

Major Hours: 80

Minimum Upper-Division Hours: 40

Upper-Division Hours Within Major: 24

Overall GPA - Combined and OU: 2.50

Program Code: B275 P186

Admission

The Helmerich School of Drama follows the basic admission requirements of the University of Oklahoma and the Weitzenhoffer Family College of Fine Arts. Please refer to those sections in this catalog for specific details. In addition, admission to the OU School of Drama is by audition and/or interview only and requires an on-campus audition (for acting emphasis) or portfolio review (for design or technology emphasis), and/or interview (for dramaturgy or stage management emphasis). **Students must be officially accepted into the School of Drama by audition and/or interview before being allowed to enroll for classes.**

The Bachelor of Fine Arts in Drama degree is designed to provide the student with a solid foundation in each basic area of the theatre, with an opportunity to begin specialization in the sophomore year.

Students must choose one of the following emphasis areas.

- **Acting Emphasis** - Students will audition during the second semester of the freshman year.
- **Costume Design Emphasis** - Emphasis review is required for admission to the design/tech emphasis area at the end of the freshman year.
- **Dramaturgy Emphasis** - Students must apply during the second semester of the freshman year.
- **Lighting Design Emphasis** - Emphasis review is required for admission to the design/tech emphasis area at the end of the freshman year.
- **Scenic Design Emphasis** - Emphasis review is required for admission to the design/tech emphasis area at the end of the freshman year.
- **Sound Design Emphasis** - Emphasis review is required for admission to the design/tech emphasis area at the end of the freshman year.
- **Stage Management Emphasis** - Admission must occur no later than the spring semester of the sophomore year.

Major Requirements

A grade of C or better is required in all courses taken within the School of Drama. Audition/Interview is required for admission to degree program.

Drama Core

Code	Title	Credit Hours
DRAM 1114	Costume Construction	4
DRAM 1124	Stagecraft	4
DRAM 1134	Stage Lighting and Sound	4
DRAM 1411	Makeup	1
DRAM 1513	Introduction to Acting	3
DRAM 2013	Introduction to Theatrical Design and Production	3
DRAM 2733	Introduction to Dramaturgy	3
DRAM 3613	Directing I	3
DRAM 3910	Advanced Rehearsal and Production	1
The following courses are satisfied in General Education Requirements:		
DRAM 3713	History of the Theatre I (Core IV)	
DRAM 3723	History of the Theatre II (Core IV)	

Total Credit Hours **26**

Drama Emphasis Areas

Dramaturgy Emphasis - Students must apply during the second semester of the freshman year.

Dramaturgy Emphasis

Code	Title	Credit Hours
Dramaturgy Core		
DRAM 1731	Dramaturgy Studio 1	1
DRAM 2731	Dramaturgy Studio 2	1
DRAM 3731	Dramaturgy Studio 3	1
DRAM 3753	Dramatic Structures: Story, Genre, Culture, Theory	3
DRAM 4731	Dramaturgy Studio 4	1
DRAM 4733	Dramaturgy Seminar	3
DRAM 4752	Season, Sequence, Script: The Art of Critical Selection	2
Choose one of the following design/production courses:		
DRAM 2153	Scene Design	3
DRAM 2223	Lighting Design	
DRAM 2813	Stage Management	
DRAM 3353	Costume Design	
DRAM 3413	Sound Design	

Performance Histories & Structures

One additional course in the history/structure of a performing art/artistic discipline 3

Students will choose from a department-maintained list of approved courses (p. 1470)

Dramatic Literature

Choose 3 hours in dramatic literature 3

Students will choose from a department-maintained list of approved courses (p. 1470)	
Shakespeare	
Choose one of the following pairs:	6
DRAM 2523 Performing Shakespeare & DRAM 2643 and Voice and Speech II ¹	
ENGL 4523 Shakespeare Comedies & ENGL 4533 and Shakespeare Tragedies	
Advised Drama Electives	
Choose 12 hours of DRAM courses from a department-maintained list (p. 1470)	12
Advised General Electives	
Choose fifteen hours of non-DRAM courses ²	15
Total Credit Hours	54

¹ For this option, students must have taken DRAM 1523 to fulfill their Dramatic Literature course and DRAM 1643 and DRAM 2513 as part of their Advised Drama Electives; all three courses are prerequisites for DRAM 2523 and DRAM 2643

² Courses used to fulfill General Education and/or major requirements may **not** fulfill electives. Dramaturgy Emphasis students are encouraged to dedicate their General Advised Electives toward fulfilling the requirements of a minor in a specialty of their choosing

General Education and College Requirements

Courses designated as Core I, II, III, IV, or V are part of the General Education curriculum. Students must complete a minimum of 40 hours of General Education courses, chosen from the approved list, including at least one upper-division General Education course outside of the student's major. **Courses graded P/NP will not apply.**

- At least **24 hours of upper-division Drama** credit must be earned in residence as a declared major.
- **Bachelor's degrees require a minimum of 40 hours of upper-division (3000-4000) coursework.**
- This plan of study should not be used in lieu of academic advisement.
- *Unless otherwise stated on the degree sheet, the College of Fine Arts does **not** permit coursework to fulfill more than one degree requirement.*

Theatre: Scenic Design Emphasis, B.F.A.

Minimum Total Credit Hours: 120-130

Major Hours: 80

Minimum Upper-Division Hours: 40

Upper-Division Hours Within Major: 24

Overall GPA - Combined and OU: 2.50

Program Code: B275 P589

Admission

The Helmerich School of Drama follows the basic admission requirements of the University of Oklahoma and the Weitzenhoffer Family College of Fine Arts. Please refer to those sections in this catalog for specific details. In addition, admission to the OU School of Drama is by audition and/or interview only and requires an on-campus audition (for acting emphasis) or portfolio review (for design or technology emphasis), and/or interview (for dramaturgy or stage management emphasis). **Students must be officially accepted into the School of Drama by audition and/or interview before being allowed to enroll for classes.**

The Bachelor of Fine Arts in Drama degree is designed to provide the student with a solid foundation in each basic area of the theatre, with an opportunity to begin specialization in the sophomore year.

Students must choose one of the following emphasis areas.

- **Acting Emphasis** - Students will audition during the second semester of the freshman year.
- **Costume Design Emphasis** - Emphasis review is required for admission to the design/tech emphasis area at the end of the freshman year.
- **Dramaturgy Emphasis** - Students must apply during the second semester of the freshman year.

- **Lighting Design Emphasis** - Emphasis review is required for admission to the design/tech emphasis area at the end of the freshman year.
- **Scenic Design Emphasis** - Emphasis review is required for admission to the design/tech emphasis area at the end of the freshman year.
- **Sound Design Emphasis** - Emphasis review is required for admission to the design/tech emphasis area at the end of the freshman year.
- **Stage Management Emphasis** - Admission must occur no later than the spring semester of the sophomore year.

Major Requirements

A grade of C or better is required in all courses taken within the School of Drama. Audition/Interview is required for admission to degree program.

Theatre, Minor

Minimum Total Credit Hours: 18

Program Code: N859

The requirements for a minor must be completed concurrently with the major degree requirements.

No minor may be added by completing courses after receiving the bachelor's degree.

No single course may be used by a student to satisfy a major requirement and a minor requirement.

Students must earn a minimum grade of C in each course.

A minimum of 9 hours must be upper division courses.

The Minor in Theatre is available to all undergraduate students at OU.

Required Courses

Code	Title	Credit Hours

General Requirements for all Master's Degrees

The master's degree requires the equivalent of *at least* two semesters of satisfactory graduate work and additional work as may be prescribed for the degree.

All coursework applied to the master's degree must carry graduate credit.

Master's degree programs which require a thesis consist of *at least* 30 credit hours. All non-thesis master's degree programs require *at least* 30 credit hours.

Credit transferred from other institutions must meet specific criteria and is subject to certain limitations.

Courses completed through correspondence study may *not* be applied to the master's degree.

To qualify for a graduate degree, students must achieve an overall grade point average of 3.0 or higher in the degree program coursework and in all resident graduate coursework attempted. A student must also have at least a 3.0 in all coursework (including undergraduate coursework if any).

Additional information for master's degree students may be found in the Graduate College Bulletin.

General Information

The School of Music offers curricula for those who choose to pursue professional careers in music, as well as opportunities for all University of Oklahoma students who may wish to acquaint themselves with music as listeners or participants. The school emphasizes and encourages creativity and research and provides avenues for the students to develop their powers of personal expression through performance, composition, historical, analytical and pedagogical disciplines.

The faculty includes artists and scholars who are nationally known in the fields of performance, composition, education, history and theory. Recitals, concerts, lectures, guest artists, operas, and seminars provide the students with a wide range of opportunities for musical and intellectual growth.

The OU School of Music is housed in three buildings: Stanley B. Catlett, Sr. Music Center, Donald W. Reynolds Performing Arts Center and Carpenter Hall. The Catlett Music Center contains the School of Music administrative offices, faculty offices and studios, rehearsal suites, classrooms, MIDI lab, the Grant Fine Arts Library, a recording studio, and three performance halls, including the Paul F. Sharp Concert Hall, Morris R. Pitman Recital Hall, and Grayce B. Kerr Gothic Hall. The Donald W. Reynolds Performing Arts Center houses faculty offices and the restored Holmberg auditorium used by the OU Opera program. Directly adjacent to the Reynolds Performing Arts Center is the Crawford Music Practice Wing, consisting of 47 practice rooms and an all-Steinway inventory of pianos. Studios for the voice and piano faculty members are currently located in Carpenter Hall.

The OU School of Music is a fully accredited institutional member of the National Association of Schools of Music, and the requirements for admission and graduation are in accordance with the published regulations of the N.A.S.M.

Programs for Academic Excellence

The School of Music offers numerous performing opportunities to all University students, regardless of their major. For students who demonstrate sufficient musical ability to qualify, the following ensembles are available: Campus Bands, Wind Symphony, Symphony Band, Basketball Band, University Orchestra, University Chorale, Men's Glee Club, Women's Chorus, Opera, Collegium Musicum, the Pride of Oklahoma Marching Band, Trombone Choir, Jazz Ensembles, Percussion Ensembles, Sooner Bassooners, New Century Ensemble, New Century Improv Ensemble, and numerous additional performing groups such as woodwind and brass quintets, string quartets, and trios. Students should consult music.ou.edu and each ensemble's director regarding membership and audition requirements.

All undergraduate students majoring in music are required to participate in a major ensemble for 4 - 8 semesters, depending on their degree plan. Major ensembles include the Pride of Oklahoma Marching Band, Symphony Band, Wind Symphony, Symphony Orchestra, University Chorale, Women's Chorus and Men's Glee Club. As each music degree program is unique, students should consult their degree requirements and consult with their advisor regarding their ensemble participation obligations.

Scholarships, Awards and Financial Aid

Tuition waivers and cash scholarships are awarded on the merits of the audition for admission to the School of Music, and renewal is based on the student's musical and academic performance each year. Students are eligible for other scholarships and awards once they have matriculated to the University of Oklahoma. Information about these awards are available at OU Scholarships. Additional financial aid is available to qualified students through the University of Oklahoma Student Financial Center.

Graduate assistantships are available in voice, piano, choral conducting, wind conducting, orchestral conducting, music theory, composition, musicology, music education, and applied music. International students offered graduate assistantships may be required to pass a series of English exams administered by the English Assessment office prior to being appointed. Interested students should contact the office of the School of Music's Assistant Director for Graduate Studies and/or their intended major professor.

Undergraduate Study

- Music: Instrumental Jazz, B.A. (p. 1514)
- Music, B.A. (p. 1517)
- Composition, B.Mus. (p. 1519)
- Organ, B.Mus. (p. 1522)
- Piano, B.Mus. (p. 1524)
- Piano Pedagogy, B.Mus. (p. 1526)
- Voice, B.Mus. (p. 1529)
- W/P/S:Brass & Percussion, B.Mus. (p. 1531)
- W/P/S:Harp, B.Mus. (p. 1534)
- W/P/S:Strings & Guitar, B.Mus. (p. 1536)
- W/P/S:Woodwinds, B.Mus. (p. 1539)
- Music, B.M.A. (p. 1541)
- Instrumental Music Education, B.M.Ed. (p. 1544)
- Vocal Music Education, B.M.Ed. (p. 1547)
- Commercial Music, Minor (p. 1551)
- Instrumental Jazz, Minor (p. 1551)
- Music, Minor (p. 1552)
- Wind, Percussion, String, D.M.A. (p. 1569)

Admission

The School of Music accepts the admission requirements of the University of Oklahoma for incoming freshmen and transfer students. In addition to these general requirements for admission, all students must audition and be accepted into a studio in the major applied instrument/voice area before enrolling as a music major. Additional materials may be required from students interested in pursuing a Music Education degree - for more information, please consult with the School of Music's Assistant Director of Recruitment and Engagement or email undergradmusic@ou.edu.

Degree Requirements

All students who are candidates for the Bachelor of Music, Bachelor of Musical Arts and Bachelor of Music Education degrees must satisfactorily pass sophomore proficiency and piano proficiency requirements. Students with prior experience on the piano may take a piano skills examination to determine placement in an appropriate piano class or private studio.

Degree Recitals

All candidates for baccalaureate degrees in music, with the exception of the Bachelor of Arts, must present public degree recitals. All recitals presented in partial fulfillment of degree requirements must be previewed and approved by a faculty committee prior to scheduling the recital.

Validation of Transfer Credit for Applied Study

Transfer students whose advancement is below the junior level and who expect to continue their studies must enroll in Applied Music 2020 and will be examined at the end of the semester for placement in a course sequence and validation of transfer credit. All other students wishing to validate transfer credit in applied music should consult with their studio professor and the academic advisor for the School of Music.

Class Attendance

Students are expected to attend every class session and private lesson as scheduled. Instructors in applied music are required to make up lessons that they cancel for personal reasons. Instructors are not required to make up lessons missed by the failure of the student

to attend, nor those missed on occasions when the instructors are requested to leave the campus as official representatives of the University.

Recital Attendance

All music students must earn a grade of Satisfactory in Music Orientation plus grades of Satisfactory in three additional semesters of Recital Attendance.

Grade Requirements

A grade of C or better is required in all courses taken within the School of Music. Any courses in which a D is earned must be repeated until a grade of C or better is achieved. Courses graded P/NP (pass/fail) may not be used to fulfill requirements for a music degree; all coursework must be letter graded.

Enrollment Limitation

If a student has enrolled in a required course three times and does not receive a C or better, the student will not be allowed to pursue any music degree program for which that course is a requirement.

This regulation concerning the limit to repetitions of a course **does not** apply to applied music study nor to ensemble study.

Graduate Study

The School of Music at the University of Oklahoma offers the following graduate programs.

- Commercial Music, Minor (p. 1551)
- Choral Conducting, M.M. (p. 1552)
- Instrumental Conducting, M.M. (p. 1553)
- Music Composition, M.M. (p. 1553)
- Music Theory, M.M. (p. 1554)
- Musicology, M.M. (p. 1555)
- Organ: Standard, M.M. (p. 1555)
- Organ: Church Music, M.M. (p. 1556)
- Organ: Technology, M.M. (p. 1556)
- Piano: Performance, M.M. (p. 1557)
- Piano: Performance and Pedagogy, M.M. (p. 1558)
- Voice: Opera, M.M. (p. 1558)
- Voice: Performance, M.M. (p. 1559)
- Wind, Percussion, String, M.M. (p. 1560)
- Conducting, M.M.Ed. (p. 1560)
- General Music Education, M.M.Ed. (p. 1561)
- Instrumental, M.M.Ed. (p. 1563)
- Piano Pedagogy, M.M.Ed. (p. 1563)
- Conducting, D.M.A. (p. 1564)
- Music Composition, D.M.A. (p. 1565)
- Piano, D.M.A. (p. 1566)
- Organ, D.M.A. (p. 1567)
- Voice, D.M.A. (p. 1568)
- Wind, Percussion, String, D.M.A. (p. 1569)
- Music Education, Ph.D. (p. 1569)

The following D.M.A. programs are also offered, contact the School of Music for more information:

- Music Composition, D.M.A.
- Piano, D.M.A.
- Voice, D.M.A.
- Wind/Percussion/String, D.M.A.

For further information, please visit the School of Music website or call the Graduate Music Office at (405) 325-5393.

Courses

BASN 2000 Freshman and/or Sophomore Secondary Bassoon 1-2 Credit Hours

1 to 2 hours. Prerequisite: permission of adviser and instructor. May be repeated; maximum credit toward B.F.A., B.M.A., B.M.E., and B.M. degrees, eight hours. For freshman and sophomore music students studying in a secondary (or minor) performance area. (F, Sp, Su)

BASN 2020 Bassoon for Music Majors; Freshman/Sophomore 2-4 Credit Hours

2 to 4 hours. Prerequisite: Majors only. May be repeated; maximum credit 12 hours. Applied instrumental lessons for freshmen and sophomore music majors in a School of Music degree program. (F, Sp)

BASN 3440 Mentored Research Experience 3 Credit Hours

0 to 3 hours. Prerequisites: ENGL 1113 or equivalent, and permission of instructor. May be repeated; maximum credit 12 hours. For the inquisitive student to apply the scholarly processes of the discipline to a research or creative project under the mentorship of a faculty member. Student and instructor should complete an Undergraduate Research & Creative Projects (URCP) Mentoring Agreement and file it with the URCP office. Not for honors credit. (F, Sp, Su)

BASN 4000 Junior and/or Senior Secondary Bassoon 1-2 Credit Hours

1 to 2 hours. Prerequisite: permission of adviser and instructor. May be repeated; maximum credit toward B.F.A., B.M.A., B.M.E., and B.M. degrees, eight hours. For junior and senior music students studying in a secondary (or minor) performance area. (F, Sp, Su)

BASN 4020 Bassoon for Music Majors: Junior/Senior 1-4 Credit Hours

1 to 4 hours. Prerequisite: Majors only; junior standing. May be repeated; maximum credit 20 hours. Applied instrumental lessons for junior and senior music majors in a School of Music degree program. (F, Sp)

BASN 5000 Master's Level Secondary Bassoon 1-2 Credit Hours

1 to 2 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For master's degree music students studying in a secondary (or minor) performance area. (F, Sp, Su)

BASN 5010 Master's-Level Bassoon for Non-Performance Music Majors 1-3 Credit Hours

1 to 3 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For master's degree students other than performance majors in their major field. (F, Sp, Su)

BASN 5020 Master's-Level Bassoon for Performance Majors 2-4 Credit Hours

2 to 4 hours. Prerequisite: graduate standing in music; permission of adviser and instructor; 4020 and 4021 or equivalent. May be repeated; maximum credit toward an M.M. degree 10 hours. (F, Sp, Su)

BASN 6000 Doctoral Secondary Bassoon 1-2 Credit Hours

1 to 2 hours. Prerequisite: graduate standing in music, permission of adviser or instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For doctoral degree music students studying in a secondary (or minor) performance area. (F, Sp, Su)

BASN 6010 Doctoral Bassoon for Non-Performance Music Majors 2-3 Credit Hours

2 to 3 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated. Doctoral-level study of applied music in the major performance area for students other than performance majors in their primary field. (F, Sp, Su)

BASN 6020 Doctoral Bassoon for Performance Majors 2-4 Credit Hours

2 to 4 hours. Prerequisite: graduate standing in music; 5042; permission of adviser and instructor. May be repeated; credit applicable toward applied music requirements for the Doctor of Musical Arts degree. Doctoral-level study of applied music for performance majors in their primary field. (F, Sp, Su)

BASS 2000 Freshman and/or Sophomore Secondary Bass 1-2 Credit Hours

1 to 2 hours. Prerequisite: permission of adviser and instructor. May be repeated; maximum credit toward B.F.A., B.M.A., B.M.E., and B.M. degrees, eight hours. For freshman and sophomore music students studying in a secondary (or minor) performance area. (F, Sp, Su)

BASS 2020 Bass for Music Majors: Freshman/Sophomore 2-4 Credit Hours

2 to 4 hours. Prerequisite: Majors only. May be repeated; maximum credit 12 hours. Applied instrumental lessons for freshmen and sophomore music majors in a School of Music degree program. (F, Sp)

BASS 3440 Mentored Research Experience 3 Credit Hours

0 to 3 hours. Prerequisites: ENGL 1113 or equivalent, and permission of instructor. May be repeated; maximum credit 12 hours. For the inquisitive student to apply the scholarly processes of the discipline to a research or creative project under the mentorship of a faculty member. Student and instructor should complete an Undergraduate Research & Creative Projects (URCP) Mentoring Agreement and file it with the URCP office. Not for honors credit. (F, Sp, Su)

BASS 4000 Junior and/or Senior Secondary Bass 1-2 Credit Hours

1 to 2 hours. Prerequisite: permission of adviser and instructor. May be repeated; maximum credit toward B.F.A., B.M.A., B.M.E., and B.M. degrees, eight hours. For junior and senior music students studying in a secondary (or minor) performance area. (F, Sp, Su)

BASS 4020 Bass for Music Majors: Junior/Senior 1-4 Credit Hours

1 to 4 hours. Prerequisite: Majors only; junior standing. May be repeated; maximum credit 20 hours. Applied instrumental lessons for junior and senior music majors in a School of Music degree program. (F, Sp)

BASS 5000 Master's Level Secondary Bass 1-2 Credit Hours

1 to 2 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For master's degree music students studying in a secondary (or minor) performance area. (F, Sp, Su)

BASS 5010 Master's-Level Bass for Non-Performance Music Majors 1-3 Credit Hours

1 to 3 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For master's degree students other than performance majors in their major field. (F, Sp, Su)

BASS 5020 Master's-Level Bass for Performance Majors 2-4 Credit Hours

2 to 4 hours. Prerequisite: graduate standing in music; permission of adviser and instructor; 4020 and 4021 or equivalent. May be repeated; maximum credit toward an M.M. degree 10 hours. (F, Sp, Su)

- BASS 6000 Doctoral Secondary Bass 1-2 Credit Hours**
1 to 2 hours. Prerequisite: graduate standing in music, permission of adviser or instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For doctoral degree music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- BASS 6010 Doctoral Bass for Non-Performance Music Majors 2-3 Credit Hours**
2 to 3 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated. Doctoral-level study of applied music in the major performance area for students other than performance majors in their primary field. (F, Sp, Su)
- BASS 6020 Doctoral Bass for Performance Majors 2-4 Credit Hours**
2 to 4 hours. Prerequisite: graduate standing in music; 5042; permission of adviser and instructor. May be repeated; credit applicable toward applied music requirements for the Doctor of Musical Arts degree. Doctoral-level study of applied music for performance majors in their primary field. (F, Sp, Su)
- CELO 2000 Freshman and/or Sophomore Secondary Cello 1-2 Credit Hours**
1 to 2 hours. Prerequisite: permission of adviser and instructor. May be repeated; maximum credit toward B.F.A., B.M.A., B.M.E., and B.M. degrees, eight hours. For freshman and sophomore music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- CELO 2020 Cello for Music Majors: Freshman/Sophomore 2-4 Credit Hours**
2 to 4 hours. Prerequisite: Majors only. May be repeated; maximum credit 12 hours. Applied instrumental lessons for freshmen and sophomore music majors in a School of Music degree program. (F, Sp)
- CELO 3440 Mentored Research Experience 3 Credit Hours**
0 to 3 hours. Prerequisites: ENGL 1113 or equivalent, and permission of instructor. May be repeated; maximum credit 12 hours. For the inquisitive student to apply the scholarly processes of the discipline to a research or creative project under the mentorship of a faculty member. Student and instructor should complete an Undergraduate Research & Creative Projects (URCP) Mentoring Agreement and file it with the URCP office. Not for honors credit. (F, Sp, Su)
- CELO 4000 Junior and/or Senior Secondary Cello 1-2 Credit Hours**
1 to 2 hours. Prerequisite: permission of adviser and instructor. May be repeated; maximum credit toward B.F.A., B.M.A., B.M.E., and B.M. degrees, eight hours. For junior and senior music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- CELO 4020 Cello for Music Majors: Junior/Senior 1-4 Credit Hours**
1 to 4 hours. Prerequisite: Majors only; junior standing. May be repeated; maximum credit 20 hours. Applied instrumental lessons for junior and senior music majors in a School of Music degree program. (F, Sp)
- CELO 5000 Master's-Level Secondary Cello 1-2 Credit Hours**
1 to 2 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For master's degree music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- CELO 5010 Master's-Level Cello for Non-Performance Music Majors 1-3 Credit Hours**
1 to 3 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For master's degree students other than performance majors in their major field. (F, Sp, Su)
- CELO 5020 Master's-Level Cello For Performance Majors 2-4 Credit Hours**
2 to 4 hours. Prerequisite: graduate standing in music; permission of adviser and instructor; 4020 and 4021 or equivalent. May be repeated; maximum credit toward an M.M. degree 10 hours. (F, Sp, Su)
- CELO 6000 Doctoral Secondary Cello 1-2 Credit Hours**
1 to 2 hours. Prerequisite: graduate standing in music, permission of adviser or instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For doctoral degree music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- CELO 6010 Doctoral Cello for Non-Performance Music Majors 2-3 Credit Hours**
2 to 3 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated. Doctoral-level study of applied music in the major performance area for students other than performance majors in their primary field. (F, Sp, Su)
- CELO 6020 Doctoral Cello for Performance Majors 2-4 Credit Hours**
2 to 4 hours. Prerequisite: graduate standing in music; 5042; permission of adviser and instructor. May be repeated; credit applicable toward applied music requirements for the Doctor of Musical Arts degree. Doctoral-level study of applied music for performance majors in their primary field. (F, Sp, Su)
- CLAR 2000 Freshman and/or Sophomore Secondary Clarinet 1-2 Credit Hours**
1 to 2 hours. Prerequisite: permission of adviser and instructor. May be repeated; maximum credit toward B.F.A., B.M.A., B.M.E., and B.M. degrees, eight hours. For freshman and sophomore music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- CLAR 2020 Clarinet for Music Majors: Freshman/Sophomore 2-4 Credit Hours**
2 to 4 hours. Prerequisite: Majors only. May be repeated; maximum credit 12 hours. Applied instrumental lessons for freshmen and sophomore music majors in a School of Music degree program. (F, Sp)
- CLAR 3440 Mentored Research Experience 3 Credit Hours**
0 to 3 hours. Prerequisites: ENGL 1113 or equivalent, and permission of instructor. May be repeated; maximum credit 12 hours. For the inquisitive student to apply the scholarly processes of the discipline to a research or creative project under the mentorship of a faculty member. Student and instructor should complete an Undergraduate Research & Creative Projects (URCP) Mentoring Agreement and file it with the URCP office. Not for honors credit. (F, Sp, Su)
- CLAR 4000 Junior and/or Senior Secondary Clarinet 1-2 Credit Hours**
1 to 2 hours. Prerequisite: permission of adviser and instructor. May be repeated; maximum credit toward B.F.A., B.M.A., B.M.E., and B.M. degrees, eight hours. For junior and senior music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- CLAR 4020 Clarinet for Music Majors: Junior/Senior 1-4 Credit Hours**
1 to 4 hours. Prerequisite: Majors only; junior standing. May be repeated; maximum credit 20 hours. Applied instrumental lessons for junior and senior music majors in a School of Music degree program. (F, Sp)
- CLAR 5000 Master's-Level Secondary Clarinet 1-2 Credit Hours**
1 to 2 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For master's degree music students studying in a secondary (or minor) performance area. (F, Sp, Su)

- CLAR 5010 Master's-Level Clarinet for Non-Performance Music Majors 1-3 Credit Hours**
1 to 3 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For master's degree students other than performance majors in their major field. (F, Sp, Su)
- CLAR 5020 Master's-Level Clarinet for Performance Majors 2-4 Credit Hours**
2 to 4 hours. Prerequisite: graduate standing in music; permission of adviser and instructor; 4020 and 4021 or equivalent. May be repeated; maximum credit toward an M.M. degree 10 hours. (F, Sp, Su)
- CLAR 6000 Doctoral Secondary Clarinet 1-2 Credit Hours**
1 to 2 hours. Prerequisite: graduate standing in music, permission of adviser or instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For doctoral degree music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- CLAR 6010 Doctoral Clarinet for Non-Performance Music Majors 2-3 Credit Hours**
2 to 3 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated. Doctoral-level study of applied music in the major performance area for students other than performance majors in their primary field. (F, Sp, Su)
- CLAR 6020 Doctoral Clarinet for Performance Majors 2-4 Credit Hours**
2 to 4 hours. Prerequisite: graduate standing in music; 5042; permission of adviser and instructor. May be repeated; credit applicable toward applied music requirements for the Doctor of Musical Arts degree. Doctoral-level study of applied music for performance majors in their primary field. (F, Sp, Su)
- COMP 2000 Freshman and/or Sophomore Secondary Composition 1-2 Credit Hours**
1 to 2 hours. Prerequisite: permission of adviser and instructor. May be repeated; maximum credit toward B.F.A., B.M.A., B.M.E., and B.M. degrees, eight hours. For freshman and sophomore music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- COMP 2020 Freshman and/or Sophomore Composition for Performance Majors 2-4 Credit Hours**
1 to 4 hours. Prerequisite: permission of adviser and instructor. May be repeated; maximum credit toward the B.M. degree, eight hours. For freshman and sophomore music students in the B.M. (Performance or Composition majors) degree program who are studying in the major performance area. (F, Sp, Su)
- COMP 3440 Mentored Research Experience 3 Credit Hours**
0 to 3 hours. Prerequisites: ENGL 1113 or equivalent, and permission of instructor. May be repeated; maximum credit 12 hours. For the inquisitive student to apply the scholarly processes of the discipline to a research or creative project under the mentorship of a faculty member. Student and instructor should complete an Undergraduate Research & Creative Projects (URCP) Mentoring Agreement and file it with the URCP office. Not for honors credit. (F, Sp, Su)
- COMP 4000 Junior and/or Senior Secondary Composition 1-2 Credit Hours**
1 to 2 hours. Prerequisite: permission of adviser and instructor. May be repeated; maximum credit toward B.F.A., B.M.A., B.M.E., and B.M. degrees, eight hours. For junior and senior music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- COMP 4020 Junior and/or Senior Composition for Performance Majors 4 Credit Hours**
1 to 4 hours. Prerequisite: permission of adviser and instructor. May be repeated; maximum credit toward the B.M. degree 14 hours. May be elected for two hours credit only during summer session. For junior and senior music students in the B.M. (Performance or Composition majors) degree program who are studying in the major performance area. (F, Sp, Su)
- COMP 5000 Master's-Level Secondary Composition 1-2 Credit Hours**
1 to 2 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For master's degree music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- COMP 5010 Master's-Level Composition for Non-Performance Music Majors 1-3 Credit Hours**
1 to 3 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For master's degree students other than performance majors in their major field. (F, Sp, Su)
- COMP 5020 Master's-Level Composition for Performance Majors 2-4 Credit Hours**
2 to 4 hours. Prerequisite: graduate standing in music; permission of adviser and instructor; 4020 and 4021 or equivalent. May be repeated; maximum credit toward an M.M. degree 10 hours. (F, Sp, Su)
- COMP 6000 Doctoral Secondary Composition 1-2 Credit Hours**
1 to 2 hours. Prerequisite: graduate standing in music, permission of adviser or instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For doctoral degree music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- COMP 6010 Doctoral Composition for Non-Performance Music Majors 2-3 Credit Hours**
2 to 3 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated. Doctoral-level study of applied music in the major performance area for students other than performance majors in their primary field. (F, Sp, Su)
- COMP 6020 Doctoral Composition for Performance Majors 2-4 Credit Hours**
2 to 4 hours. Prerequisite: graduate standing in music; 5042; permission of adviser and instructor. May be repeated; credit applicable toward applied music requirements for the Doctor of Musical Arts degree. Doctoral-level study of applied music for performance majors in their primary field. (F, Sp, Su)
- EUPH 2000 Freshman and/or Sophomore Secondary Euphonium 1-2 Credit Hours**
1 to 2 hours. Prerequisite: permission of adviser and instructor. May be repeated; maximum credit toward B.F.A., B.M.A., B.M.E., and B.M. degrees, eight hours. For freshman and sophomore music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- EUPH 2020 Euphonium for Music Majors: Freshman/Sophomore 2-4 Credit Hours**
2 to 4 hours. Prerequisite: Majors only. May be repeated; maximum credit 12 hours. Applied instrumental lessons for freshmen and sophomore music majors in a School of Music degree program. (F, Sp)

EUPH 3440 Mentored Research Experience 3 Credit Hours

0 to 3 hours. Prerequisites: ENGL 1113 or equivalent, and permission of instructor. May be repeated; maximum credit 12 hours. For the inquisitive student to apply the scholarly processes of the discipline to a research or creative project under the mentorship of a faculty member. Student and instructor should complete an Undergraduate Research & Creative Projects (URCP) Mentoring Agreement and file it with the URCP office. Not for honors credit. (F, Sp, Su)

EUPH 4000 Junior and/or Senior Secondary Euphonium 1-2 Credit Hours

1 to 2 hours. Prerequisite: permission of adviser and instructor. May be repeated; maximum credit toward B.F.A., B.M.A., B.M.E., and B.M. degrees, eight hours. For junior and senior music students studying in a secondary (or minor) performance area. (F, Sp, Su)

EUPH 4020 Euphonium for Music Majors: Junior/Senior 1-4 Credit Hours

1 to 4 hours. Prerequisite: Majors only; junior standing. May be repeated; maximum credit 20 hours. Applied instrumental lessons for junior and senior music majors in a School of Music degree program. (F, Sp)

EUPH 5000 Master's-Level Secondary Euphonium 1-2 Credit Hours

1 to 2 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For master's degree music students studying in a secondary (or minor) performance area. (F, Sp, Su)

EUPH 5010 Master's-Level Euphonium for Non-Performance Music Majors 1-3 Credit Hours

1 to 3 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For master's degree students other than performance majors in their major field. (F, Sp, Su)

EUPH 5020 Master's-Level Euphonium for Performance Majors 2-4 Credit Hours

2 to 4 hours. Prerequisite: graduate standing in music; permission of adviser and instructor; 4020 and 4021 or equivalent. May be repeated; maximum credit toward an M.M. degree 10 hours. (F, Sp, Su)

EUPH 6000 Doctoral Secondary Euphonium 1-2 Credit Hours

1 to 2 hours. Prerequisite: graduate standing in music, permission of adviser or instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For doctoral degree music students studying in a secondary (or minor) performance area. (F, Sp, Su)

EUPH 6010 Doctoral Euphonium for Non-Performance Music Majors 2-3 Credit Hours

2 to 3 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated. Doctoral-level study of applied music in the major performance area for students other than performance majors in their primary field. (F, Sp, Su)

EUPH 6020 Doctoral Euphonium for Performance Majors 2-4 Credit Hours

2 to 4 hours. Prerequisite: graduate standing in music; 5042; permission of adviser and instructor. May be repeated; credit applicable toward applied music requirements for the Doctor of Musical Arts degree. Doctoral-level study of applied music for performance majors in their primary field. (F, Sp, Su)

FLUT 2000 Freshman and/or Sophomore Secondary Flute 1-2 Credit Hours

1 to 2 hours. Prerequisite: permission of adviser and instructor. May be repeated; maximum credit toward B.F.A., B.M.A., B.M.E., and B.M. degrees, eight hours. For freshman and sophomore music students studying in a secondary (or minor) performance area. (F, Sp, Su)

FLUT 2020 Flute for Music Majors: Freshman/Sophomore 2-4 Credit Hours

2 to 4 hours. Prerequisite: Majors only. May be repeated; maximum credit 12 hours. Applied instrumental lessons for freshmen and sophomore music majors in a School of Music degree program. (F, Sp)

FLUT 3440 Mentored Research Experience 3 Credit Hours

0 to 3 hours. Prerequisites: ENGL 1113 or equivalent, and permission of instructor. May be repeated; maximum credit 12 hours. For the inquisitive student to apply the scholarly processes of the discipline to a research or creative project under the mentorship of a faculty member. Student and instructor should complete an Undergraduate Research & Creative Projects (URCP) Mentoring Agreement and file it with the URCP office. Not for honors credit. (F, Sp, Su)

FLUT 4000 Junior and/or Senior Secondary Flute 1-2 Credit Hours

1 to 2 hours. Prerequisite: permission of adviser and instructor. May be repeated; maximum credit toward B.F.A., B.M.A., B.M.E., and B.M. degrees, eight hours. For junior and senior music students studying in a secondary (or minor) performance area. (F, Sp, Su)

FLUT 4020 Flute for Music Majors: Junior/Senior 1-4 Credit Hours

1 to 4 hours. Prerequisite: Majors only; junior standing. May be repeated; maximum credit 20 hours. Applied instrumental lessons for junior and senior music majors in a School of Music degree program. (F, Sp)

FLUT 5000 Master's-Level Secondary Flute 1-2 Credit Hours

1 to 2 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For master's degree music students studying in a secondary (or minor) performance area. (F, Sp, Su)

FLUT 5010 Master's-Level Flute for Non-Performance Music Majors 1-3 Credit Hours

1 to 3 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For master's degree students other than performance majors in their major field. (F, Sp, Su)

FLUT 5020 Master's-Level Flute for Performance Majors 2-4 Credit Hours

2 to 4 hours. Prerequisite: graduate standing in music; permission of adviser and instructor; 4020 and 4021 or equivalent. May be repeated; maximum credit toward an M.M. degree 10 hours. (F, Sp, Su)

FLUT 6000 Doctoral Secondary Flute 1-2 Credit Hours

1 to 2 hours. Prerequisite: graduate standing in music, permission of adviser or instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For doctoral degree music students studying in a secondary (or minor) performance area. (F, Sp, Su)

FLUT 6010 Doctoral Flute for Non-Performance Music Majors 2-3 Credit Hours

2 to 3 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated. Doctoral-level study of applied music in the major performance area for students other than performance majors in their primary field. (F, Sp, Su)

- FLUT 6020 Doctoral Flute for Performance Majors 2-4 Credit Hours**
2 to 4 hours. Prerequisite: graduate standing in music; 5042; permission of adviser and instructor. May be repeated; credit applicable toward applied music requirements for the Doctor of Musical Arts degree. Doctoral-level study of applied music for performance majors in their primary field. (F, Sp, Su)
- FR H 2000 Freshman and/or Sophomore Secondary French Horn 1-2 Credit Hours**
1 to 2 hours. Prerequisite: permission of adviser and instructor. May be repeated; maximum credit toward B.F.A., B.M.A., B.M.E., and B.M. degrees, eight hours. For freshman and sophomore music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- FR H 2020 French Horn for Music Majors: Freshman/Sophomore 2-4 Credit Hours**
2 to 4 hours. Prerequisite: Majors only. May be repeated; maximum credit 12 hours. Applied instrumental lessons for freshmen and sophomore music majors in a School of Music degree program. (F, Sp)
- FR H 3440 Mentored Research Experience 3 Credit Hours**
0 to 3 hours. Prerequisites: ENGL 1113 or equivalent, and permission of instructor. May be repeated; maximum credit 12 hours. For the inquisitive student to apply the scholarly processes of the discipline to a research or creative project under the mentorship of a faculty member. Student and instructor should complete an Undergraduate Research & Creative Projects (URCP) Mentoring Agreement and file it with the URCP office. Not for honors credit. (F, Sp, Su)
- FR H 4000 Junior and/or Senior Secondary French Horn 1-2 Credit Hours**
1 to 2 hours. Prerequisite: permission of adviser and instructor. May be repeated; maximum credit toward B.F.A., B.M.A., B.M.E., and B.M. degrees, eight hours. For junior and senior music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- FR H 4020 French Horn for Music Majors: Junior/Senior 1-4 Credit Hours**
1 to 4 hours. Prerequisite: Majors only; junior standing. May be repeated; maximum credit 20 hours. Applied instrumental lessons for junior and senior music majors in a School of Music degree program. (F, Sp)
- FR H 5000 Master's-Level Secondary French Horn 1-2 Credit Hours**
1 to 2 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For master's degree music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- FR H 5010 Master's-Level French Horn for Non-Performance Music Majors 1-3 Credit Hours**
1 to 3 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For master's degree students other than performance majors in their major field. (F, Sp, Su)
- FR H 5020 Master's-Level French Horn for Performance Majors 2-4 Credit Hours**
2 to 4 hours. Prerequisite: graduate standing in music; permission of adviser and instructor; 4020 and 4021 or equivalent. May be repeated; maximum credit toward an M.M. degree 10 hours. (F, Sp, Su)
- FR H 6000 Doctoral Secondary French Horn 1-2 Credit Hours**
1 to 2 hours. Prerequisite: graduate standing in music, permission of adviser or instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For doctoral degree music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- FR H 6010 Doctoral French Horn for Non-Performance Music Majors 2-3 Credit Hours**
2 to 3 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated. Doctoral-level study of applied music in the major performance area for students other than performance majors in their primary field. (F, Sp, Su)
- FR H 6020 Doctoral French Horn for Performance Majors 2-4 Credit Hours**
2 to 4 hours. Prerequisite: graduate standing in music; 5042; permission of adviser and instructor. May be repeated; credit applicable toward applied music requirements for the Doctor of Musical Arts degree. Doctoral-level study of applied music for performance majors in their primary field. (F, Sp, Su)
- GCRE 5051 Graduate Composition Recital 1 Credit Hour**
Prerequisite: Permission of instructor. A program of original compositions presented in partial fulfillment of the requirements of the Master of Music degree in Composition. (F, Sp, Su)
- GDMA 6042 Graduate Recital-Doctor Of Musical Arts Degree 2 Credit Hours**
Prerequisite: Concurrent enrollment in 6020; permission of adviser and instructor. May be repeated; maximum credit four hours. May not be elected during first enrollment. The preparation and presentation of a public recital. (F, Sp, Su)
- GRRE 5042 Graduate Recital-Master of Music Degree 2 Credit Hours**
Prerequisite: Concurrent enrollment in 5020, permission of adviser and instructor. Preparation and performance of a public recital. May not be elected during first enrollment. (F, Sp, Su)
- GTAR 2000 Freshman and/or Sophomore Secondary Guitar 1-2 Credit Hours**
1 to 2 hours. Prerequisite: permission of adviser and instructor. May be repeated; maximum credit toward B.F.A., B.M.A., B.M.E., and B.M. degrees, eight hours. For freshman and sophomore music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- GTAR 2020 Guitar for Music Majors: Freshman/Sophomore 2-4 Credit Hours**
2 to 4 hours. Prerequisite: Majors only. May be repeated; maximum credit 12 hours. Applied instrumental lessons for freshmen and sophomore music majors in a School of Music degree program. (F, Sp)
- GTAR 3440 Mentored Research Experience 3 Credit Hours**
0 to 3 hours. Prerequisites: ENGL 1113 or equivalent, and permission of instructor. May be repeated; maximum credit 12 hours. For the inquisitive student to apply the scholarly processes of the discipline to a research or creative project under the mentorship of a faculty member. Student and instructor should complete an Undergraduate Research & Creative Projects (URCP) Mentoring Agreement and file it with the URCP office. Not for honors credit. (F, Sp, Su)
- GTAR 4000 Junior and/or Senior Secondary Guitar 1-2 Credit Hours**
1 to 2 hours. Prerequisite: permission of adviser and instructor. May be repeated; maximum credit toward B.F.A., B.M.A., B.M.E., and B.M. degrees, eight hours. For junior and senior music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- GTAR 4020 Guitar for Music Majors: Junior/Senior 1-4 Credit Hours**
1 to 4 hours. Prerequisite: Majors only; junior standing. May be repeated; maximum credit 20 hours. Applied instrumental lessons for junior and senior music majors in a School of Music degree program. (F, Sp)

- GTAR 5000 Master's-Level Secondary Guitar 1-2 Credit Hours**
1 to 2 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For master's degree music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- GTAR 5010 Master's-Level Guitar for Non-Performance Music Majors 1-3 Credit Hours**
1 to 3 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For master's degree students other than performance majors in their major field. (F, Sp, Su)
- GTAR 5020 Master's-Level Guitar for Performance Majors 2-4 Credit Hours**
2 to 4 hours. Prerequisite: graduate standing in music; permission of adviser and instructor; 4020 and 4021 or equivalent. May be repeated; maximum credit toward an M.M. degree 10 hours. (F, Sp, Su)
- GTAR 6000 Doctoral Secondary Guitar 1-2 Credit Hours**
1 to 2 hours. Prerequisite: graduate standing in music, permission of adviser or instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For doctoral degree music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- GTAR 6010 Doctoral Guitar for Non-Performance Music Majors 2-3 Credit Hours**
2 to 3 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated. Doctoral-level study of applied music in the major performance area for students other than performance majors in their primary field. (F, Sp, Su)
- GTAR 6020 Doctoral Guitar for Performance Majors 2-4 Credit Hours**
2 to 4 hours. Prerequisite: graduate standing in music; 5042; permission of adviser and instructor. May be repeated; credit applicable toward applied music requirements for the Doctor of Musical Arts degree. Doctoral-level study of applied music for performance majors in their primary field. (F, Sp, Su)
- HARP 2000 Freshman and/or Sophomore Secondary Harp 1-2 Credit Hours**
1 to 2 hours. Prerequisite: permission of adviser and instructor. May be repeated; maximum credit toward B.F.A., B.M.A., B.M.E., and B.M. degrees, eight hours. For freshman and sophomore music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- HARP 2020 Harp for Music Majors: Freshman/Sophomore 2-4 Credit Hours**
2 to 4 hours. Prerequisite: Majors only. May be repeated; maximum credit 12 hours. Applied instrumental lessons for freshmen and sophomore music majors in a School of Music degree program. (F, Sp)
- HARP 3440 Mentored Research Experience 3 Credit Hours**
0 to 3 hours. Prerequisites: ENGL 1113 or equivalent, and permission of instructor. May be repeated; maximum credit 12 hours. For the inquisitive student to apply the scholarly processes of the discipline to a research or creative project under the mentorship of a faculty member. Student and instructor should complete an Undergraduate Research & Creative Projects (URCP) Mentoring Agreement and file it with the URCP office. Not for honors credit. (F, Sp, Su)
- HARP 4000 Junior and/or Senior Secondary Harp 1-2 Credit Hours**
1 to 2 hours. Prerequisite: permission of adviser and instructor. May be repeated; maximum credit toward B.F.A., B.M.A., B.M.E., and B.M. degrees, eight hours. For junior and senior music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- HARP 4020 Harp for Music Majors: Junior/Senior 1-4 Credit Hours**
1 to 4 hours. Prerequisite: Majors only; junior standing. May be repeated; maximum credit 20 hours. Applied instrumental lessons for junior and senior music majors in a School of Music degree program. (F, Sp)
- HARP 5000 Master's-Level Secondary Harp 1-2 Credit Hours**
1 to 2 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For master's degree music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- HARP 5020 Master's-Level Harp for Performance Majors 2-4 Credit Hours**
2 to 4 hours. Prerequisite: graduate standing in music; permission of adviser and instructor; 4020 and 4021 or equivalent. May be repeated; maximum credit toward an M.M. degree 10 hours. (F, Sp, Su)
- HARP 6000 Doctoral Secondary Harp 1-2 Credit Hours**
1 to 2 hours. Prerequisite: graduate standing in music, permission of adviser or instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For doctoral degree music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- HARP 6010 Doctoral Harp for Non-Performance Music Majors 2-3 Credit Hours**
2 to 3 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated. Doctoral-level study of applied music in the major performance area for students other than performance majors in their primary field. (F, Sp, Su)
- HARP 6020 Doctoral Harp for Performance Majors 2-4 Credit Hours**
2 to 4 hours. Prerequisite: graduate standing in music; 5042; permission of adviser and instructor. May be repeated; credit applicable toward applied music requirements for the Doctor of Musical Arts degree. Doctoral-level study of applied music for performance majors in their primary field. (F, Sp, Su)
- HPCD 2000 Freshman and/or Sophomore Secondary Harpsichord 1-2 Credit Hours**
1 to 2 hours. Prerequisite: Majors only; departmental permission; may be repeated; maximum credit 8 hours. B.M.A., B.M.E., and B.M. degrees, eight hours. For freshman and sophomore music students studying in a secondary (or minor) performance area. (F, Sp)
- HPCD 3440 Mentored Research Experience 3 Credit Hours**
0 to 3 hours. Prerequisites: ENGL 1113 or equivalent, and permission of instructor. May be repeated; maximum credit 12 hours. For the inquisitive student to apply the scholarly processes of the discipline to a research or creative project under the mentorship of a faculty member. Student and instructor should complete an Undergraduate Research & Creative Projects (URCP) Mentoring Agreement and file it with the URCP office. Not for honors credit. (F, Sp, Su)
- HPCD 4000 Junior and/or Senior Secondary Harpsichord 1-2 Credit Hours**
1 to 2 hours. Prerequisite: Junior standing, majors only, and HPCD 2000; may be repeated; maximum credit 8 hours. B.M.A., B.M.E., and B.M. degrees, eight hours. For junior and senior music students studying in a secondary (or minor) performance area. (F, Sp)
- JRRE 3020 Junior Recital 0 Credit Hours**
Prerequisite: Majors only; concurrent enrollment in applied study at (4020) during the junior year, permission of adviser and instructor. Preparation and performance of a public recital by students in the B.M. degree program. (F, Sp)

- JRRE 3021 Junior Recital 1 Credit Hour**
Prerequisite: concurrent enrollment in 4020, during the junior year, permission of adviser and instructor. Preparation and performance of a public recital by students in the B.M. degree program. (F, Sp, Su)
- LDMA 6052 Graduate Lecture/Chamber Recital--Doctor Of Musical Arts Degree 2 Credit Hours**
Prerequisite: concurrent enrollment in 6020; permission of adviser and instructor. May not be elected during first enrollment. The preparation and presentation of a public lecture or chamber music recital. Requires the submission of a related written document. (F, Sp, Su)
- MUED 1732 Introduction to Music Education 2 Credit Hours**
Prerequisite: Music Majors only. An overview of school music teaching. Designed to enable students to make early career choices. Students will observe music teaching in schools, develop a philosophy of music education, study psychological foundations as applied to music teaching, and become familiar with the total school music curriculum and its place in the school program. (F)
- MUED 1742 Introduction to Teaching Techniques in Music 2 Credit Hours**
Prerequisite: MUED majors only, MUED 1732. Second part of two-semester course sequence in music education. Sequential process of musical development, skills, content, methods, techniques and materials in the following areas: singing voice, classroom listening, sight reading, movement, and music series books. (Sp)
- MUED 2112 Instrumental Music Education Methods I 2 Credit Hours**
Prerequisite: Majors only; MUTE 2242. This is the first in a series of three courses designed to prepare instrumental music education majors for public school teaching. This course focuses heavily on teaching/rehearsing and conducting in a peer setting. Advanced conducting techniques, paired with an introduction to rehearsal techniques and sequencing, are a primary focus. (Sp)
- MUED 3112 Instrumental Music Education Methods II 2 Credit Hours**
Prerequisite: Majors only; Junior Standing; MUED 2112. This is the second in a series of three courses designed to prepare instrumental music education majors for public school teaching. This course focuses heavily on teaching/rehearsing and conducting in a peer setting, performing on secondary string and wind/percussion instruments. A continued focus on advanced conducting and rehearsal techniques is a central component of the course. (Sp)
- MUED 3252 General Music Methods for Instrumental Majors 2 Credit Hours**
Prerequisite: Majors only; Junior standing; MUED 1732. Sequential process of music development, skills, content, methods, techniques and materials suited to students in elementary and middle school grades. The course includes at least 10 hours of observation in elementary/secondary public school music programs. (F)
- MUED 3440 Mentored Research Experience 3 Credit Hours**
0 to 3 hours. Prerequisites: ENGL 1113 or equivalent, and permission of instructor. May be repeated; maximum credit 12 hours. For the inquisitive student to apply the scholarly processes of the discipline to a research or creative project under the mentorship of a faculty member. Student and instructor should complete an Undergraduate Research & Creative Projects (URCP) Mentoring Agreement and file it with the URCP office. Not for honors credit. (F, Sp, Su)
- MUED 3760 Field Experience for 3762 0 Credit Hours**
Corequisite: 3762. Students will complete twelve to thirteen hours of independent teaching in a high school classroom. Fieldwork will take place in addition to course hours and must be scheduled through the instrumental music education office for field placement. (Sp)
- MUED 3782 Internship in Piano Teaching 2 Credit Hours**
Prerequisite: MUED 3783 or concurrent enrollment. Teaching of children from preschool through high school in groups and private lessons under faculty supervision. (F, Sp)
- MUED 3783 Piano Pedagogy 3 Credit Hours**
Prerequisite: Majors only, departmental permission, and eight hours of piano or organ. Required for piano majors and elective for other fields. Basic study of concepts necessary for successful private and class piano teaching at the elementary level. Student teaching required. (F)
- MUED 3792 Internship in Piano Teaching 2 Credit Hours**
Prerequisite or corequisite: 3782 and 3783. Continuation of teaching skills begun in 3782. Teaching of children from preschool through high school in groups and private lessons under faculty supervision. (F, Sp)
- MUED 3793 Piano Pedagogy 3 Credit Hours**
Prerequisite: 3783. Required for piano majors and elective for other fields. Continuation of skills begun in 3783. Basic study of concepts necessary for successful private and class piano teaching at the intermediate level. Student teaching required. (Alt. Sp)
- MUED 3823 Teaching General Music PreK-2 3 Credit Hours**
Prerequisite: MUED 1732; majors only. Psychological foundations, teaching techniques and materials for vocal music instruction in pre-kindergarten through grade 2. Teaching techniques used in the Kodaly, Orff and other contemporary approaches will be examined. (F)
- MUED 3832 Teaching Vocal/General Music 3-5 2 Credit Hours**
Prerequisite: MUED 1732; majors only. Sequential process of music development, skills, content, methods, techniques and materials suited to students in grades 3-5. (F)
- MUED 3842 Teaching Vocal/General Music 6-8 2 Credit Hours**
Prerequisite: Junior standing, majors only, and MUED 1732. Sequential process of music development, skills, content, methods, techniques and materials suited to students in grades 6-8. Special attention given to the boys' changing voices. (Sp)
- MUED 3852 Teaching Choral Music Grades 9-12 2 Credit Hours**
Prerequisite: MUED 1732, Junior standing, and majors only. Organization and management of choirs, repertoire appropriate to JHS/SHS choirs, rehearsal techniques, programming considerations, use of audio equipment, field experiences. (F)
- MUED 3960 Honors Reading 1-3 Credit Hours**
1 to 3 hours. Prerequisite: Admission to Honors Program. May be repeated; maximum credit six hours. Consists of topics designated by the instructor in keeping with the student's major program. The topics will cover materials not usually presented in the regular courses. (F, Sp, Su)
- MUED 3970 Honors Seminar 1-3 Credit Hours**
1 to 3 hours. Prerequisite: admission to Honors Program. May be repeated; maximum credit six hours. Subjects covered vary. Deals with concepts not usually treated in regular courses. (Irreg.)
- MUED 3980 Honors Research 1-3 Credit Hours**
1 to 3 hours. Prerequisite: Admission to Honors Program. May be repeated; maximum credit six hours. Will provide an opportunity for the gifted Honors candidate to work at a special project in the student's field. (F, Sp, Su)

- MUED 3990 Independent Study 1-3 Credit Hours**
1 to 3 hours. Prerequisite: permission of instructor and junior standing. May be repeated once with change of content. Independent study may be arranged to study a subject not available through regular course offerings. (F, Sp, Su)
- MUED 4042 Capstone Seminar 2 Credit Hours**
Prerequisite: concurrent enrollment in 4050 and 4060. The development of a teaching portfolio including a reflection log of teaching activities, written evaluations of video and audio episodes, and a summary of teaching successes and areas to be improved. (F, Sp) [V].
- MUED 4050 Teaching Experiences in the Elementary School 4-5 Credit Hours**
Prerequisite: formal admission to student teaching; corequisite: 4042. Laboratory activities in music classes in elementary schools under competent direction and supervision: orientation, observation, and classroom teaching experiences supported by seminars and conferences focusing on the problems of teaching. Prospective teachers receive instruction, aid, and constructive supervision in classroom management, evaluation of pupil behavior, methods of teaching, selection of teaching materials, and school-home-community relations. (F, Sp)
- MUED 4060 Teaching Experiences in the Secondary School 4-5 Credit Hours**
Prerequisite: formal admission to student teaching; corequisite: 4042. Correlation of theory and instructional practices in music classes in secondary schools; supervised observation, teaching, classroom management, and evaluation; acquaintance with the administration of a secondary school and the school program; selection and use of appropriate instructional materials; conferences with supervisors. (F, Sp)
- MUED 4113 Instrumental Music Education Methods III 3 Credit Hours**
Prerequisite: Majors only; Junior standing; MUED 3113. This is the third in a series of three courses designed to prepare instrumental music education majors for public school teaching. This course focuses on the development of diagnostic and pedagogical skills while working with students. (F)
- MUED G4752 Marching Band Techniques 2 Credit Hours**
Prerequisite: junior standing in music education. Organization of the marching band and its instrumentation, selecting and adapting music, marching fundamentals, marching styles and trends, planning and charting half-time shows, parade routines, auxiliary units and drum major signals. (Sp)
- MUED 4762 String Pedagogy 2 Credit Hours**
Prerequisite: majors only; MUTE 2252 or MUTE 3252; junior standing. String teaching techniques in large and small group settings. Emphasis is on familiarizing students with teaching strategies for string classes in public schools. (Sp)
- MUED G4892 Vocal Pedagogy & Diction for the Classroom Teacher 2 Credit Hours**
Prerequisite: junior standing and majors only. Study of vocal teaching techniques including anatomy of vocal tract, physiological process and acoustical properties. Repertory for high school students. (F)
- MUED 4960 Directed Readings 1-4 Credit Hours**
1 to 4 hours. Prerequisite: good standing in University; permission of instructor and dean. May be repeated; maximum credit four hours. Designed for upper-division students who need opportunity to study a specific problem in greater depth than formal course content permits. (Irreg.)
- MUED 4970 Special Topics/Seminar 1-3 Credit Hours**
1 to 3 hours. Prerequisite: Senior standing or permission of instructor. May be repeated; maximum credit nine hours. Special topics or seminar course for content not currently offered in regularly scheduled courses. May include library and/or laboratory research and field projects. (Irreg.)
- MUED 4990 Independent Study 1-3 Credit Hours**
1 to 3 hours. Prerequisite: Senior standing and permission of instructor. May be repeated; maximum credit nine hours. Contracted independent study for a topic not currently offered in regularly scheduled courses. Independent study may include library and/or laboratory research and field projects. (Irreg.)
- MUED 5212 Research in Music Education 2 Credit Hours**
Prerequisite: graduate standing in music or music education or permission. Methods of analytical-historical research in music and historical, philosophical, descriptive and experimental research in music education. (F, Alt. Su)
- MUED 5312 Advanced Pedagogy and Practice in Instrumental Music 2 Credit Hours**
Prerequisite: Graduate standing, MUED 5212, and departmental permission. The course is designed to help practicing music educators gain advanced tools for teaching instrumental music. Topics include diverse wind/orchestral literature appropriate for a variety of levels and learning styles, strategies for comprehensive musicianship, effective rehearsal techniques, culturally responsive pedagogy, and issues pertaining to the overall development of an instrumental music program. (F)
- MUED 5322 Advanced Pedagogy and Practice in Choral Music 2 Credit Hours**
Prerequisite: Graduate standing, MUED 5212, and departmental permission. Course is designed to help practicing music educators gain advanced pedagogical tools for teaching choral music. Topics include diverse choral literature appropriate for a variety of levels and learning styles, pedagogical strategies for sight-reading and strengthening musicianship, effective rehearsal techniques, culturally responsive pedagogy, and issues pertaining to the overall development of a choral music program. (F)
- MUED 5334 Capstone Project in Music Education 4 Credit Hours**
Prerequisite: Graduate standing, MUED 5212, and departmental permission. This course is designed to reflect an action-research project typical of the education field. The project will be directly related to the student's school classroom and his/her students. Over the course of a full semester, the student will identify a research-based issue in music education, collect and analyze data, and propose reformed teaching and learning practices informed by his/her findings. (F, Sp)
- MUED 5512 Contemporary and Commercial Music Vocal Pedagogy 2 Credit Hours**
Prerequisite: Graduate standing. The objective of graduate contemporary and commercial music (CCM) vocal pedagogy is to cover most of the necessary topics that concern the modern voice teacher when teaching non-classical and non-traditional vocal students. The course will survey the various technical adaptations needed to sing multiple CCM genres effectively and how to teach singers to perform this repertoire healthily. (Sp)

- MUED 5522 Advanced Vocal Pedagogy 2 Credit Hours**
Prerequisite: Graduate standing and MUTE 4312. This course will cover the topics that concern the modern voice teacher. Aspects of vocal and physical anatomy and physiology will be covered along with an introduction into the world of voice science, including interaction of formants and harmonics, resonance, registration, and spectral analysis. Teaching demonstrations will be required. (F)
- MUED 5553 Kodaly Concept I 3 Credit Hours**
Kodaly Concept I. Prerequisite: Graduate Standing. The Philosophy, Methodology And Techniques Of Teaching The Kodaly Concept In Music Education In Levels K - 1. (F)
- MUED 5562 Solfege I 2 Credit Hours**
Solfege I. Kodaly Techniques Applied To The Practice And Skills Of Sight Singing, Ear Training And Dictation. Sight Singing Of Unison, Homophonic And Polyphonic Examples From The Classical Music Literature. Study Of Selected Books In The Kodaly Choral Method. (Sp)
- MUED 5563 Kodaly Concept II 3 Credit Hours**
Prerequisite: 5553. The philosophy, methodology and techniques of teaching the Kodaly Concept of music education in levels 2-3. (Irreg.)
- MUED 5572 Solfege II 2 Credit Hours**
Prerequisite: 5562. Advanced Kodaly techniques applied to the practice and skills of sight singing, ear training and dictation. Sight singing examples will involve modulation, chromaticism and modes. (Su)
- MUED 5573 Kodaly Concept III 3 Credit Hours**
Prerequisite: 5563. The philosophy, methodology and techniques of teaching the Kodaly concept of music education in levels 4-6.
- MUED 5582 Folk Song Research 2 Credit Hours**
Prerequisite: 5553. Study of musical culture in America through analysis of melodic and rhythmic structures, forms and categories of American folk songs as source material for teaching the Kodaly Concept. (Irreg.)
- MUED 5612 Piano Pedagogy I 2 Credit Hours**
Prerequisite: graduate standing or permission. Methods, materials, curriculum building and philosophical bases for teaching piano at the college and university levels with focus on group instruction. Student teaching required. (F)
- MUED 5622 Piano Pedagogy II 2 Credit Hours**
Prerequisite: graduate standing or permission. Methods, materials, curriculum building and philosophical bases for teaching piano at the elementary and intermediate levels. Student teaching required. (Sp)
- MUED 5642 Internship in Piano Teaching 2 Credit Hours**
Prerequisite: graduate standing. Teaching of children's classes, college classes, adult students or private lessons under faculty supervision. Designed to give the student experience in areas where none exists. (F, Sp, Su)
- MUED 5662 Teaching Intermediate and Advanced Piano 2 Credit Hours**
Prerequisite: graduate standing or permission. Methods, materials and curriculum building for teaching piano students at the intermediate through advanced levels. Focus will be on developing piano teaching techniques for high school and college-age students, studying repertoire that is appropriate for these students, and exploring performance practice suitable for pianists at the intermediate and advanced levels. (Alt. Sp)
- MUED 5960 Directed Readings 1-3 Credit Hours**
1 to 3 hours. Prerequisite: 18 hours of music, permission of the director of the school. May be repeated; maximum credit six hours. Individual topics in music education. (F, Sp, Su)
- MUED 5970 Seminar in Music Education 1-6 Credit Hours**
1 to 6 hours. Prerequisite: twelve hours of music education, graduate standing, or permission. May be repeated with change of subject matter; maximum graduate credit twelve hours. (F, Sp, Su)
- MUED 5980 Research for Master's Thesis 2-9 Credit Hours**
Variable enrollment, two to nine hours; maximum credit applicable toward degree, four hours. (F, Sp, Su)
- MUED 5990 Special Studies in Music Education 1-3 Credit Hours**
1 to 3 hours. Prerequisite: permission of the director of the school. May be repeated with change of subject matter; maximum credit six hours. Individual study and research in the field of music education. (F, Sp, Su)
- MUED 6012 Philosophical Foundations of Music Education 2 Credit Hours**
Prerequisite: graduate standing in music or music education. Students will study the writings of Mursell, Leonhard, Reimer, Elliott, and others. Students will debate the theories these authors propose and prepare written papers applying aspects of these theories to music education practice in today's schools. (Irreg.)
- MUED 6022 Psychological Foundations of Music Education 2 Credit Hours**
Prerequisite: graduate standing in music or music education. Philosophies, theories, principles and concepts of learning and their implications to the teaching and learning processes in music education. The basic orientations of Associationist and Field theories will be investigated and the current status of learning theory applied to music education will be evaluated. Specific theories are those of Ausubel, Gagne, Guilford, Piaget, and Skinner and applications by Bruner, Gordon and Mursell. (Sp)
- MUED 6032 Sociological Foundations of Music Education 2 Credit Hours**
Prerequisite: graduate standing in Music or Music Education. Students will read works by Adorno, Becker, Blumer, Dewey, Mead, Vygotsky, and others. Students will debate the issues and theories these authors propose and will prepare written papers applying aspects of these theories to music education practice in today's schools. (Irreg.)
- MUED 6042 Historical Foundations of Music Education 2 Credit Hours**
Prerequisite: graduate standing in Music or Music Education. Includes readings from works by Birge, Britton, Chase, Heller, Keene, Mark, and others that outline the development of music instruction in American schools. Students will debate the issues presented by these authors and prepare written papers on various historical movements and methodologies. (Irreg.)
- MUED 6052 The History of Vocal Pedagogy 2 Credit Hours**
Prerequisite: Graduate standing. The class will focus on a wide range of the most prominent literature connected with vocal pedagogy. Pedagogies from the 14th century through the current scholarship will be examined in the light of what the modern voice teacher should know and understand. The course will include the major names and treatises of both pedagogues and singers who became active teachers. (Sp)
- MUED 6062 Vocal Performance and Teaching Psychology 2 Credit Hours**
Prerequisite: Graduate standing. This course will cover material related to the teaching of singing and performance. Topics will include the psychology of singing and performance, and performance anxiety. Attitudes about practice and how and what to practice will be examined. Students will develop skills necessary to solve problems and learn how to practice effectively to remove obstacles that contribute to less ideal performance. (F)

- MUED 6212 Measurement and Evaluation in Music Education** **2 Credit Hours**
Prerequisite: graduate standing in music or music education. Techniques and methods of measuring and evaluating musical behavior in cognitive, affective and psychomotor domains. (Sp)
- MUED 6222 Qualitative Research in Music Education** **2 Credit Hours**
Prerequisite: graduate standing in music or music education. Required for the Music Education Ph.D. curriculum. Course assignments review qualitative research techniques applied to problems in music education. Students will study questionnaire development, interview formats, case study reporting, triangulation methods, and oral history methodologies. (Irreg.)
- MUED 6242 Quantitative Research in Music Education** **2 Credit Hours**
Prerequisite: graduate standing in music or music education. Required for the Music Education Ph.D. curriculum. Course assignments review empirical research techniques applied to problems in music education. Students study research design, population sampling, statistical formulae for analyzing data, and advanced statistical techniques such as factor analysis and regression analyses. (Irreg.)
- MUED 6442 Current Trends in Music Education** **2 Credit Hours**
Prerequisite: graduate standing in music or music education, permission. Identification and evaluation of current trends in music teaching. Individual projects expected. (Alt. F)
- MUED 6642 Workshop in Vocal Pedagogy** **2 Credit Hours**
Prerequisite: Graduate standing and instructor permission. With faculty mentorship, the DMA candidate will prepare, promote, and conduct a public workshop for voice teachers. The workshop will have an emphasis on pedagogy techniques, vocal styles, repertoire for the various levels of singer or advances in voice science. The workshop should range between 4 and 5 hours and is a requirement for the DMA degree. (F, Sp, Su)
- MUED 6652 Doctoral Workshop in Piano Pedagogy** **2 Credit Hours**
Prerequisite: doctoral standing and permission. A public workshop for piano teachers concentrating on teaching techniques and materials. The workshop must be a least five hours in length. Terminal degree requirement in lieu of recital. (F, Sp, Su)
- MUED 6960 Directed Readings** **1-3 Credit Hours**
1 to 3 hours. Prerequisite: graduate standing or permission of instructor. May be repeated; maximum credit six hours. Directed readings and/or literature review under the direction of a faculty member. (Irreg.)
- MUED 6970 Special Topics/Seminar** **1-3 Credit Hours**
1 to 3 hours. Prerequisite: graduate standing or permission of instructor. May be repeated; maximum credit 12 hours. Special topics or seminar course for content not currently offered in regularly scheduled courses. May include library and/or research and field projects. (Irreg.)
- MUED 6980 Research for Doctoral Dissertation** **2-16 Credit Hours**
2 to 16 hours. Prerequisite: Graduate standing and permission of instructor; may be repeated. Directed research culminating in the completion of the doctoral dissertation. (F, Sp, Su)
- MUED 6990 Independent Study** **1-3 Credit Hours**
1 to 3 hours. Prerequisite: Graduate standing and permission of instructor. May be repeated; maximum credit nine hours. Contracted independent study for a topic not currently offered in regularly scheduled courses. Independent study may include library and/or laboratory research and field projects. (Irreg.)
- MULI 2970 Special Topics in Music Literature** **1-3 Credit Hours**
Majors only. 1 to 3 hours. May be repeated with change of subject matter; maximum credit nine hours. Content changes each semester. Study of newly developed, experimental or inter-disciplinary topics in music literature. (Irreg.)
- MULI 3440 Mentored Research Experience** **3 Credit Hours**
0 to 3 hours. Prerequisites: ENGL 1113 or equivalent, and permission of instructor. May be repeated; maximum credit 12 hours. For the inquisitive student to apply the scholarly processes of the discipline to a research or creative project under the mentorship of a faculty member. Student and instructor should complete an Undergraduate Research & Creative Projects (URCP) Mentoring Agreement and file it with the URCP office. Not for honors credit. (F, Sp, Su)
- MULI 4242 The History of the American Theatre Pipe Organ** **2 Credit Hours**
(Slashlisted with MULI 5242) Prerequisite: Majors only. A historical survey of the development of the theatre pipe organ as a medium for entertainment, as well as its social impact on American culture and beyond. No student may earn credit for both 4242 and 5242. (Fall, alternating years)
- MULI 4453 Organ Literature** **3 Credit Hours**
Prerequisites: Junior standing; majors only. A general survey of organ literature, composers, performers, builders and instruments from the Baroque period through modern times. The course goal is for students to be able to identify style characteristics of periods in general and composers in particular, as well as trends in organ building and how those trends influenced composers and performers. (Irreg.)
- MULI G4523 Keyboard Literature** **3 Credit Hours**
Prerequisite: Music History 2313, 2323, 3333, or permission. (Alt. F)
- MULI G4533 Keyboard Literature** **3 Credit Hours**
Prerequisite: Music History 2313, 2323, 3333, or permission. (Alt. Sp)
- MULI G4543 Introduction to Vocal Literature** **3 Credit Hours**
Prerequisite: Junior standing and music majors only. This course provides an introduction to vocal literature through the intensive study of the German Lied, French melodie, and English, American and Italian art song. The main emphasis will be on songs for the solo voice; some examples from opera, oratorio, and vocal chamber music might also be discussed. (Irreg.)
- MULI 4552 Choral Literature** **2 Credit Hours**
(Slashlisted with MULI 5552) Prerequisite: Majors only; Junior Standing; may be repeated with change of content; maximum credit 4 hours. A focused survey of choral literature from the early Renaissance through the present organized in the context of distinctive concert programming for a variety of choral ensembles including secondary school (MS and HS), collegiate, church, civic, male voice, and female voice choirs. Special attention will be given to pedagogical aims, concert programming, performance practice, and instruction in choral music sources. No student may earn credit for both 4552 and 5552. (Irreg.)
- MULI 4612 Harp Orchestral Literature** **2 Credit Hours**
(Slashlisted with MULI 5612) Prerequisite: majors only, junior standing. This course is designed to prepare the harp student for orchestral auditions. Classes will consist of learning a book of standard orchestral audition excerpts, studying scores, and listening to audition excerpts. No student may earn credit for both 4612 and 5612. (Irreg.)

- MULI 4960 Directed Readings 1-4 Credit Hours**
1 to 4 hours. Prerequisite: good standing in University; permission of instructor and dean. May be repeated; maximum credit four hours. Designed for upper-division students who need opportunity to study a specific problem in greater depth than formal course content permits. (Irreg.)
- MULI 4970 Undergraduate Seminar 1-3 Credit Hours**
1 to 3 hours. Prerequisite: permission of department. In-depth study of topics of interest as appropriate to the field of study. May be repeated; maximum credit nine hours. Subjects such as The Art Song since 1950; The Symphonic Music of Charles Ives; Songs of the American Revolution; Music of the American Theatre; The String Quartets of Haydn; and the like, are illustrative of topics that may be offered. (F, Sp)
- MULI 4990 Independent Study 1-3 Credit Hours**
1 to 3 hours. Prerequisite: Senior standing and permission of instructor. May be repeated; maximum credit nine hours. Contracted independent study for a topic not currently offered in regularly scheduled courses. Independent study may include library and/or laboratory research and field projects. (Irreg.)
- MULI 5242 The History of the American Theatre Pipe Organ 2 Credit Hours**
(Slashlisted with MULI 4242) Prerequisites: Graduate Standing. Majors only. A historical survey of the development of the theatre pipe organ as a medium for entertainment as well as its social impact on American culture and beyond. No student may earn credit for both 4242 and 5242. (Fall, alternating years)
- MULI 5412 Vocal Literature for the Teaching Studio 2 Credit Hours**
Prerequisite: Graduate standing or permission of instructor. This class surveys the standard repertoire from the areas of art song, operatic arias, and musical theater selections for use in the college studio. Repertoire examined will be in all major languages, Italian, German, French, English, Russian, Czech, Swedish, and Spanish from all time periods with the goal of learning when and how to introduce material to the college student. (Sp)
- MULI 5422 20th and 21st-Century Vocal Literature 2 Credit Hours**
Prerequisite: Graduate standing in Music or permission of instructor. This interactive seminar will survey vocal music of the 20th and 21st centuries and teach students how to discover newly emerging works appropriate for their voices. Literature will be introduced within a series of relevant topics. Significant time will be devoted to the discussion of diversity and representation considerations in repertoire decisions and recital/concert programming. (F)
- MULI 5453 Organ Literature I: Renaissance and Baroque 3 Credit Hours**
Prerequisite: graduate standing, for majors only. A study of organ literature from its origins to 1750 through analysis, readings, listening, and lectures. Students will examine the relationships between the music and the organs of the time. Emphasis will also be placed on the role of organ music in the surrounding culture, both musical and social. (Irreg.)
- MULI 5463 Organ Literature II: 1750-1900 3 Credit Hours**
Prerequisites: graduate standing, for majors only. A study of organ literature from 1750 to 1900 through analysis, readings, listening, and lectures. Students will examine the relationships between the music and the organs of the time. Emphasis will also be placed on the role of organ music in the surrounding culture, both musical and social. (Irreg.)
- MULI 5473 Organ Literature III: 1900-Present 3 Credit Hours**
Prerequisite: graduate standing, for majors only. A study of organ literature from 1900 to the present through analysis, readings, listening, and lectures. Students will examine the relationships between the music and the organs of the time. Emphasis will also be placed on the role of organ music in the surrounding culture, both musical and social. (Irreg.)
- MULI 5483 Hymnody 3 Credit Hours**
Prerequisite: graduate standing or permission. A historical survey of the development of Christian hymnody from the early/Byzantine period through current times. Includes lectures and analysis of texts, tunes and other primary source material. Hymns will be studied in their historical and social context. Students will also examine the role of hymns in western art music. (F, Sp)
- MULI 5552 Choral Literature 2 Credit Hours**
(Slashlisted with MULI 4552) Prerequisite: Graduate standing, music majors only, and may be repeated with change of content; maximum credit 4 hours. A focused survey of choral literature from the early Renaissance through the present organized in the context of distinctive concert programming for a variety of choral ensembles, including secondary school (MS and HS), collegiate, church, civic, male voice, and female voice choirs. Special attention will be given to pedagogical aims, concert programming, performance practice, and instruction in choral music sources. No student may earn credit for both 4552 and 5552. (Irreg.)
- MULI 5612 Harp Orchestral Literature 2 Credit Hours**
(Slashlisted with MULI 4612) Prerequisite: majors only, graduate standing, and departmental permission. This course is designed to prepare the harp student for orchestral auditions. Classes will consist of learning a book of standard orchestral audition excerpts, studying scores, and listening to audition excerpts. No student may earn credit for both 4612 and 5612. (Irreg.)
- MULI 5960 Directed Readings 1-3 Credit Hours**
1 to 3 hours. Prerequisite: graduate standing and permission of department. May be repeated; maximum credit twelve hours. Directed readings and/or literature reviews under the direction of a faculty member. (F, Sp, Su)
- MULI 5970 Seminar in Music Literature 1-4 Credit Hours**
1 to 4 hours. Prerequisite: 30 hours of music, graduate standing or permission. May be repeated with change of subject matter; maximum graduate credit 12 hours. (F, Sp)
- MULI 5990 Special Studies 1-3 Credit Hours**
Prerequisite: graduate standing; permission of the director of the school. May be repeated with change of subject matter; maximum credit six hours. Individual study and research in the field of music literature. (F, Sp, Su)
- MUNM 1022 Beginning Instrument/Voice Class I 2 Credit Hours**
For non-music majors with no experience in the instrument/voice only. May be repeated for credit; maximum credit eight hours. Class instruction in basic performance/musicianship skills. This course does not count for major credit in the School of Music. (F, Sp)
- MUNM 1032 Beginning Instrument/Voice Class II 2 Credit Hours**
Prerequisite: 1022 or permission. For non-music majors with limited instrumental/vocal experience only. May be repeated for credit; maximum credit eight hours. Class instruction in basic performance/musicianship skills. This course does not count for major credit in the School of Music. (F, Sp)

MUNM 1100 Freshman and/or Sophomore Piano, Violin, Etc., for Nonmusic Majors 1-2 Credit Hours

1 to 2 hours. Prerequisite: permission of instructor. Enrollment is subject to faculty availability and will not be accepted until the first day of classes. Private instruction in the development of instrumental or vocal performance skills and musicianship. This course does not count for major credit in the School of Music. (F, Sp, Su)

MUNM 1113 The Understanding of Music 3 Credit Hours

Open to non-music majors. A course in music appreciation covering all of the important fields of music, with opportunity for the students to listen to recordings and to attend concerts. This course does not count for major credit in the School of Music. (F, Sp, Su) [IV-AF].

MUNM 1143 American Popular Music 3 Credit Hours

A study of the evolution of popular music found in America from the early minstrel shows of the nineteenth century through the current trends of today. Students will be expected to listen to and identify music from a variety of musical styles. The social and historical contexts in which this music was performed and composed will also be examined as part of the course. (F, Sp) [IV-AF].

MUNM 1153 Songs that Shaped the Country 3 Credit Hours

This class looks at the societal elements of the United States that shaped popular music and how popular music shaped the societal elements of the United States. In addition, students will learn how to play these songs or similar ones on the guitar. No music experience necessary. Guitars will be provided for to students who don't have access to one. (Irreg.) [IV-AF].

MUNM 1163 History of Video Game Music 3 Credit Hours

A study of the evolution of video game music from simple sound effects and chip tunes to today's billion-dollar crossover industry influenced by other musics. An overview of the history of video game music with a focus on world music influences and encourage students to think critically about video games and the sounds that bring these virtual worlds to life. (F, Sp)

MUNM 1743 Experiencing Music 3 Credit Hours

Designed as an introduction to the varied strands of folk music in America. Involves examination of the historical, cultural and social implications of American folk songs; performance and analysis of folk songs as musical art forms; and the link between folk songs and large-scale contemporary musical compositions. This course does not count for major credit in the School of Music. (F, Sp) [IV-AF].

MUNM 2313 History of Jazz 3 Credit Hours

Open to non-music majors. Detailed study of jazz as a major art form. Studies the development of jazz through the growth of distinct styles. Stylistic change and cultural ties are made through representative works. Critical listening and evaluation are a major element. No prior knowledge is necessary. This course does not count for major credit in the School of Music. (F, Sp, Su) [IV-AF].

MUNM 2413 Music in Film 3 Credit Hours

A "grand tour" of the esthetics and dramatic techniques of film music since 1895. Excerpts from commercial "silent era" and "sound era" films will be viewed and studied as examples of film music development and the composer's art. (Irreg.) [IV-AF].

MUNM 2513 Music in the Rock Era: Heavy Metal 3 Credit Hours

This course covers the globally popular yet often socially and critically maligned rock music genre of heavy metal from its inception in the late 1960s to the present day. We will cover musical characteristics associated with the style, investigate its fan culture, social impact, and meaning, and explore its interaction with the music industry. Related musical styles will be discussed to give additional points of reference. Previous knowledge of music and the heavy metal genre is not required. The development of critical thinking and listening skills is an important element of this class. (Sp, Su) [IV-AF].

MUNM 2970 Special Topics in Music 1-3 Credit Hours

Open to non-music majors. 1 to 3 hours. May be repeated with change of subject matter; content changes each semester. Study of newly developed, experimental or inter-disciplinary topics in music. This course does not count for major credit in the School of Music.

MUNM 3100 Junior and/or Senior Piano, Violin, etc., for Nonmusic Majors 1-2 Credit Hours

1 to 2 hours. Prerequisite: permission of instructor. Enrollment is subject to faculty availability and will not be accepted until the first day of classes. Private instruction in the development of instrumental or vocal skills and musicianship. This course does not count for major credit in the School of Music. (F, Sp, Su)

MUNM 3113 World Music 3 Credit Hours

Prerequisite: junior standing. Study of music as human culture focusing on classical, popular and folk music beyond Western Art Music. Several representative cultures may include music of Native America, India, West Africa, South America, and Indonesia. Field study, music-making projects, and analysis of live performances of ethnic music are included. This course does not count for major credit in the School of Music. (F, Sp, Su) [IV-WDC].

MUNM 3213 Native American Music 3 Credit Hours

Prerequisite: junior standing. Study of Native American music of the North American continental United States (with special emphasis on music of the Plains tribes). Field study, instrument building, analytical essays of live performances and a high level of aural classroom experience will be included. This course does not count for major credit in the School of Music. [IV-WDC].

MUNM 3313 African Repercussions 3 Credit Hours

Prerequisite: junior standing; Open to non-music majors. Study of music culture focusing on the African impact. Several areas of influence explored in depth include African traditional music, Afro Pop, Reggae and Caribbean fusion, American black gospel, rhythm and blues, and jazz. Written analyses on recorded and live music are emphasized. This course does not count for major credit in the School of Music. (F, Sp) [IV-WDC].

MUNM 3440 Mentored Research Experience 3 Credit Hours

0 to 3 hours. Prerequisites: ENGL 1113 or equivalent, and permission of instructor. May be repeated; maximum credit 12 hours. For the inquisitive student to apply the scholarly processes of the discipline to a research or creative project under the mentorship of a faculty member. Student and instructor should complete an Undergraduate Research & Creative Projects (URCP) Mentoring Agreement and file it with the URCP office. Not for honors credit. (F, Sp, Su)

MUNM 3513 Music of South Asia 3 Credit Hours

Prerequisite: junior standing. Focuses on music cultures of South Asia with particular emphasis on the Indian subcontinent. Examines the musical qualities and cultural meaning of Northern (Hindustani) and Southern (Karnatak) classical styles as well as regional folk, popular (film), temple music, and devotional music. (F, Sp) [IV-WDC].

- MUNM 3613 Middle Eastern Music 3 Credit Hours**
Prerequisite: junior standing. Study of musical systems observed in the Arab world and parts of the Mediterranean. Explores overarching concepts of melody and rhythm in Middle Eastern music, namely the maqam and iqa', and their manifestation in various musical cultures of the East Arab world, North Africa, Turkey, and the Balkans. Course does not count for major credit in the School of Music. (F, Sp) [IV-WDC].
- MUNM 3713 Jazz: Development of an African-American Art Form 3 Credit Hours**
Prerequisite: Junior standing. This class will examine the history of jazz, its major exponents, structural elements, and socio-cultural aspects, through lectures, discussions, listening sessions, films, and live performances and demonstrations. The readings and assignments will deepen the student's knowledge, understanding, and appreciation of this American art form. (F, Sp) [IV-WC].
- MUNM 3813 European Cultures of Crusade - 1096 to the Present 3 Credit Hours**
Prerequisite: Junior Standing. The Crusades, Christian expeditions in which Europeans travelled to distant battlegrounds to conquer Muslims, Jews, heretics, and pagans, shaped Western culture and identity for nearly a millennium. This course examines the Crusades through history, song, opera, film, games, and other media, exploring relationships between identity and difference, community and singularity, desire and distance, love (sacred and worldly) and violence. (Sp)
- MUNM 3960 Honors Reading 1-3 Credit Hours**
1 to 3 hours. Prerequisite: Admission to Honors Program. May be repeated; maximum credit six hours. Consists of topics designated by the instructor in keeping with the student's major program. The topics will cover materials not usually presented in the regular courses. (F, Sp, Su)
- MUNM 3970 Honors Seminar 1-3 Credit Hours**
1 to 3 hours. Prerequisite: admission to Honors Program. May be repeated; maximum credit six hours. Subjects covered vary. Deals with concepts not usually treated in regular courses. (Irreg.)
- MUNM 3980 Honors Research 1-3 Credit Hours**
1 to 3 hours. Prerequisite: Admission to Honors Program. May be repeated; maximum credit six hours. Will provide an opportunity for the gifted Honors candidate to work at a special project in the student's field. (F, Sp, Su)
- MUNM 3990 Independent Study 1-3 Credit Hours**
1 to 3 hours. Prerequisite: permission of instructor and junior standing. May be repeated once with change of content. Independent study may be arranged to study a subject not available through regular course offerings. (F, Sp, Su)
- MUNM 4960 Directed Readings 1-4 Credit Hours**
1 to 4 hours. Prerequisite: good standing in University; permission of instructor and dean. May be repeated; maximum credit four hours. Designed for upper-division students who need opportunity to study a specific problem in greater depth than formal course content permits. (Irreg.)
- MUNM 4970 Undergraduate Seminar 1-3 Credit Hours**
Open to non-music majors. 1 to 3 hours. Prerequisite: 1113 or permission of instructor. May be repeated with change of subject matter; content changes each semester. Study of newly developed, experimental or inter-disciplinary topics in music. This course does not count for major credit in the School of Music. (Irreg.)
- MUNM 4990 Independent Study 1-3 Credit Hours**
1 to 3 hours. Prerequisite: Senior standing and permission of instructor. May be repeated; maximum credit nine hours. Contracted independent study for a topic not currently offered in regularly scheduled courses. Independent study may include library and/or laboratory research and field projects. (Irreg.)
- MUNM 5100 Graduate Piano, Violin, etc for Nonmusic Majors 1-2 Credit Hours**
1 to 2 hours. Prerequisite: graduate standing and permission; four semesters of previous study in the instrument or voice. Enrollment is subject to faculty availability and will not be accepted until the first day of classes. Private instruction in the development of instrumental or vocal skills and musicianship. This course does not count for major credit in the School of Music. (F, Sp, Su)
- MUNM 5960 Directed Readings 1-3 Credit Hours**
1 to 3 hours. Prerequisite: graduate standing and permission of department. May be repeated; maximum credit twelve hours. Directed readings and/or literature reviews under the direction of a faculty member. (F, Sp, Su)
- MUNM 5970 Special Topics/Seminar 1-3 Credit Hours**
1 to 3 hours. Prerequisite: Graduate standing or permission of instructor. May be repeated; maximum credit nine hours. Special topics or seminar course for content not currently offered in regularly scheduled courses. May include library and/or laboratory research and field projects. (Irreg.)
- MUNM 5990 Independent Study 1-3 Credit Hours**
1 to 3 hours. Prerequisite: Graduate standing and permission of instructor. May be repeated; maximum credit nine hours. Contracted independent study for a topic not currently offered in regularly scheduled courses. Independent study may include library and/or laboratory research and field projects. (Irreg.)
- MUS 2970 Special Topics in Music 1-3 Credit Hours**
1 to 3 hours. Prerequisite: May be repeated with change of subject matter; content changes each semester. Study of newly developed, experimental, or inter-disciplinary topics in music. (Irreg.)
- MUS 3440 Mentored Research Experience 3 Credit Hours**
0 to 3 hours. Prerequisites: ENGL 1113 or equivalent, and permission of instructor. May be repeated; maximum credit 12 hours. For the inquisitive student to apply the scholarly processes of the discipline to a research or creative project under the mentorship of a faculty member. Student and instructor should complete an Undergraduate Research & Creative Projects (URCP) Mentoring Agreement and file it with the URCP office. Not for honors credit. (F, Sp, Su)
- MUS 3960 Honors Reading 1-3 Credit Hours**
1 to 3 hours. Prerequisite: admission to Honors Program. May be repeated with change of subject; maximum credit six hours. Consists of either reading topics or independent study designated by the instructor in keeping with the student's major program. Covers materials not usually presented in the regular courses. (F, Sp, Su)
- MUS 3970 Honors Seminar 1-3 Credit Hours**
1 to 3 hours. Prerequisite: admission to Honors Program; junior or senior standing. May be repeated with change of subject; maximum credit six hours. The projects covered will vary. Deals with concepts not usually presented in regular coursework. (Irreg.)
- MUS 3980 Honors Research 1-3 Credit Hours**
1 to 3 hours. Prerequisite: admission to Honors Program. May be repeated with change of subject; maximum credit six hours. Provides an opportunity for the gifted Honors candidate to work at a special project in the student's field. (F, Sp, Su)

- MUS 3990 Independent Study 1-3 Credit Hours**
1 to 3 hours. Prerequisite: permission of instructor and junior standing. May be repeated once with change of content. Independent study may be arranged to study a subject not available through regular course offerings. (F, Sp, Su)
- MUS 4023 Senior Capstone - BA Degree 3 Credit Hours**
Prerequisites: majors only; MUTH 2622; and permission. Research and reading leading to a senior capstone paper in consultation with individual faculty. (F, Sp) [V].
- MUS 4960 Directed Readings 1-4 Credit Hours**
1 to 4 hours. Prerequisite: good standing in University; permission of instructor and dean. May be repeated; maximum credit four hours. Designed for upper-division students who need opportunity to study a specific problem in greater depth than formal course content permits. (Irreg.)
- MUS 4970 Undergraduate Seminar 1-3 Credit Hours**
1 to 3 hours. Prerequisite: permission of department. May be repeated; maximum credit six hours. In-depth study of topics of interest. Subjects such as The Aesthetics of Music; Musical Criticism; Music in American Culture; Music of the American Indians; The Band as a Cultural Phenomenon; and the like, are illustrative of the topics that may be pursued. (Irreg.)
- MUS 4990 Independent Study 1-3 Credit Hours**
1 to 3 hours. Prerequisite: Senior standing and permission of instructor. May be repeated; maximum credit nine hours. Contracted independent study for a topic not currently offered in regularly scheduled courses. Independent study may include library and/or laboratory research and field projects. (Irreg.)
- MUS 5111 Bibliography and Research in Music 1 Credit Hour**
Prerequisite: Graduate standing in the School of Music. The goals of this course are to provide a model of a coherent, systematic process to follow to conduct research on any music topic, and to learn the rules of academic writing style. The model of scholarly research and writing has many uses in the music profession. This is an eight-week, one credit hour course. (F)
- MUS 5121 Document Proposal 1 Credit Hour**
Prerequisite: Graduate standing in the School of Music. The objective of this course is to write a DMA document proposal. This includes finding an appropriate topic, exploring ways to present a thesis, working on the writing skills, and practicing extemporaneous speaking. Students do not have to be at the proposal writing stage or in the DMA program to enroll. This is an eight-week, one credit hour course. (Irreg.)
- MUS 5960 Directed Readings 1-3 Credit Hours**
1 to 3 hours. Prerequisite: graduate standing and permission of department. May be repeated; maximum credit twelve hours. Directed readings and/or literature reviews under the direction of a faculty member. (F, Sp, Su)
- MUS 5970 Special Topics/Seminar 1-3 Credit Hours**
1 to 3 hours. Prerequisite: Graduate standing or permission of instructor. May be repeated; maximum credit nine hours. Special topics or seminar course for content not currently offered in regularly scheduled courses. May include library and/or laboratory research and field projects. (Irreg.)
- MUS 5990 Independent Study 1-3 Credit Hours**
1 to 3 hours. Prerequisite: Graduate standing and permission of instructor. May be repeated; maximum credit nine hours. Contracted independent study for a topic not currently offered in regularly scheduled courses. Independent study may include library and/or laboratory research and field projects. (Irreg.)
- MUS 6880 Doctor of Musical arts Project 2-8 Credit Hours**
2 to 8 hours. Prerequisite: admission to DMA degree program; permission of adviser and instructor. Research and/or creative endeavor leading to the completion of the final written project for the degree Doctor of Musical Arts. (F, Sp, Su)
- MUS 6960 Directed Readings 1-3 Credit Hours**
1 to 3 hours. Prerequisite: graduate standing or permission of instructor. May be repeated; maximum credit six hours. Directed readings and/or literature review under the direction of a faculty member. (Irreg.)
- MUS 6970 Special Topics/Seminar 1-3 Credit Hours**
1 to 3 hours. Prerequisite: graduate standing or permission of instructor. May be repeated; maximum credit 12 hours. Special topics or seminar course for content not currently offered in regularly scheduled courses. May include library and/or research and field projects. (Irreg.)
- MUS 6990 Independent Study 1-3 Credit Hours**
1 to 3 hours. Prerequisite: Graduate standing and permission of instructor. May be repeated; maximum credit nine hours. Contracted independent study for a topic not currently offered in regularly scheduled courses. Independent study may include library and/or laboratory research and field projects. (Irreg.)
- MUSC 1312 Music in Culture 2 Credit Hours**
Required of all music majors; nonmusic majors admitted by permission. A study of music in its cultural context, exploring the inter-relationship of music to such aspects as everyday life, worship and belief, migration, dance, memory, politics, and identity. Techniques of aural perception are stressed for the improvement of basic listening skills. (Sp) [IV-AF].
- MUSC 2313 Ancient Times to 1700 3 Credit Hours**
Prerequisite: 1312. A study of the development of music from its inception to the late Baroque era conducted through lectures, readings, listening and analysis. (F) [IV-WC].
- MUSC 2323 Late Baroque Through Romantic Period 3 Credit Hours**
Prerequisite: 1312. A study of the development of music in the eighteenth and nineteenth centuries conducted through lectures, readings, listening and analysis. (Sp) [IV-WC].
- MUSC 3333 Post-Romantic Period to the Present 3 Credit Hours**
Prerequisite: 1312. A study of the development of music from the Post-Romantic era to the present day conducted through lectures, readings, listening and analysis. (F) [IV-WC].
- MUSC 3440 Mentored Research Experience 3 Credit Hours**
0 to 3 hours. Prerequisites: ENGL 1113 or equivalent, and permission of instructor. May be repeated; maximum credit 12 hours. For the inquisitive student to apply the scholarly processes of the discipline to a research or creative project under the mentorship of a faculty member. Student and instructor should complete an Undergraduate Research & Creative Projects (URCP) Mentoring Agreement and file it with the URCP office. Not for honors credit. (F, Sp, Su)
- MUSC 3960 Honors Reading 1-3 Credit Hours**
1 to 3 hours. Prerequisite: Admission to Honors Program. May be repeated; maximum credit six hours. Consists of topics designated by the instructor in keeping with the student's major program. The topics will cover materials not usually presented in the regular courses. (F, Sp, Su)
- MUSC 3970 Honors Seminar 1-3 Credit Hours**
1 to 3 hours. Prerequisite: admission to Honors Program. May be repeated; maximum credit six hours. Subjects covered vary. Deals with concepts not usually treated in regular courses. (Irreg.)

- MUSC 3980 Honors Research 1-3 Credit Hours**
1 to 3 hours. Prerequisite: Admission to Honors Program. May be repeated; maximum credit six hours. Will provide an opportunity for the gifted Honors candidate to work at a special project in the student's field. (F, Sp, Su)
- MUSC 3990 Independent Study 1-3 Credit Hours**
1 to 3 hours. Prerequisite: permission of instructor and junior standing. May be repeated once with change of content. Independent study may be arranged to study a subject not available through regular course offerings. (F, Sp, Su)
- MUSC 4960 Directed Readings 1-4 Credit Hours**
1 to 4 hours. Prerequisite: good standing in University; permission of instructor and dean. May be repeated; maximum credit four hours. Designed for upper-division students who need opportunity to study a specific problem in greater depth than formal course content permits. (Irreg.)
- MUSC 4970 Undergraduate Seminar 1-3 Credit Hours**
1 to 3 hours. Prerequisite: permission of department. May be repeated with change of content; maximum credit nine hours. In-depth study of topics of interest as appropriate to the field of study. Subjects such as the style, aesthetics, and influence of a particular composer, i.e., Beethoven, Berlioz, Brahms; the social/cultural foundations of a particular musical era or period; notational systems; and the like, are illustrative of the topics that may be pursued. (Sp)
- MUSC 4990 Independent Study 1-3 Credit Hours**
1 to 3 hours. Prerequisite: Senior standing and permission of instructor. May be repeated; maximum credit nine hours. Contracted independent study for a topic not currently offered in regularly scheduled courses. Independent study may include library and/or laboratory research and field projects. (Irreg.)
- MUSC 5100 Music History Graduate Review I 1 Credit Hour**
0 to 1 hour. Prerequisite: majors only. Designed to provide remediation to graduate students who did not pass the preliminary exam in early music history. In order to register for graduate musicology seminars, students must either have passed the preliminary exam or have passed this review course. This class is held during the first eight weeks of the semester. The Medieval, Renaissance, and Baroque eras are studied. (F, Sp)
- MUSC 5200 Music History Graduate Review II 1 Credit Hour**
0 to 1 hour. Prerequisite: majors only. Designed to provide remediation to graduate students who did not pass the preliminary exam in early music history. In order to register for graduate musicology seminars, students must either have passed the preliminary exam or have passed the review course. This class is held during the last eight weeks of the semester. Classical, Romantic, and 20th century periods are studied. (F, Sp)
- MUSC 5323 History of Opera 3 Credit Hours**
Prerequisite: graduate standing or permission; 2313, 2323, 3333, or equivalent. Changes of content, style and form in dramatic music as related to social, economic and political change in the past 350 years of western civilization. (Irreg.)
- MUSC 5373 History of American Music 3 Credit Hours**
Prerequisite: graduate standing or permission; 2313, 2323, 3333, or equivalent. Music in the United States from its beginnings to the present. (Irreg.)
- MUSC 5433 Ethnomusicology 3 Credit Hours**
Prerequisite: Graduate standing or permission of the department. A study of world music from an issue and concepts orientation, including illustrative musical expressions from a variety of world areas. (Irreg.)
- MUSC 5513 Music in the Middle Ages 3 Credit Hours**
Prerequisite: graduate standing. Majors only. A detailed survey of music from Hildegard of Bingen through Guillaume de Machaut. Explores a wide variety of medieval musical repertoires, including major sacred and vernacular musical genres. Through detailed study of primary and secondary materials, we will examine musical structures as well as the historical contexts within which they were produced. (Irreg.)
- MUSC 5523 Music in the Renaissance: Style, Theory and Performance 3 Credit Hours**
Prerequisite: graduate standing; 2313 or equivalent. An integrated course that correlates vocal and instrumental Renaissance music by the major composers with the major writers of the time on musical theory, acoustics, philosophy, esthetics, history and performance. (Irreg.)
- MUSC 5543 The Baroque Era 3 Credit Hours**
Prerequisite: graduate standing or permission; 2313, 2323, 3333, or equivalent. A detailed study of music from Monteverdi through J.S. Bach. (Irreg.)
- MUSC 5583 Music from 1900-1945 3 Credit Hours**
Prerequisite: Graduate standing or permission of the department. A study of European and American classical music during this period. (Irreg.)
- MUSC 5960 Directed Readings 1-3 Credit Hours**
1 to 3 hours. Prerequisite: 18 hours of music, permission of the director of the school. May be repeated; maximum credit six hours. Individual topics in music history and literature. (F, Sp, Su)
- MUSC 5970 Seminar in Music History 1-4 Credit Hours**
1 to 4 hours. Prerequisite: 30 hours of music or permission. May be repeated with change of subject matter; maximum graduate credit 12 hours. (F, Sp, Su)
- MUSC 5980 Research for Master's Thesis 2-9 Credit Hours**
Variable enrollment, two to nine hours; maximum credit applicable toward degree, four hours. Music television emphasis also requires the production of a half-hour broadcast-quality television program as part of thesis research. (F, Sp, Su)
- MUSC 5990 Special Studies in Music History 1-3 Credit Hours**
1 to 3 hours. Prerequisite: 30 hours of music, permission of the director of the school. May be repeated with change of subject matter; maximum graduate credit six hours. Individual study, research and analysis. (F, Sp, Su)
- MUTE 1000 Freshman/Transfer Music Orientation 0 Credit Hours**
Prerequisite: majors only. To help ensure that music students are aware of the varied and numerous performance opportunities, and to encourage educated listening skills and habits. (F, Sp)
- MUTE 1010 Recital Attendance 0 Credit Hours**
0 hours credit. Performance laboratory for all undergraduate music majors. (F, Sp)
- MUTE 1050 Wind Symphony 1 Credit Hour**
0 to 1 hours. The University of Oklahoma Wind Symphony is the flagship wind and percussion ensemble at OU. It explores established repertoire, significant new works, and premieres. Membership is by audition. The Wind Symphony performs five concerts each academic year. Music students enroll in 1050 prior to their sophomore barrier. Non-majors seeking lower-level credit should enroll in this section. (F, Sp)

- MUTE 1060 Symphony Band** **1 Credit Hour**
0 to 1 hours. The University of Oklahoma Symphony Band performs significant repertoire for wind and percussion instruments. The ensemble is comprised of talented undergraduate and graduate students who have demonstrated an outstanding level of musicianship through an audition procedure. The Symphony Band performs four concerts each academic year featuring new works as well as core repertoire for Winds and Percussion. (F, Sp)
- MUTE 1070 University Marching Band** **1 Credit Hour**
0 to 1 hours. Pride of Oklahoma Marching Band. Membership is by audition. (F)
- MUTE 1080 Campus Band** **1 Credit Hour**
0 to 1 hours. Performance band for non majors and a major ensemble credit for music majors upon the approval of applied professor and the conducting faculty. (Sp)
- MUTE 1090 Basketball Band** **1 Credit Hour**
0 to 1 hours. Sound of the Sooners Men's and Women's Basketball Bands. Continuation of the fall basketball band rehearsals for the Men's and Women's basketball bands. Students learn by performing throughout the spring Men's and Women's Basketball home schedule and during all Conference and NCAA Tournament Travel. Membership is by audition. (Sp)
- MUTE 1120 Jazz Ensemble** **1 Credit Hour**
0 to 1 hour. Prerequisite: permission by audition. May be repeated for credit; maximum credit eight hours. Preparation and performance of music written in a variety of jazz styles. (F, Sp)
- MUTE 1140 University Orchestra** **1 Credit Hour**
0 to 1 hour. Prerequisite: permission by audition. May be repeated for credit; maximum credit eight hours. Performance in University orchestra. (F, Sp, Su)
- MUTE 1160 University Chorale** **1 Credit Hour**
0 to 1 hour. Prerequisite: permission; membership determined by audition. May be repeated for credit; maximum credit eight hours. An ensemble of high caliber; approximately 24 singers. Rehearsal and performance of choral and choral-orchestral masterworks drawn mostly from the baroque through twentieth-century style periods. Several performances each semester. (F, Sp, Occas. Su)
- MUTE 1180 Singing Sooners** **1 Credit Hour**
0 to 1 hour. May be repeated for credit; maximum credit six hours. Non-audition; hearing for vocal placement within ensemble. Wide variety of styles from popular to major choral works, combining with other choirs. (F, Sp)
- MUTE 1280 Opera Chorus** **1 Credit Hour**
0-1 hours. May be repeated; maximum credit 8 hours. The OU Opera Chorus is a 24-member performing ensemble. This select ensemble will perform one fully staged opera production. Membership is open through audition to all students in any degree program at OU. Music majors must participate in both Choral Union and Opera Chorus each semester to fulfill large ensemble credit for undergraduates and graduates. (F, Sp)
- MUTE 1282 Italian and English Lyric Diction** **2 Credit Hours**
Prerequisite: Majors only. Italian and English Lyric Diction provides an introduction to the principles of pronunciation of the Italian and English languages in speech and singing. In English, the American, Mid- Atlantic, British and General Southern dialects will be addressed. Frequent performance and coaching of poetic readings, songs, arias and recitative in class will provide opportunity to develop accurate and expressive communication. (F)
- MUTE 1290 Women's Chorus** **1 Credit Hour**
0-1 hours. May be repeated; maximum credit 8 hours. This ensemble is dedicated to the study and performance of music for the female voice. Annual performances include the Fall and Spring concerts, Christmas at OU, and the President's Concert. Membership is open through audition to female students in any degree program at OU. Fulfills large ensemble credit for undergraduate and graduate music majors. (F, Sp)
- MUTE 1310 Men's Glee Club** **1 Credit Hour**
0-1 hours. May be repeated; maximum credit 5 hours. This ensemble is dedicated to the study and performance of music for the male voice. Annual performances include the Fall and Spring concerts, Christmas at OU, and the President's Concert. Membership is open through audition to male students in any degree program at OU. (Fa, Sp)
- MUTE 1311 Group Piano I** **1 Credit Hour**
Prerequisite: permission. Development of functional piano skills for the non-keyboard music major. Emphasis on keyboard theory and technique, sight reading, solo/ensemble repertoire and creative activities (harmonization, improvisation). Laboratory (F, Sp)
- MUTE 1321 Group Piano II** **1 Credit Hour**
Prerequisite: 1311 and permission. Continued development of the skills begun in 1311. Laboratory (F, Sp)
- MUTE 1332 Functional Piano Skills I** **2 Credit Hours**
Prerequisite: piano major, piano emphasis, permission. Experience in sight reading, playing by ear, modulation, open score reading, transposition and improvisation at the keyboard. (F)
- MUTE 1342 Functional Piano Skills II** **2 Credit Hours**
Prerequisite: 1332 or permission. Experience in sight reading, playing by ear, modulation, open score reading, transposition and improvisation at the keyboard. (Sp)
- MUTE 2000 Sophomore Barrier** **0 Credit Hours**
Prerequisite: Majors only; Sophomore standing; Students must be in their fourth semester of 2020-level lessons or have permission from their studio instructor. The Sophomore Barrier is a formal performance exam required of all students enrolled in the BM, BME, and BMA degree programs at the end of their sophomore year. In addition, all BA students who wish to continue applied study at the upper-division level must also pass this exam. (F, Sp)
- MUTE 2113 The Commercial Music and Recording Industry** **3 Credit Hours**
Prerequisite: Majors only; MUNM 1143 or MUNM 1163 or MUNM 2413 or MUTK 4113. An introductory course that will focus on the history, procedures, standard practices, economics and technologies involved with the modern machinations of the business of music including recording, distribution, audience development, touring, promotion, publicity, placements, and royalties. Students in this course will explore what career paths are available and how to build a sustainable income in the modern music industry. (Sp)
- MUTE 2211 Brass Instrument Class** **1 Credit Hour**
Prerequisite: Permission; Majors only; course is not open to freshmen. May be repeated with change of instrument or subject matter; maximum credit four hours. Designed to provide opportunities for growth both as a teacher and as a player of brass instruments. Students will demonstrate performance ability at an intermediate level; teaching ability of pedagogical issues at all ability levels through peer teaching demonstrations; and an understanding of fundamental instrument-specific knowledge and techniques. Several teaching episodes and ample experiences on multiple instruments throughout the semester. (F, Sp)

MUTE 2221 Percussion Instrument Class	1 Credit Hour	MUTE 2411 Organ Technology Lab	1 Credit Hour
Prerequisite: Permission of instructor; Majors only; course not open to freshmen. May be repeated with change of instrument or subject matter; maximum credit four hours. Serves as an introduction to the world of percussion performance. Students gain executive skills on a variety of percussion instruments, experience teaching multiple percussion instruments, and hands-on percussion ensemble conducting/coaching experience. (F, Sp)		Prerequisite: Majors only. May be repeated; maximum credit 4 hours. This course must be completed four times (for a total of four credit hours) as a prerequisite to MUTE 4411. Provides a practical and hands-on component to Organ Technology majors. Covers basic and fundamental areas of knowledge and experience any organ technician is expected to master. For students who already have experience in certain areas, their course of study may be altered to address areas of relative weakness or provide advanced experience. Laboratory (F, Sp)	
MUTE 2231 Guitar Instrument Class	1 Credit Hour	MUTE 2471 Internship in Organbuilding I	1 Credit Hour
Prerequisite: MUTH 1622 and MUTH 1522. Develop skills for playing guitar and reading chord charts. Also provides opportunity to explore the structure of various styles of folk and popular music. Assessments are performance-based with students demonstrating knowledge and skill acquired through individual playing tests. The skills and knowledge acquired in this course will be applicable to teaching in elementary and secondary general music classrooms. (F, Sp)		Prerequisite: Permission of instructor; may be repeated, maximum credit 2 hours. The Internship in Organbuilding is designed to provide students first-hand training in the practice of organbuilding, both in the workshop and in the field. Site visits will allow for first-hand application of skills honed in the organbuilder's shop. Travel to local churches and academic institutions will provide additional opportunities for analysis and hands-on experience. (Irreg.)	
MUTE 2241 Woodwind Instrument Class	1 Credit Hour	MUTE 2970 Special Topics in Music Technique	1-3 Credit Hours
Prerequisite: Permission of instructor; Majors only; course is not open to freshmen. May be repeated with change of instrument or subject matter; maximum credit four hours. Provides opportunities for growth both as a teacher and as a player of all woodwind instruments. Students demonstrate performance ability at an intermediate level; teaching ability of pedagogical issues at all ability levels through peer teaching demonstrations; and an understanding of fundamental instrument-specific knowledge and techniques. Several teaching episodes and ample experiences are afforded throughout the semester. (F, Sp)		Majors only. 1 to 3 hours. May be repeated with change of subject matter; content changes each semester. Study of newly developed, experimental or inter-disciplinary topics in music technique .	
MUTE 2242 Bme Instrumental Conducting I	2 Credit Hours	MUTE 3050 Wind Symphony	1 Credit Hour
Prerequisite: sophomore standing in music. Development of skills and knowledge in instrumental conducting, rehearsal techniques and instrumental repertoire. (F)		0 to 1 hours. Prerequisite: Junior standing; may be repeated for credit; maximum credit eight hours. The University of Oklahoma Wind Symphony is the flagship wind and percussion ensemble at OU. It explores established repertoire, significant new works, and premieres. Membership is by audition. The Wind Symphony performs five concerts each academic year. Music students enrolled in 3050 should have successfully passed their sophomore barrier. Non-music majors seeking upper-level credit hours should enroll in this section. (F, Sp)	
MUTE 2251 Stringed Instrument Class	1 Credit Hour	MUTE 3060 Symphony Band	1 Credit Hour
Prerequisite: Permission. May be repeated with change of instrument or subject matter; maximum credit four hours. Designed to provide opportunities for growth both as a teacher and as a player of string instruments. Students develop correct posture and instrument placement, as well as correct left and right hand position in order to play string instruments well. Several teaching experiences provided for students to begin to break down performance technique into left and right hand strategies. (F, Sp)		0 to 1 hours. Prerequisite: Junior standing; may be repeated for credit; maximum credit eight hours. The University of Oklahoma Symphony Band performs significant repertoire for wind and percussion instruments. Membership is by audition. The Symphony Band performs four concerts each academic year. Music students enrolled in 3060 should have successfully passed their sophomore barrier. Non-music majors seeking upper-level credit hours should enroll in this section. (F, Sp)	
MUTE 2271 Chamber Music	1 Credit Hour	MUTE 3070 University Marching Band	1 Credit Hour
Prerequisite: permission. May be repeated; maximum credit four hours. Study and performance of chamber music literature for various combinations of instruments. (F, Sp, Su)		0 to 1 hours. Prerequisite: Junior standing; may be repeated for credit; maximum credit eight hours. Pride of Oklahoma Marching Band. Membership is by audition. (F)	
MUTE 2280 Studio Ensemble	1 Credit Hour	MUTE 3080 Campus Band	1 Credit Hour
0 to 1 hour. May be repeated for credit. Performance experience in an ensemble of similar instruments. (F, Sp)		0 to 1 hours. Prerequisite: Junior standing; may be repeated for credit; maximum credit eight hours. Performance band for non majors and a major ensemble credit for music majors upon the approval of applied professor and the conducting faculty. (Sp)	
MUTE 2311 Group Piano III	1 Credit Hour	MUTE 3090 Basketball Band	1 Credit Hour
Prerequisite: 1321 and permission. Continued development of the skills begun in 1321. Laboratory (F, Sp)		0 to 1 hours. Prerequisite: Junior standing; may be repeated for credit; maximum credit eight hours. Sound of the Sooners Men's and Women's Basketball Bands. Continuation of the fall basketball band rehearsals for the Men's and Women's basketball bands. You will learn by performing throughout the spring Men's and Women's Basketball home schedule and during all Conference and NCAA Tournament Travel. Membership is by audition. (Sp)	
MUTE 2321 Group Piano IV	1 Credit Hour		
Prerequisite: 2311 and permission. Continued development of the skills begun in 2311. Special emphasis on sight reading, accompanying and instrumental and vocal-choral score reading. Laboratory (F, Sp)			

- MUTE 3110 Studio Accompanying for Piano Majors 1 Credit Hour**
0 to 1 hour. Prerequisite: majors only; PIAN 2020 or PIAN 2010. May be repeated; max credit 4 hours. Required of piano majors during junior and senior years. Two hours per week of assigned accompanying in vocal and/or instrumental teaching studios. Laboratory (F, Sp)
- MUTE 3120 Jazz Ensemble 1 Credit Hour**
0 to 1 hour. Admission by audition. May be repeated for credit. Preparation and performance of music written in a variety of jazz styles.
- MUTE 3140 University Orchestra 1 Credit Hour**
0 to 1 hour. Prerequisite: permission by audition. May be repeated for credit; maximum credit eight hours. Performance in University orchestra. (F, Sp)
- MUTE 3160 University Chorale 1 Credit Hour**
0 to 1 hour. Prerequisite: audition. May be repeated for credit. An ensemble of high caliber; approximately forty singers. Rehearsal and performance of choral and choral-orchestral masterworks drawn mostly from the baroque through twentieth-century style periods. Several performances each semester. (F, Sp)
- MUTE 3180 Singing Sooners 1 Credit Hour**
0 to 1 hour. May be repeated for credit; maximum credit six hours. Non-audition; hearing for vocal placement within ensemble. Wide variety of styles from popular to major choral works, combining with other choirs. (F, Sp)
- MUTE 3190 Opera/Music Theatre 2 Credit Hours**
0 to 2 hours. Prerequisite: permission by audition. May be repeated for credit; maximum credit sixteen hours. Consists of rehearsals and performances of opera, musicals and other forms of music theatre. (F, Sp)
- MUTE 3202 French Lyric Diction 2 Credit Hours**
Prerequisite: VOIC 2020; majors only. French Lyric Diction provides an introduction to the principles of pronunciation of the French language in speech and singing. Student will use the International Phonetic Alphabet as a symbolic medium. Frequent performance and coaching of poetic readings, songs, arias, and recitative in class will provide students an opportunity to develop accurate and expressive communication. (Sp)
- MUTE 3212 German Lyric Diction 2 Credit Hours**
Prerequisite: VOIC 2020; majors only. German Lyric Diction provides an introduction to the principles of pronunciation of the German language in speech and singing. Student will use the International Phonetic Alphabet as a symbolic medium. Frequent performance and coaching of poetic readings, songs, arias, and recitative in class will provide students an opportunity to develop accurate and expressive communication. (F)
- MUTE 3242 Instrumental Conducting I 2 Credit Hours**
Prerequisite: junior standing in music. Development of skills and knowledge in instrumental conducting, rehearsal techniques and instrumental repertoire. (F)
- MUTE 3252 Instrumental Conducting II 2 Credit Hours**
Prerequisite: 3242. Continued development of skills and knowledge in instrumental conducting, rehearsal skills and instrumental repertoire. (Sp)
- MUTE 3262 Choral Conducting I 2 Credit Hours**
Prerequisite: junior standing in the School of Music. Development of skills and knowledge in choral conducting, rehearsal techniques and choral repertoire. (F)
- MUTE 3272 Choral Conducting II 2 Credit Hours**
Prerequisite: 3262. Continued development of skills and knowledge in choral conducting, rehearsal techniques and choral repertoire. (Sp)
- MUTE 3280 Opera Chorus 1 Credit Hour**
0-1 hours. May be repeated; maximum credit 6 hours. The OU Opera Chorus is a 24-member performing ensemble. Ensemble performs one fully staged opera production. Membership is open through audition to all students in any degree program at OU. Music majors must participate in both Choral Union and Opera Chorus each semester to fulfill large ensemble credit for undergraduates and graduates. (F, Sp)
- MUTE 3290 Women's Chorus 1 Credit Hour**
0-1 hours. May be repeated; maximum credit 6 hours. Ensemble dedicated to the study and performance of music for the female voice. Annual performances include the Fall and Spring concerts, Christmas at OU, and the President's Concert. Membership is open through audition to female students in any degree program at OU. Fulfills large ensemble credit for undergraduate and graduate music majors. (F, Sp)
- MUTE 3310 Men's Glee Club 1 Credit Hour**
0-1 hours. Prerequisite: junior standing. May be repeated; maximum credit 5 hours. This ensemble is dedicated to the study and performance of music for the male voice. Annual performances include the Fall and Spring concerts, Christmas at OU, and the President's Concert. Membership is open through audition to male students in any degree program at OU. (F, Sp)
- MUTE 3342 Jazz Improvisation 2 Credit Hours**
Prerequisite: junior standing. May be repeated; maximum credit 8 hours. Development of improvising skills in the jazz idiom. Designed as a hands-on laboratory course for students of various skill levels to improve personal abilities. (F, Sp, Su)
- MUTE 3440 Mentored Research Experience 3 Credit Hours**
0 to 3 hours. Prerequisites: ENGL 1113 or equivalent, and permission of instructor. May be repeated; maximum credit 12 hours. For the inquisitive student to apply the scholarly processes of the discipline to a research or creative project under the mentorship of a faculty member. Student and instructor should complete an Undergraduate Research & Creative Projects (URCP) Mentoring Agreement and file it with the URCP office. Not for honors credit. (F, Sp, Su)
- MUTE 3980 Honors Research 1-3 Credit Hours**
1 to 3 hours. Prerequisite: Admission to Honors Program; May be repeated, maximum credit six hours. Will provide an opportunity for the gifted Honors candidate to work at a special project in the student's field. (F, Sp, Su)
- MUTE 4020 Composition Forum 0 Credit Hours**
Prerequisite: junior standing and composition majors; corequisite: Composition 4010 or 4020. Required of all composition majors. Meets weekly throughout the semester as an official laboratory to discuss compositional techniques and review student compositions. (F, Sp, Su)
- MUTE 4232 Organ Improvisation Seminar 2 Credit Hours**
Prerequisites: majors only; MUTH 2522 and MUTH 2622. The goal of the course is to help students develop basic skills in improvisation, including the development of a greater sense of harmonic direction, the exploration of simple forms and counterpoint, and the improvisation of melodic phrases. (F, Sp)
- MUTE G4252 Music in Worship 2 Credit Hours**
Prerequisite: junior standing. Presents both a brief history of hymnody within worship, as well as an overview of the role of music within various denominations, both within the United States and throughout the world. (F)
- MUTE G4262 Church Music Practicum 2 Credit Hours**
Prerequisite: junior standing. Provides students with practical skills and information pertinent to the church music profession. (Irreg.)

- MUTE 4271 Chamber Music 1 Credit Hour**
Prerequisite: permission. May be repeated; maximum credit four hours. Study and performance of chamber music literature for various combinations of instruments. (F, Sp)
- MUTE 4280 Studio Ensemble 1 Credit Hour**
0 to 1 hour. Prerequisite: 2280. May be repeated for credit. Performance experience in an ensemble of similar instruments. (F, Sp)
- MUTE 4290 Opera Production 1-3 Credit Hours**
(Slashlisted with 5290) 1 to 3 hours. Prerequisite: junior standing in music. May be repeated; maximum credit 12 hours. A musical, dramatic, and technical theater practicum for students cast in solo and chorus roles in major opera productions. The purpose of the course and productions is to provide appropriate training and performance opportunities for each participant. No student may earn credit for both 4290 and 5290. (Irreg.)
- MUTE 4310 Vocal Coaching 2 Credit Hours**
0 to 2 hours credit. Prerequisite: junior or senior standing and instructors permission. May be repeated three times; maximum credit eight hours. Course is designed as a supplement to weekly voice lessons with sessions that focus primarily on diction, style and interpretation issues within a students repertoire. (F, Sp)
- MUTE 4312 Voice Science and Vocal Pedagogy 2 Credit Hours**
Prerequisite: Junior Standing, Majors only. In this course students will learn about how the voice functions when used as musical instrument. Students will study the anatomy and physiology of the voice, respiratory and articulation system, the conditions for correct posture and alignment, and vocal acoustics. Students will learn how to apply this information to develop skills as a vocal pedagogue. (Sp)
- MUTE 4382 Acting for Opera I 2 Credit Hours**
(Slashlisted with MUTE 5382) Prerequisite: majors only, junior standing. Acting for Opera develops basic acting and interpretive skills for opera performance, including characterization, interaction, movement and improvisation. Music and text will be explored from the perspective of dramatic structure. The creative integration of the physical, emotional, and mental tasks of acting are emphasized. No student may earn credit for both 4382 and 5382. (F)
- MUTE 4392 Acting for Opera II 2 Credit Hours**
(Slashlisted with MUTE 5392) Prerequisite: majors only, junior standing. An in-depth study of scenes selected from 18th - 20th century operatic repertoire, culminating in a performance at the end of the semester. Scenes will be assigned, coached, and rehearsed in class. The focus of the class is the development of the individual student's skills, with an emphasis on process and techniques. No student may earn credit for both 4392 and 5392. (Sp)
- MUTE 4411 Organ Technology Lab 1 Credit Hour**
Prerequisite: completion of MUTE 2411 for four semesters, and permission of instructor. May be repeated; maximum credit four hours. Combined with MUTE 2411, MUTE 4411 provides an eight-semester course of study of practical and hands-on experience for Organ Technology majors. Students may not enroll in MUTE 4411 without the completion of four semesters of MUTE 2411. Covers basic and fundamental areas of knowledge and experience any organ technician is expected to master. For students who already have experience in certain areas, their course of study may be altered to address areas of relative weakness or provide advanced experience. Laboratory (F, Sp)
- MUTE 4423 History and Fundamentals of Pipe Organ Construction and Design 3 Credit Hours**
Prerequisite: junior standing; majors only or permission of instructor. Historical and interactive study of the pipe organ, from the earliest historical examples to the latest developments in contemporary instruments. Covers a broad field of information that applies directly to the instrument itself, including topics such as: basic components of the pipe organ, various types of key action, physics of pipe speech, pipe-making, acoustics, console design and the development of tuning standards. Includes a lab-type component in which the class will explore various instruments in situ to experience the various principles in application, as well as learning the basics of tuning and maintenance. (F, Sp)
- MUTE 4453 History and Technique of Organbuilding I 3 Credit Hours**
Prerequisite: Junior standing; majors only. The course is modeled after the syllabus published by the American Institute of Organbuilders pertaining to the fundament of knowledge required to pass the examination for admission as a Colleague of the organization. This two-semester sequence traverses the majority of the topics covered in the AIO examination, thus this course is a comprehensive study of both technical and artistic knowledge. (Irreg.)
- MUTE 4463 History and Technique of Organbuilding II 3 Credit Hours**
Prerequisite: Majors only; Junior standing; MUTE 4453. A continuation of the content begun in MUTE 4453. Course content is modeled after the published syllabus of the American Institute of Organbuilders and the knowledge required to pass the examination for admission as a Colleague of the organization. Continues the progression of the technical and artistic knowledge of organ building. (Irreg.)
- MUTE 4472 Internship in Organbuilding II 2 Credit Hours**
Prerequisite: Permission of instructor; MUTE 2471; may be repeated; maximum credit 4 hours. The Internship in Organbuilding is designed to provide students first hand training in the practice of organbuilding, both in the workshop and in the field. Specifically, students will practice organ tuning and maintenance. Travel to local churches and academic institutions will provide additional opportunities for analysis and hands-on experience. (Irreg.)
- MUTE 4512 Professional Preparation and Capstone Project 2 Credit Hours**
Prerequisite: Majors only, junior standing. Designed to maximize student potential to think, work, and thrive in all facets of a professional musical career and complete a Capstone Project. The ultimate goal of the class is to provide students with strategies, concepts, and knowledge to help build the career-development skills necessary for 21st-century musicians. (F) [V].
- MUTE 4970 Undergraduate Seminar 1-3 Credit Hours**
Majors only. 1 to 3 hours. May be repeated with change of subject matter; content changes each semester. In-depth look at areas dealing with technique, technology and applied instruction in a class or group setting. Study of newly developed, experimental or inter-disciplinary topics in music technique.
- MUTE 4990 Independent Study 1-3 Credit Hours**
1 to 3 hours. Prerequisite: Senior standing and permission of instructor. May be repeated; maximum credit nine hours. Contracted independent study for a topic not currently offered in regularly scheduled courses. Independent study may include library and/or laboratory research and field projects. (Irreg.)

- MUTE 5050 Wind Symphony** **1 Credit Hour**
0 to 1 hours. Prerequisite: Graduate standing and permission of instructor; may be repeated; maximum four credit hours. The University of Oklahoma Wind Symphony is the flagship wind and percussion ensemble at the University of Oklahoma. It explores, through rehearsal and performance, established repertoire, significant new works, and premieres. Membership is by audition. (F, Sp)
- MUTE 5060 Symphony Band** **1 Credit Hour**
0 to 1 hours. Prerequisite: Graduate standing and permission of instructor; may be repeated; maximum four credit hours. The University of Oklahoma Symphony Band is a major ensemble that performs significant repertoire for wind and percussion instruments. Membership is by audition. The Symphony Band performs four concerts each academic year. Students enrolled in the 5000 level of the class are graduate students of the OU School of Music, or graduate students in another field. (F, Sp)
- MUTE 5070 University Marching Band** **1 Credit Hour**
0 to 1 hours. Prerequisite: Graduate standing and permission of instructor; may be repeated; maximum credit four hours. Pride of Oklahoma Marching Band. Membership is by audition. (F)
- MUTE 5080 Campus Band** **1 Credit Hour**
0 to 1 hours. Prerequisite: Graduate standing and permission of instructor; may be repeated; maximum four credit hours. Study and performance of concert literature for the wind band to include score analysis and study of the aspects of program planning and performance practices. Number of credits applicable to degree programs varies, but in no case may exceed four hours. Audition required. (Sp)
- MUTE 5090 Basketball Band** **1 Credit Hour**
0 to 1 hours. Prerequisite: Graduate standing and permission of instructor; may be repeated; maximum four credit hours. Sound of the Sooners Men's and Women's Basketball Bands. Membership is by audition. (Sp)
- MUTE 5120 Jazz Ensemble** **1 Credit Hour**
0 to 1 hour. Prerequisite: graduate standing and permission. May be repeated for credit; maximum credit four hours. Admission by audition. Preparation and performance of music written in a variety of jazz styles. (F, Sp)
- MUTE 5132 Organ Improvisation Seminar** **2 Credit Hours**
Prerequisites: majors only; graduate standing. The goal of the course is to help students develop basic skills in improvisation, including the development of a greater sense of harmonic direction, the exploration of simple forms and counterpoint, and the improvisation of melodic phrases. (F, Sp)
- MUTE 5140 University Orchestra** **1 Credit Hour**
0 to 1 hour. Prerequisite: permission of instructor; determined by audition. May be repeated for credit. Number of credits applicable to degree programs varies, but in no case may exceed four hours. Study and performance of orchestral literature for the string orchestra and full symphony orchestra to include score analysis and study of the aspects of program planning and performance practices. (F, Sp)
- MUTE 5160 University Chorale** **1 Credit Hour**
Prerequisite: graduate standing, permission; membership determined by audition. May be repeated for credit. An ensemble of high caliber; approximately 40 singers. Rehearsal and performance of choral and choral-orchestral masterworks drawn mostly from the baroque through twentieth-century style periods. Several performances each semester. (F, Sp, Su)
- MUTE 5190 Opera/Music Theatre** **2 Credit Hours**
0 to 2 hours. Prerequisite: permission of instructor by audition. May be repeated for credit; maximum credit eight hours. Consists of rehearsals and performances of opera, musicals and other forms of music theatre. (F, Sp, Su)
- MUTE 5271 Chamber Music** **1 Credit Hour**
Prerequisite: Graduate standing, permission. May be repeated with change of subject matter. Survey of chamber music through participation in ensemble groups. Preparation and public performance of selected chamber music works. (F, Sp)
- MUTE 5280 Studio Ensemble** **1 Credit Hour**
0 to 1 hour. Prerequisite: graduate standing. May be repeated for credit. Performance experience in an ensemble of similar instruments. (F, Sp)
- MUTE 5290 Opera Production** **1-3 Credit Hours**
(Slashlisted with 4290) 1 to 3 hours. Prerequisite: junior standing in music. May be repeated; maximum credit 12 hours. A musical, dramatic, and technical theater practicum for students cast in solo and chorus roles in major opera productions. The purpose of the course and productions is to provide appropriate training and performance opportunities for each participant. No student may earn credit for both 4290 and 5290. (Irreg.)
- MUTE 5310 Men's Glee Club** **1 Credit Hour**
Prerequisite: graduate standing. 0-1 hours. May be repeated; maximum credit 5 hours. This ensemble is dedicated to the study and performance of music for the male voice. Annual performances include the Fall and Spring concerts, Christmas at OU, and the President's Concert. Membership is open through audition to male voices in any degree program at OU. (F, Sp)
- MUTE 5320 Women's Chorus** **1 Credit Hour**
Prerequisite: graduate standing. 0-1 hours. May be repeated; maximum credit 8 hours. This ensemble is dedicated to the study and performance of music for the female voice. Annual performances include the Fall and Spring concerts, Christmas at OU, and the President's Concert. Membership is open through audition to female voices in any degree program at OU. Fulfills large ensemble credit for undergraduate and graduate music majors. (F, Sp)
- MUTE 5342 Jazz Improvisation** **2 Credit Hours**
Prerequisite: Graduate Standing. Development of improvising skills in the jazz idiom for graduate students. Designed as a hands-on laboratory course for students of various skill levels to improve personal abilities. (F, Sp)
- MUTE 5382 Acting for Opera I** **2 Credit Hours**
(Slashlisted with MUTE 4382) Prerequisite: graduate standing. Acting for Opera develops basic acting and interpretive skills for opera performance, including characterization, interaction, movement and improvisation. Music and text will be explored from the perspective of dramatic structure. The creative integration of the physical, emotional, and mental tasks of acting are emphasized. No student may earn credit for both 4382 and 5382. (F)
- MUTE 5392 Acting for Opera II** **2 Credit Hours**
(Slashlisted with MUTE 4392) Prerequisite: graduate standing. An in-depth study of scenes selected from 18th-20th century operatic repertoire, culminating in a performance at the end of the semester. Scenes will be assigned, coached, and rehearsed in class. The focus of the class is the development of the individual student's skills, with an emphasis on process and techniques. No student may earn credit for both 4392 and 5392. (Sp)

- MUTE 5413 Church Music Practicum 3 Credit Hours**
Prerequisite: graduate standing or permission. This course provides students with practical skills and information pertinent to the church-music profession. The scope of study will include, but is not limited to, service playing, accompanying choral works, console conducting, and interpersonal skills related to the workplace environment. The students will also develop a list of historical and current resources that will contribute to their knowledge of music's place within the church. (F, Sp)
- MUTE 5423 History and Fundamentals of Pipe Organ Construction and Design 3 Credit Hours**
Prerequisite: graduate standing or permission. Historical and interactive study of the pipe organ, from the earliest historical examples to the latest developments in contemporary instruments. Covers a broad field of information that applies directly to the instrument itself, including topics such as: basic components of the pipe organ, various types of key action, physics of pipe speech, pipemaking, acoustics, console design and the development of tuning standards. Includes a lab-type component in which the class will explore various instruments in situ to experience the various principles in application as well as learning the basics of tuning and maintenance. (F, Sp)
- MUTE 5453 History and Technique of Organbuilding I 3 Credit Hours**
Prerequisite: Graduate Standing. The course is modeled after the syllabus published by the American Institute of Organbuilders pertaining to the fundament of knowledge required for admission as a Colleague of the organization. The two-semester sequence of MUTE 5453 and 5463 traverses the majority of the topics covered in the AIO examination and thus is a comprehensive study of both technical and artistic knowledge. (F)
- MUTE 5463 History and Technique of Organbuilding II 3 Credit Hours**
Prerequisite: Graduate standing and MUTE 5453. A continuation of the content begun in MUTE 5453. Course content is modeled after the published syllabus of the American Institute of Organbuilders and the knowledge required to pass the examination for admission as a Colleague of the organization. Continues the progression of the technical and artistic knowledge of organ building. (Sp)
- MUTE 5471 Internship in Organbuilding I 1 Credit Hour**
Prerequisite: Graduate standing. The Internship in Organbuilding is designed to provide students first-hand training in the practice of organbuilding, both in the workshop and in the field. Site visits will allow for first-hand application of skills honed in the organbuilder's shop. Travel to local churches and academic institutions will provide additional opportunities for analysis and hands-on experience. (F, Sp)
- MUTE 5472 Internship in Organbuilding II 2 Credit Hours**
Prerequisite: Graduate standing and MUTE 5471. The Internship in Organbuilding is designed to provide students firsthand training in the practice of organbuilding, both in the workshop and in the field. Students will coordinate three-hour meeting times each week directly with an organbuilder and in consultation with the instructor. Site visits will allow for first-hand application of skills honed in the organbuilder's shop. (F, Sp, Su)
- MUTE 5512 Choral Conducting 2 Credit Hours**
Prerequisite: 3262; graduate standing; permission of instructor. May be repeated; maximum credit six hours. Development of conducting gestures, rehearsal procedures and stylistic interpretation in an ensemble setting. Content coordinated with 6152. Repertoire ranges from medieval chant to avant garde works with nonconventional notation. (F, Sp, Su)
- MUTE 5522 Instrumental Conducting 2 Credit Hours**
Instrumental Conducting; Prerequisite: 3252; Graduate Standing; Permission Of Instructor. May Be Repeated; Maximum Credit Six Hours. Development Of Baton Technique, Error Detection Skills, Rehearsal Procedures And Interpretive Skills. Conducting Of Band Or Orchestral Works From Various Style Periods. (F)
- MUTE 5532 Instrumental Score Studies 2 Credit Hours**
Instrumental Score Studies. Prerequisite: 3252; graduate standing or permission. May be repeated with change of content. Critical performance analysis of selected instrumental masterworks from various style periods. Development of an understanding of proper style and interpretation based on musical research.
- MUTE 5970 Seminar in Music Technique 1-3 Credit Hours**
1 to 3 hours. Prerequisite: graduate standing in music and permission. May be repeated with change of subject matter; maximum credit applicable toward degree, six hours. In-depth study of topics of interest in music performance. (Sp)
- MUTE 5990 Special Studies in Conducting 1-3 Credit Hours**
1 to 3 hours. Prerequisite: 5512 or 5522, graduate standing, permission of director of the school. May be repeated with change of subject matter; maximum graduate credit six hours. Advanced individual study of conducting problems and score analysis. (Sp, Su)
- MUTE 6132 Organ Improvisation Seminar 2 Credit Hours**
Prerequisites: majors only; graduate standing. The goal of the course is to help students develop basic skills in improvisation, including the development of a greater sense of harmonic direction, the exploration of simple forms and counterpoint, and the improvisation of melodic phrases. (F, Sp)
- MUTE 6152 Choral Score Studies 2 Credit Hours**
Prerequisite: 3252; graduate standing; permission of instructor. May be repeated; eight hours credit applicable to DMA degree. Critical performance analysis of selected masterworks from medieval chant to avant garde works of the twentieth century. Development of an understanding of proper style and interpretation based on musical research. (F, Sp, Su)
- MUTE 6162 Instrumental Score Studies 2 Credit Hours**
Prerequisite: 5532, graduate standing, and permission of instructor. May be repeated; maximum credit eight hours applicable to DMA degree. Development of knowledge of broad base of repertoire combined with in-depth analysis of specific works. (F, Sp)
- MUTE 6210 Collegium Musicum 1 Credit Hour**
0 to 1 hour. Prerequisite: permission. Performance of instrumental and vocal music from all periods and repertoires, and problems related thereto. (F, Sp)
- MUTE 6252 Choral Conducting 2 Credit Hours**
Prerequisite: 5512; graduate standing; permission of instructor. May be repeated; eight hours credit applicable to DMA degree. Refinement of conducting, rehearsal and interpretive skills. Emphasis on musical nuance in choral style and interpretation. (F, Sp, Occas. Su)
- MUTE 6262 Instrumental Conducting 2 Credit Hours**
Prerequisite: 5522, graduate standing, and permission of instructor. May be repeated; maximum credit eight hours applicable to DMA degree. Development of advanced conducting techniques and rehearsal skills. Exploration of relationships between structural analysis and performance. Podium time in ensemble situations. (F, Sp)

- MUTH 1512 Musical Structures I** **2 Credit Hours**
Prerequisite: Majors only; Corequisite: MUTH 1612. This is the first course in the structures sequence required of all music majors. Structures I focuses on the fundamentals, diatonic counterpoint, and introduces diatonic harmonic practices of the eighteenth and nineteenth centuries through composition, analysis, and aural perception. (F)
- MUTH 1522 Musical Structures II** **2 Credit Hours**
Prerequisite: MUTH 1512 and MUTH 1612 with grade of C or better; Majors only; Corequisite: MUTH 1622. An overview of diatonic harmony and small-scale forms through writing, analysis, and aural perception. (Sp)
- MUTH 1612 Aural Skills I** **2 Credit Hours**
Prerequisite: Majors only; Corequisite: MUTH 1512. This course draws connections between written and aural theory in order to enhance the students abilities of musical interpretation as well as improve upon aural training. In specific, students will learn dictation and singing of diatonic intervals, triads, and scales (major and minor), dictation and singing of diatonic melodies, dictation of basic rhythms in the standard meters. (F)
- MUTH 1622 Aural Skills II** **2 Credit Hours**
Prerequisite: MUTH 1512 and MUTH 1612 with grade of C or better; Corequisite: MUTH 1522. Draws connections between written and aural theory to enhance the abilities of musical interpretation as well as improve aural training. A continuation of MUTH 1612, students learn dictation and sight singing of more advanced diatonic melodies and dictation of rhythmic patterns, including triplets and syncopations, in standard meters. In addition, students learn dictation and singing of standard diatonic harmonic patterns. (Sp)
- MUTH 2512 Musical Structures III** **2 Credit Hours**
Prerequisite: MUTH 1522 and MUTH 1622 with grade of C or better; Corequisite MUTH 2612. A study of the chromatic harmonic practices and large-scale forms of the eighteenth and nineteenth centuries through writing, analysis, and aural perception. (F) [IV-AF].
- MUTH 2522 20th- and 21st-Century Musical Structures** **2 Credit Hours**
Prerequisite: MUTH 2512 with grade of C or better. A study of the late nineteenth- through twenty first-century compositional practices. Development of theoretical analysis skills in twentieth- and twenty first-century music. (Sp)
- MUTH 2612 Aural Skills III** **2 Credit Hours**
Prerequisite: MUTH 1522 and MUTH 1622 with grade of C or better; Corequisite: MUTH 2512. Study of moderately difficult rhythms and melodies in the context of illustrative eighteenth- and nineteenth-century styles - aural perception, vocal reading and analysis. (F)
- MUTH 2621 Aural Skills IV** **1 Credit Hour**
Prerequisite: Majors only; MUTH 2512 and MUTH 2612 with grade of C or better. Study of rhythms, chromatic harmonies, and modulations as used by nineteenth-century composers - aural perception, vocal reading and analysis. (Sp)
- MUTH 2970 Special Topics in Music Theory** **1-3 Credit Hours**
Majors only. 1 to 3 hours. May be repeated with change of subject matter; content changes each semester. Study of newly developed, experimental or inter-disciplinary topics in music theory.
- MUTH 3440 Mentored Research Experience** **3 Credit Hours**
0 to 3 hours. Prerequisites: ENGL 1113 or equivalent, and permission of instructor. May be repeated; maximum credit 12 hours. For the inquisitive student to apply the scholarly processes of the discipline to a research or creative project under the mentorship of a faculty member. Student and instructor should complete an Undergraduate Research & Creative Projects (URCP) Mentoring Agreement and file it with the URCP office. Not for honors credit. (F, Sp, Su)
- MUTH 3763 Counterpoint** **3 Credit Hours**
Prerequisite: 2522. A study of eighteenth-century counterpoint. First semester, two parts with analysis and original writing. (F)
- MUTH 3783 Forms and Analysis** **3 Credit Hours**
Prerequisite: 2522. A study of the structure of homophonic forms, followed by the standard polyphonic and homophonic forms of eighteenth-, nineteenth-, and twentieth-century music. (Sp)
- MUTH 3960 Honors Reading** **1-3 Credit Hours**
1 to 3 hours. Prerequisite: Admission to Honors Program. May be repeated; maximum credit six hours. Consists of topics designated by the instructor in keeping with the student's major program. The topics will cover materials not usually presented in the regular courses. (F, Sp, Su)
- MUTH 3970 Honors Seminar** **1-3 Credit Hours**
1 to 3 hours. Prerequisite: admission to Honors Program. May be repeated; maximum credit six hours. Subjects covered vary. Deals with concepts not usually treated in regular courses. (Irreg.)
- MUTH 3980 Honors Research** **1-3 Credit Hours**
1 to 3 hours. Prerequisite: Admission to Honors Program. May be repeated; maximum credit six hours. Will provide an opportunity for the gifted Honors candidate to work at a special project in the student's field. (F, Sp, Su)
- MUTH 3990 Independent Study** **1-3 Credit Hours**
1 to 3 hours. Prerequisite: permission of instructor and junior standing. May be repeated once with change of content. Independent study may be arranged to study a subject not available through regular course offerings. (F, Sp, Su)
- MUTH G4853 Orchestration** **3 Credit Hours**
Prerequisite: Majors only; MUTH 3512 or concurrent enrollment in MUTH 3512. A study of the characteristics of the instruments of the orchestra and their uses in combination, including historical background of orchestral style. (F)
- MUTH 4863 Advanced Orchestration** **3 Credit Hours**
Prerequisite: 4853 or permission of instructor. May be repeated; maximum credit six hours. Continuation of the study of the characteristics of the instruments of the orchestra and their uses in combination covering advanced techniques and practices, including historical background or orchestral style, including the twentieth century. (Sp)
- MUTH 4960 Directed Readings** **1-4 Credit Hours**
1 to 4 hours. Prerequisite: good standing in University; permission of instructor and dean. May be repeated; maximum credit four hours. Designed for upper-division students who need opportunity to study a specific problem in greater depth than formal course content permits. (Irreg.)
- MUTH 4970 Senior Seminar** **1-3 Credit Hours**
1 to 3 hours. Prerequisite: 3763 and 3783. May be repeated once with change of topic; maximum credit six hours. Not open to graduate students. Intended to permit study in-depth of such areas as the style of a particular composer or the writing of a particular theorist such as Hindemith, Schenker, Persichetti and others. (F, Sp, Su)

- MUTH 4990 Independent Study 1-3 Credit Hours**
1 to 3 hours. Prerequisite: Senior standing and permission of instructor. May be repeated; maximum credit nine hours. Contracted independent study for a topic not currently offered in regularly scheduled courses. Independent study may include library and/or laboratory research and field projects. (Irreg.)
- MUTH 5811 Tonal Harmony Review 1 Credit Hour**
Prerequisite: Graduate standing in the School of Music and departmental permission. Assuming a knowledge of scales, key signatures, and clef reading, this course offers a comprehensive, fast-paced review of tonal harmony via an online format that mixes text- and video-based teaching methods. To participate and receive course credit, you must have performed unsatisfactorily on either 1) the graduate program's music-theory entrance exam or 2) previous iterations of this course. (F)
- MUTH 5813 Introduction to Schenkerian Analysis 3 Credit Hours**
Prerequisite: graduate standing and permission of the graduate music office. Develop basic skills in Schenkerian analysis and an understanding of Schenkerian theory. (Irreg.)
- MUTH 5821 Musical Form Review 1 Credit Hour**
Prerequisite: Graduate standing in the School of Music and departmental permission. This course offers a comprehensive, fast-paced review of tonal form via an online format that mixes text- and video-based teaching methods. To participate and receive course credit, you must have performed unsatisfactorily on either 1) the graduate program's music-theory entrance exam or 2) previous iterations of this course. (Sp, Su)
- MUTH 5823 Pedagogy of Music Theory 3 Credit Hours**
Prerequisite: graduate standing and permission of the graduate music office. An examination of the philosophy, logistics, methods, content, and materials of teaching music theory at the undergraduate level. (Irreg.)
- MUTH 5833 Analysis of Twentieth-Century Music 3 Credit Hours**
Prerequisite: graduate standing and permission of the graduate music office. Traces the origins of twentieth-century music and surveys compositional techniques. (Irreg.)
- MUTH 5863 Advanced Orchestration 3 Credit Hours**
Prerequisite: graduate standing and permission of the graduate music office. Continuation of the study of the characteristics of the instruments of the orchestra and their uses in combination covering advanced techniques and practices, including historical background or orchestral style, including the twentieth century. No student may earn credit for both 4863 and 5863. (Sp)
- MUTH 5883 Analysis of Tonal Music 3 Credit Hours**
Prerequisite: graduate standing and permission of the graduate music office. Analysis of form and harmony in selected works from the common practice era (1670-1900). (Irreg.)
- MUTH 5893 Teaching Music Theory in the 21st Century 3 Credit Hours**
Prerequisite: Graduate standing and departmental permission. A survey of current trends in the field of music theory. Subjects to include opportunity and access, form, galant schemata, meter, narrative, performance, popular music, Schenkerian theory, and world music. (Irreg.)
- MUTH 5960 Directed Readings 1-4 Credit Hours**
1 to 4 hours. Prerequisite: 18 hours of music, permission of the director of the school. May be repeated; maximum undergraduate credit eight hours, graduate credit six hours. Individual topics in music theory. (F, Sp, Su)
- MUTH 5970 Seminar in Music Theory 1-4 Credit Hours**
1 to 4 hours. Prerequisite: 30 hours of music or permission. May be repeated with change of subject matter; maximum graduate credit 12 hours. (F, Sp, Su)
- MUTH 5980 Research for Master's Thesis 2-9 Credit Hours**
Variable enrollment, two to nine hours; maximum credit applicable toward degree, four hours. (F, Sp, Su)
- MUTH 5990 Special Studies in Music Theory 1-3 Credit Hours**
1 to 3 hours. Prerequisite: 30 hours of music, permission of the director of the school. May be repeated with change of subject matter; maximum graduate credit six hours. Individual study, research and analysis in music theory. (F, Sp, Su)
- MUTH 6960 Directed Readings 1-3 Credit Hours**
1 to 3 hours. Prerequisite: graduate standing or permission of instructor. May be repeated; maximum credit six hours. Directed readings and/or literature review under the direction of a faculty member. (Irreg.)
- MUTH 6970 Special Topics/Seminar 1-3 Credit Hours**
1 to 3 hours. Prerequisite: graduate standing or permission of instructor. May be repeated; maximum credit 12 hours. Special topics or seminar course for content not currently offered in regularly scheduled courses. May include library and/or research and field projects. (Irreg.)
- MUTH 6990 Independent Study 1-3 Credit Hours**
1 to 3 hours. Prerequisite: Graduate standing and permission of instructor. May be repeated; maximum credit nine hours. Contracted independent study for a topic not currently offered in regularly scheduled courses. Independent study may include library and/or laboratory research and field projects. (Irreg.)
- MUTK 4113 Understanding Electroacoustic Music 3 Credit Hours**
(Slashlisted with MUTK 5113) Prerequisite: Sophomore standing. A course on Electroacoustic music techniques, history, aesthetics, and literature. Students will improve their role as active listeners by observing the ways we listen to music, speculate on the role of technology in creating new music, consider the aesthetic intentions of seminal experimental composers, and study their compositions using various analytical systems. No student may earn credit for both 4113 and 5113. (Irreg.) [IV-AF].
- MUTK 4133 Introduction to Digital Signal Processing 3 Credit Hours**
(Slashlisted with MUTK 5133) Prerequisite: Sophomore standing and permission of instructor. Students will be familiarized with the theory of Digital Audio and various Digital Signal Processing applications. Cycling 74's Max, an object-oriented programming environment for music applications, known for its real-time audio functions, will be the preferred software for the term. Students will complete weekly creative & programming assignments. A final and original creative project will be required. No student may earn credit for both 4133 and 5133. (Irreg.)
- MUTK 4143 Advanced Digital Signal Processing 3 Credit Hours**
Prerequisite: 4133. Advanced methods and theories of digital audio and digital signal processing applications. (Irreg.)
- MUTK 4163 Real Time MIDI Control 3 Credit Hours**
Prerequisite: 4133 and sophomore, junior, or senior standing. An introduction to the real-time MIDI control and various MIDI processing applications through reading, listening, and composing. (Irreg.)
- MUTK 4173 Recording Techniques 3 Credit Hours**
Prerequisite: 4183 and junior or senior standing. Provides an understanding to the fundamentals of recording techniques and studio procedures. (Irreg.)
- MUTK 4183 Sound Design 3 Credit Hours**
Prerequisite: sophomore, junior, or senior standing. A course designed to expand ones knowledge of MIDI sequencing, software-hardware synthesizers, and digital audio editing. (Irreg.)

- MUTK 4193 Producing, Mixing, & Mastering 3 Credit Hours**
Prerequisite: Junior standing; MUTK 4173 and MUTK 4183. This course gives students the opportunity to learn the practical skills involved in producing, mixing, and mastering a music recording. Students will also apply appropriate skills for mix-down and editing, and learn recording studio etiquette and final deliverable expectations for album distribution. (Sp)
- MUTK 4960 Directed Readings 1-4 Credit Hours**
1 to 4 hours. Prerequisite: good standing in University; permission of instructor and dean. May be repeated; maximum credit four hours. Designed for upper-division students who need opportunity to study a specific problem in greater depth than formal course content permits. (Irreg.)
- MUTK 4970 Undergraduate Seminar 1-3 Credit Hours**
Prerequisite: sophomore standing. 1 to 3 hours. May be repeated with change with change of content; maximum credit nine hours. In depth look at advanced topics of various fields of electroacoustic music. (Irreg.)
- MUTK 4990 Independent Study 1-3 Credit Hours**
1 to 3 hours. Prerequisite: Senior standing and permission of instructor. May be repeated; maximum credit nine hours. Contracted independent study for a topic not currently offered in regularly scheduled courses. Independent study may include library and/or laboratory research and field projects. (Irreg.)
- MUTK 5113 Understanding Electroacoustic Music 3 Credit Hours**
(Slashlisted with MUTK 4113) Prerequisite: Graduate standing and departmental permission. A course on Electroacoustic music techniques, history, aesthetics, and literature. Students will improve their role as active listeners by observing the ways we listen to music, speculate on the role of technology in creating new music, consider the aesthetic intentions of seminal experimental composers, and study their compositions using various analytical systems. No student may earn credit for both 4113 and 5113. (Irreg.)
- MUTK 5133 Introduction to Digital Signal Processing 3 Credit Hours**
(Slashlisted with MUTK 4133) Prerequisite: Graduate standing and departmental permission. Students will be familiarized with the theory of Digital Audio and various Digital Signal Processing applications. Cycling 74's Max, an object-oriented programming environment for music applications, known for its real-time audio functions, will be the preferred software for the term. Students will complete weekly creative & programming assignments. A final and original creative project will be required. No student may earn credit for both 4133 and 5133. (Irreg.)
- MUTK 5143 Advanced Digital Signal Processing 3 Credit Hours**
Prerequisite: Graduate standing and departmental permission. Students will expand their knowledge and understanding of the theory and music applications of Digital Signal Processing through reading and programming in Cycling74's Max. Students will demonstrate their understanding of the topics discussed in class through weekly creative assignments and presentations. An original music composition will be presented at the end of the semester. (Irreg.)
- MUTK 5153 Interactive Performance Techniques 3 Credit Hours**
Prerequisite: Graduate standing and departmental permission. Students will expand their knowledge and practice of the techniques used in composition of live electronics and interactive performance, through weekly readings, listening and analyzing interactive music, and completing programming assignments in Cycling74 Max. An original creative project such as a composition for a solo performer and computer interaction will be required. (Irreg.)
- MUTK 5163 Real Time MIDI Control 3 Credit Hours**
Prerequisite: Graduate standing and departmental permission. Students will study in depth advanced techniques of Real time MIDI control in Cycling74's Max programming environment, through readings, listening, analysis of related compositions, completing weekly programming assignments, and composing an improvisation environment that they will demonstrate as a group. (Irreg.)
- MUTK 5173 Recording Techniques 3 Credit Hours**
Prerequisite: Graduate standing and departmental permission. This course aims to familiarize students with specialized recording techniques and studio procedures. This is a hands-on class with emphasis on acquiring skills via intensive practice. The students will be required to demonstrate their understanding of the materials through the successful completion of creative assignments using the recording music studio software-hardware. (Irreg.)
- MUTK 5183 Sound Design 3 Credit Hours**
Prerequisite: Graduate standing and departmental permission. Sound Design is a hands-on graduate class with emphasis on creative practice of sound manipulation. It aims to offer to the students an in-depth examination of specialized techniques divided in two major areas of interest: MIDI Sequencing and Digital Audio Editing. Students will demonstrate their understanding of the materials through the composition of creative assignments using the MIDI lab software-hardware. (Irreg.)
- MUTK 5193 Seminar in Electroacoustic Music 3 Credit Hours**
Prerequisite: Graduate standing and departmental permission. The goal of the course is to extend and deepen the students' knowledge of electroacoustic music through its contemporary discourse, such as aesthetics, analytical systems, notation, terminology, genres & categories, recent repertory, and technical fields, such as DSP, DVP, Sensors/ Actuators, etc. The students and instructor will decide the list of topics for study in according to their creative interests. (Irreg.)
- OBOE 2000 Freshman and/or Sophomore Secondary Oboe 1-2 Credit Hours**
1 to 2 hours. Prerequisite: permission of adviser and instructor. May be repeated; maximum credit toward B.F.A., B.M.A., B.M.E., and B.M. degrees, eight hours. For freshman and sophomore music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- OBOE 2020 Oboe for Music Majors: Freshman/Sophomore 2-4 Credit Hours**
2 to 4 hours. Prerequisite: Majors only. May be repeated; maximum credit 12 hours. Applied instrumental lessons for freshmen and sophomore music majors in a School of Music degree program. (F, Sp)
- OBOE 3440 Mentored Research Experience 3 Credit Hours**
0 to 3 hours. Prerequisites: ENGL 1113 or equivalent, and permission of instructor. May be repeated; maximum credit 12 hours. For the inquisitive student to apply the scholarly processes of the discipline to a research or creative project under the mentorship of a faculty member. Student and instructor should complete an Undergraduate Research & Creative Projects (URCP) Mentoring Agreement and file it with the URCP office. Not for honors credit. (F, Sp, Su)
- OBOE 4000 Junior and/or Senior Secondary Oboe 1-2 Credit Hours**
1 to 2 hours. Prerequisite: permission of adviser and instructor. May be repeated; maximum credit toward B.F.A., B.M.A., B.M.E., and B.M. degrees, eight hours. For junior and senior music students studying in a secondary (or minor) performance area. (F, Sp, Su)

- OBOE 4020 Oboe for Music Majors: Junior/Senior 1-4 Credit Hours**
1 to 4 hours. Prerequisite: majors only; junior standing. May be repeated; maximum credit 20 hours. Applied instrumental lessons for junior and senior music majors in a School of Music degree program. (F, Sp)
- OBOE 5000 Master's-Level Secondary Oboe 1-2 Credit Hours**
1 to 2 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For master's degree music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- OBOE 5010 Master's-Level Oboe for Non-Performance Music Majors 1-3 Credit Hours**
1 to 3 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For master's degree students other than performance majors in their major field. (F, Sp, Su)
- OBOE 5020 Master's-Level Oboe for Performance Majors 2-4 Credit Hours**
2 to 4 hours. Prerequisite: graduate standing in music; permission of adviser and instructor; 4020 and 4021 or equivalent. May be repeated; maximum credit toward an M.M. degree 10 hours. (F, Sp, Su)
- OBOE 6000 Doctoral Secondary Oboe 1-2 Credit Hours**
1 to 2 hours. Prerequisite: graduate standing in music, permission of adviser or instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For doctoral degree music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- OBOE 6010 Doctoral Oboe for Non-Performance Music Majors 2-3 Credit Hours**
2 to 3 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated. Doctoral-level study of applied music in the major performance area for students other than performance majors in their primary field. (F, Sp, Su)
- OBOE 6020 Doctoral Oboe for Performance Majors 2-4 Credit Hours**
2 to 4 hours. Prerequisite: graduate standing in music; 5042; permission of adviser and instructor. May be repeated; credit applicable toward applied music requirements for the Doctor of Musical Arts degree. Doctoral-level study of applied music for performance majors in their primary field. (F, Sp, Su)
- ORGN 2000 Freshman and/or Sophomore Secondary Organ 1-2 Credit Hours**
1 to 2 hours. Prerequisite: permission of adviser and instructor. May be repeated; maximum credit toward B.F.A., B.M.A., B.M.E., and B.M. degrees, eight hours. For freshman and sophomore music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- ORGN 2020 Organ for Music Majors: Freshman/Sophomore 2-4 Credit Hours**
2 to 4 hours. Prerequisite: Majors only. May be repeated; maximum credit 8 hours. Applied instrumental lessons for freshmen and sophomore music majors in a School of Music degree program. (F, Sp)
- ORGN 3440 Mentored Research Experience 3 Credit Hours**
0 to 3 hours. Prerequisites: ENGL 1113 or equivalent, and permission of instructor. May be repeated; maximum credit 12 hours. For the inquisitive student to apply the scholarly processes of the discipline to a research or creative project under the mentorship of a faculty member. Student and instructor should complete an Undergraduate Research & Creative Projects (URCP) Mentoring Agreement and file it with the URCP office. Not for honors credit. (F, Sp, Su)
- ORGN 4000 Junior and/or Senior Secondary Organ 1-2 Credit Hours**
1 to 2 hours. Prerequisite: permission of adviser and instructor. May be repeated; maximum credit toward B.F.A., B.M.A., B.M.E., and B.M. degrees, eight hours. For junior and senior music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- ORGN 4020 Organ for Music Majors: Junior/Senior 1-4 Credit Hours**
1 to 4 hours. Prerequisite: majors only; junior standing. May be repeated; maximum credit 14 hours. Applied instrumental lessons for junior and senior music majors in a School of Music degree program. (F, Sp)
- ORGN 5000 Master's-Level Secondary Organ 1-2 Credit Hours**
1 to 2 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For master's degree music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- ORGN 5010 Master's-Level Organ for Non-Performance Music Majors 1-3 Credit Hours**
1 to 3 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For master's degree students other than performance majors in their major field. (F, Sp, Su)
- ORGN 5020 Master's-Level Organ for Performance Majors 2-4 Credit Hours**
2 to 4 hours. Prerequisite: graduate standing in music; permission of adviser and instructor; 4020 and 4021 or equivalent. May be repeated; maximum credit toward an M.M. degree 10 hours. (F, Sp, Su)
- ORGN 6000 Doctoral Secondary Organ 1-2 Credit Hours**
1 to 2 hours. Prerequisite: graduate standing in music, permission of adviser or instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For doctoral degree music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- ORGN 6010 Doctoral Organ for Non-Performance Music Majors 2-3 Credit Hours**
2 to 3 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated. Doctoral-level study of applied music in the major performance area for students other than performance majors in their primary field. (F, Sp, Su)
- ORGN 6020 Doctoral Organ for Performance Majors 2-4 Credit Hours**
2 to 4 hours. Prerequisite: graduate standing in music; 5042; permission of adviser and instructor. May be repeated; credit applicable toward applied music requirements for the Doctor of Musical Arts degree. Doctoral-level study of applied music for performance majors in their primary field. (F, Sp, Su)
- PCUS 2000 Freshman and/or Sophomore Secondary Percussion 1-2 Credit Hours**
1 to 2 hours. Prerequisite: permission of adviser and instructor. May be repeated; maximum credit toward B.F.A., B.M.A., B.M.E., and B.M. degrees, eight hours. For freshman and sophomore music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- PCUS 2020 Percussion for Music Majors: Freshman/Sophomore 2-4 Credit Hours**
2 to 4 hours. Prerequisite: Majors only. May be repeated; maximum credit 12 hours. Applied instrumental lessons for freshmen and sophomore music majors in a School of Music degree program. (F, Sp)

- PCUS 3440 Mentored Research Experience 3 Credit Hours**
0 to 3 hours. Prerequisites: ENGL 1113 or equivalent, and permission of instructor. May be repeated; maximum credit 12 hours. For the inquisitive student to apply the scholarly processes of the discipline to a research or creative project under the mentorship of a faculty member. Student and instructor should complete an Undergraduate Research & Creative Projects (URCP) Mentoring Agreement and file it with the URCP office. Not for honors credit. (F, Sp, Su)
- PCUS 4000 Junior and/or Senior Secondary Percussion 1-2 Credit Hours**
1 to 2 hours. Prerequisite: permission of adviser and instructor. May be repeated; maximum credit toward B.F.A., B.M.A., B.M.E., and B.M. degrees, eight hours. For junior and senior music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- PCUS 4020 Percussion for Music Majors: Junior/Senior 1-4 Credit Hours**
1 to 4 hours. Prerequisite: majors only; junior standing. May be repeated; maximum credit 20 hours. Applied instrumental lessons for junior and senior music majors in a School of Music degree program. (F, Sp)
- PCUS 5000 Master's-Level Secondary Percussion 1-2 Credit Hours**
1 to 2 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For master's degree music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- PCUS 5010 Master's-Level Percussion for Non-Performance Music Majors 1-3 Credit Hours**
1 to 3 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For master's degree students other than performance majors in their major field. (F, Sp, Su)
- PCUS 5020 Master's-Level Percussion for Performance Majors 2-4 Credit Hours**
2 to 4 hours. Prerequisite: graduate standing in music; permission of adviser and instructor; 4020 and 4021 or equivalent. May be repeated; maximum credit toward an M.M. degree 10 hours. (F, Sp, Su)
- PCUS 6000 Doctoral Secondary Percussion 1-2 Credit Hours**
1 to 2 hours. Prerequisite: graduate standing in music, permission of adviser or instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For doctoral degree music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- PCUS 6010 Doctoral Percussion for Non-Performance Music Majors 2-3 Credit Hours**
2 to 3 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated. Doctoral-level study of applied music in the major performance area for students other than performance majors in their primary field. (F, Sp, Su)
- PCUS 6020 Doctoral Percussion for Performance Majors 2-4 Credit Hours**
2 to 4 hours. Prerequisite: graduate standing in music; 5042; permission of adviser and instructor. May be repeated; credit applicable toward applied music requirements for the Doctor of Musical Arts degree. Doctoral-level study of applied music for performance majors in their primary field. (F, Sp, Su)
- PIAN 2000 Freshman and/or Sophomore Secondary Piano 1-2 Credit Hours**
1 to 2 hours. Prerequisite: permission of adviser and instructor. May be repeated; maximum credit toward B.F.A., B.M.A., B.M.E., and B.M. degrees, eight hours. For freshman and sophomore music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- PIAN 2020 Piano for Music Majors: Freshman/Sophomore 2-4 Credit Hours**
2 to 4 hours. Prerequisite: Majors only. May be repeated; maximum credit 8 hours. Applied instrumental lessons for freshmen and sophomore music majors in a School of Music degree program. (F, Sp)
- PIAN 3440 Mentored Research Experience 3 Credit Hours**
0 to 3 hours. Prerequisites: ENGL 1113 or equivalent, and permission of instructor. May be repeated; maximum credit 12 hours. For the inquisitive student to apply the scholarly processes of the discipline to a research or creative project under the mentorship of a faculty member. Student and instructor should complete an Undergraduate Research & Creative Projects (URCP) Mentoring Agreement and file it with the URCP office. Not for honors credit. (F, Sp, Su)
- PIAN 4000 Junior and/or Senior Secondary Piano 1-2 Credit Hours**
1 to 2 hours. Prerequisite: permission of adviser and instructor. May be repeated; maximum credit toward B.F.A., B.M.A., B.M.E., and B.M. degrees, eight hours. For junior and senior music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- PIAN 4020 Piano for Music Majors: Junior/Senior 1-4 Credit Hours**
1 to 4 hours. Prerequisite: majors only; junior standing. May be repeated; maximum credit 14 hours. Applied instrumental lessons for junior and senior music majors in a School of Music degree program. (F, Sp)
- PIAN 5000 Master's-Level Secondary Piano 1-2 Credit Hours**
1 to 2 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For master's degree music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- PIAN 5010 Master's-Level Piano for Non-Performance Music Majors 1-3 Credit Hours**
1 to 3 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For master's degree students other than performance majors in their major field. (F, Sp, Su)
- PIAN 5020 Master's-Level Piano for Performance Majors 2-4 Credit Hours**
2 to 4 hours. Prerequisite: graduate standing in music; permission of adviser and instructor; 4020 and 4021 or equivalent. May be repeated; maximum credit toward an M.M. degree 10 hours. (F, Sp, Su)
- PIAN 6000 Doctoral Secondary Piano 1-2 Credit Hours**
1 to 2 hours. Prerequisite: graduate standing in music, permission of adviser or instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For doctoral degree music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- PIAN 6010 Doctoral Piano for Non-Performance Music Majors 2-3 Credit Hours**
2 to 3 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated. Doctoral-level study of applied music in the major performance area for students other than performance majors in their primary field. (F, Sp, Su)

- PIAN 6020 Doctoral Piano for Performance Majors 2-4 Credit Hours**
2 to 4 hours. Prerequisite: graduate standing in music; 5042; permission of adviser and instructor. May be repeated; credit applicable toward applied music requirements for the Doctor of Musical Arts degree. Doctoral-level study of applied music for performance majors in their primary field. (F, Sp, Su)
- RPHD 6022 Graduate Recital-Doctor of Philosophy Degree 2 Credit Hours**
Prerequisite: concurrent enrollment in 6010, permission of adviser and instructor. May be repeated for credit with the approval of the student's advisory committee. May not be elected during first enrollment. Preparation and performance of a public recital. (F, Sp, Su)
- SAX 2000 Freshman and/or Sophomore Secondary Saxophone 1-2 Credit Hours**
1 to 2 hours. Prerequisite: permission of adviser and instructor. May be repeated; maximum credit toward B.F.A., B.M.A., B.M.E., and B.M. degrees, eight hours. For freshman and sophomore music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- SAX 2020 Saxophone for Music Majors: Freshman/Sophomore 2-4 Credit Hours**
2 to 4 hours. Prerequisite: Majors only. May be repeated; maximum credit 12 hours. Applied instrumental lessons for freshmen and sophomore music majors in a School of Music degree program. (F, Sp)
- SAX 3440 Mentored Research Experience 3 Credit Hours**
0 to 3 hours. Prerequisites: ENGL 1113 or equivalent, and permission of instructor. May be repeated; maximum credit 12 hours. For the inquisitive student to apply the scholarly processes of the discipline to a research or creative project under the mentorship of a faculty member. Student and instructor should complete an Undergraduate Research & Creative Projects (URCP) Mentoring Agreement and file it with the URCP office. Not for honors credit. (F, Sp, Su)
- SAX 4000 Junior and/or Senior Secondary Saxophone 1-2 Credit Hours**
1 to 2 hours. Prerequisite: permission of adviser and instructor. May be repeated; maximum credit toward B.F.A., B.M.A., B.M.E., and B.M. degrees, eight hours. For junior and senior music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- SAX 4020 Saxophone for Music Majors: Junior/Senior 1-4 Credit Hours**
1 to 4 hours. Prerequisite: majors only; junior standing. May be repeated; maximum credit 20 hours. Applied instrumental lessons for junior and senior music majors in a School of Music degree program. (F, Sp)
- SAX 5000 Master's-Level Secondary Saxophone 1-2 Credit Hours**
1 to 2 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For master's degree music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- SAX 5010 Master's-Level Saxophone for Non-Performance Music Majors 1-3 Credit Hours**
1 to 3 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For master's degree students other than performance majors in their major field. (F, Sp, Su)
- SAX 5020 Master's-Level Saxophone for Performance Majors 2-4 Credit Hours**
2 to 4 hours. Prerequisite: graduate standing in music; permission of adviser and instructor; 4020 and 4021 or equivalent. May be repeated; maximum credit toward an M.M. degree 10 hours. (F, Sp, Su)
- SAX 6000 Doctoral Secondary Saxophone 1-2 Credit Hours**
1 to 2 hours. Prerequisite: graduate standing in music, permission of adviser or instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For doctoral degree music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- SAX 6010 Doctoral Saxophone for Non-Performance Music Majors 2-3 Credit Hours**
2 to 3 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated. Doctoral-level study of applied music in the major performance area for students other than performance majors in their primary field. (F, Sp, Su)
- SAX 6020 Doctoral Saxophone for Performance Majors 2-4 Credit Hours**
2 to 4 hours. Prerequisite: graduate standing in music; 5042; permission of adviser and instructor. May be repeated; credit applicable toward applied music requirements for the Doctor of Musical Arts degree. Doctoral-level study of applied music for performance majors in their primary field. (F, Sp, Su)
- SRRE 4020 Senior Recital 0 Credit Hours**
Prerequisite: Senior standing; majors only and departmental permission; Co-requisite: enrollment in appropriate 4020. Preparation and performance of a public recital by students in the BMA degree program and all BM degrees. (F, Sp)
- SRRE 4021 Senior Recital 1 Credit Hour**
Prerequisite: Majors only and instructor permission; Co-requisite: enrollment in appropriate 4020. Preparation and performance of a public recital by students in the BMA degree program and all BM degrees. (F, Sp) [V].
- TRMP 2000 Freshman and/or Sophomore Secondary Trumpet 1-2 Credit Hours**
1 to 2 hours. Prerequisite: permission of adviser and instructor. May be repeated; maximum credit toward B.F.A., B.M.A., B.M.E., and B.M. degrees, eight hours. For freshman and sophomore music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- TRMP 2020 Trumpet for Music Majors: Freshman/Sophomore 2-4 Credit Hours**
2 to 4 hours. Prerequisite: Majors only. May be repeated; maximum credit 12 hours. Applied instrumental lessons for freshmen and sophomore music majors in a School of Music degree program. (F, Sp)
- TRMP 3440 Mentored Research Experience 3 Credit Hours**
0 to 3 hours. Prerequisites: ENGL 1113 or equivalent, and permission of instructor. May be repeated; maximum credit 12 hours. For the inquisitive student to apply the scholarly processes of the discipline to a research or creative project under the mentorship of a faculty member. Student and instructor should complete an Undergraduate Research & Creative Projects (URCP) Mentoring Agreement and file it with the URCP office. Not for honors credit. (F, Sp, Su)
- TRMP 4000 Junior and/or Senior Secondary Trumpet 1-2 Credit Hours**
1 to 2 hours. Prerequisite: permission of adviser and instructor. May be repeated; maximum credit toward B.F.A., B.M.A., B.M.E., and B.M. degrees, eight hours. For junior and senior music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- TRMP 4020 Trumpet for Music Majors: Junior/Senior 1-4 Credit Hours**
1 to 4 hours. Prerequisite: majors only; junior standing. May be repeated; maximum credit 20 hours. Applied instrumental lessons for junior and senior music majors in a School of Music degree program. (F, Sp)

- TRMP 5000 Master's-Level Secondary Trumpet 1-2 Credit Hours**
1 to 2 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For master's degree music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- TRMP 5010 Master's-Level Trumpet for Non-Performance Music Majors 1-3 Credit Hours**
1 to 3 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For master's degree students other than performance majors in their major field. (F, Sp, Su)
- TRMP 5020 Master's-Level Trumpet for Performance Majors 2-4 Credit Hours**
2 to 4 hours. Prerequisite: graduate standing in music; permission of adviser and instructor; 4020 and 4021 or equivalent. May be repeated; maximum credit toward an M.M. degree 10 hours. (F, Sp, Su)
- TRMP 6000 Doctoral Secondary Trumpet 1-2 Credit Hours**
1 to 2 hours. Prerequisite: graduate standing in music, permission of adviser or instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For doctoral degree music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- TRMP 6010 Doctoral Trumpet for Non-Performance Music Majors 2-3 Credit Hours**
2 to 3 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated. Doctoral-level study of applied music in the major performance area for students other than performance majors in their primary field. (F, Sp, Su)
- TRMP 6020 Doctoral Trumpet for Performance Majors 2-4 Credit Hours**
2 to 4 hours. Prerequisite: graduate standing in music; 5042; permission of adviser and instructor. May be repeated; credit applicable toward applied music requirements for the Doctor of Musical Arts degree. Doctoral-level study of applied music for performance majors in their primary field. (F, Sp, Su)
- TROM 2000 Freshman and/or Sophomore Secondary Trombone 1-2 Credit Hours**
1 to 2 hours. Prerequisite: permission of adviser and instructor. May be repeated; maximum credit toward B.F.A., B.M.A., B.M.E., and B.M. degrees, eight hours. For freshman and sophomore music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- TROM 2020 Trombone for Music Majors: Freshman/Sophomore 2-4 Credit Hours**
2 to 4 hours. Prerequisite: Majors only. May be repeated; maximum credit 12 hours. Applied instrumental lessons for freshmen and sophomore music majors in a School of Music degree program. (F, Sp)
- TROM 3440 Mentored Research Experience 3 Credit Hours**
0 to 3 hours. Prerequisites: ENGL 1113 or equivalent, and permission of instructor. May be repeated; maximum credit 12 hours. For the inquisitive student to apply the scholarly processes of the discipline to a research or creative project under the mentorship of a faculty member. Student and instructor should complete an Undergraduate Research & Creative Projects (URCP) Mentoring Agreement and file it with the URCP office. Not for honors credit. (F, Sp, Su)
- TROM 4000 Junior and/or Senior Secondary Trombone 1-2 Credit Hours**
1 to 2 hours. Prerequisite: permission of adviser and instructor. May be repeated; maximum credit toward B.F.A., B.M.A., B.M.E., and B.M. degrees, eight hours. For junior and senior music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- TROM 4020 Trombone for Music Majors: Junior/Senior 1-4 Credit Hours**
1 to 4 hours. Prerequisite: majors only; junior standing. May be repeated; maximum credit 20 hours. Applied instrumental lessons for junior and senior music majors in a School of Music degree program. (F, Sp)
- TROM 5000 Master's-Level Secondary Trombone 1-2 Credit Hours**
1 to 2 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For master's degree music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- TROM 5010 Master's-Level Trombone for Non-Performance Music Majors 1-3 Credit Hours**
1 to 3 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For master's degree students other than performance majors in their major field. (F, Sp, Su)
- TROM 5020 Master's-Level Trombone for Performance Majors 2-4 Credit Hours**
2 to 4 hours. Prerequisite: graduate standing in music; permission of adviser and instructor; 4020 and 4021 or equivalent. May be repeated; maximum credit toward an M.M. degree 10 hours. (F, Sp, Su)
- TROM 6000 Doctoral Secondary Trombone 1-2 Credit Hours**
1 to 2 hours. Prerequisite: graduate standing in music, permission of adviser or instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For doctoral degree music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- TROM 6010 Doctoral Trombone for Non-Performance Music Majors 2-3 Credit Hours**
2 to 3 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated. Doctoral-level study of applied music in the major performance area for students other than performance majors in their primary field. (F, Sp, Su)
- TROM 6020 Doctoral Trombone for Performance Majors 2-4 Credit Hours**
2 to 4 hours. Prerequisite: graduate standing in music; 5042; permission of adviser and instructor. May be repeated; credit applicable toward applied music requirements for the Doctor of Musical Arts degree. Doctoral-level study of applied music for performance majors in their primary field. (F, Sp, Su)
- TUBA 2000 Freshman and/or Sophomore Secondary Tuba 1-2 Credit Hours**
1 to 2 hours. Prerequisite: permission of adviser and instructor. May be repeated; maximum credit toward B.F.A., B.M.A., B.M.E., and B.M. degrees, eight hours. For freshman and sophomore music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- TUBA 2020 Tuba for Music Majors: Freshman/Sophomore 2-4 Credit Hours**
2 to 4 hours. Prerequisite: Majors only. May be repeated; maximum credit 12 hours. Applied instrumental lessons for freshmen and sophomore music majors in a School of Music degree program. (F, Sp)
- TUBA 3440 Mentored Research Experience 3 Credit Hours**
0 to 3 hours. Prerequisites: ENGL 1113 or equivalent, and permission of instructor. May be repeated; maximum credit 12 hours. For the inquisitive student to apply the scholarly processes of the discipline to a research or creative project under the mentorship of a faculty member. Student and instructor should complete an Undergraduate Research & Creative Projects (URCP) Mentoring Agreement and file it with the URCP office. Not for honors credit. (F, Sp, Su)

- TUBA 4000 Junior and/or Senior Secondary Tuba 1-2 Credit Hours**
1 to 2 hours. Prerequisite: permission of adviser and instructor. May be repeated; maximum credit toward B.F.A., B.M.A., B.M.E., and B.M. degrees, eight hours. For junior and senior music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- TUBA 4020 Tuba for Music Majors: Junior/Senior 1-4 Credit Hours**
1 to 4 hours. Prerequisite: majors only; junior standing. May be repeated; maximum credit 20 hours. Applied instrumental lessons for junior and senior music majors in a School of Music degree program. (F, Sp)
- TUBA 5000 Master's-Level Secondary Tuba 1-2 Credit Hours**
1 to 2 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For master's degree music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- TUBA 5010 Master's-Level Tuba for Non-Performance Music Majors 1-3 Credit Hours**
1 to 3 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For master's degree students other than performance majors in their major field. (F, Sp, Su)
- TUBA 5020 Master's-Level Tuba for Performance Majors 2-4 Credit Hours**
2 to 4 hours. Prerequisite: graduate standing in music; permission of adviser and instructor; 4020 and 4021 or equivalent. May be repeated; maximum credit toward an M.M. degree 10 hours. (F, Sp, Su)
- TUBA 6000 Doctoral Secondary Tuba 1-2 Credit Hours**
1 to 2 hours. Prerequisite: graduate standing in music, permission of adviser or instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For doctoral degree music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- TUBA 6010 Doctoral Tuba for Non-Performance Music Majors 2-3 Credit Hours**
2 to 3 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated. Doctoral-level study of applied music in the major performance area for students other than performance majors in their primary field. (F, Sp, Su)
- TUBA 6020 Doctoral Tuba for Performance Majors 2-4 Credit Hours**
2 to 4 hours. Prerequisite: graduate standing in music; 5042; permission of adviser and instructor. May be repeated; credit applicable toward applied music requirements for the Doctor of Musical Arts degree. Doctoral-level study of applied music for performance majors in their primary field. (F, Sp, Su)
- UGRE 4010 Undergraduate Recital 0 Credit Hours**
Prerequisite: Majors only; concurrent enrollment in applied instruction (4020) on the primary instrument, permission of adviser and instructor. Preparation and performance of a public recital by students in the B.M.E. degree programs. (F, Sp, Su)
- UGRE 4011 Undergraduate Recital 1 Credit Hour**
Prerequisite: concurrent enrollment in 4010, permission of adviser and instructor. Preparation and performance of a public recital by students in the B.M.A. and B.M.E. degree programs. (F, Sp, Su)
- VIOA 2000 Freshman and/or Sophomore Secondary Viola 1-2 Credit Hours**
1 to 2 hours. Prerequisite: permission of adviser and instructor. May be repeated; maximum credit toward B.F.A., B.M.A., B.M.E., and B.M. degrees, eight hours. For freshman and sophomore music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- VIOA 2020 Viola for Music Majors: Freshman/Sophomore 2-4 Credit Hours**
2 to 4 hours. Prerequisite: Majors only. May be repeated; maximum credit 12 hours. Applied instrumental lessons for freshmen and sophomore music majors in a School of Music degree program. (F, Sp)
- VIOA 3440 Mentored Research Experience 3 Credit Hours**
0 to 3 hours. Prerequisites: ENGL 1113 or equivalent, and permission of instructor. May be repeated; maximum credit 12 hours. For the inquisitive student to apply the scholarly processes of the discipline to a research or creative project under the mentorship of a faculty member. Student and instructor should complete an Undergraduate Research & Creative Projects (URCP) Mentoring Agreement and file it with the URCP office. Not for honors credit. (F, Sp, Su)
- VIOA 4000 Junior and/or Senior Secondary Viola 1-2 Credit Hours**
1 to 2 hours. Prerequisite: permission of adviser and instructor. May be repeated; maximum credit toward B.F.A., B.M.A., B.M.E., and B.M. degrees, eight hours. For junior and senior music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- VIOA 4020 Viola for Music Majors: Junior/Senior 1-4 Credit Hours**
1 to 4 hours. Prerequisite: majors only; junior standing. May be repeated; maximum credit 20 hours. Applied instrumental lessons for junior and senior music majors in a School of Music degree program. (F, Sp)
- VIOA 5000 Master's-Level Secondary Viola 1-2 Credit Hours**
1 to 2 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For master's degree music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- VIOA 5010 Master's-Level Viola for Non-Performance Music Majors 1-3 Credit Hours**
1 to 3 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For master's degree students other than performance majors in their major field. (F, Sp, Su)
- VIOA 5020 Master's-Level Viola for Performance Majors 2-4 Credit Hours**
2 to 4 hours. Prerequisite: graduate standing in music; permission of adviser and instructor; 4020 and 4021 or equivalent. May be repeated; maximum credit toward an M.M. degree 10 hours. (F, Sp, Su)
- VIOA 6000 Doctoral Secondary Viola 1-2 Credit Hours**
1 to 2 hours. Prerequisite: graduate standing in music, permission of adviser or instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For doctoral degree music students studying in a secondary (or minor) performance area. (F, Sp, Su)
- VIOA 6010 Doctoral Viola for Non-Performance Music Majors 2-3 Credit Hours**
2 to 3 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated. Doctoral-level study of applied music in the major performance area for students other than performance majors in their primary field. (F, Sp, Su)
- VIOA 6020 Doctoral Viola for Performance Majors 2-4 Credit Hours**
2 to 4 hours. Prerequisite: graduate standing in music; 5042; permission of adviser and instructor. May be repeated; credit applicable toward applied music requirements for the Doctor of Musical Arts degree. Doctoral-level study of applied music for performance majors in their primary field. (F, Sp, Su)

VIOL 2000 Freshman and/or Sophomore Secondary Violin 1-2 Credit Hours

1 to 2 hours. Prerequisite: permission of adviser and instructor. May be repeated; maximum credit toward B.F.A., B.M.A., B.M.E., and B.M. degrees, eight hours. For freshman and sophomore music students studying in a secondary (or minor) performance area. (F, Sp, Su)

VIOL 2020 Violin for Music Majors: Freshman/Sophomore 2-4 Credit Hours

2 to 4 hours. Prerequisite: Majors only. May be repeated; maximum credit 12 hours. Applied instrumental lessons for freshmen and sophomore music majors in a School of Music degree program. (F, Sp)

VIOL 3440 Mentored Research Experience 3 Credit Hours

0 to 3 hours. Prerequisites: ENGL 1113 or equivalent, and permission of instructor. May be repeated; maximum credit 12 hours. For the inquisitive student to apply the scholarly processes of the discipline to a research or creative project under the mentorship of a faculty member. Student and instructor should complete an Undergraduate Research & Creative Projects (URCP) Mentoring Agreement and file it with the URCP office. Not for honors credit. (F, Sp, Su)

VIOL 4000 Junior and/or Senior Secondary Violin 1-2 Credit Hours

1 to 2 hours. Prerequisite: permission of adviser and instructor. May be repeated; maximum credit toward B.F.A., B.M.A., B.M.E., and B.M. degrees, eight hours. For junior and senior music students studying in a secondary (or minor) performance area. (F, Sp, Su)

VIOL 4020 Violin for Music Majors: Junior/Senior 1-4 Credit Hours

1 to 4 hours. Prerequisite: majors only; junior standing. May be repeated; maximum credit 20 hours. Applied instrumental lessons for junior and senior music majors in a School of Music degree program. (F, Sp)

VIOL 5000 Master's-Level Secondary Violin 1-2 Credit Hours

1 to 2 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For master's degree music students studying in a secondary (or minor) performance area. (F, Sp, Su)

VIOL 5010 Master's-Level Violin for Non-Performance Music Majors 1-3 Credit Hours

1 to 3 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For master's degree students other than performance majors in their major field. (F, Sp, Su)

VIOL 5020 Master's-Level Violin for Performance Majors 2-4 Credit Hours

2 to 4 hours. Prerequisite: graduate standing in music; permission of adviser and instructor; 4020 and 4021 or equivalent. May be repeated; maximum credit toward an M.M. degree 10 hours. (F, Sp, Su)

VIOL 6000 Doctoral Secondary Violin 1-2 Credit Hours

1 to 2 hours. Prerequisite: graduate standing in music, permission of adviser or instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For doctoral degree music students studying in a secondary (or minor) performance area. (F, Sp, Su)

VIOL 6010 Doctoral Violin for Non-Performance Music Majors 2-3 Credit Hours

2 to 3 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated. Doctoral-level study of applied music in the major performance area for students other than performance majors in their primary field. (F, Sp, Su)

VIOL 6020 Doctoral Violin for Performance Majors 2-4 Credit Hours

2 to 4 hours. Prerequisite: graduate standing in music; 5042; permission of adviser and instructor. May be repeated; credit applicable toward applied music requirements for the Doctor of Musical Arts degree. Doctoral-level study of applied music for performance majors in their primary field. (F, Sp, Su)

VOIC 2000 Freshman and/or Sophomore Secondary Voice 1-2 Credit Hours

1 to 2 hours. Prerequisite: permission of adviser and instructor. May be repeated; maximum credit toward B.F.A., B.M.A., B.M.E., and B.M. degrees, eight hours. For freshman and sophomore music students studying in a secondary (or minor) performance area. (F, Sp, Su)

VOIC 2020 Voice for Music Majors: Freshman/Sophomore 2-4 Credit Hours

2 to 4 hours. Prerequisite: Majors only. May be repeated; maximum credit 8 hours. Applied instrumental lessons for freshmen and sophomore music majors in a School of Music degree program. (F, Sp)

VOIC 3440 Mentored Research Experience 3 Credit Hours

0 to 3 hours. Prerequisites: ENGL 1113 or equivalent, and permission of instructor. May be repeated; maximum credit 12 hours. For the inquisitive student to apply the scholarly processes of the discipline to a research or creative project under the mentorship of a faculty member. Student and instructor should complete an Undergraduate Research & Creative Projects (URCP) Mentoring Agreement and file it with the URCP office. Not for honors credit. (F, Sp, Su)

VOIC 4000 Junior and/or Senior Secondary Voice 1-2 Credit Hours

1 to 2 hours. Prerequisite: permission of adviser and instructor. May be repeated; maximum credit toward B.F.A., B.M.A., B.M.E., and B.M. degrees, eight hours. For junior and senior music students studying in a secondary (or minor) performance area. (F, Sp, Su)

VOIC 4020 Voice for Music Majors: Junior/Senior 1-4 Credit Hours

1 to 4 hours. Prerequisite: majors only; junior standing. May be repeated; maximum credit 8 hours. Applied instrumental lessons for junior and senior music majors in a School of Music degree program. (F, Sp)

VOIC 5000 Master's-Level Secondary Voice 1-2 Credit Hours

1 to 2 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For master's degree music students studying in a secondary (or minor) performance area. (F, Sp, Su)

VOIC 5010 Master's-Level Voice for Non-Performance Music Majors 1-3 Credit Hours

1 to 3 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For master's degree students other than performance majors in their major field. (F, Sp, Su)

VOIC 5020 Master's-Level Voice for Performance Majors 2-4 Credit Hours

2 to 4 hours. Prerequisite: graduate standing in music; permission of adviser and instructor; 4020 and 4021 or equivalent. May be repeated; maximum credit toward an M.M. degree 10 hours. (F, Sp, Su)

VOIC 6000 Doctoral Secondary Voice 1-2 Credit Hours

1 to 2 hours. Prerequisite: graduate standing in music, permission of adviser or instructor. May be repeated; maximum credit eight hours on a given instrument (including voice). For doctoral degree music students studying in a secondary (or minor) performance area. (F, Sp, Su)

VOIC 6010 Doctoral Voice for Non-Performance Music**Majors 2-3 Credit Hours**

2 to 3 hours. Prerequisite: graduate standing in music; permission of adviser and instructor. May be repeated. Doctoral-level study of applied music in the major performance area for students other than performance majors in their primary field. (F, Sp, Su)

VOIC 6020 Doctoral Voice for Performance Majors 2-4 Credit Hours

2 to 4 hours. Prerequisite: graduate standing in music; 5042; permission of adviser and instructor. May be repeated; credit applicable toward applied music requirements for the Doctor of Musical Arts degree. Doctoral-level study of applied music for performance majors in their primary field. (F, Sp, Su)

Lipinski	Igor		2017	ASSOCIATE PROFESSOR OF MUSIC, 2017	DMA, Northwestern Univ, 2015; M Music, Univ of Rochester, 2011; B Music, Univ of Rochester, 2009
McCrary	Mark	E	2014	ASSOCIATE PROFESSOR OF MUSIC, 2014	M Music, Univ of North Texas, 2005; B Music, Univ of North Texas, 1993
Murphy	John	Patrick	2021	ASSISTANT PROFESSOR OF MUSIC, 2021	D.M.A, Univ of Oklahoma, 2020; M.M. Manhattan School of Music, 2012; B.M., SUNY Fredonia, 2010
Neumann	Mark		2009	PROFESSOR OF MUSIC, 2018; PRESIDENT'S ASSOCIATES PRESIDENTIAL PROFESSORSHIP, 2018	DMA, Juilliard, 1995; M Music, Univ of Victoria, 1987; B Music, Univ of Victoria, 1983
Nichol	Jonathan	D	2013	PROFESSOR OF MUSIC, 2016; DIRECTOR, SCHOOL OF MUSIC, 2023	DMA, Michigan State Univ, 2010; MFA, Michigan State Univ, 2007; BFA, Central Michigan Univ, 2005
Pederson	Sanna	F	2001	MAVIS C. PITMAN PROFESSOR OF MUSIC HISTORY OR THEORY, 2001; PROFESSOR OF MUSIC, 2014	PhD, Univ of Pennsylvania, 1995; BA, Oberlin College, 1985
Reynolds	Matthew		2022	ASSISTANT PROFESSOR OF MUSIC, 2022	DMA, University of Southern California; MM, Wichita State University; BM, Baylor University
Ruck	Jonathan	C	2006	PROFESSOR OF MUSIC, 2019	DMA, Indiana Univ, 2012; M Music, Indiana Univ, 2003; B Music, Indiana Univ, 2001
Schullman	Matthew		2022	ASSISTANT PROFESSOR OF MUSIC, 2022	PhD, Yale Univ
Shames	Jonathan		2004	ARTISTIC DIRECTOR, OU OPERA PROGRAM, 2005; DIRECTOR OF ORCHESTRAL ACTIVITIES; PROFESSOR OF MUSIC, 2018	DMA, Univ of Michigan, 1986; M Music, Univ of Michigan, 1982; BA, Yale Univ, 1979
Sherinian	Zoe	C	2001	PROFESSOR OF MUSIC, 2018; ADJUNCT ASSOCIATE PROFESSOR OF WOMEN'S AND GENDER STUDIES, 2008	PhD, Wesleyan Univ, 1998; MA, Wesleyan Univ, 1991; BA, Oberlin College, 1984
Sievers	Karl	H	1999	PROFESSOR OF MUSIC, 2005	DMA, UMKC, 1997; M Music, Indiana Univ, 1981; B Music, Indiana Univ, 1977
Simon	Shanti	C	2018	PROFESSOR OF MUSIC, 2018; DIRECTOR OF BANDS	DMA, Univ of Minnesota; MM, Univ of Minnesota; BME, Stetson Univ; BM, Stetson Univ
Spritzer	Damin	R	2015	ASSOCIATE PROFESSOR OF MUSIC, 2021	DMA, Univ of North Texas, 2012; M Music, Eastman School of Music, 1999; B Music, Oberlin College, 1997
Stoops	Anthony	D	2006	PROFESSOR OF MUSIC, 2018	DMA, Univ of Michigan, 2002; M Music, Univ of Michigan, 1999; B Music, Univ of Iowa, 1997
Swinkin	Jeffrey	A	2014	ASSOCIATE PROFESSOR OF MUSIC, 2014	PhD, Univ of Michigan, 2013; M Music, Univ of Michigan, 1993; B Music, Eastman School of Music, 1992
Tirk	Suzanne	M	2011	ASSOCIATE PROFESSOR OF MUSIC, 2014; ASSISTANT DIRECTOR FOR RECRUITMENT AND ENGAGEMENT, 2023	DMA, Michigan State Univ, 2009; M Music, Michigan State Univ, 2000; B Music, Lawrence Univ, 1998
Watts	Valerie	L	1994	PROFESSOR OF MUSIC, 2006; ASSISTANT DIRECTOR FOR UNDERGRADUATE STUDIES & SCHOLARSHIPS, 2023	DMA, Eastman School of Music, 1993; M Music, Eastman School of Music, 1988; B Music, Northwestern Univ, 1986
Welk	Shawn		2022	ASSISTANT PROFESSOR OF MUSIC, 2022	MM, University of Oklahoma
Yamane	Maxwell		2023	ASSOCIATE PROFESSOR OF ETHNOMUSICOLOGY	MA, Univ of Maryland College Park; BA, James Madison Univ
Zielinski	Richard		2009	DIRECTOR, CHORAL ACTIVITIES, 2009; PROFESSOR OF MUSIC, 2016	DMA, Univ of Illinois, 1991; M Music, Eastman School of Music, 1985; B Music, Univ of Wisconsin, 1982

Music: Instrumental Jazz, B.A.

Minimum Total Credit Hours: 120-131

Major Hours: 49

Minimum Upper-Division Hours: 40

Upper-Division Hours Within Major: 15

Overall GPA - Combined and OU: 2.50

Program Code: B703 P332

Major Requirements

A grade of C or better is required in all courses taken within the School of Music. Audition is required for admission to the degree program. All coursework must be letter graded; P/NP may not count toward degree.

Musicianship

Code	Title	Credit Hours
Music Theory		
MUTH 1512	Musical Structures I	2
MUTH 1612	Aural Skills I	2
MUTH 1522	Musical Structures II	2
MUTH 1622	Aural Skills II	2
MUTH 2512	Musical Structures III (Core IV)	2
MUTH 2612	Aural Skills III	2
Musicology and Music Literature		
MUSC 1312	Music in Culture (Core IV)	2
MUNM 3313	African Repercussions (Core IV)	3
MUNM 3713	Jazz: Development of an African-American Art Form (Core IV)	3
MUSC 3333	Post-Romantic Period to the Present (Core IV)	3
Total Credit Hours		23

Performance and Music Electives

Code	Title	Credit Hours
MUTE 4512	Professional Preparation and Capstone Project	2
XXXX 2020	Applied Lesson ¹	8
Choose 4 hours from each of the following:		8
MUTE 1120/3120	Jazz Ensemble	
MUTE 2271/4271	Chamber Music	
Choose 2 hours for 2 semesters of the following:		4
MUTE 3342	Jazz Improvisation	
MUTE 4990	Independent Study	1
MUTE 1000	Freshman/Transfer Music Orientation (1 semester)	0
MUTE 1010	Recital Attendance (3 semesters)	0
Advised Music Electives (3000-4000 level)		3
Total Credit Hours		26

¹ A passing grade in MUTE 2000 Sophomore Barrier is required for admission to upper-division applied study should the student desire to continue beyond lower-division.

Major Support Requirements

All 43 hours must be taken outside the School of Music.

Code	Title	Credit Hours
Secondary Emphasis		
Choose one of the following:		18-30
Minor (approximately 18-24 hours) ¹		
Double major (approximately 30 hours) ¹		
Develop a specialized area of concentration (approximately 24-30 hours) ²		
Free Electives		
Hours not used for the secondary emphasis/concentration may be free electives taken in any college or department except the School of Music		13-25
Total Credit Hours		43

¹ If the emphasis is an official minor or major offered by the university, it must be formally declared in the appropriate college advising office.

² The proposed area of concentration must be approved by the Assistant Director for Curriculum and Advising in the School of Music.

Note: A minimum of 40 upper-division hours is required for the degree. Students should utilize Major Support Requirements to reach this total.

General Education and College Requirements

Courses used to fulfill General Education and/or major requirements may not fulfill electives. Some courses that fulfill General Education requirements are listed in other areas on this sheet and are indicated by the appropriate Core numbers.

Courses designated as Core I, II, III, IV, or V are part of the General Education curriculum. Students must complete a minimum of 40 hours of General Education courses, chosen from the approved list, including at least one upper-division Gen. Ed. course outside of the student's major. **Courses graded S/U or P/NP will not apply.**

UNIVERSITY-WIDE GENERAL EDUCATION (MINIMUM 40 HOURS) AND COLLEGE REQUIREMENTS

Code	Title	Credit Hours
Core Area I: Symbolic and Oral Communication		
<i>English Composition</i>		
ENGL 1113	Principles of English Composition (Core I)	3
ENGL 1213	Principles of English Composition (Core I)	3
or EXPO 1213	Expository Writing	
<i>Language</i>		
This requirement is not mandatory if the student successfully completed 2 years of the same language in high school –2 courses (Core I)		0-10
<i>Mathematics</i>		
Choose one course (Core I) ¹		3
Core Area II: Natural Science		
Choose two courses from different disciplines; one must include a laboratory		7-8
Core Area III: Social Science		
P SC 1113	American Federal Government	3
Choose one course		3
Core Area IV: Arts and Humanities		
<i>Artistic Forms</i>		

The following are satisfied in Musicology and Music Theory requirements (4 hours)	0
MUSC 1312 Music in Culture	
MUTH 2512 Musical Structures III	
<i>Western Culture</i>	
HIST 1483 United States to 1865 (Core IV)	3
or HIST 1493 United States, 1865 to the Present	
The following are satisfied in Musicology requirements (6 hours):	0
MUNM 3713 Jazz: Development of an African-American Art Form	
MUSC 3333 Post-Romantic Period to the Present	
<i>World Culture</i>	
The following is satisfied in Musicology & Music Theory requirements:	0
MUNM 3313 African Repercussions	
Core Area V: First-Year Experience	
Choose one course	3
Total Credit Hours	28-39

¹ MATH 1473 is recommended.

Note: The Bachelor of Arts degree requires at least 80 hours of liberal arts coursework.

According to the State Regents, liberal arts "are those traditional fields of study in the humanities; social and behavioral sciences; communication, natural and life sciences; mathematics; and the history, literature and theory of the fine arts (music, art, drama, dance)... courses in the arts which rely substantially on studio or performance work are not considered to be liberal arts and sciences for the purpose of this policy." (3.14.2, p.133, OSRHE Policy Manual, retrieved 4/21/15)

Suggested Semester Plan of Study

At least **15 hours of upper-division Music** credit must be earned in residence as a declared BA major.

A grade of C or better is required in all courses taken within the School of Music. Unless otherwise stated on the degree sheet, the College of Fine Arts does **not** permit coursework to fulfill more than one degree requirement.

Degree Completion Responsibility: Although the Dean's Office checks each student's records, the responsibility for meeting degree requirements lies with the student and not with the advisor or the Dean. Each student should obtain a copy of the requirements for graduation and check it regularly as they complete their degree program.

General Education and College Requirements

Courses used to fulfill General Education and/or major requirements may **not** fulfill electives. Some courses which fulfill the General Education requirements are listed in other areas on this sheet and are indicated by the appropriate Core numbers.

Courses designated as Core I, II, III, IV, or V are part of the General Education curriculum. Students must complete a minimum of 40 hours of General Education courses, chosen from the approved list, including at

least one upper-division Gen. Ed. course outside of the student's major.
Courses graded S/U or P/NP will not apply.

UNIVERSITY-WIDE GENERAL EDUCATION (MINIMUM 40 HOURS) AND COLLEGE REQUIREMENTS

Code	Title	Credit Hours
Core Area I: Symbolic and Oral Communication

Free Electives		
Choose 7 hours		7
Total Credit Hours		38-49

¹ MATH 1473 is recommended.

Suggested Semester Plan of Study

At least **24 hours of upper-division Music** credit must be earned in residence as a declared major.

A grade of C or better is required in all courses taken within the School of Music. Unless otherwise stated on the degree sheet, the College of Fine Arts does **not** permit coursework to fulfill more than one degree requirement.

Degree Completion Responsibility: Although the Dean's Office checks each student's records, the responsibility for meeting degree requirements lies with the student and not with the advisor or the Dean. Each student should obtain a copy of the requirements for graduation and check it regularly as they complete their degree program.

General Education & Other Requirements

Courses used to fulfill General Education and/or major requirements may **not** fulfill electives. Some courses which fulfill the General Education requirements are listed in other areas on this sheet and are indicated by the appropriate Core numbers.

Courses designated as Core I, II, III, IV, or V are part of the General Education curriculum. Students must complete a minimum of 40 hours of General Education courses, chosen from the approved list, including at least one upper-division Gen. Ed. course outside of the student's major. **Courses graded S/U or P/NP will not apply.**

Choose 15 hours in a focused area of concentration in music ¹		
Track 2 Secondary Emphasis outside Music:		
Choose 24 hours in a focused area of concentration outside the School of Music ¹		
Choose 9 hours in any college or department including the School of Music		
Total Credit Hours		33

¹ The proposed area of concentration must be approved by the Undergraduate Studies Coordinator for Advising & Student Academic Performance in the School of Music. If it is an official minor offered by the university, it must be formally declared in the appropriate college advising office.

Recommended to complete at least 2 hours of upper division music electives in order to complete minimum of 24 upper division hours required for the degree.

Note: A minimum of 40 upper-division hours is required for the degree. Students should utilize "Secondary Area" to reach this total.

General Education and College Requirements

Courses used to fulfill General Education and/or major requirements may not fulfill electives. Some courses that fulfill General Education requirements are listed in other areas on this sheet and are indicated by the appropriate Core numbers.

Courses designated as Core I, II, III, IV, or V are part of the General Education curriculum. Students must complete a minimum of 40 hours of General Education courses, chosen from the approved list, including at least one upper-division Gen. Ed. course outside of the student's major. **Courses graded S/U or P/NP will not apply.**

Choose one course		3
Total Credit Hours		31-42

¹ MATH 1473 is recommended.

Suggested Semester Plan of Study

At least **24 hours of upper-division Music** credit must be earned in residence as a declared major.

A grade of C or better is required in all courses taken within the School of Music. Unless otherwise stated on the degree sheet, the College of Fine Arts does **not** permit coursework to fulfill more than one degree requirement.

Degree Completion Responsibility: Although the Dean's Office checks each student's records, the responsibility for meeting degree requirements lies with the student and not with the advisor or the Dean. Each student should obtain a copy of the requirements for graduation and check it regularly as they complete their degree program.

General Rules, Regulations and Requirements

More information on Grade Requirements and Enrollment Limitations can be found in the catalog under School of Music: Undergraduate Study (p. 1482).

Admission to Music Teacher Education: Students must apply to the teacher education program at the end of the sophomore year by the following process:

- Complete & submit a "Request for Admission to Teacher Preparation Program Form" from the Fine Arts Dean's office.
- Students must pass the Oklahoma General Education Test. OGET results must be turned in with Admission to Teacher Preparation Program Form to the College of Education.
- Students must complete a minimum of 24 hours of general education coursework from the university approved list with C or better grades in the following areas: ENGL 1113 (required), ENGL 1213 or EXPO 1213 (required), math, natural science w/o lab, natural science w/lab, P SC 1113, social science, HIST 1483 or HIST 1493, humanities.
- Complete Submission 1 on electronic portfolio to faculty advisor. Submission 1 check list must be complete and portfolio must be cleared by faculty advisor.
- Meet with faculty advisor to complete: Memorandum of Understanding, Supplemental Disclaimer, and an Academic Completion Letter.
- Take the following to the College of Education Advising Office for entrance paperwork and permissions for courses: completed Admission to Teacher Preparation Program Form; *Memorandum of Understanding*; *Supplemental Disclaimer*; *Academic Completion Letter*; essay from MUED 1732; OGET scores; background check.

Students must have a minimum 2.75 OU retention and combined retention GPAs in order to be admitted to the College of Education Teacher Preparation coursework, to graduate, and to be certified. Students with a GPA between 2.5 and 2.74 may petition the MUED faculty for an exemption to begin their Teacher Preparation coursework, but will be placed on Academic Probation by the College until such time as their

GPA is raised to the required 2.75 for graduation. Exemptions cannot be granted for students with less than a 2.50.

Scheduling of MUED Sequence Courses: Courses are to be taken the semester as indicated in the semester grid below. MUTE 2221 and MUTE 2251 should be taken during the sophomore year in any order. No substitutions or exceptions will be allowed under normal circumstances. Private lessons on secondary instruments may not be substituted for these courses.

Student Teaching: MUED 4042, MUED 4050, and MUED 4060 are taken during the student teaching semester. All coursework and recitals must be completed prior to student teaching.

Suggested Semester Plan of Study

At least **24 hours of upper-division Music** credit must be earned in residence as a declared major; must include the Senior Capstone. This plan of study should not be used in lieu of academic advisement. Unless otherwise stated on the degree sheet, the College of Fine Arts does **not** permit coursework to fulfill more than one degree requirement.

The following are satisfied in Musicology requirements (9 hours):		0
MUSC 2313	Ancient Times to 1700	
MUSC 2323	Late Baroque Through Romantic Period	
MUSC 3333	Post-Romantic Period to the Present	
<i>World Culture</i>		
Choose one upper-division (3000-4000-level) elective course from the University-Wide General Ed. World Culture List (Core IV)		3
Core Area V: First-Year Experience		

Choose one course	3
Total Credit Hours	31-44

¹ Grade of C or better required.

² MATH 1473 or COMM 2513 is recommended.

General Rules, Regulations and Requirements

More information on Grade Requirements and Enrollment Limitations can be found in the catalog under School of Music: Undergraduate Study (p. 1482).

Admission to Music Teacher Education: Students must apply to the teacher education program at the end of the sophomore year by the following process:

- Complete & submit a "Request for Admission to Teacher Preparation Program Form" from the Fine Arts Dean's office.
- Students must pass the Oklahoma General Education Test. OGET results must be turned in with Admission to Teacher Preparation Program Form to the Rainbolt College of Education.
- Students must complete a minimum of 24 hours of general education coursework from the university approved list with C or better grades in the following areas: ENGL 1113 (required), ENGL 1213 or EXPO 1213 (required), math, natural science w/o lab, natural science w/lab, P SC 1113, social science, HIST 1483 or HIST 1493, humanities.
- Complete Submission 1 on electronic portfolio to faculty advisor. Submission 1 check list must be complete and portfolio must be cleared by faculty advisor.
- Meet with faculty advisor to complete: *Memorandum of Understanding*, *Supplemental Disclaimer*, and an *Academic Completion Letter*.
- Take the following to the College of Education Advising Office for entrance paperwork and permissions for courses: completed Admission to Teacher Preparation Program Form; *Memorandum of Understanding*; *Supplemental Disclaimer*; *Academic Completion Letter*; essay from MUED 1732; OGET scores; background check.
- **Students must have a minimum 2.75 OU retention and combined retention GPAs** in order to be admitted to the College of Education Teacher Preparation coursework, to graduate, and to be certified. Students with a GPA between 2.5 and 2.74 may petition the MUED faculty for an exemption to begin their Teacher Preparation coursework, but will be placed on Academic Probation by the College until such time as their GPA is raised to the required 2.75 for graduation. **Exemptions cannot be granted for students with less than a 2.50.**

Student Teaching: MUED 4042, MUED 4050, and MUED 4060 are taken during the student teaching semester. All coursework and recitals must be completed prior to student teaching.

Suggested Semester Plan of Study

At least **24 hours of upper-division Music** credit must be earned in residence as a declared major; must include the Senior Capstone. This plan of study should not be used in lieu of academic advisement. Unless otherwise stated on the degree sheet, the College of Fine Arts does **not** permit coursework to fulfill more than one degree requirement.

Freshman**First Semester**

Degree Completion Responsibility: Although the Dean's Office checks each student's records, the responsibility for meeting degree requirements lies with the student and not with the advisor or the Dean. Each student should obtain a copy of the requirements for graduation and check it regularly as they complete their degree program.

Commercial Music, Minor

Minimum Total Credit Hours: 21-22

Program Code: N209

Required Courses

- The minor in Commercial Music is open to all undergraduate students at OU except those majoring in music.
- No single course may be used by a student to satisfy a major requirement and a minor requirement.
- At least 15 hours must be completed at the University of Oklahoma.
- A minimum of 9 hours must be completed at the upper division level.
- No courses counted toward the minor may be taken Pass/No Pass.
- Students must earn a minimum grade of C in each course.**
- Students must achieve a minimum 2.50 GPA (OU and overall) in the minor coursework.**

Code	Title	Credit Hours
MUTE 2113	The Commercial Music and Recording Industry	3
MUTE 1120 or MUTE 3120	Jazz Ensemble	1
MUTE 2271 or MUTE 4271	Chamber Music	1
MUNM 1100 & MUNM 3100	Freshman and/or Sophomore Piano, Violin, Etc., for Nonmusic Majors and Junior and/or Senior Piano, Violin, etc., for Nonmusic Majors	2
Choose one of the following:		3
MUNM 1143	American Popular Music	
MUNM 1163	History of Video Game Music	
MUNM 2413	Music in Film	
MUTK 4113	Understanding Electroacoustic Music	
MUTK 4183	Sound Design	3
MUTK 4173	Recording Techniques	3
MUTK 4193	Producing, Mixing, & Mastering	3
Choose one of the following:		2-3
MUTE 4512	Professional Preparation and Capstone Project	
AMGT 3023	Entrepreneurial Mindset in the Arts	
AMGT 3440	Mentored Research Experience	
Total Credit Hours		21-22

Instrumental Jazz, Minor

Minimum Total Credit Hours: 21

Minimum Upper-Division Hours: 9

Program Code: N576

The requirements for a minor must be completed concurrently with the major degree requirements. No minor may be added by completing courses after receiving the bachelor's degree.

See form available in Fine Arts Dean's office:

- Students must audition and be accepted as an instrumental jazz minor before it may be declared. Students are encouraged to audition during the School's formal Audition Days held during the spring semester.
- Acceptance as an instrumental jazz minor in any given studio area is on a space available basis (GTAs will teach).
- The minor must be officially declared in the Fine Arts Dean's office/ Student Services. Complete the form and take it to the Office of the Dean, Weitzenhoffer Family College of Fine Arts, Fred Jones Fine Arts Center, Rm. 122 (FJC 122) on or before the student's senior graduation check.

Students beginning the program in the freshman or sophomore year will not have difficulty completing the instrumental jazz minor. Students beginning the program in the junior year will need to plan accordingly to meet the requirements before graduation. Applied study at the 4000 level does not require Sophomore Proficiency and may be taken for 1-2 hrs of credit.

- No single course may be used by a student to satisfy a major requirement and a minor requirement.
- At least 15 hours must be completed at the University of Oklahoma.
- A minimum of 9 hours must be at the upper division level.
- No courses counted toward the minor may be taken Pass/ No Pass.
- The minor in Instrumental Jazz is available to all undergraduate students at OU except those majoring in music.
- Students must earn a minimum grade of C in each course.**
- Students must achieve a minimum 2.50 GPA (OU and overall) in the minor coursework.**

Required Courses

Students must successfully complete at least 21 hours of coursework in music, including at least 9 hours at the upper division level. The following specific requirements must be met:

Code	Title	Credit Hours
MUTE 1120 or MUTE 3120	Jazz Ensemble ¹	4
MUTE 2271 or MUTE 4271	Chamber Music ¹	3
MUTH 1512	Musical Structures I	2
MUTH 1612	Aural Skills I	2
MUTE 3342	Jazz Improvisation (two semesters)	4
MUNM 2313	History of Jazz	3

MUNM 3713	Jazz: Development of an African-American Art Form	3
Total Credit Hours		21

¹ Students must take 4 semesters of Jazz Ensemble and 3 semesters of Chamber Jazz. Of these 7 credit hours, at least 2 hours must be taken at the Upper Division (3000-4000) level.

If the minor is officially declared and approved, successfully completed, and noted on the graduation application, the student's transcript will so indicate at the time the bachelor's degree is posted.

Music, Minor

Minimum Total Credit Hours: 26

Program Code: N715

The requirements for a minor must be completed concurrently with the major degree requirements. No minor may be added by completing courses after receiving the bachelor's degree.

See form available in Fine Arts Dean's office:

- Students must audition and be accepted as a music minor before it may be declared. Students are encouraged to audition during the School's formal Audition Days held during the spring semester.
- Acceptance as a music minor in any given studio area is on a space available basis (GTAs will teach).
- The minor must be officially declared in the Fine Arts Dean's office/ Student Services. Complete the form and take it to the Office of the Dean, Weitzenhoffer Family College of Fine Arts, Fred Jones Fine Arts Center, Rm. 122 (FJC 122) on or before the student's senior graduation check.

Students beginning the program in the freshman or sophomore year will not have difficulty completing the music minor. Students beginning the program in the junior year will need to plan accordingly to meet the requirements before graduation. Applied study at the 4000 level does not require Sophomore Proficiency and may be taken for 1-2 hrs of credit.

- No single course may be used by a student to satisfy a major requirement and a minor requirement.
- At least 15 hours must be completed at the University of Oklahoma.
- A minimum of 9 hours must be at the upper division level.
- No courses counted toward the minor may be taken Pass/ No Pass.
- The minor in Music is available to all undergraduate students at OU except those majoring in music.
- **Students must earn a minimum grade of C in each course.**
- **Students must achieve a minimum 2.50 GPA (OU and overall) in the minor coursework.**

Required Courses

Students must successfully complete at least 24 hours of coursework in music, including at least 9 hours at the upper division level. The following specific requirements must be met:

Code	Title	Credit Hours
MUNM 1113	The Understanding of Music	2-3
	or MUSC 1312 Music in Culture	
MUTH 1512	Musical Structures I	2
MUTH 1522	Musical Structures II	2
MUTH 1612	Aural Skills I	2
MUTH 1622	Aural Skills II	2
	Choose major performance ensembles (1 hr. each), three semesters at the 1000 level	3
	Choose applied lessons (1 hr. each) at the 2000 level for three (3) semesters ¹	3
	Choose 9-10 credit hours at the 3000 level or above from applied lessons, ensembles, and/or classes ²	9-10
Total Credit Hours		26

¹ 1 credit hour per semester will be a half-hour individual lesson per week.

² May be from music major courses or from MUNM courses. Students who take MUSC 1312 to fulfill minor requirements must complete 10 hours.

If the minor is officially declared and approved, successfully completed, and noted on the graduation application, the student's transcript will so indicate at the time the bachelor's degree is posted.

Choral Conducting, M.M.

Minimum Total Hours (Non-Thesis): 32

Program Code: M717

The requirements listed on this degree check sheet apply to the following concentrations in Choral Conducting.

- Standard - M717 Q113
- Church Music - M717 Q114

ORGN 5000 Master's-Level Secondary Organ (2-4 hours)	
Total Credit Hours	32

¹ No more than the required 4 hours may be applied to the degree.

² Except for any Music Technology courses.

³ May be chosen from any area in music or, with the program advisor's approval, from related non-music fields.

General Requirements for all Master's Degrees

The master's degree requires the equivalent of *at least* two semesters of satisfactory graduate work and additional work as may be prescribed for the degree.

All coursework applied to the master's degree must carry graduate credit.

Master's degree programs which require a thesis consist of *at least* 30 credit hours. All non-thesis master's degree programs require *at least* 30 credit hours.

Credit transferred from other institutions must meet specific criteria and is subject to certain limitations.

Courses completed through correspondence study may *not* be applied to the master's degree.

To qualify for a graduate degree, students must achieve an overall grade point average of 3.0 or higher in the degree program coursework and in all resident graduate coursework attempted. A student must also have at least a 3.0 in all coursework (including undergraduate coursework if any).

Additional information for master's degree students may be found in the Graduate College Bulletin.

COMP 5000 Master's-Level Secondary Composition (2-4 hours)

VOIC 5000 Master's-Level Secondary Voice (2-4 hours)

Total Credit Hours

32

¹ Organ majors with a church music emphasis must enroll in ORGN 5020 for at least two consecutive 16 week semesters.

² No coursework taken to remediate deficiencies determined by the student's score on the Prelim Exam may be used to fulfill the Musicology requirement. It may, however, be used as elective credit, providing it is at the 5000- or 6000-level.

³ Except for any Music Technology courses.

General Requirements for all Master's Degrees

The master's degree requires the equivalent of *at least* two semesters of satisfactory graduate work and additional work as may be prescribed for the degree.

All coursework applied to the master's degree must carry graduate credit.

Master's degree programs which require a thesis consist of *at least* 30 credit hours. All non-thesis master's degree programs require *at least* 30 credit hours.

Credit transferred from other institutions must meet specific criteria and is subject to certain limitations.

Courses completed through correspondence study may *not* be applied to the master's degree.

To qualify for a graduate degree, students must achieve an overall grade point average of 3.0 or higher in the degree program coursework and in all resident graduate coursework attempted. A student must also have at least a 3.0 in all coursework (including undergraduate coursework if any).

Additional information for master's degree students may be found in the Graduate College Bulletin.

Organ: Technology, M.M.

Minimum Total Hours (Non-Thesis): 32

Program Code: M724 Q483

This program has changes pending Regents approval for 2024-25. These pending changes are not reflected here.

Choose 4 hours from Music History and Literature, Ethnomusicology, Theory, Conducting, Composition, Applied Music, Music Education, Piano Pedagogy, or Piano Literature courses		4
<i>Piano Pedagogy</i>		
Choose 2 hours; the following are advised electives:		2
MUED 5662	Teaching Intermediate and Advanced Piano	
MUED 5642	Internship in Piano Teaching	
MUED 5970	Seminar in Music Education (Applied Research in Piano Pedagogy)	
MUED 5970	Seminar in Music Education (Ensemble Music in Piano Teaching)	
Total Credit Hours		32

General Requirements for all Master's Degrees

The master's degree requires the equivalent of *at least* two semesters of satisfactory graduate work and additional work as may be prescribed for the degree.

All coursework applied to the master's degree must carry graduate credit.

Master's degree programs which require a thesis consist of *at least* 30 credit hours. All non-thesis master's degree programs require *at least* 30 credit hours.

Credit transferred from other institutions must meet specific criteria and is subject to certain limitations.

Courses completed through correspondence study may *not* be applied to the master's degree.

To qualify for a graduate degree, students must achieve an overall grade point average of 3.0 or higher in the degree program coursework and in all resident graduate coursework attempted. A student must also have at least a 3.0 in all coursework (including undergraduate coursework if any).

Additional information for master's degree students may be found in the Graduate College Bulletin.

Conducting, D.M.A.

Minimum Total Hours: 90

Program Code: D707

Program Requirements

Concentrations

- Choral Conducting (R113)
- Church Music (R114)
- Orchestral Conducting (R476)
- Wind Conducting (R676)

Code	Title	Credit Hours
Coursework Requirements		
Master's degree or equivalent		32
Core Coursework		
Music Theory (excluding MUTH 5811, MUTH 5821, and Music Technology courses)		9
Enrollment is three semesters, as advised, of the following courses:		6
GDMA 6042	Graduate Recital-Doctor Of Musical Arts Degree	
LDMA 6052	Graduate Lecture/Chamber Recital-Doctor Of Musical Arts Degree	
Area of Concentration		37
Choose one of the following areas of concentration:		
Choral Conducting Concentration (p. 1565)		
Church Music Concentration (p. 1565)		
Orchestral Conducting Concentration (p. 1565)		
Wind Conducting Concentration (p. 1565)		
Written Document		
MUS 6880	Doctor of Musical arts Project (No more than the required 6 hours may be applied to the degree)	6
Total Credit Hours		90

CHORAL CONDUCTING (R113)

Code	Title	Credit Hours
Choral Conducting Concentration		
MUTE 6252	Choral Conducting (No more than the required 8 hours may be applied to the degree)	8
MUTE 6152	Choral Score Studies (No more than the required 8 hours may be applied to the degree)	8
Musicology/Music Literature		9
Electives - as approved by the graduate liaison and program advisor		12

CHURCH MUSIC (R114)

Code	Title	Credit Hours
Church Music Concentration		
MUTE 6252	Choral Conducting (No more than the required 8 hours may be applied to the degree)	8
MUTE 6152	Choral Score Studies (No more than the required 8 hours may be applied to the degree)	8
Musicology		6
MUTE 5423	History and Fundamentals of Pipe Organ Construction and Design (Required if not taken during the master's degree)	0-3
MULI 5483	Hymnody (Required if not taken during the master's degree)	0-3
MUTE 5413	Church Music Practicum (Required if not taken during the master's degree)	0-3
One semester of choral ensemble, as approved by the graduate liaison and program advisor		1
MUTE 5160	University Chorale	
MUTE 5180		
Electives - to be chosen from the following, as approved by the graduate liaison and program advisor:		5-14
COMP 6000	Doctoral Secondary Composition	
VOIC 6000	Doctoral Secondary Voice	
ORGN 6000	Doctoral Secondary Organ	
RELS 6960	Advanced Readings in Religious Studies	
MUTE 5342	Jazz Improvisation	

ORCHESTRAL CONDUCTING (R476)

Code	Title	Credit Hours
Orchestral Conducting Concentration		
MUTE 6262	Instrumental Conducting (Enroll in the section taught by the Director of Orchestral Activities or their designate. No more than the required 8 hours may be applied to the degree)	8

MUTE 6162	Instrumental Score Studies (Enroll in the section taught by the Director of Orchestral Activities or their designate. No more than the required 8 hours may be applied to the degree)	8
Musicology/Music Literature		9
Electives - as approved by the graduate liaison and program advisor		12

WIND CONDUCTING (R676)

Code	Title	Credit Hours
Wind Conducting Concentration		
MUTE 6262	Instrumental Conducting (Enroll in the section taught by the Director of Bands or their designate. No more than the required 8 hours may be applied to the degree.)	8
MUTE 6162	Instrumental Score Studies (Enroll in the section taught by the Director of Bands or their designate. No more than the required 8 hours may be applied to the degree.)	8
Musicology/Music Literature		9
Electives - as approved by the graduate liaison and program advisor		12

General Requirements for Doctoral Degrees

A student should expect to spend at least the equivalent of three full academic years beyond the bachelor's degree to obtain the doctoral degree. During this period the student will take appropriate graduate coursework, successfully complete the general examination, and successfully defend and submit the final dissertation.

All coursework applied to the doctoral degree must carry graduate credit.

The doctoral degree requires at least 90 post-baccalaureate hours, including both formal coursework and hours of research.

The minimum hour requirement for a specific doctoral degree program cannot be waived.

No more than one-half of the credit hours, both OU and overall, excluding Research for Doctoral Dissertation (6980), may be S/U-graded coursework.

The student must be in residence at OU for at least two consecutive 16-week semesters during the pursuit of the doctoral degree while enrolled and engaged in coursework or research activities as prescribed by the major academic unit.

For more detailed regulations and requirements for Doctoral degrees, please consult the Graduate College Bulletin: <http://www.ou.edu/gradcollege/forms/bulletin>

Music Composition, D.M.A.

Minimum Total Hours: 90

Program Code: D705

Program Requirements

Code	Title	Credit Hours
Coursework Requirements		
Master's degree or equivalent ¹		32
Core Coursework		
COMP 6020	Doctoral Composition for Performance Majors (No more than the required 10 hours may be applied to the degree)	10
Musicology/Music Literature (Any three graduate level MUHI, MUSC, or MULI courses may be taken)		9
Music Theory (Any two graduate level Music Theory (MUTH) courses with these exceptions: MUTH 5811, MUTH 5821. ²		6
Ensembles		2
Two semesters of participation on principal instrument or voice in appropriate section of MUTE 50x0 ensemble, 51x0 ensemble, and/or New Century Ensemble (appropriate section of MUTE 5271 as advised.)		
Recitals		4
Enrollment in two semesters, as advised, of the following courses:		
GDMA 6042	Graduate Recital-Doctor Of Musical Arts Degree	
LDMA 6052	Graduate Lecture/Chamber Recital-Doctor Of Musical Arts Degree	
Music Technology		6
MUTK 5163	Real Time MIDI Control	
MUTK 5133	Introduction to Digital Signal Processing	
Electives as advised		15
Written Document		
MUS 6880	Doctor of Musical arts Project (No more than the required 8 hours may be applied to the degree)	6
Total Credit Hours		90

¹ If your MM is not 32 hours, adjustments will need to be made. Contact the Graduate Music Office.

² No coursework taken to remedy deficiencies in Music Theory determined by the student's score on the Preliminary Exam may be applied to this requirement and no Music Technology (MUTK) course may be applied to this requirement.

General Requirements for Doctoral Degrees

A student should expect to spend at least the equivalent of three full academic years beyond the bachelor's degree to obtain the doctoral degree. During this period the student will take appropriate graduate coursework, successfully complete the general examination, and successfully defend and submit the final dissertation.

All coursework applied to the doctoral degree must carry graduate credit.

The doctoral degree requires at least 90 post-baccalaureate hours, including both formal coursework and hours of research.

MUED 6980	Research for Doctoral Dissertation	10
Total Credit Hours		93

Notes:

- The Ph.D. program requires satisfactory completion of ninety-three (93) credit hours of approved coursework beyond the Bachelor's degree. In most instances, the first thirty-two (32) of these hours come from the Master's degree.
- The Ph.D. in Music Education requires a dissertation.
- Each student is required to be "in residence" (i.e.: enrolled as a full-time student) for at least two consecutive 16-week semesters (i.e.: Fall and Spring or Spring and Fall).
- Each student is expected to complete all required coursework within four (4) years of taking any coursework beyond the thirty-two (32) hours of the Master's degree. At that time, the student must pass the General Examination.
- Assuming satisfactory completion of the General Examination within the allowed timeframe, the student will have five (5) years from that semester to complete the degree, including successfully proposing, completing, defending, and depositing two (2) copies of the written document in the library and submitting an electronic copy of the document to the Graduate College.

General Information

The A. Max Weitzenhoffer School of Musical Theatre at the University of Oklahoma is the only independent school of musical theatre in the country. With an innovative and challenging curriculum, impressive faculty and a select student body, OU Musical Theatre provides its students with the best of two worlds — conservatory-style training within a dynamic liberal arts university environment. Offering a world-class program of study in the arts, OU Musical Theatre gives students unique opportunities to broaden their knowledge with a wide array of possibilities outside of the school. Apart from offering a high caliber faculty, curriculum and performance opportunities, the goal of OU Musical Theatre is to provide its students with the necessary training and tools to make them highly marketable, employable and successful both on stage and off.

Born out of a generous gift from acclaimed Broadway producer and OU School of Drama graduate A. Max Weitzenhoffer, in 1998, the School of Musical Theatre stands along with the Weitzenhoffer Family College of Fine Arts as a testament to the University of Oklahoma's continued commitment to the fostering of artistic talent. OU Musical Theatre bridges the gap between past and present, uniting a University steeped in tradition and history with a fresh and contemporary outlook toward the future of Musical Theatre.

In its relatively short history, the Weitzenhoffer School of Musical Theatre has established itself as one of the premier musical theatre programs in the country, graduating students who perform on Broadway, in Europe, with national tours, at regional theaters, and in film and television.

Special Facilities and Programs

The school's administrative and faculty offices are located in Carpenter Hall. The Musical Theatre dance studios and performance classrooms are also located here, along with all voice studios and student lounge. The Fine Arts Center contains the 600-seat Elsie C. Brackett Theatre and the 250-seat Weitzenhoffer Theatre as well as classrooms and studios used by drama, dance, and musical theatre. The Catlett Music Center

houses the Paul F. Sharp Concert Hall, the Morris R. Pittman Recital Hall, the Grayce B. Kerr Gothic Hall, as well as the FACTS Box Office for all Weitzenhoffer Family College of Fine Arts productions and concerts. In addition, Catlett houses many of the School of Music classrooms and rehearsal halls which include state of the art technology. The exquisitely renovated and restored Donald W. Reynolds Performing Arts Center (formerly historic Holmberg Hall) is used for performances, faculty studios and the School of Dance offices.

The A. Max Weitzenhoffer School of Musical Theatre presents two main stage productions each year with OU University Theatre. Many of our students also participate in other University Theatre productions with the Helmerich School of Drama, OU School of Dance, and the OU School of Music. The School of Musical Theatre also self-produces a third musical each year as part of our **OUMT Downtown Series**. Recent productions have included *Into the Woods* in a found space in Norman, and *I Love You, You're Perfect, Now Change* at the Studio at Sooner Theatre, *A New Brain* (with guest director, Gerry McIntyre) at the OKC Civic Center's CitySpace Theatre, and most recently, a female-led, epic outdoor production of *Jesus Christ Superstar* at the Myriad Gardens Water Stage in OKC. Additional opportunities include cabaret, revue, and workshop performances.

Programs for Excellence

The A. Max Weitzenhoffer School of Musical Theatre is one of the very few comprehensive and balanced musical theatre programs offered at a publicly supported university. Its conservatory type atmosphere is unique in a liberal arts university setting. The school is an interdisciplinary degree program working cooperatively with other units in the Weitzenhoffer Family College of Fine Arts. This performance-based degree is involved with and supported by a multitude of diverse theatrical and performance opportunities ranging from fully produced musicals, dramas, dance and cabarets. These opportunities provide the students with a wide variety of experiences in which they can put classroom skills into practice.

A special feature of the A. Max Weitzenhoffer School of Musical Theatre is its commitment to the development of new musical theatre works. This is accomplished through unique partnership arrangements with recognized producers, regional theaters, and creative artists who are leaders in the professional theatre world. The school has worked with up-and-coming writers, composers, and lyricist on shows such as *Big Picture*, *Minnesota*, *The First Gentleman*, *20,000 Leagues Under the Sea*, and most recently, *Little Miss Perfect* by Jorjah Kwamé. Each year, we bring in several guest artists from the industry to work with our students. Networking with Broadway casting directors and agents has led to numerous professional performance opportunities upon graduation.

During the summer, faculty members work professionally in a variety of musical theatre venues. In addition, a majority of students in the school secure summer employment with professional theatres and entertainment venues throughout the country. Students are also given the chance to explore international performing opportunities in Europe and South Africa.

Scholarship Information

A number of scholarships and awards are available to qualified students each academic year. Initial scholarship considerations and offers are made following admission auditions in the spring. Returning students apply for scholarships and waivers through scholarships.ou.edu. Additional non-departmental scholarships and financial aid are available

through the University of Oklahoma's office of Financial Aid Services. These applications must be made separately.

For specific information and deadlines, contact the A. Max Weitzenhoffer School of Musical Theatre's office at musicaltheatre@ou.edu or (405) 325-0538.

Undergraduate Study

- Musical Theatre Performance, B.F.A. (p. 1575)

Admission

Admission to the School of Musical Theatre is a two-part audition process. It involves a pre-screen audition on the GetAccepted.com platform followed by a possible callback audition at one of several national auditions (like Unifeds) or other callbacks at events in Atlanta, Dallas or NYC. On-campus and virtual callbacks are also a possibility. This audition process is SEPARATE from the regular application to the University of Oklahoma. Prospective students must complete both processes. Only students that have also been accepted academically to the University of Oklahoma will be considered for admission to the School of Musical Theatre. For more specific audition information, please visit our website.

Proficiency Evaluation

Review of a student's progress for continuation in the school will occur during the spring semesters of their freshman, sophomore, and junior years. Academic and artistic progress will be evaluated during this period accompanied by career counseling.

Degree Requirements

Students are advised each semester by an academic advisor and school faculty concerning enrollments, advancement toward degree and career options.

Students considering a Bachelor of Fine Arts in Musical Theatre should call (405) 325-0538 or visit the website for curriculum requirements, admission guidelines, scheduled admission audition dates, scholarships and awards. The Musical Theatre office is located in Carpenter Hall, Rm 104.

Courses

MTHR 1102 Tap Foundations 2 Credit Hours

Introduction to the basic concepts of tap dance. Students learn step development, basic rhythms, and the rudiments of placement, balance, and weight change. (F, Sp)

MTHR 1112 Tap I 2 Credit Hours

Prerequisite: DANC 1212 and permission of instructor. May be repeated; maximum credit four hours. A beginner class emphasizing tap fundamentals and terminology that includes weight change, proper placement and simple step patterns. The course concentrates on basic rhythms, counting, ear training and clarity of sound. (F, Sp)

MTHR 1402 Jazz Foundations 2 Credit Hours

Introduction to the basic concepts of jazz movement. Students learn basic motor skills used in musical theatre and focus on the rudiments of placement, alignment, flexibility, and assimilation. (F, Sp)

MTHR 1442 Jazz I 2 Credit Hours

Prerequisite: DANC 1212 and permission of instructor. May be repeated; maximum credit four hours. A beginner class that provides the student with a comprehensive understanding of the technical fundamentals of jazz dance including basic rhythms, vocabulary and skills. Focus is aimed towards proper placement, strength and flexibility development. (F, Sp)

MTHR 1501 Music Theory Notation 1 Credit Hour

Prerequisite: admission to Musical Theatre program. Lecture/discussion class to enhance the ability to read music and attain a general understanding of the theory of music, including treble and bass clefs, major and minor scales, diatonic intervals and chords. A rhythmic component is added to attain mastery of simple and compound meters. (F)

MTHR 1502 Studio Voice I 2 Credit Hours

Prerequisite: majors only. May be repeated; maximum credit six hours. Establishing basic vocal technique for musical theatre singing, including vocal exercises and breathing technique. Application of technique through the study of beginning level Broadway up-tempos and ballads as well as English art song and American folk song. (F, Sp)

MTHR 1551 Sight Reading and Theory 1 Credit Hour

Prerequisite: admission to Musical Theatre program. Lab practice of theory, rhythm and pitch recognition, including the ability to perform diatonic intervals, ascending/descending, as well as simple/compound rhythms in both division and subdivision. (Sp)

MTHR 1713 Understanding Musical Theatre 3 Credit Hours

A course for non-majors in musical theatre appreciation covering basic aspects of the various components, and history of, the musical theatre genre(s). (F, Sp) [IV-AF].

MTHR 2101 Performance Practicum 1 Credit Hour

Prerequisite: Majors only; Must be cast in a show; May be repeated; maximum credit four hours. Study and practice in rehearsal and performance as a cast member in musical theatre productions including cabaret work of the freshman/sophomore level. (F, Sp)

MTHR 2112 Tap II 2 Credit Hours

Prerequisite: MTHR 1112 and permission of instructor. May be repeated; maximum credit four hours. An advanced beginner class that maintains focus on proper placement and clarity of sound while introducing more complicated rhythms, step patterns and vocabulary. Counting and ear training continues as the student hones assimilation skills. Focus is placed on tap dynamics including accenting, shading and movement quality. A variety of styles will be introduced. (F, Sp)

MTHR 2122 Auditions 2 Credit Hours

Prerequisite: Musical Theatre majors only. An introduction to musical theatre performance through the practice of auditioning. Study involves an overview of song form, style, and composers. Assignments include casting notices, resume format and research tools. Emphasis is placed on assembling a portfolio of song cuttings. (Sp)

MTHR 2162 Introduction to Urban Dance 2 Credit Hours

Prerequisite: Majors Only, may be repeated; maximum credit eight hours. Urban Dance is the combination of many dance styles. It holds various dances influenced by hip hop, house, jazz funk, modern and contemporary technique. Each class will have a learning progression starting with the warm up followed by across the floor combinations and center combinations. The ability to execute Urban Dance makes you a stronger, more well-rounded dancer. (F, Sp, Irreg.)

- MTHR 2181 Accents and Dialects for Musical Theatre Performance** **1 Credit Hour**
Prerequisite: DRAM 1643 and DRAM 2513. This course offers a foundational exploration of the most commonly used accents and dialects for Musical Theatre performance. This International Phonetic Alphabet (IPA) is employed as a tool for exploring speech and will supplement practical tools and fundamental skills for developing successful accents and dialects for the stage. (Sp)
- MTHR 2222 Core Practice** **2 Credit Hours**
Prerequisite: May be repeated; maximum credit 12 hours. Designed to provide physical conditioning for musical theater performers. Included in the training will be C.O.R.E. principles (Corrective Oppositional Resistance Exercise), injury prevention, circuit training, kinesiological awareness designed to improve students' level of dance and mind/body connection. (F, Sp)
- MTHR 2442 Jazz II** **2 Credit Hours**
Prerequisite: MTHR 1442 or permission of instructor. May be repeated; maximum credit four hours. This advanced beginner class expands on the techniques learned in Jazz I with focus on cleanly executed technique, well connected movement quality, dynamics and increased strength and flexibility. A variety of jazz styles will be introduced. (F, Sp)
- MTHR 2502 Studio Voice II** **2 Credit Hours**
Prerequisite: Majors only; MTHR 1501, MTHR 1502, and MTHR 1551. May be repeated; maximum credit six hours. Continuing practice of vocal technique for musical theatre singing; includes developing range, flexibility and tone color. Application of technique through the study of intermediate level Broadway up-tempos and ballads, as well as Italian art song and European operetta. (F, Sp)
- MTHR 2552 Singing for the Stage** **2 Credit Hours**
Prerequisite: Non-majors only; May be repeated; maximum credit eight hours. Class is designed for non-majors only. Vocal technique for musical theatre singing, including technical exercises and application through the study of songs. (F, Sp)
- MTHR 2970 Special Topics/Seminar** **1-3 Credit Hours**
1 to 3 hours. Prerequisite: May be repeated; maximum credit nine hours. Special topics course for content not currently offered in regularly scheduled courses. May include library and/or laboratory research, and field projects. (Irreg.)
- MTHR 3112 Tap III** **2 Credit Hours**
Prerequisite: Majors only; MTHR 2112 and permission of instructor. May be repeated; maximum credit six hours. An intermediate class with focus placed on refinement of technical and assimilation skills while dramatically increasing tap vocabulary. Students focus on tap dynamics, performance quality, style variety and movement coordination while learning longer and more complicated step patterns. Tap improvisation is introduced. (Irreg.)
- MTHR 3142 Song Study I** **2 Credit Hours**
Prerequisite: 2122 or permission of instructor. Development of musical theatre performance technique through the study of solo song. Study includes exploring aspects of interpretation and expression to support the vocal, physical and mental aspects of performing. Emphasis is placed on integrating singing and acting skills. (F)
- MTHR 3143 History of American Musical Theatre** **3 Credit Hours**
Prerequisite: English 1213. Surveys history of the American musical theatre from its beginnings in the late 19th century to the present. (F, Sp) [IV-AF].
- MTHR 3152 Song Study II** **2 Credit Hours**
Prerequisite: MTHR 3142. Expand analytical and performance skills through extended song forms. Study includes breath, body and visualization techniques to continue integrating vocal, physical and mental aspects of performing. Song Study II will focus on contemporary commercial music. (Sp)
- MTHR 3162 Repertoire I** **2 Credit Hours**
Prerequisite: Musical Theatre majors only, MTHR 3152. Investigation of Broadway and Hollywood songwriting during the first half of the 20th Century. Performance material will consist of songs appropriate for the student's vocal range. Study includes critical listening to period recordings. (F)
- MTHR 3172 Repertoire II** **2 Credit Hours**
Prerequisite: Musical Theatre majors only, MTHR 3162. Exploration of musical theatre repertoire from the second half of the 20th Century. Performance material will consist of songs appropriate for the student's vocal and physical range. Study includes viewing performances of artists from the Broadway stage. (Sp)
- MTHR 3182 Musical Scenes I** **2 Credit Hours**
Prerequisite: 3152 or permission of instructor. Application of musical theatre performance technique utilizing scenes from the Broadway stage. Study includes using show research and script analysis to develop characterization. Emphasis is placed on creating unified performance both dramatically and musically. (F)
- MTHR 3192 Musical Scenes II** **2 Credit Hours**
Prerequisite: 3182. Application of musical theatre performance skills using contemporary scenes from the Broadway stage. Study includes larger scene-song forms including one-acts or new-works from the musical theatre. (Sp)
- MTHR 3440 Mentored Research Experience** **3 Credit Hours**
0 to 3 hours. Prerequisites: ENGL 1113 or equivalent, and permission of instructor. May be repeated; maximum credit 12 hours. For the inquisitive student to apply the scholarly processes of the discipline to a research or creative project under the mentorship of a faculty member. Student and instructor should complete an Undergraduate Research & Creative Projects (URCP) Mentoring Agreement and file it with the URCP office. Not for honors credit. (F, Sp, Su)
- MTHR 3442 Jazz III** **2 Credit Hours**
Prerequisite: MTHR 2442 and permission of instructor. May be repeated; maximum credit four hours. An intermediate class that moves at a heightened pace, this level expands on the techniques learned in Jazz II. Additional focus is placed on style variety, assimilation skills, and more advanced movement coordination and rhythms. (Irreg.)
- MTHR 3502 Studio Voice III** **2 Credit Hours**
Prerequisite: 2502. May be repeated; maximum credit four hours. Broadening development of vocal technique for musical theatre singing; includes learning to blend the vocal registers for healthy tone production. Application of technique through the study of advanced level Broadway up-tempos and ballads, as well as German art song and American operetta. (F, Sp)
- MTHR 3960 Honors Reading** **1-3 Credit Hours**
Prerequisite: admission to Honors program and permission of instructor. Consists of either reading topics or independent study designated by the instructor in keeping with the student's major program. Covers materials not usually presented in the regular courses. (F, Sp)

MTHR 3970 Honors Seminar 1-3 Credit Hours

1 to 3 hours. Prerequisite: admission to Honors Program. May be repeated; maximum credit six hours. Subjects covered vary. Deals with concepts not usually treated in regular courses. (Irreg.)

MTHR 3980 Honors Research 1-3 Credit Hours

Prerequisite: admission to Honors program and permission of instructor. Provides an opportunity for the gifted Honors candidate to work at a special project in the student's field. (F, Sp)

MTHR 3990 Independent Study 1-3 Credit Hours

1 to 3 hours. Prerequisite: permission of instructor and junior standing. May be repeated once with change of content. Independent study may be arranged to study a subject not available through regular course offerings. (F, Sp, Su)

MTHR 4101 Advanced Performance Practicum 1 Credit Hour

Prerequisite: Majors only, Junior standing, and must be cast in a show; May be repeated; maximum credit four hours. Study and practice in rehearsal and performance as a cast member in musical theatre productions, including mainstage or cabaret/revue participation during the junior and senior years. (F, Sp)

MTHR 4112 Tap IV 2 Credit Hours

Prerequisite: MTHR 3112 and permission of instructor; May be repeated; maximum credit four hours. This advanced class furthers the tap dancer's vocabulary, refines technical skills, greatly increases assimilation ability and furthers the study of tap improvisation. (Irreg.)

MTHR 4162 Advanced Urban Dance 2 Credit Hours

Prerequisite: MTHR 2162 and Permission of Instructor; Majors only; May be repeated; maximum credit eight hours. Advance Urban Dance will build on the foundation of Intro to Urban Dance to provide students with the skills to learn and execute a combination of many dance styles. Course content will include various dance styles influenced by hip hop, house, jazz funk, street jazz and modern technique. (F, Sp)

MTHR 4171 Industry 1 Credit Hour

Prerequisite: MTHR 4173; senior standing and majors only. This class focuses on preparation for musical theatre casting in New York City. Performance material will consist of songs appropriate for the students' vocal and physical range. (Sp)

MTHR 4172 Theatre Dance Styles I 2 Credit Hours

Prerequisite: 2112 and 2442, and senior standing, or permission of instructor. A practical and historical study of the Broadway dance styles. The main focus is in the jazz idiom; however, strong ballet, jazz, and tap skills are required. Emphasis is placed on technique, performance quality and auditioning skills. (F)

MTHR 4173 Coaching 3 Credit Hours

Prerequisite: Majors only and Senior standing. Advanced techniques of musical theatre performance through individual coaching. Study includes developing a song notebook appropriate to one's type for professional auditions and assignments related to working in the Broadway profession. Emphasis is placed on presenting a variety of musical and dramatic styles. (F)

MTHR 4182 Theatre Dance Styles II 2 Credit Hours

Prerequisite: 4172. This course is a continuing study of Broadway dance styles. Strong skills in jazz, ballet, and tap are required. Emphasis placed on techniques, performance quality and auditioning skills. (Sp)

MTHR 4183 Capstone Experience 3 Credit Hours

Prerequisite: Majors only and Senior standing. Requires written documentation in appropriate format. Senior year project which demonstrates mastery of skills and knowledge in musical theatre, selected under advisement and guided by appropriate faculty. (F, Sp) [V].

MTHR 4190 Special Studies 1-4 Credit Hours

1 to 4 hours. Prerequisite: junior standing, major in musical theatre, and permission of instructor. May be repeated with change of content; maximum credit six hours. Varying individual or small group topics or projects in the study and practice of musical theatre not covered in regularly scheduled courses. (Irreg.)

MTHR 4252 Advanced Tap 2 Credit Hours

Prerequisite: MTHR 4112 and permission of instructor; May be repeated; maximum credit eight hours. Class conducted at a professional level. Step breakdown will be minimized and students will be asked to create their own choreography and work heavily in improvisation. (F, Sp)

MTHR 4442 Jazz IV 2 Credit Hours

Prerequisite: Permission of instructor. May be repeated; maximum credit four hours. An advanced class emphasizing strong technique and assimilation skills as well as the ability to adapt to any jazz style. Continued focus is placed on flexibility, strength, dynamics, and solid performance quality. (Irreg.)

MTHR 4502 Studio Voice IV 2 Credit Hours

Prerequisite: 3502. May be repeated; maximum credit four hours. Furthering development of vocal technique for musical theatre singing; includes practical application of technical skills and knowledge. Application of technique through the study of classics and contemporary Broadway up-tempo and ballads as well as French art song and American art song. (F, Sp)

MTHR 4960 Directed Readings 1-4 Credit Hours

1 to 4 hours. Prerequisite: good standing in University; permission of instructor and dean. May be repeated; maximum credit four hours. Designed for upper-division students who need opportunity to study a specific problem in greater depth than formal course content permits. (Irreg.)

MTHR 4970 Special Topics/Seminar 1-3 Credit Hours

1 to 3 hours. Prerequisite: Senior standing or permission of instructor. May be repeated; maximum credit nine hours. Special topics or seminar course for content not currently offered in regularly scheduled courses. May include library and/or laboratory research and field projects. (Irreg.)

MTHR 4990 Independent Study 1-3 Credit Hours

1 to 3 hours. Prerequisite: Senior standing and permission of instructor. May be repeated; maximum credit nine hours. Contracted independent study for a topic not currently offered in regularly scheduled courses. Independent study may include library and/or laboratory research and field projects. (Irreg.)

Total Credit Hours		83

¹ May substitute MUNM 1100 or MUNM 3100.

² May substitute MUTH 1512 and MUTH 1612.

General Education and College Requirements

Courses used to fulfill General Education and/or major requirements may *not* fulfill electives.

Courses designated as Core I, II, III, IV, or V are part of the General Education curriculum. Students must complete a minimum of 40 hours of General Education courses, chosen from the approved list, including at least one upper-division Gen. Ed. course outside of the student's major.

Courses graded P/NP will not apply.

UNIVERSITY-WIDE GENERAL EDUCATION (MINIMUM 40 HOURS) AND COLLEGE REQUIREMENTS

Code	Title	Credit Hours
Core Area I: Symbolic and Oral Communication		
<i>English Composition</i>		
ENGL 1113	Principles of English Composition	3
ENGL 1213	Principles of English Composition	3
or EXPO 1213	Expository Writing	
<i>Language</i>		
Choose 2 courses. This requirement is not mandatory if the student successfully completed 2 years of the same language in high school. (Core 1)		0-10
<i>Mathematics</i>		
Choose any General Education approved MATH course; one of the following two is recommended:		3
MATH 1473	Mathematics for Critical Thinking	
PHIL 1113	Introduction to Logic	
Core Area II: Natural Science		
Choose two courses from different disciplines; one must include a laboratory.		7
Core Area III: Social Science		
P SC 1113	American Federal Government	3
Choose one Social Science course		3
Core Area IV: Arts and Humanities		
<i>Artistic Forms</i>		
Satisfied in Musical Theatre Core requirements:		0
MTHR 3143	History of American Musical Theatre	
<i>Western Culture</i>		
HIST 1483	United States to 1865	3
or HIST 1493	United States, 1865 to the Present	
Choose one course from Art, Dance, Drama, or Music; 3000-4000-level is recommended ¹		3
<i>World Culture</i>		

Choose one course from Art, Dance, Drama, or Music; 3000-4000-level is recommended ¹ 3

Core Area V: First-Year Experience

Choose one course 3
Choose one General Education Elective: 3000-4000-level approved course is recommended 3

Total Credit Hours 37-47

¹ These two courses must be from different fine arts disciplines.

Suggested Semester Advisement Plan

At least **24 hours of upper-division Musical Theatre** credit must be earned in residence as a declared major. **A grade of C or better is required in all courses taken within the College of Fine Arts.**

Degree Completion Responsibility: Although the Dean's Office checks each student's records, the responsibility for meeting degree requirements lies with the student and not with the advisor or the Dean. Each student should obtain a copy of the requirements for graduation and check it regularly as they complete their degree program.

General Information

The OU School of Visual Arts is a premier institution offering a comprehensive range of programs across four main divisions: Studio Art, Art History, Art, Technology and Culture, and Visual Communication (Design).

Divisions:

- Studio Art:** Focusing on painting, printmaking, sculpture, and ceramics, students can develop their skills in various art forms.
- Art History:** This humanities discipline explores the history, criticism, and theory of visual arts, visual culture, and material culture.
- Art, Technology, and Culture:** Embracing modern advancements, this division covers photography, video, film, technology-based art, and other emerging media.
- Visual Communication (Design):** Students specializing in this area concentrate on graphic design, illustration, production management, and design advertisement.

As Oklahoma's largest and most comprehensive art school, the OU School of Visual Arts is unique in offering a doctoral program in art history. Catering to undergraduate and graduate students, the school fosters creative and scholarly pursuits in the visual arts.

Students from diverse educational backgrounds and life experiences join the OU School of Visual Arts from Oklahoma and around the globe. The school cultivates a dynamic environment by hosting guest artists and scholars, sponsoring visits to nearby museums and galleries, and celebrating alumni's professional accomplishments. Students can actively engage with the school through exhibitions and various visual arts activities in collaboration with local arts organizations.

Student Organizations

- Red Clay Faction
- Graphic Design Association
- Print Club
- Visual Art Student Association

Special Facilities

Facilities at the OU School of Visual Arts include classrooms, large well-equipped instructional studios, a technology-based fabrication lab, installation spaces, video and film editing rooms, analog and digital photography labs, and the Lightwell Gallery exhibition space. Separate from the Fred Jones Jr. Art Center, a 5,000 sq. ft. ceramics facility is located on the university's south campus near the Lloyd Noble Arena and features state-of-the-art equipment and kilns to handle all types of ceramic production. A 12,000 sq. ft. graduate studio facility is located northwest of campus. Media and library resources include the University of Oklahoma Bizzell Library, the largest research library in the state of Oklahoma containing almost 4 million volumes, and the Fine Arts Library houses books and periodicals on art, art history and design as well as on music, dance, drama and musical theatre. The Charles M. Russell Center for the Study of Art of the American West provides an extensive library on western art and a unique opportunity to study with authorities in the field.

Programs for Excellence

The Charles M. Russell Center for the Study of Art of the American West is dedicated to the pursuit of knowledge in the field of American art history as it relates to the western United States. Through its library, national symposia, Distinguished Lecture Series, campus course offerings, archives, and related outreach programs, the Russell Center actively engages students and the public in developing a better understanding of and appreciation for 19th and 20th century Euro-American art.

The OU School of Visual Arts is pleased to offer students the privilege of working with nationally and internationally known artists under the Artist-in-Residence programs. Visiting artists come to campus for varying periods offering students and faculty insights into numerous cultures and professional backgrounds.

The OU School of Visual Arts maintains and has created faculty and student exchange programs with international universities and participates in the University's Study Abroad Program.

Scholarships and Financial Aid

Several forms of financial aid are available to qualified students. These include scholarships, graduate assistantships, tuition or fee waivers, and work-study support. Scholarships and graduate assistantships are available on a competitive basis.

The OU School of Visual Arts offers the following scholarships and fellowships:

- Frances Weitzenhoffer Memorial Fellowship (graduate students in art history);
- Mvhayv Scholarship (graduate students pursuing a degree in Native American Art History);
- Robert S. and Grayce B. Kerr Fellowship (graduate students pursuing a degree in Native American Art or Art of the American West);
- Ben Barnett Scholarships (for all OU School of Visual Arts students);
- Madeline Colbert Steed Scholarship (for all OU School of Visual Arts students);
- Dan Kiacz Memorial Scholarship (printmaking);
- Selma Naifeh Scholarship (painting);
- Glennis Horn Scholarship (sculpture);

- Robert Monroe Memorial Scholarship (for all School Visual Arts students);
- Paul and Kim Moore Scholarship (sculpture);
- Moore Family Scholarship (graduate students pursuing a degree in Native American Art or Art of the American West);
- Paul and Kim Moore Sooner Schooner Scholarships (graduate students pursuing a degree in Native American Art or Art of the American West);
- Roger Sprague Scholarship (painting);
- Amy West-Strain (awarded to one incoming freshman and follows that person through graduation);
- Victor Koshkin-Youritzin Scholarship (art history); and
- Resident and Non-Resident Tuition Waivers.

Visit scholarships.ou.edu for more information.

Undergraduate Study

- Art, B.A. (p. 1597)
- Art History, B.A. (p. 1599)
- Art, Technology & Culture, B.F.A. (p. 1601)
- Studio Arts, B.F.A. (p. 1603)
- Visual Communication, B.F.A. (p. 1604)
- Art, Minor (p. 1606)
- Art History, Minor (p. 1607)
- Museum Studies, Undergraduate Certificate (p. 1607)
- Art and Technology, M.A. (p. 1608)

Admission

The OU School of Visual Arts accepts the admission requirements of the University of Oklahoma for incoming freshman and transfer students in the fall semester. Once admitted to the University of Oklahoma, **all art majors are admitted under the Bachelor of Arts in Art or Bachelor of Arts in Art History** degree programs.

Admission to the Bachelor of Fine Arts in Art degree program (Studio Arts; Art, Technology and Culture; or Visual Communication) is by portfolio review. Students who have taken studio coursework at another institution must meet with an advisor or the Coordinator for Undergraduate Studies to determine if courses can be substituted for program requirements. Information can be found at art.ou.edu.

Laptop Requirement

To ensure that students have adequate access to the software and programs needed for creative and scholarly work, the OU School of Visual Arts requires newly admitted BA & BFA majors in all programs to have a laptop computer.

It's highly recommended that your laptop has been acquired within the previous two years of starting our program. For specific requirements please see the School of Visual Arts website, <http://art.ou.edu>.

Graduate Study

- Museum Studies, Undergraduate Certificate (p. 1607)
- Art History, M.A. (p. 1607)
- Art and Technology, M.A. (p. 1608)
- Art, M.F.A. in Art (p. 1608)
- Art History: Art of the American West, Ph.D. (p. 1609)

- Art History: European Art, Ph.D. (p. 1610)
- Art History: Native American Art, Ph.D. (p. 1610)
- Critical Issues in Art History, Ph.D. (p. 1611)

Admission

Master of Arts in Art History

The requirements for admission into the MA program in art history are a bachelor's degree in art history, or a related field, with a 3.00 cumulative grade point average. Students must submit a letter of intent, three letters of reference, and a copy of one or more art history papers to the school electronically along with the internal OU School of Visual Arts application.

The OU application and transcripts should be sent directly to the Office of Admissions & Recruitment. International applicants are required to demonstrate an appropriate mastery of English and submit satisfactory TOEFL scores.

Master of Fine Arts in Art

The requirements for admission to the MFA program normally include: a BFA degree with a 3.00 grade point average (or equivalent credentials), submission of an online portfolio and a letter of intent. Three letters of reference will also be submitted electronically.

The OU application and transcripts should be sent directly to the Office of Admissions & Recruitment. International applicants are required to demonstrate an appropriate mastery of English and submit satisfactory TOEFL scores.

Doctor of Philosophy

The requirements for admission into the Ph.D. program in art history are an appropriately related master's or equivalent graduate degree as well as meeting all of the minimum admission requirements for the University, the Weitzenhoffer Family College of Fine Arts and the OU School of Visual Arts, including English proficiency scores, as well as submitting writing samples and letters of recommendation. Writing samples and letters of recommendation should be submitted electronically to the school along with the internal OU School of Visual Arts Ph.D. application.

The OU application and transcripts should be sent directly to the Office of Admissions & Recruitment. International applicants are required to demonstrate an appropriate mastery of English and submit satisfactory TOEFL scores.

Courses

A HI 1113 The Understanding of Art 3 Credit Hours

Explanation and analysis of the principles underlying the visual arts. Consideration of formal, historical and other factors in the valuation and enjoyment of painting, sculpture, architecture and utilitarian objects. (F, Sp, Su) [IV-AF].

A HI 1314 Introduction to Art History 4 Credit Hours

Students will be introduced to basic concepts in art and art history through a thematic study of global art. (F, Sp) [IV-AF].

A HI 2303 Introduction to Art in Europe: 1300-1800 3 Credit Hours

This course is an introduction to art and architecture of the early modern period in Europe, from the beginning of the Renaissance in the 1300s until the end of the French Revolution, around 1800. (Irreg.)

A HI 2403 Introduction to American Art 3 Credit Hours

This course offers an introduction to American art, architecture, and visual culture from the colonial period to the present, with an emphasis on art of the United States. Foregrounding issues of encounter and exchange between peoples, nations, and cultures, we will ask what new visual forms were forged in the hybrid cultures of North America. (Irreg.)

A HI 2503 Introduction to Modern Art 3 Credit Hours

This course offers an Introduction to Modern Art, tracing its emergence, development, and some reactions to its practice. We will discuss the institutional, social, and political conditions that spurred artists to address and critique their contemporary moment, beginning with the gritty Realism of Gustave Courbet and stretching to the modular geometries of Minimalism. (Irreg.)

A HI 2603 Introduction to Contemporary Art 3 Credit Hours

This course focuses on contemporary art of the world with a strong emphasis on art made since 1989. Departing from transformations in late modern art that marked the aftermath of World War II and the process of decolonization, we will survey major developments and investigate social, political, and economic aspects of contemporary art. (Irreg.) [IV-AF].

A HI 2703 Introduction to Museum Studies 3 Credit Hours

This introductory course lays the foundation for understanding both the practical and theoretical concerns of the museum world. Topics will include museum management, the acquisition and conservation of art and artifacts, debates over display and interpretation, repatriation and the rights of Native peoples, and memorial museums. (Irreg.) [IV-AF].

A HI 2803 Introduction to Native American Art 3 Credit Hours

This course is designed as a broad survey of Native American art history. We will examine artworks from a vast range of locations, communities, and artistic practices throughout North America and focus on Native peoples' kinships with the natural world and trade partnerships. (Irreg.) [IV-WDC].

A HI 2970 Special Topics/Seminar 1-3 Credit Hours

Special Topics. 1 to 3 hours. May be repeated; Maximum credit nine hours. Special topics course for content not currently offered in regularly scheduled courses. May include library and/or laboratory research, and field projects. (Irreg.)

A HI 3133 Survey of Aegean Art and Architecture 3 Credit Hours

Prerequisite: junior standing. Understanding of art and architecture of the Aegean civilization. The focus of the course will be on artistic production of the island of Crete and to a lesser extent Cycladic and Mycenaean achievements in the Bronze Age Greece. (alt. Sp) [IV-WC].

A HI 3213 Classical Art and Archaeology: Greek Art to the Death of Alexander 3 Credit Hours

(Crosslisted with CL C 3213) Prerequisite: sophomore standing. Lectures, occasionally illustrated, and assigned readings. Survey of the architecture, sculpture, painting and minor arts in the Greek regions of the eastern Mediterranean in the successive stages of their development, with analyses of dominant styles and detailed study of select masterpieces and monuments. (F) [IV-AF].

A HI 3223 Classical Art and Archaeology: Hellenistic Greek Art; Roman Art 3 Credit Hours

(Crosslisted with CL C 3223) Prerequisite: sophomore standing. Continuation of 3213. Survey of Hellenistic art, with particular attention to the individuality of style and diversity of matter. Early Etruscan and Roman art. The development of Roman art in native and assimilated forms; studies in domestic and national monuments. (Sp) [IV-AF].

- A HI 3233 Medieval Art I 3 Credit Hours**
Prerequisite: Junior standing. This course covers the art and architecture of Europe and the Mediterranean from Late Antiquity through the fall of Constantinople in 1453. Beginning with Constantine and the rise of Christianity, this course follows the development and spread of new cultures and art forms, stretching from Islamic material in the east to insular art of the British Isles. (Irreg.) [IV-WC].
- A HI 3263 Survey of Byzantine Art and Architecture 3 Credit Hours**
Prerequisite: junior standing A survey of Byzantine monuments from the foundation of Constantinople in 330 CE to its fall in 1453. (Sp-Alt) [IV-AF].
- A HI 3303 Renaissance Art in Italy 1200-1600 3 Credit Hours**
Prerequisite: junior standing. Focuses on Renaissance art and architecture in Italy from a social and cultural framework, beginning in the 1200's and ending around 1580. (Irreg.) [IV-AF].
- A HI 3313 Art and Culture in Italy 3 Credit Hours**
Prerequisite: permission of department: acceptance to "Journey to Italy". Taught on-site in Italy as part of the "Journey to Italy" summer program in Arezzo. Students will study art from ancient Roman through the Baroque, with special focus on the Renaissance. (Irreg.) [IV-WC].
- A HI 3343 Northern Renaissance Art 3 Credit Hours**
Prerequisite: Junior standing. Painting, sculpture and architecture in Northern Europe from 1400-1600. The course will emphasize painting in Flanders, Germany and the Netherlands. (Irreg.) [IV-WC].
- A HI 3403 Baroque Art and Architecture in Europe:1600-1700 3 Credit Hours**
Prerequisite: junior standing; Covers art and architecture in Europe in the seventeenth century, during the time period called the Baroque. (Irreg.) [IV-WC].
- A HI 3440 Mentored Research Experience 3 Credit Hours**
0 to 3 hours. Prerequisites: ENGL 1113 or equivalent, and permission of instructor. May be repeated; maximum credit 12 hours. For the inquisitive student to apply the scholarly processes of the discipline to a research or creative project under the mentorship of a faculty member. Student and instructor should complete an Undergraduate Research & Creative Projects (URCP) Mentoring Agreement and file it with the URCP office. Not for honors credit. (F, Sp, Su)
- A HI 3503 Art of the 18th Century: The Age of Enlightenment 3 Credit Hours**
Prerequisite: Junior standing. Emphasizes the interaction of art with scientific, literary, historic and philosophical innovations of the eighteenth century. Content includes painting, sculpture and architecture of Northern Europe. (Irreg.) [IV-WC].
- A HI 3553 Nineteenth-Century Art 3 Credit Hours**
Prerequisite: Junior standing. European art from the French Revolution to 1900, with particular emphasis on developments in French painting. Brief consideration of parallel trends in American art. (Irreg.) [IV-WC].
- A HI 3603 American Art 3 Credit Hours**
Prerequisite: junior standing. American art from the colonial period to 1950. (Irreg.) [IV-WC].
- A HI 3613 Studies in American Art 3 Credit Hours**
Prerequisite: ENGL 1213 or EXPO 1213; junior standing; May be repeated with change of subject matter; maximum credit 9 hours. Specialized study in selected topics in American art. Topics vary by semester; potential topics include colonial portraiture, nineteenth-century genre painting, murals in American art, U.S. sculpture, U.S. art in international contexts, and U.S. memorials and monuments. (Irreg.)
- A HI 3663 Contemporary Art 3 Credit Hours**
Prerequisite: Junior standing. Focuses on contemporary art of the world with a strong emphasis on art made since 1989. (Irreg.) [IV-AF].
- A HI 3673 History of Visual Communication 3 Credit Hours**
Prerequisite: junior standing. The history of visual communications and design from prehistoric times to the twentieth century. (Sp)
- A HI 3693 New Media Art 3 Credit Hours**
Prerequisite: Junior standing. This course covers new media - video, installation, performance, and digital media - and technology in art since 1950. (Irreg.) [IV-AF].
- A HI 3703 Exhibition Preparation and Presentation 3 Credit Hours**
Prerequisite: ENGL 1213 or EXPO 1213, Junior standing. This course will familiarize you with practical aspects of museum studies involving exhibitions. Taught by faculty with varied areas of expertise, the course is unique each time it is offered, as each instructor will bring differing expertise, interests, and projects into the classroom. Students gain working experience involving varied aspects of the preparation and presentation of exhibitions. (Irreg.)
- A HI 3733 Art of the American West 3 Credit Hours**
Prerequisite: ENGL 1213 and junior standing. An introduction to the art of the American West accompanied by close study of relevant primary and scholarly texts. Students will be responsible for active participation in class discussion and for a series of short papers and assessments designed to develop skills in writing and historical interpretation. (Irreg.)
- A HI 3803 Pre-Columbian Art & Architecture of Meso- and South America 3 Credit Hours**
Prerequisite: junior standing. An overview of Pre-Columbian art and architecture in Meso-America from Prehistoric times until the Spanish intervention in the early 1500s. (F-alternate) [IV-WDC].
- A HI 3813 Colonial Latin American Art 3 Credit Hours**
Prerequisite: ENGL 1213 or EXPO 1213; junior standing. This upper-level course examines the history of artistic production in Latin America from the sixteenth through the mid eighteenth century. We will conduct case studies of artistic media by region, beginning with Peru and ending with the Californias. A geographical approach allows us to identify regional differences in artistic expression, which reflect local materials and Indigenous ideas. (Irreg.) [IV-AF].
- A HI 3833 Native American Art of the West 3 Credit Hours**
Prerequisite: Junior standing. This course will focus on the artistic and architectural practices of Native American communities throughout the western United States and parts of Canada and Mexico. We will examine how Native artists responded to the impacts of colonization on their ancestral practices. (Irreg.) [IV-AF].
- A HI 3903 Art History, Theory and Practice 3 Credit Hours**
Prerequisite: A HI 1314, A HI 2000-level elective, and junior standing; or permission of instructor. Introduction to the theory and practice of Art History required for the major involving consideration of the field's history, exposure to historical and contemporary approaches to its practice, and training in art historical writing and critical and visual analysis. (Irreg.)
- A HI 3913 American Visual Culture 3 Credit Hours**
Prerequisites: junior standing. Explores approaches to American visual culture, an interdisciplinary area of inquiry that considers the role of visual experience in everyday life. These include photography, cinema, television, digital media, and public art. We examine the key theorists, methodologies, and cultural practices that have shaped the field of Visual Culture Studies.(Irreg.)

- A HI 3960 Honors Reading 1-3 Credit Hours**
1 to 3 hours. Prerequisite: Admission to Honors Program. May be repeated; maximum credit six hours. Consists of topics designated by the instructor in keeping with the student's major program. The topics will cover materials not usually presented in the regular courses. (F, Sp, Su)
- A HI 3970 Honors Seminar 1-3 Credit Hours**
1 to 3 hours. Prerequisite: admission to Honors Program. May be repeated; maximum credit six hours. Subjects covered vary. Deals with concepts not usually treated in regular courses. (Irreg.)
- A HI 3980 Honors Research 1-3 Credit Hours**
1 to 3 hours. Prerequisite: Admission to Honors Program. May be repeated; maximum credit six hours. Will provide an opportunity for the gifted Honors candidate to work at a special project in the student's field. (F, Sp, Su)
- A HI 3990 Independent Study 1-3 Credit Hours**
1 to 3 hours. Prerequisite: permission of instructor and junior standing. May be repeated once with change of content. Independent study may be arranged to study a subject not available through regular course offerings. (F, Sp, Su)
- A HI 4043 Native Americans, Museums and Exhibitions 3 Credit Hours**
(Slashlisted with AHI 5043) Prerequisite: Junior standing; A HI 1314 or permission of instructor. A discussion-based seminar on the history of museums and Native American art and culture. An examination of early collecting practices that removed materials and belongings from Native American communities, eventually becoming part of museum collections. We will also look at the interventions living artists are making and how they choose to present themselves and their culture to the public. No student may earn credit for both 4043 and 5043. (Irreg.)
- A HI 4163 Etruscan Art 3 Credit Hours**
(Slashlisted with 5163) Prerequisite: junior standing or permission of instructor. Examine and interpret selected works of Etruscan art in reference to the possible influences from the social, political, economic, literary, and religious "climate" of the time. No student may earn credit for both 4163 and 5163. (F) [IV-WC].
- A HI 4273 Byzantine Icons 3 Credit Hours**
(Slashlisted with 5273) Prerequisite: junior standing. Byzantine images occupy a principal position at the heart of the Eastern Church and they are an organic part of daily services. The icon represents a vision of the invisible, and therefore a vision founded on divine knowledge which transforms the created work into the miracle working image. This Class will examine the challenging process of producing holiness and divinity through painting panels. No student may earn credit for both 4273 and 5273. (Irreg.) [IV-AF].
- A HI 4373 The Italian City: Renaissance and Baroque Architecture 3 Credit Hours**
(Slashlisted with 5373) Prerequisite: junior standing. Architecture and urban planning of Italy from about 1300-1700. Emphasis on the growth of the city and how new forms of social interaction affected the development of architecture and the urban setting. No student may earn credit for both 4373 and 5373. (Alt. F) [IV-WC].
- A HI 4383 Italian Renaissance Art and Science 3 Credit Hours**
Prerequisite: junior standing. Focuses on the confluence of science and art in Renaissance Italy through a study of materials, process, technique and structural issues addressed by artists in the creation of painting, sculpture, and architectures. (Su) [IV-WC].
- A HI 4463 Issues in Northern Baroque Art 3 Credit Hours**
(Slashlisted with A HI 5463) Prerequisite: junior standing. Focuses on Northern Baroque art as case-study for examination of a variety of art historical methodologies and problems such as attribution, function, and meaning. No student may earn credit for both 4463 and 5463. (Irreg.)
- A HI 4523 Art and Power 3 Credit Hours**
(Slashlisted with AHI 5523) Prerequisite: Junior standing. What is the relationship between art and power, and how has it changed over time? This course delves into how art and architecture have been used to assert, reinforce, and resist power from 1800 to the present. We will explore topics including propaganda, cultural diplomacy, monumentality, restitution and repatriation, thinking critically about how similar strategies are utilized today. No student may earn credit for both 4523 and 5523. (Irreg.)
- A HI 4573 Impressionist Revolt 3 Credit Hours**
(Slashlisted with A HI 5573) Prerequisite: A HI 1314, A HI 2000-level elective, and junior standing; or permission of instructor. This course will establish a context for the Impressionist movement by looking at works by theme. We will examine the physical and social transformation of Paris at midcentury, prostitution and the deceptions of capitalism, cafe culture and precarious public spaces, performers of (theater, opera, dance), and the escapist seduction of suburban leisure. No student may earn credit for both 4573 and 5573. (Irreg.)
- A HI 4583 Caricature and Satire 3 Credit Hours**
(Slashlisted with A HI 5583) Prerequisite: A HI 1314, A HI 2000-level elective, and junior standing; or permission of instructor for non-majors in related areas of study. This course will investigate topics and themes related to satire and caricature, first grounding our discussion in theoretical foundations. We will look at social caricature and social science, political critique and the rise of the illustrated press, criminality and 19th-century science, cults of celebrity, and the impact of censorship on form. No student may earn credit for both 4583 and 5583. (Irreg.)
- A HI G4623 Contemporary Art and the Environment 3 Credit Hours**
Prerequisite: Junior standing. In this course, we will think together about how contemporary art relates to the environment. We will approach this topic at the intersection of the discipline of art history and the interdisciplinary area of environmental studies, which can draw on the arts, humanities, sciences, and professional disciplines like medicine, engineering, and law. (Irreg.) [IV-AF].
- A HI 4633 Modern Art: Cezanne to 1950 3 Credit Hours**
(Slashlisted with 5633) Prerequisite: junior standing. European art from Post-Impressionism to 1950, including some American developments. Emphasis on painting and sculpture, with some consideration of architecture. No student may earn credit for both 4633 and 5633. (Irreg.) [IV-WC].
- A HI 4643 Art After Modernism 3 Credit Hours**
(Slashlisted with A HI 5643) Prerequisite: Junior standing. Examines the transition from modern to contemporary art in Europe and the United States between 1950 and 1989. No student may earn credit for both 4643 and 5643. (Irreg.)
- A HI 4683 American Material Culture 3 Credit Hours**
Prerequisite: Junior standing. An interdisciplinary seminar addressing the significance of ordinary American objects (cell phones, storm shelters, ATM machines, lava lamps, food processors; the possibilities are nearly endless) taken as evidence of unconscious as well as conscious attitudes and beliefs, some specific to their original makers, users, owners and perceivers, others latent in the broader cultural milieu of their creation. (Sp)

A HI 4723 Cinema of the American West: Then and Now 3 Credit Hours
(Slashlisted with A HI 5723) Prerequisite: junior standing. Provides a critical overview of cinema of the American West from the 1930s to present day. Through screenings and course readings, examines the underlying components of Western films, including issues of race, class, ethnicity, gender, sexuality and ideology. Also explores the influence of painting and photography on cinema, as filmmakers both reinforced and reshaped popular imaginings of the American West. No student may earn credit for both 4723 and 5723. (Irreg.)

A HI 4733 Contemporary Art in Exhibition 3 Credit Hours
Prerequisite: ENGL 1213 or EXPO 1213; junior standing. Museums are usually places where things go when they have outlasted their original purposes but still retain value, require care, and stir interest. In this course, we will think in various ways about how contemporary art and the museum do and do not go together. (Irreg.)

A HI 4743 The American West in Art, Photography and Popular Culture 3 Credit Hours
(Slashlisted with A HI 5743) Prerequisite: junior standing or permission of instructor. Focuses on the Trans-Mississippi West, as seen through the eyes of artists and photographers from the early 19th century until today. A variety of media will be discussed, including paintings, prints, photography, and sculpture. The course will study Euro-American artistic conventions/tradition and how they have been employed in defining western history, culture, and native people as fact, fiction, and myth. No student may earn credit for both 4743 and 5743. (Irreg.) [IV-AF].

A HI 4753 The American West in Photography 3 Credit Hours
(Slashlisted with 5753) Prerequisite: Junior standing or permission of the instructor. This course focuses on the study of the trans-Mississippi west as seen through the eyes of photographers from the early 19th century up to the present. The purpose of this course will primarily be to study Euro-American photographic conventions, traditions, and styles and how they have been employed in defining American western history, culture and native peoples as fact, artistic motif and myth. No student may earn credit for both 4753 and 5753. (Irreg.) [IV-WC].

A HI 4773 Modern Exhibition Histories 3 Credit Hours
(Slashlisted with A HI 5773) Prerequisite: Junior standing and ENGL 1213 or EXPO 1213. This course offers a history of modern art exhibitions, with a focus on European, U.S., and transnational contexts. It explores how exhibitionary decisions, including object choice, design and installation, location, historical context, artistic goals, and visitor experience and reception shape the fluid and multiple meanings of art. No student may earn credit for both 4773 and 5773. (Irreg.)

A HI 4823 20th Century American Indian Art History 3 Credit Hours
(Slashlisted with A HI 5823) Prerequisite: junior standing. Examination and study of the arts of North American Indians. Included in the survey will be the examination of new materials, styles, and the shifts of gender roles in the creative arts. No student may earn credit for both 4823 and 5823. (F) [IV-WDC].

A HI 4853 American Indian Women Artists 3 Credit Hours
(Slashlisted with A HI 5853) Prerequisite: Junior standing or permission of the instructor. Investigates the arts of indigenous women throughout the Americas. Students will participate in research, discussion of selected readings, written assignments and individual presentations concerning the non-western aesthetics and ideals that are found in arts of Indian women from the 20th century forward. No student may earn credit for both 4853 and 5853. (Irreg.) [IV-WDC].

A HI 4913 Seminar 3 Credit Hours
(Slashlisted with 5913) Prerequisite: permission of instructor. May be repeated with change of content; maximum credit 12 hours. Advanced topics in art history. No student may earn credit for both 4913 and 5913. (Irreg.)

A HI 4930 Internship 1-6 Credit Hours
1 to 6 hours. Prerequisite: permission of instructor; majors only. May be repeated; maximum credit 6 hours. Students arrange and participate in a professional work experience with an approved internship site. (Irreg.)

A HI 4933 Process and Theory Workshop 3 Credit Hours
(Slashlisted with A HI 5933; Crosslisted with ARTC 4933) Prerequisite: Junior standing or permission of instructor; majors only. May be repeated with change of subject; maximum credit 6 hours. The course will offer a deeper grounding in relevant theoretical issues, as students explore together the interdisciplinary landscapes of contemporary theory and assess their relevance for artistic practice and art historical research. No student may earn credit for both 4933 and 5933. (Irreg.)

A HI 4943 Fieldwork for Art History 3 Credit Hours
(Slashlisted with A HI 5943) Prerequisite: Junior standing and permission of instructor. Students will be introduced to the idea that strategies art historians have developed to interpret art can be applied to the full range of traces left by human beings in the natural world. This course stretches the discipline of art history in experimental ways, challenging the centrality of art, understood as the sort of object that belongs in a museum. No student may earn credit for both 4943 and 5943. (Irreg.)

A HI 4953 Museum Studies 3 Credit Hours
(Slashlisted with 5953) Prerequisite: junior standing. Analysis of problems in collecting, authenticating, exhibiting and conserving works of art. Attention is also given to museum architecture and administration, as well as to the cultural and educational role of the museum in the community. Field trips, projects and papers are required. No student may earn credit for both 4953 and 5953. (Irreg.)

A HI 4960 Directed Readings 2-6 Credit Hours
Prerequisite: six hours of upper-division art history and permission of instructor. May be repeated; maximum credit six hours. Research culminating in the preparation of papers using technical and critical literature in the history of art. (Irreg.)

A HI 4970 Special Topics/Seminar 1-3 Credit Hours
1 to 3 hours. Prerequisite: Senior standing or permission of instructor. May be repeated; maximum credit nine hours. Special topics or seminar course for content not currently offered in regularly scheduled courses. May include library and/or laboratory research and field projects. (Irreg.)

A HI 4990 Independent Study 1-3 Credit Hours
1 to 3 hours. Prerequisite: senior standing and permission of instructor. May be repeated; maximum credit six hours. Contracted independent study for a topic not currently offered in regularly scheduled courses. Independent study may include library and/or laboratory research and field projects. (Irreg.)

A HI 4993 Senior Capstone Experience 3 Credit Hours
Prerequisite: senior classification. May not be repeated for credit. Primary objective is to provide a culminating experience for the senior-year student. Satisfies the University-wide General Education Requirement for a capstone course for art history majors. (F, Sp) [V].

- A HI 5043 Native Americans, Museums and Exhibitions 3 Credit Hours**
(Slashlisted with AHI 4043) Prerequisite: Graduate standing. A discussion-based seminar on the history of museums and Native American art and culture. An examination of early collecting practices that removed materials and belongings from Native American communities, eventually becoming part of museum collections. We will also look at the interventions living artists are making and how they choose to present themselves and their culture to the public. No student may earn credit for both 4043 and 5043. (Irreg.)
- A HI 5163 Etruscan Art 3 Credit Hours**
(Slashlisted with 4163) Prerequisite: graduate standing in the School of Art and Art History or permission of the instructor. Examine and interpret selected works of Etruscan art in reference to the possible influences from the social, political, economic, literary, and religious "climate" of the time. No student may earn credit for both 4163 and 5163. (Irreg.)
- A HI 5210 Graduate Readings 1-6 Credit Hours**
1 to 6 hours. Prerequisite: graduate standing in the School of Art and Art History or permission of the instructor. May be repeated with change of subject; maximum credit nine hours. Selected readings in art history. (Irreg.)
- A HI 5220 Graduate Projects 1-6 Credit Hours**
1 to 6 hours. Prerequisite: graduate standing in the School of Art and Art History or permission of the instructor. May be repeated with change of subject; maximum credit nine hours. Individual problems on selected topics. (Irreg.)
- A HI 5273 Byzantine Icons 3 Credit Hours**
(Slashlisted with 4273) Prerequisite: graduate standing in the School of Art and Art History or permission of the instructor. Byzantine images occupy a principal position at the heart of the Eastern Church and they are an organic part of daily services. The icon represents a vision of the invisible, and therefore a vision founded on divine knowledge which transforms the created work into the miracle working image. This class will examine the challenging process of producing holiness and divinity through painting panels. No student may earn credit for both 4273 and 5273. (Irreg.)
- A HI 5373 The Italian City: Renaissance and Baroque Architecture 3 Credit Hours**
(Slashlisted with 4373) Prerequisite: graduate standing in the School of Art and Art History or permission of the instructor. Architecture and urban planning of Italy from about 1300-1700. Emphasis on the growth of the city and how new forms of social interaction affected the development of architecture and the urban setting. No student may earn credit for both 4373 and 5373. (Irreg.)
- A HI 5463 Issues in Northern Baroque Art 3 Credit Hours**
(Slashlisted with A HI 4463) Prerequisite: Prerequisite: graduate standing in the School of Art and Art History or permission of the instructor. Looks at northern Baroque art as a case study for the examination of a variety of art historical problems such as attribution, function, interpretation, and symbolism. No student may earn credit for both 4463 and 5463. (Irreg.)
- A HI 5523 Art and Power 3 Credit Hours**
(Slashlisted with AHI 4523) Prerequisite: Graduate standing or instructor permission. What is the relationship between art and power, and how has it changed over time? This course delves into how art and architecture have been used to assert, reinforce, and resist power from 1800 to the present. We will explore topics including propaganda, cultural diplomacy, monumentality, restitution and repatriation, thinking critically about how similar strategies are utilized today. No student may earn credit for both 4523 and 5523. (Irreg.)
- A HI 5573 Impressionist Revolt 3 Credit Hours**
(Slashlisted with A HI 4573) Prerequisite: Graduate standing and permission of instructor. This course will establish a context for the Impressionist movement by looking at works by theme. We will examine the physical and social transformation of Paris at midcentury, prostitution and the deceptions of capitalism, cafe culture and precarious public spaces, performers of theater, opera, and dance, and the escapist seduction of suburban leisure. No student may earn credit for both 4573 and 5573. (Irreg.)
- A HI 5583 Caricature and Satire 3 Credit Hours**
(Slashlisted with A HI 4583) Prerequisite: Graduate standing and permission of instructor. This course will investigate topics and themes related to satire and caricature, first grounding our discussion in theoretical foundations. We will look at social caricature and social science, political critique and the rise of the illustrated press, criminality and 19th-century science, cults of celebrity, and the impact of censorship on form. No student may earn credit for both 4583 and 5583. (Irreg.)
- A HI 5633 Modern Art: Cezanne to 1950 3 Credit Hours**
(Slashlisted with 4633) Prerequisite: graduate standing in the School of Art and Art History or permission of the instructor. European art from Postimpressionism to 1950, including some American developments. Emphasis on painting and sculpture, with some consideration of architecture. No student may earn credit for both 4633 and 5633. (Irreg.)
- A HI 5643 Art After Modernism 3 Credit Hours**
(Slashlisted with A HI 4643) Prerequisites: graduate standing; permission of instructor. Examines the transition from modern to contemporary art in Europe and the United States between 1950 and 1989. No student may earn credit for both 4643 and 5643. (Irreg.)
- A HI 5723 Cinema of the American West: Then and Now 3 Credit Hours**
(Slashlisted with A HI 4723) Prerequisite: graduate standing; majors only or permission of instructor. Provides a critical overview of cinema of the American West from the 1930s to present day. Through screenings and course readings, examines the underlying components of Western films, including issues of race, class, ethnicity, gender, sexuality, and ideology. Also explores the influence of painting and photography on cinema, as filmmakers both reinforced and reshaped popular imaginings of the American West. No student may earn credit for both 4723 and 5723. (Irreg.)
- A HI 5743 The American West in Art, Photography, and Popular Culture 3 Credit Hours**
(Slashlisted with A HI 4743) Prerequisite: graduate standing in the School of Art and Art History or permission of the instructor. Focuses on the Trans-Mississippi West, as seen through the eyes of artists and photographers from the early 19th century until today. A variety of media will be discussed, including paintings, prints, photography, and sculpture. The course will study Euro-American artistic conventions/tradition and how they have been employed in defining western history, culture, and native people as fact, fiction, and myth. No student may earn credit for both 4743 and 5743. (Irreg.)
- A HI 5753 The American West in Photography 3 Credit Hours**
(Slashlisted with 4753) Prerequisite: graduate standing in the School of Art and Art History or permission of the instructor. This course focuses on the study of the trans-Mississippi west as seen through the eyes of photographers from the early 19th century up to the present. The purpose of this course will primarily be to study Euro-American photographic conventions, traditions, and styles and how they have been employed in defining American western history, culture and native peoples as fact, artistic motif and myth. No student may earn credit for both 4753 and 5753. (Irreg.)

- A HI 5773 Modern Exhibition Histories 3 Credit Hours**
(Slashlisted with A HI 4773) Prerequisite: Graduate standing and permission of instructor. This course offers a history of modern art exhibitions, with a focus on European, U.S., and transnational contexts. It explores how exhibitionary decisions, including object choice, design and installation, location, historical context, artistic goals, and visitor experience and reception shape the fluid and multiple meanings of art. No student may earn credit for both 4773 and 5773. (Irreg.)
- A HI 5823 20th Century American Indian Art History 3 Credit Hours**
(Slashlisted with 4823) Prerequisite: graduate standing in the School of Art and Art History or permission of the instructor. Examination and study of the arts of North American Indians. Included in the survey will be the examination of new materials, styles, and the shifts of gender roles in the creative arts. No student may earn credit for both 4823 and 5823. (Irreg.)
- A HI 5853 American Indian Women Artists 3 Credit Hours**
(Slashlisted with 4853) Prerequisite: graduate standing in the School of Art and Art History or permission of the instructor. Investigates the arts of indigenous women throughout the Americas. Students will participate in research, discussion of selected readings, written assignments and individual presentations concerning the non-western aesthetics and ideals that are found in arts of Indian women from the 20th century forward. No student may earn credit for both 4853 and 5853. (Irreg.)
- A HI 5903 Methodologies and Theories in Art History 3 Credit Hours**
Prerequisite: graduate standing in art history or senior standing with permission of instructor. A study of various scholarly approaches to the history of art, as well as the theories which inform these approaches. Preparation of bibliographies; short presentations and papers. (Irreg.)
- A HI 5911 Teaching of Art History 1 Credit Hour**
Prerequisites: graduate standing; permission of instructor. Introduction to pedagogy for art history graduate students. It is required for Graduate Teaching Assistants with teaching assignments, and they should normally take it in the first semester of their appointment. The course focuses on principles and practices of good teaching and uses hands-on methods to encourage students to gain confidence and share ideas. Through a series of practical assignments students will increase their competency in creating and evaluating assignments, developing syllabi, and leading discussion sections. (Irreg.)
- A HI 5912 Professional Writing for Art Historians 2 Credit Hours**
Prerequisites: graduate standing; permission of instructor. This course is intended for graduate students pursuing an art history degree at the M.A. or Ph.D. level. It aims to teach professional writing skills necessary for a career in academia or the art world with a focus on proposals for conferences and grants. (Irreg.)
- A HI 5913 Seminar 3 Credit Hours**
(Slashlisted with 4913) Prerequisite: permission of instructor. May be repeated with change of content; maximum credit twelve hours. Advanced topics in art history. No student may earn credit for both 4913 and 5913. (Irreg.)
- A HI 5930 Graduate Internship 1-6 Credit Hours**
Prerequisite: graduate standing; permission of instructor. Variable credit: 1-6 hours. May be repeated; maximum credit 6 credit hours. An Internship is a planned work experience related to a student's personal career and academic goals. It can help a student learn about a career, apply knowledge gained in the classroom, develop skills, and enrich the student's understanding of a variety of art organizations. The primary purpose of an internship is to help relate academic experiences with those in the workplace. (Irreg.)
- A HI 5933 Process and Theory Workshop 3 Credit Hours**
(Slashlisted with A HI 4933; Crosslisted with ARTC 5933) Prerequisite: Graduate standing and permission of instructor. May be repeated with change of subject; maximum credit 6 hours. The course will offer a deeper grounding in relevant theoretical issues, as students explore together the interdisciplinary landscapes of contemporary theory and assess their relevance for artistic practice and art historical research. No student may earn credit for both 4933 and 5933. (Irreg.)
- A HI 5943 Fieldwork for Art History 3 Credit Hours**
(Slashlisted with A HI 4943) Prerequisite: Graduate standing and permission of instructor. Students will be introduced to the idea that strategies art historians have developed to interpret art can be applied to the full range of traces left by human beings in the natural world. This course stretches the discipline of art history in experimental ways, challenging the centrality of art, understood as the sort of object that belongs in a museum. No student may earn credit for both 4943 and 5943. (Irreg.)
- A HI 5953 Museum Studies 3 Credit Hours**
(Slashlisted with A HI 4953) Prerequisite: graduate standing in the School of Art and Art History or permission of the instructor. Analysis of problems in collecting, authenticating, exhibiting and conserving works of art. Attention is also given to museum architecture and administration, as well as to the cultural and educational role of the museum in the community. Field trips, projects and papers are required. No student may earn credit for both 4953 and 5953. (Irreg.)
- A HI 5960 Directed Readings 2-6 Credit Hours**
Prerequisite: permission of instructor. May be repeated; maximum credit six hours. Research culminating in the preparation of papers using technical and critical literature in the history of art. (Irreg.)
- A HI 5970 Special Topics/Seminar 1-3 Credit Hours**
1 to 3 hours. Prerequisite: Graduate standing or permission of instructor. May be repeated; maximum credit nine hours. Special topics or seminar course for content not currently offered in regularly scheduled courses. May include library and/or laboratory research and field projects. (Irreg.)
- A HI 5972 Thesis Proposal 2 Credit Hours**
Prerequisite: graduate standing in the School of Art and Art History or permission of the instructor. Students will create a research topic, select a thesis committee and formulate a proposal and bibliography approved by their committee. (Irreg.)
- A HI 5980 Research for Master's Thesis 2-9 Credit Hours**
2 to 9 hours. Prerequisite: graduate standing in the School of Art and Art History or permission of the instructor. May be repeated for credit; maximum credit applicable toward degree, four hours. Directed research culminating in the completion of the master's thesis. (Irreg.)
- A HI 5990 Independent Study 1-3 Credit Hours**
1 to 3 hours. Prerequisite: Graduate standing and permission of instructor. May be repeated; maximum credit nine hours. Contracted independent study for a topic not currently offered in regularly scheduled courses. Independent study may include library and/or laboratory research and field projects. (Irreg.)
- A HI 5993 Special Studies 3 Credit Hours**
Prerequisite: graduate standing in the School of Art and Art History or permission of the instructor. May be repeated; maximum credit twelve hours. Advanced studies in various periods of art history, given under stated titles determined semester by the instructor involved. (Irreg.)

- A HI 6203 Native American Art 3 Credit Hours**
Prerequisite: graduate standing in the School of Art and Art History or permission of the instructor. May be repeated with change in topic; maximum credit 12 hours. Advanced seminar that will examine in depth various concepts, individuals, schools, movements, or themes. Topics may include: Oklahoma Native American artist; Ledger art; art of Native American people; contemporary Native American painters; Native American sculptors; southwestern Native American weaving; jewelry; beadwork; potteries; coastal American art of the northwest; and native arts of Hawaii. (Irreg.)
- A HI 6213 Graduate Seminar in Ancient Art 3 Credit Hours**
Prerequisite: Graduate standing and permission of instructor; May be repeated with change of content; maximum credit 6 hours. This is a rotating topic course on Ancient Art. Content initially will include examining selected works and archaeological sites of the Cycladic Islands. (Irreg.)
- A HI 6313 Seminar in Early Modern Art 3 Credit Hours**
Prerequisite: Graduate standing. May be repeated with change of content; maximum credit 6 hours. This course is a variable topic seminar on European Art from c. 1400s-c. 1700s that includes an advanced examination of a particular artist, theme, style, or era. (Irreg.)
- A HI 6413 Seminar in Modern Art 3 Credit Hours**
Prerequisite: Graduate standing and permission of instructor. May be repeated with change of content; maximum credit 6 hours. This course is a variable topic seminar on European Art from c. 1800s-1900s that includes an advanced examination of a particular artist, theme, style, or era. (Irreg.)
- A HI 6423 Topics in American Art History 3 Credit Hours**
Prerequisite: Graduate standing in the School of Art and Art History or permission of instructor. Interdisciplinary seminar addressing topics in the history of American art, its focus changing from year to year though always concerned with developments in the art of the American west, based on close, restrained analysis of particular images combined with readings in art history and related disciplines. (Irreg.)
- A HI 6433 Material Culture, Theory and Practice 3 Credit Hours**
Prerequisite: Graduate standing in the OU School of Visual Arts or permission of the instructor. Interdisciplinary seminar addressing the significance of ordinary objects taken as evidence of unconscious as well as conscious attitudes and beliefs, some specific to their original makers, users, owners and receivers, others latent in the broader cultural milieu in which each object circulated or circulates still. (Irreg.)
- A HI 6513 Critical Issues in Recent American Art History 3 Credit Hours**
Prerequisite: Graduate standing in the School of Art and Art History or permission of the instructor. Interdisciplinary seminar addressing critical issues in recent American art history through close attention to a series of recent monographs by major figures in the field. (Irreg.)
- A HI 6523 Graduate Seminar in Contemporary Art 3 Credit Hours**
Prerequisite: Graduate standing and permission of instructor; May be repeated with change of content; maximum credit 6 hours. The course is a rotating topics seminar on contemporary art that includes an advanced examination of an artist, theme, style, or era. (Irreg.)
- A HI 6950 Dissertation Proposal 1-6 Credit Hours**
1 to 6 hours. Prerequisite: Completion of core coursework for the PhD in Art History. May be repeated; maximum credit six hours. Students will create a research topic and formulate a proposal and bibliography approved by their doctoral committee. (F, Sp)
- A HI 6960 Directed Readings 1-3 Credit Hours**
1 to 3 hours. Prerequisite: graduate standing or permission of instructor. May be repeated; maximum credit six hours. Directed readings and/or literature review under the direction of a faculty member. (Irreg.)
- A HI 6970 Special Topics/Seminar 1-3 Credit Hours**
1 to 3 hours. Prerequisite: graduate standing or permission of instructor. May be repeated; maximum credit 12 hours. Special topics or seminar course for content not currently offered in regularly scheduled courses. May include library and/or research and field projects. (Irreg.)
- A HI 6980 Research for Doctoral Dissertation 2-9 Credit Hours**
2 to 9 hours. Prerequisite: Graduate standing and permission of instructor; may be repeated. Directed research culminating in the completion of the Doctoral dissertation. (F, Sp)
- A HI 6990 Independent Study 1-3 Credit Hours**
1 to 3 hours. Prerequisite: Graduate standing and permission of instructor. May be repeated; maximum credit nine hours. Contracted independent study for a topic not currently offered in regularly scheduled courses. Independent study may include library and/or laboratory research and field projects. (Irreg.)
- A T 5803 History and Theory of Art and Technology Seminar 3 Credit Hours**
Prerequisite: Graduate standing and Master of Arts in Art and Technology majors only. This course surveys the history and theory of art and technology from prehistory to the present. Presenting the major historical developments alongside key works and texts in art and design practice, their critical and historical reception, and their theorization, the course provides students with a comprehensive foundation in the past of their field. (F, Sp, Su)
- A T 5813 Creative Coding Techniques 3 Credit Hours**
Prerequisite: Graduate standing and Master of Arts in Art and Technology majors only. This course provides an introduction to the computer as a usable art production tool. Students work to understand computer code as a malleable form within the context of New Media Art. Students learn the basic structure of OOP (Object Oriented Programming) as it pertains to the navigation of current technologies. (F, Sp, Su)
- A T 5823 Emerging Art and Technology Seminar 3 Credit Hours**
Prerequisite: Graduate standing and Master of Arts in Art and Technology majors only. This course helps students position themselves within the field of art and technology by equipping them with knowledge necessary to anticipate the future shape of its fast-paced development. Specific topics covered tend to involve big-picture changes on the horizon, new technologies in development, and the shifting relationship of society to technology. (F, Sp, Su)
- A T 5833 Video and Sound Techniques 3 Credit Hours**
Prerequisite: Graduate standing and Master of Arts in Art and Technology majors only. This course provides students with an overview of audio and video capture and post-production. This technique-intensive lab features weekly sequences of video tutorials covering introductory to advanced techniques for video capture, video lighting and exposure, audio capture, technical equipment, and industry standard software post-production methods. (F, Sp, Su)

- A T 5843 3D Animation Techniques 3 Credit Hours**
Prerequisite: Graduate standing and Master of Arts in Art and Technology majors only. This course teaches students how to produce 3D models and 3D animations with the latest industry-standard software. This technique-intensive lab features weekly sequences of in-depth video tutorials covering introductory to advanced techniques for creating high-quality 3D objects, environments, characters, keyframe animations, procedural animations, and simulation FX. (Sp, Su)
- A T 5853 Motion Graphics Techniques 3 Credit Hours**
Prerequisite: Graduate standing and Master of Arts in Art and Technology majors only. This course provides students with a technical overview of using motion graphics, including but not limited to, effective communication in moving text, interactive media, and basic digital compositing. This technique-intensive lab features weekly sequences of in-depth video tutorials covering techniques for key components in the successful creation of imagery, sound, video, and animation for use in motion graphic projects. (F, Sp, Su)
- A T 5863 Moving Image Production 3 Credit Hours**
Prerequisite: Graduate standing and Master of Arts in Art and Technology majors only. This studio course provides students with one-on-one and group feedback for self-directed projects of time-based media. Students will develop their work within a theoretical and conceptual framework, learning and applying the principles of interactivity in art and design. The course includes screenings, discussions, and critiques. (F, Sp, Su)
- A T 5873 Game Engine Techniques 3 Credit Hours**
Prerequisite: Graduate standing and Master of Arts in Art and Technology majors only. This course provides students with an overview of 3D game engine software to produce narrative and experimental screen-based video games. This technique-intensive lab features weekly sequences of in-depth video tutorials covering introductory to advanced techniques for importing, animating, scripting, and exporting computer games. (F, Sp, Su)
- A T 5883 Interactive Media Production 3 Credit Hours**
Prerequisite: Graduate standing and Master of Arts in Art and Technology majors only. This studio course provides students with one-on-one and group feedback for self-directed projects in interactive media. Students will develop their work within a theoretical and conceptual framework, learning and applying the principles of interactivity in art and design. The course includes screenings, discussions, and critiques. (F, Sp, Su)
- A T 5893 Mixed Reality Techniques 3 Credit Hours**
Prerequisite: Graduate standing and Master of Arts in Art and Technology majors only. This course teaches students to how to create virtual and augmented reality experiences. This technique-intensive lab features weekly sequences of in-depth video tutorials covering introductory to advanced techniques for creating art and design projects in advanced, emerging visual technologies. (F, Sp, Su)
- A T 5913 Professional Project 3 Credit Hours**
Prerequisite: Graduate standing, Master of Arts in Art and Technology majors only, and concurrent enrollment in AT 5923. The purpose of this culminating project is to synthesize the student's knowledge in the field of art and technology through the production of a work or body of works in art or design that demonstrates professional skills and will serve the student well as a key component of their portfolio moving forward in their career. (F, Sp, Su)
- A T 5923 Professional Forum 3 Credit Hours**
Prerequisite: Graduate standing, Master of Arts in Art and Technology majors only, and concurrent enrollment in AT 5913. This group seminar course is intended to provide a forum for peer feedback on the professional project as it evolves from conception to completion. Students will discuss their ideas and their practices, developing both greater clarity about their working process as well as a deepened capacity to talk about their work and present it coherently to the public. (Sp, Su)
- ARNM 1003 Art For Non-Majors: Two-Dimensional 3 Credit Hours**
May be repeated; maximum credit six hours. Provides students who are not art majors with an introduction to the basic studio processes of painting and drawing. (Irreg.)
- ARNM 2843 Photography for Non Art Majors 3 Credit Hours**
This course will introduce the non art major to camera controls and traditional darkroom operations including film processing, contact printing, enlarging and processing of black and white material, matting and presentation. Students enrolling in this course do not need to have any previous photographic or art skills. This course will complete a portfolio of images to complete the course. Textbook required. (Irreg.)
- ARNM 2970 Special Topics/Seminar 1-3 Credit Hours**
1 to 3 hours. Prerequisite: sophomore standing or permission of instructor. May be repeated; maximum credit six hours. Special topics or seminar course for content not currently offered in regularly scheduled courses. May include library and/or laboratory research and field projects. (Irreg.)
- ARNM 3440 Mentored Research Experience 3 Credit Hours**
0 to 3 hours. Prerequisites: ENGL 1113 or equivalent, and permission of instructor. May be repeated; maximum credit 12 hours. For the inquisitive student to apply the scholarly processes of the discipline to a research or creative project under the mentorship of a faculty member. Student and instructor should complete an Undergraduate Research & Creative Projects (URCP) Mentoring Agreement and file it with the URCP office. Not for honors credit. (F, Sp, Su)
- ARNM 3960 Honors Reading 1-3 Credit Hours**
1 to 3 hours. Prerequisite: admission to Honors Program. May be repeated; maximum credit six hours. Consists of topics designated by the instructor in keeping with the student's major program. Covers topics not usually presented in the regular courses.
- ARNM 3970 Honors Seminar 1-3 Credit Hours**
1 to 3 hours. Prerequisite: admission to Honors Program. May be repeated; maximum credit six hours. Subjects covered vary. Deals with concepts not usually treated in regular courses.
- ARNM 3980 Honors Research 1-3 Credit Hours**
1 to 3 hours. Prerequisite: admission to Honors Program. May be repeated; maximum credit six hours. Provides an opportunity for the gifted Honors candidate to work at a special project in the student's field. (F, Sp, Su)
- ARNM 3990 Independent Study 1-3 Credit Hours**
1 to 3 hours. Prerequisite: permission of instructor and junior standing. May be repeated once with change of content. Independent study may be arranged to study a subject not available through regular course offerings. (F, Sp, Su)
- ARNM 4970 Special Topics/Seminar 1-3 Credit Hours**
1 to 3 hours. Prerequisite: junior standing or permission of instructor. May be repeated; maximum credit nine hours. Special topics or seminar course for content not currently offered in regularly scheduled courses. May include library and/or laboratory research and field projects. (Irreg.)

- ART 1033 Core Studio I: Surface** **3 Credit Hours**
Prerequisite: majors only; co-requisite: ART 1043. Core Studio I: Surface is a foundation level course that introduces students to a variety of experiences using two-dimensional design and drawing practices. The course will focus on developing conceptual imagery as expressed through the organization of spatial relationships using design elements and principles, visual observation, color relationships, and the investigation of line, perspective, the figure, gesture, and space. (F)
- ART 1043 Core Studio II: Space and Time** **3 Credit Hours**
Prerequisite: majors only; co-requisite: ART 1033. A foundation level course that introduces students to a variety of experiences using interdisciplinary spatial relationships and three-dimensional design practices. The course will focus on developing a keen awareness of space, form, and time via the application of design principles to handmade forms. Students will create artworks through a variety of media investigations to enhance awareness of the interconnections within visual art and design disciplines. The course emphasizes ideation and process, and exploring and exploiting subject matter and media as a means of obtaining individual conceptual goals. (F)
- ART 1133 Core III: Technology** **3 Credit Hours**
Prerequisite: majors only; ART 1033 and ART 1043. Co-requisite: ART 1143. A foundation level course that introduces students to a variety of experience using electronic tools, processes and techniques. The course will focus on image, interactivity, and motion using core concepts & principles. (Sp)
- ART 1143 Core IV: Integrated Studio** **3 Credit Hours**
Prerequisites: majors only; ART 1033 and ART 1043. Co-requisite: ART 1133. Integrated Studio is a foundation level art practice course that introduces students to the broad dialogues driving activity in the world of contemporary art. Students learn to structure their work around core concepts and make practical decisions that propel critical discourse within the context of an art or design practice. (Sp)
- ART 2253 Beginning Ceramics** **3 Credit Hours**
Prerequisite: majors only; ART 1033 and ART 1043. Introduction to various hand-building, glazing and firing techniques. Emphasis placed on developing an understanding of working in three dimensions (with clay as the medium), and on interpreting shape by combining surface color and three-dimensional form. Conceptual and critical issues introduced. (F, Sp)
- ART 2313 Beginning Drawing** **3 Credit Hours**
Prerequisite: majors only; ART 1033 and ART 1043. Uses representational drawing to increase observational abilities. Perspective, value, form, texture, proportion and scale are studied using still life, the figure and outside drawing assignments. (Irreg.)
- ART 2413 Beginning Painting** **3 Credit Hours**
Prerequisite: majors only; ART 1033 and ART 1043. The aqueous media used in various approaches to painting problems (processes and concepts); lectures, group criticism and individual instruction assist the student in studying the fundamentals of painting. (Irreg.)
- ART 2523 Beginning Sculpture: Figurative** **3 Credit Hours**
Prerequisite: majors only; ART 1033 and ART 1043. Creating in oil base clay the human skull and a life-size portrait; creating a waste mold and making a plaster cast from it. (Irreg.)
- ART 2533 Beginning Sculpture: Contemporary** **3 Credit Hours**
Prerequisite: Majors only; ART 1033 and ART 1043. This course will introduce students to the methods of sculpture including material exploration, space investigation and conceptual development of sculptural experiences. Scale, material relationships, craft, context, and final presentation will be fundamental aspects covered in this course. Students will be encouraged to formulate elements of self-expression, research artists & ideas, and develop a vocabulary for constructive criticism. (Irreg.)
- ART 2743 Beginning Printmaking** **3 Credit Hours**
Prerequisites: majors only; ART 1033. This course is a formal introduction to the art of printmaking and the disciplines that comprise it. Students learn to create repeatable matrices in various media, including relief, screen, lithography, and intaglio printing. Technical demonstrations combine with lectures to provide students a sense of the materials, tools, and skills involved in printing as well as printmaking's history and the role it has played in our culture. (Irreg.)
- ART 2873 Video for the Artist I** **3 Credit Hours**
Prerequisite: majors only; ART 1013, ART 1023, ART 1113, ARTC 1003, ARTC 1103. Emphasis on developing video production and post-production skills. Training exercises in studio and field production, camera work, lighting and sound. Instruction and practice in analog and digital editing. Exploration of digital media. Students will produce a number of short projects. (Irreg.)
- ART 2970 Studio Special Topics** **1-3 Credit Hours**
Prerequisite: majors only; ART 1033 and ART 1043. May be repeated with change of content; maximum credit nine hours. Special topics course for content not currently offered in regular scheduled courses. (Irreg.)
- ART 3143 Core III: Integrated Studio** **3 Credit Hours**
Prerequisite: ART 1033 and ART 1043; Junior standing or above, majors only. Integrated Studio is a junior-level art practice course that engages students in dialogue and collaboration centered around issues related to contemporary art. (F)
- ART 3253 Intermediate Ceramic Design** **3 Credit Hours**
Prerequisite: 2253. Continued exploration of various hand-building, glazing and firing techniques. Primarily low fire processes. Formal issues such as sculptural composition, form and surface development, and the interpretation of function addressed. Emphasis placed on developing a personal language of materials and ideas. Progression through the range of ceramic-making skill sets. Conceptual and critical issues expanded. (F, Sp)
- ART 3263 Intermediate Ceramic Processes** **3 Credit Hours**
Prerequisite: 2253. Continued exploration of various hand-building, glazing and firing techniques. Primarily high fire processes. Utilitarian and sculptural concerns, creative problem solving, art making strategies addressed. Emphasis placed on developing a personal language of materials and ideas. Progression through the range of ceramic-making skill sets. Conceptual and critical issues expanded. (F, Sp)
- ART 3313 Intermediate Drawing Processes** **3 Credit Hours**
Prerequisite: 2313 or permission of instructor. Intermediate life drawing in various media with use of the human figure as the primary subject. The development of drawing processes and proficiency is stressed. (Irreg.)
- ART 3323 Experimental Drawing Practices** **3 Credit Hours**
Prerequisites: majors only; junior standing; ART 2313. Drawing will be explored as a unique visual language. An emphasis will be placed on experimentation, exploration and the development of a personal drawing practice. (Irreg.)

- ART 3343 Comics & Sequential Art 3 Credit Hours**
Prerequisite: Majors only and ART 2313; may be repeated; maximum credit 6 hours. Comics and Sequential Art has been designed to gain insight into the depth, complexity, and cultural significance of comics through the making and analyzing of how this art form functions differently from other traditional two-dimensional art mediums. (Sp)
- ART 3353 Collage & Assemblage 3 Credit Hours**
Prerequisite: Majors only, Junior standing, and ART 2313 or permission of instructor; may be repeated; maximum credit 6 hours. This course examines the history, theory, and practice of collage and its use in related mediums including assemblage, installation art, film and video, sound art, etc. Students will learn about major tendencies within the history of the medium, key figures from the past, leading ideas about collage, and techniques for making culture from culture. (Irreg.)
- ART 3413 Intermediate Painting Studio I 3 Credit Hours**
Prerequisite: majors only; junior standing; ART 2413. Personal painting issues are developed in a variety of media. An emphasis on experimentation, exploration, development of imagery and personal expression. (Irreg.)
- ART 3423 Intermediate Painting Studio 2 3 Credit Hours**
Prerequisites: majors only; junior standing; ART 2413. Individual painting issues are pursued through an intense exploration of ideas and technical risk taking. Students will develop research methodologies that will influence their visual and conceptual problem solving. (Irreg.)
- ART 3440 Mentored Research Experience 3 Credit Hours**
0 to 3 hours. Prerequisites: ENGL 1113 or equivalent, and permission of instructor. May be repeated; maximum credit 12 hours. For the inquisitive student to apply the scholarly processes of the discipline to a research or creative project under the mentorship of a faculty member. Student and instructor should complete an Undergraduate Research & Creative Projects (URCP) Mentoring Agreement and file it with the URCP office. Not for honors credit. (F, Sp, Su)
- ART 3513 Intermediate Sculpture: Contemporary Process 3 Credit Hours**
Prerequisite: ART 2513 or ART 2523 or permission of instructor. Examination of metal fabrication, welding, woodworking (construction and carving), and advanced assembly with nontraditional materials. Concerns in the development of formal visual issues, presentation, concept and theory of contemporary sculpture will be emphasized. (Irreg.)
- ART 3523 Intermediate Sculpture: Figurative Processes 3 Credit Hours**
Prerequisite: 2513, 2523 or permission of instructor on a space available basis. Creating a bas-relief and sculpting the human hand and foot in oil based clay; creating a slip cast mold of the bas-relief for water base clay castings. (Irreg.)
- ART 3533 Sculpture: Digital Fabrication for Artists and Designers 3 Credit Hours**
Prerequisites: majors only; junior standing; ART 2533. Focuses on digital fabrication technologies associated with CAD modeling and vector based digital production. Students will be involved in developing projects that will be constructed using a variety of 3D printing and CNC technologies using plastic, acrylic, metal, wood, and fabrics. Students will be expected to develop a vocabulary of digital production as it relates to contemporary art and design. (Irreg.)
- ART 3543 Intermediate Sculpture: Figurative Small Projects 3 Credit Hours**
Prerequisite: 2513 or 2523 or permission of the instructor. Creating a plaster sculpture(s) with a foam core; students will sculpt several small figurative sculptures from oil based clay. Armatures for smaller sculptures are designed and developed for more complex compositions. (Irreg.)
- ART 3563 Sculpture: Functional Design Studio 3 Credit Hours**
Prerequisites: majors only; junior standing; ART 2533. Investigate function as a means for creative experience and interaction. This includes furniture design, product development, utilitarian objects, and other associated objects that exist functionally within our environment. Design principles, construction techniques, and craft will be emphasized. Students will employ traditional construction techniques as well as digital fabrication to plan, design and build projects that approach utility from various practical and experimental approaches. (Irreg.)
- ART 3743 Intermediate Printmaking I: Lithography and Planar Processes 3 Credit Hours**
Prerequisite: Majors only; ART 2743; May be repeated; maximum credit 6 hours. This section of printmaking is designed for investigating multiple surfaces and processes in intermediate printmaking with an emphasis on drawing. The different levels of each process will allow students to develop their understanding of the basic concepts of the intaglio, lithography and relief processes. (Irreg.)
- ART 3753 Intermediate Printmaking II-Screen Printing and Digital Processes 3 Credit Hours**
Prerequisite: Majors only; ART 2743; May be repeated; maximum credit 6 hours. This course serves as a practical investigation of photo-process screenprinting and an introduction to various other forms of photo and digital printmaking. Students learn to handle, utilize, and manipulate photosensitive materials and how these materials are commonly utilized in the creation of print media. (F, Sp)
- ART 3763 Intermediate Printmaking III-Book Arts 3 Credit Hours**
Prerequisite: Majors only; ART 2743; May be repeated; maximum credit 6 hours. Students focus on techniques related to book arts, case building, and letterpress printing as they learn to utilize the formal materials of printmaking (paper, board, and fabric) as expressive elements in their creative process. The concepts that guide bookmaking and book construction are covered in an open and nontraditional manner to allow for experimentation, self-expression, and evolution. (Irreg.)
- ART 3823 Concepts in Electronic Media 3 Credit Hours**
Prerequisite: Majors only; ATC 2823. Consideration of conceptual and aesthetic issues within technological systems, which may include interactive media, immersive virtual environments, experimental games, visualization & simulation, and 3-D object development. Exposure to a variety of possible technical processes as they consider visual strategies regarding the constraints of visual spaces. Topics may include, but are not limited to 3-D modeling, real-time processing, database/interactive narrative, game play, and strategies for designing objects and environments. A personal laptop is required. (Irreg.)
- ART 3853 Intermediate Traditional Photography 3 Credit Hours**
Prerequisite: Majors only; ART 2853 or ATC 2853. May be repeated with change of content; maximum credit 6 hours. This course will explore traditional photographic practices. It focuses on the development of concepts in the imagemaking process and explores various means for producing a cohesive body of work. Instructor will determine the content and methodology, but all courses will include refinement of ideas and informed discussion with referential context. Readings and writings will supplement class discussion. Laboratory. (Irreg.)

- ART 3863 Intermediate Digital Photography 3 Credit Hours**
Prerequisite: Majors only; ART 2853 or ATC 2853. Explores digital photographic practices. Focus on the development of concepts in the image making process, and explores various means for producing a cohesive body of work. The content and methodology will be determined by the instructor, but all courses will include refinement of ideas and informed discussion with referential context. Readings and writings will supplement class discussion. Laboratory. (Irreg.)
- ART 3873 Video for the Artist II 3 Credit Hours**
Prerequisite: Majors only; ATC 2873. Continuation of ATC 2873. Introduction to advanced imaging and editing techniques. (F)
- ART 3960 Honors Reading 1-3 Credit Hours**
1 to 3 hours. Prerequisite: admission to Honors Program. May be repeated with change of subject matter; maximum credit six hours. Consists of either reading topics or independent study designated by the instructor in keeping with the student's major program. The topics of study will cover materials not usually presented in the regular courses. (F, Sp)
- ART 3970 Honors Seminar 1-3 Credit Hours**
1 to 3 hours. Prerequisite: admission to Honors Program, junior or senior standing. May be repeated with change of subject matter; maximum credit six hours. The projects covered will vary. The content will deal with concepts not usually presented in regular coursework. (Irreg.)
- ART 3980 Honors Research 1-3 Credit Hours**
1 to 3 hours. Prerequisite: admission to Honors Program. May be repeated with change of subject; maximum credit six hours. Provides an opportunity for the gifted honors candidate to work at a special project in the student's field. (F, Sp)
- ART 3990 Independent Study 1-3 Credit Hours**
1 to 3 hours. Prerequisite: permission of instructor and junior standing. May be repeated once with change of content. Independent study may be arranged to study a subject not available through regular course offerings. (F, Sp, Su)
- ART 4253 Advanced Ceramics 3 Credit Hours**
Prerequisite: 3253, 3263. May be repeated, maximum credit twelve hours. Emphasis on articulating and developing individual projects in ceramics. Students are expected to research materials and techniques pertinent to development and exploration of personal direction of form and ideas. Each student is expected to create a body of work building on prior exploration of color and form in clay and glazes, traditional and/or non-traditional techniques. Emphasis is on students' individual area of interest. (F, Sp)
- ART 4323 Advanced Drawing Concepts 3 Credit Hours**
Prerequisite: 2313, 2323, 3313, or 3323, 4313. Students are encouraged to refine their portfolio of work representing drawing proficiency and professional maturity. (Irreg.)
- ART 4333 Drawing the Natural World 3 Credit Hours**
Prerequisite: Majors only, junior standing, and ART 3313 or ART 3323. This course explores methods for observing and drawing natural objects with an emphasis on scientific illustration as an application. Students will gain experience drawing specimens from life, while exploring mediums and conventions specific to the field of scientific illustration. (F, Sp)
- ART 4423 Advanced Painting Concepts 3 Credit Hours**
Prerequisite: 4413. A series of paintings are created representing a body of work of a professional nature. (Irreg.)
- ART 4433 Alternative Painting Practices 3 Credit Hours**
Prerequisites: majors only; junior standing; ART 2413, ART 3413, ART 3423. May be repeated; maximum credit 6 hours. Advanced-level topics to be determined by department and which may include materials and techniques; landscape painting; figurative painting or related topics. Each option will permit concentration and encourage realization of conceptual goals. (Irreg.)
- ART 4513 Advanced Sculpture: Contemporary 3 Credit Hours**
Prerequisite: ART 3513 or ART 3533 or permission of instructor. May be repeated twice; maximum credit nine hours. Self-directed research objectives in terms of sculpture technique, process and concept. Progress relating to personal artistic growth and professional discipline will be expected. Emphasis will be placed on producing a unique body of work for portfolio development and exhibition. (Irreg.)
- ART 4533 Advanced Sculpture: Figurative I 3 Credit Hours**
Prerequisite: 2513, 3513, 3523. Develop the student's awareness of form through the modeling of the human figure. The students will study the fundamentals of sculpture such as armature, design, materials, tools and techniques. (Irreg.)
- ART 4543 Advanced Sculpture: Figurative II 3 Credit Hours**
Prerequisite: 4533. Continuation of the techniques developed in 4533. Students will explore more complex compositions and armature designs while modeling the human form. There will be more emphasis on human and animal anatomy. Will expand into the study and application of bas-reliefs. (Irreg.)
- ART 4573 Monumental Sculpture 3 Credit Hours**
Prerequisite: 4543. Students will be introduced to various enlarging techniques, taking a sculpture from the maquette (small version) to life-size or monumental scale. Focus on enlarging with the grid method. Use of a pantograph and the wafer method will also be discussed. Emphasis will be placed on the professional aspects of working with foundries, installations, and clientele. (F)
- ART 4743 Advanced Printmaking Studio 3 Credit Hours**
Prerequisites: majors only, junior standing; Art 3743, ART 3753 or ART 3763. May be repeated; maximum credit 6 hours. Offers advanced instruction in all areas of printmaking. Through discussion, lecture, and demonstration, instructors work closely with students to improve their technical and conceptual acuity. Students expand their formal understanding of print processes as they deepen their focus on the concepts that drive their art practice. (Irreg.)
- ART 4823 Advanced Art and Technology 3 Credit Hours**
Prerequisite: Majors only; ART 3823. May be repeated with change of content; maximum credit 12 hours. Advanced-level topics are determined by department. Individual topics may include, but are not limited to: Interactive Objects and Environment, Experimental Electronics, Sound Synthesis, Virtual Space, and hardware/software/wetware. (Irreg.)
- ART 4833 Experimental Art and Technology 3 Credit Hours**
Prerequisite: Majors only; ART 3823. May be repeated with change of content; maximum credit 12 hours. Experimental topics determined by department, and may include, but not limited to: Art & Science, Expanded Narrative, Game Art, Critical Play, Tactical Media, Sensory Systems, Networks, Bio-media and Participatory Media. (Irreg.)

- ART 4843 Applied Photo Practice 3 Credit Hours**
Prerequisite: 2853 and 3853. May be repeated; maximum credit 15 hours. Explores various applied and practical topics of photography to be determined by department. Topics may include view camera technique, zone system, photo illustration, studio experience and extended research and presentation of related topics. Each option will permit concentration and encourage realization of conceptual goals. (Irreg.)
- ART 4853 Advanced Photo Practices 3 Credit Hours**
Prerequisite: 2853 and 3853. May be repeated with change of content; maximum credit 15 hours. Advanced-level topics to be determined by department and which may include advanced B&W; color; books and portfolios. Extended research and presentation of related topics. Each option will permit concentration and encourage realization of conceptual goals. (Irreg.)
- ART 4863 Alternative Photo Practices 3 Credit Hours**
Prerequisite: majors only; ART 2853 or ATC 2853 and ART 3853. May be repeated; maximum credit 15 hours. Topics of historical processes, contemporary explorations, and alternatives to traditional photo methods to be determined by department (nonsilver I and II; process imagery, alternative color, digital imaging, extended research and presentation, etc.). Each method will permit concentration and encourage realization of conceptual goals. (Irreg.)
- ART 4883 BFA Senior Studio I 3 Credit Hours**
Prerequisite: majors only; senior standing; BFA studio majors having completed a minimum of 12 hours of 3000 or 4000 level studio courses and permission of the instructor. The BFA Senior Studio is an immersive experience of art making, creativity, and thinking. This intensive studio experience is focused on studio practice and research related to the artist's discipline. The expectation is that BFA seniors are working towards a professional career and/or the MFA degree. (F)
- ART 4893 BFA Senior Studio II 3 Credit Hours**
Prerequisite: ART 4883, majors only, senior standing, and permission of the instructor; co-requisite: ART 4993 Senior Experience. The BFA Senior Studio II is a continuation of creative work established in BFA Studio I. Building on their ideas and personal expression, students will refine theoretical and conceptual ideas, expand their research interests, and further develop new work. (Sp)
- ART 4913 Ceramics Studio Topics 3 Credit Hours**
Prerequisite: majors with junior standing or permission of instructor. May be repeated with change of subject matter; maximum credit nine hours. Special topics course in ceramics for content not currently offered in regularly scheduled courses. (Irreg.)
- ART 4923 Drawing Studio Topics 3 Credit Hours**
Prerequisite: majors with junior standing or permission of instructor. May be repeated with change of subject matter; maximum credit nine hours. Special topics course in drawing for content not currently offered in regularly scheduled courses. (Irreg.)
- ART 4930 Internship 1-6 Credit Hours**
1 to 6 Hours. Prerequisite: permission of instructor; majors only. May be repeated; maximum credit six hours. Students arrange and participate in a professional work experience with an approved internship site. (Irreg.)
- ART 4933 Painting Studio Topics 3 Credit Hours**
Prerequisite: majors with junior standing or permission of the instructor. May be repeated with change of subject matter; maximum credit nine hours. Special topics course in painting for content not currently offered in regularly scheduled courses. (Irreg.)
- ART 4953 Sculpture Studio Topics 3 Credit Hours**
Prerequisite: majors with junior standing or permission of instructor. May be repeated with change of subject matter; maximum credit nine hours. Special topics course in sculpture for content not currently offered in regularly scheduled courses. (Irreg.)
- ART 4960 Directed Readings 1-4 Credit Hours**
1 to 4 hours. Prerequisite: good standing in University; permission of instructor and dean. May be repeated; maximum credit four hours. Designed for upper-division students who need opportunity to study a specific problem in greater depth than formal course content permits. (Irreg.)
- ART 4963 Photography Studio Topics 3 Credit Hours**
Prerequisite: majors with junior standing or permission of instructor. May be repeated with change of subject matter; maximum credit nine hours. Special topics course in photography for content not currently offered in regularly scheduled courses. (Irreg.)
- ART 4970 Special Topics 1-3 Credit Hours**
1 to 3 hours. Prerequisite: majors with junior standing or permission of instructor. May be repeated; maximum credit nine hours. Special topics course for content not currently offered in regular scheduled courses. (Irreg.)
- ART 4973 Film and Video Studio Topics 3 Credit Hours**
Prerequisite: majors with junior standing or permission of instructor. May be repeated with change of subject matter; maximum credit nine hours. Special topics course in film and video for content not currently offered in regularly scheduled courses. (Irreg.)
- ART 4983 Senior Capstone Experience 3 Credit Hours**
Prerequisite: senior classification. May not be repeated for credit. Primary objective is to provide a culminating experience for the senior-year student. Satisfies the University-wide General Education Requirement for a capstone course for art majors. [V].
- ART 4990 Independent Study 1-3 Credit Hours**
Prerequisite: junior standing or permission of instructor. May be repeated; maximum credit six hours. Contracted independent study for a topic not currently offered in regularly scheduled courses. Independent study may include library and/or laboratory research and field projects. Title is variable only to reflect specific discipline area within the School of Art. (Irreg.)
- ART 4993 Senior Experience 3 Credit Hours**
Prerequisite: ART 3143, senior standing, majors only. The primary objective of this class is to provide a culminating experience for the senior-year studio student. There are two primary objectives that must be completed: 1) A written document presented in the form of a self-autobiographical monograph and 2) The artwork you display in the Senior Exhibition. (Sp)
- ART 5013 Graduate Studio Ceramics I 3 Credit Hours**
Prerequisite: graduate standing in Art. Individual problems in the ceramics studio area. (Irreg.)
- ART 5033 Graduate Studio Painting I 3 Credit Hours**
Prerequisite: graduate standing in Art. Individual problems in the painting studio area. (Irreg.)
- ART 5043 Graduate Studio Printmaking I 3 Credit Hours**
Graduate Studio Printmaking I. Prerequisite: Graduate Standing In Art Individual Problems In The Printmaking Studio Area (Irreg)
- ART 5053 Graduate Studio Sculpture I 3 Credit Hours**
Prerequisite: graduate standing in Art. Individual problems in the sculpture studio area. (Irreg.)

- ART 5733 Graduate Studio Painting VIII 3 Credit Hours**
Prerequisite: graduate standing in Art. Individual problems in the painting studio area. (Irreg.)
- ART 5743 Graduate Studio Printmaking VIII 3 Credit Hours**
Prerequisite: graduate standing in Art. Individual problems in the printmaking studio area. (Irreg.)
- ART 5753 Graduate Studio Sculpture VIII 3 Credit Hours**
Prerequisite: graduate standing in Art. Individual problems in the sculpture studio area. (Irreg.)
- ART 5773 Graduate Studio Film/Video VIII 3 Credit Hours**
Prerequisite: graduate standing in Art. Individual problems in the film/video studio area. (Irreg.)
- ART 5813 Graduate Studio Ceramics IX 3 Credit Hours**
Prerequisite: graduate standing in Art. Individual problems in the ceramics studio area. (Irreg.)
- ART 5833 Graduate Studio Painting IX 3 Credit Hours**
Prerequisite: graduate standing in Art. Individual problems in the painting studio area. (Irreg.)
- ART 5843 Graduate Studio Printmaking IX 3 Credit Hours**
Prerequisite: graduate standing in Art. Individual problems in the printmaking studio area. (Irreg.)
- ART 5913 Graduate Studio Ceramics X 3 Credit Hours**
Prerequisite: graduate standing in Art. Individual problems in the ceramics studio area. (Irreg.)
- ART 5933 Graduate Studio Painting X 3 Credit Hours**
Prerequisite: graduate standing in Art. Individual problems in the painting studio area. (Irreg.)
- ART 5960 Directed Readings 1-3 Credit Hours**
1 to 3 hours. Prerequisite: graduate standing and permission of department. May be repeated; maximum credit twelve hours. Directed readings and/or literature reviews under the direction of a faculty member. (F, Sp, Su)
- ART 5970 Special Topics/Seminar 1-3 Credit Hours**
1 to 3 hours. Prerequisite: Graduate standing or permission of instructor. May be repeated; maximum credit nine hours. Special topics or seminar course for content not currently offered in regularly scheduled courses. May include library and/or laboratory research and field projects. (Irreg.)
- ART 5980 Research for Master's Thesis 2-9 Credit Hours**
Variable enrollment, two to nine hours; maximum credit applicable toward degree, four hours. (F, Sp, Su)
- ART 5990 Independent Study 1-3 Credit Hours**
1 to 3 hours. Prerequisite: Graduate standing and permission of instructor. May be repeated; maximum credit nine hours. Contracted independent study for a topic not currently offered in regularly scheduled courses. Independent study may include library and/or laboratory research and field projects. (Irreg.)
- ART 6010 Graduate Studio 1-6 Credit Hours**
1 to 6 hours. Prerequisite: graduate standing - 30 hours. May be repeated with change of subject; maximum credit twelve hours. Individual problems in major studio area, with a choice of medium. (F, Sp, Su)
- ART 6013 Graduate Studio Ceramics XI 3 Credit Hours**
Prerequisite: graduate standing in Art. Individual problems in the ceramics studio area. (Irreg.)
- ART 6033 Graduate Studio Painting XI 3 Credit Hours**
Prerequisite: graduate standing in Art. Individual problems in the painting studio area. (Irreg.)
- ART 6133 Graduate Studio Painting XII 3 Credit Hours**
Prerequisite: graduate standing in Art. Individual problems in the painting studio area. (Irreg.)
- ART 6880 Graduate Exhibition 1-4 Credit Hours**
1 to 4 hours. Prerequisite: at least 30 hours of graduate credit successfully completed. May be repeated; maximum credit four hours. A special project course culminating in a graduate exhibition presented by the candidate for the Master of Fine Arts degree. Students enrolled will be following the "no thesis" plan. (F, Sp, Su)
- ART 6960 Directed Readings 1-3 Credit Hours**
1 to 3 hours. Prerequisite: graduate standing or permission of instructor. May be repeated; maximum credit six hours. Directed readings and/or literature review under the direction of a faculty member. (Irreg.)
- ART 6970 Special Topics/Seminar 1-3 Credit Hours**
1 to 3 hours. Prerequisite: graduate standing or permission of instructor. May be repeated; maximum credit 12 hours. Special topics or seminar course for content not currently offered in regularly scheduled courses. May include library and/or research and field projects. (Irreg.)
- ART 6990 Independent Study 1-3 Credit Hours**
1 to 3 hours. Prerequisite: Graduate standing and permission of instructor. May be repeated; maximum credit nine hours. Contracted independent study for a topic not currently offered in regularly scheduled courses. Independent study may include library and/or laboratory research and field projects. (Irreg.)
- ARTC 2813 Introduction to Visual Culture and Media Literacy 3 Credit Hours**
Prerequisite: ENGL 1213. An introduction to the study of media in relationship to modern society and culture. Establish methodologies for describing and analyzing diverse forms of media, including print, television, cinema, and digital communication. Critically examines the historical scholarship, theory, and media practice that informs current conversations in the fields of media and cultural studies. (Irreg.)
- ARTC 3440 Mentored Research Experience 3 Credit Hours**
0 to 3 hours. Prerequisites: ENGL 1113 or equivalent, and permission of instructor. May be repeated; maximum credit 12 hours. For the inquisitive student to apply the scholarly processes of the discipline to a research or creative project under the mentorship of a faculty member. Student and instructor should complete an Undergraduate Research & Creative Projects (URCP) Mentoring Agreement and file it with the URCP office. Not for honors credit. (F, Sp, Su)
- ARTC 3930 Special Topics In Theory & Criticism 2-6 Credit Hours**
Prerequisite: junior Standing. May be repeated with change of content; maximum credit six hours. Covers various topics dealing with diverse issues relating to the visual arts. (Irreg.)
- ARTC 3960 Honors Reading 1-3 Credit Hours**
1 to 3 hours. Prerequisite: Admission to Honors Program. May be repeated; maximum credit six hours. Consists of topics designated by the instructor in keeping with the student's major program. The topics will cover materials not usually presented in the regular courses. (F, Sp, Su)
- ARTC 3970 Honors Seminar 1-3 Credit Hours**
1 to 3 hours. Prerequisite: admission to Honors Program. May be repeated; maximum credit six hours. Subjects covered vary. Deals with concepts not usually treated in regular courses. (Irreg.)
- ARTC 3980 Honors Research 1-3 Credit Hours**
1 to 3 hours. Prerequisite: Admission to Honors Program. May be repeated; maximum credit six hours. Will provide an opportunity for the gifted Honors candidate to work at a special project in the student's field. (F, Sp, Su)

- ARTC 3990 Independent Study 1-3 Credit Hours**
1 to 3 hours. Prerequisite: permission of instructor and junior standing. May be repeated once with change of content. Independent study may be arranged to study a subject not available through regular course offerings. (F, Sp, Su)
- ARTC 4513 Understanding Comics, Criticism & Practice 3 Credit Hours**
Prerequisites: junior or senior standing; ENGL 1113; ENGL 1213/ EXPO 1213 or EXPO 1223. May be repeated with change of content: maximum credit 6 hours. An online course designed to give insight into the depth, complexity and intellectual significance of comics. The overall goal of this course is for students to understand the visual and conceptual inner-workings of comics. (Irreg.)
- ARTC 4853 Photography: Theory and Criticism 3 Credit Hours**
Prerequisite: majors with junior standing or permission of instructor. May be repeated with change of content; maximum credit 9 hours. Covers various topics related to critical issues in photographic thought and cultural studies. Students will examine literary resources, view various media sources and participate in a variety of interactions with peers and available guests. (Irreg.)
- ARTC 4933 Process and Theory Workshop 3 Credit Hours**
(Slashlisted with ARTC 5933; Crosslisted with A HI 4933) Prerequisite: Junior standing or permission of instructor; majors only. May be repeated with change of subject; maximum credit 6 hours. The course will offer a deeper grounding in relevant theoretical issues, as students explore together the interdisciplinary landscapes of contemporary theory and assess their relevance for artistic practice and art historical research. No student may earn credit for both 4933 and 5933. (Irreg.)
- ARTC 4943 Business of Art: Professional Practice 3 Credit Hours**
(Slashlisted with ARTC 5943) Prerequisite: Junior standing and majors only. This course is designed for students who plan to enter a career in the visual arts. Students will learn professional tactics to improve their marketing and visibility as visual artists. Emphasis on publicity, self-promotion, effective communication, and presentation skills that will assist with career opportunities, exhibition opportunities, management of finances, budgets, and strategies for career growth. No student may earn credit for both 4943 and 5943. (Irreg.)
- ARTC 4960 Directed Readings 1-4 Credit Hours**
1 to 4 hours. Prerequisite: good standing in University; permission of instructor and dean. May be repeated; maximum credit four hours. Designed for upper-division students who need opportunity to study a specific problem in greater depth than formal course content permits. (Irreg.)
- ARTC 4970 Special Topics/Seminar 1-3 Credit Hours**
1 to 3 hours. Prerequisite: Senior standing or permission of instructor. May be repeated; maximum credit nine hours. Special topics or seminar course for content not currently offered in regularly scheduled courses. May include library and/or laboratory research and field projects. (Irreg.)
- ARTC 4990 Independent Study 1-3 Credit Hours**
1 to 3 hours. Prerequisite: Senior standing and permission of instructor. May be repeated; maximum credit nine hours. Contracted independent study for a topic not currently offered in regularly scheduled courses. Independent study may include library and/or laboratory research and field projects. (Irreg.)
- ARTC 5013 Graduate Seminar 3 Credit Hours**
Prerequisite: graduate standing. A required course during the first semester that focuses upon developing an informed approach to the art making process. It will utilize readings, writings, and visual references to form a basis for discussions. Each student will conduct a presentation on the aesthetic basis of their own work to the class. (F, Sp)
- ARTC 5933 Process and Theory Workshop 3 Credit Hours**
(Slashlisted with ARTC 4933; Crosslisted with A HI 5933) Prerequisite: Graduate standing and permission of instructor. May be repeated with change of subject; maximum credit 6 hours. The course will offer a deeper grounding in relevant theoretical issues, as students explore together the interdisciplinary landscapes of contemporary theory and assess their relevance for artistic practice and art historical research. No student may earn credit for both 4933 and 5933. (Irreg.)
- ARTC 5943 Business of Art: Professional Practice 3 Credit Hours**
(Slashlisted with ARTC 4943) Prerequisite: Graduate standing and permission of instructor. This course is designed for students who plan to enter a career in the visual arts. Students will learn professional tactics to improve their marketing and visibility as visual artists. Emphasis on publicity, self-promotion, effective communication, and presentation skills that will assist with career opportunities, exhibition opportunities, management of finances, budgets, and strategies for career growth. (Irreg.) No student may earn credit for both 4943 and 5943. (Irreg.)
- ARTC 5960 Directed Readings 1-3 Credit Hours**
1 to 3 hours. Prerequisite: graduate standing and permission of department. May be repeated; maximum credit twelve hours. Directed readings and/or literature reviews under the direction of a faculty member. (F, Sp, Su)
- ARTC 5970 Special Topics/Seminar 1-3 Credit Hours**
1 to 3 hours. Prerequisite: Graduate standing or permission of instructor. May be repeated; maximum credit nine hours. Special topics or seminar course for content not currently offered in regularly scheduled courses. May include library and/or laboratory research and field projects. (Irreg.)
- ARTC 5990 Independent Study 1-3 Credit Hours**
1 to 3 hours. Prerequisite: Graduate standing and permission of instructor. May be repeated; maximum credit nine hours. Contracted independent study for a topic not currently offered in regularly scheduled courses. Independent study may include library and/or laboratory research and field projects. (Irreg.)
- ARTC 6881 Thesis Proposal/Statement 1 Credit Hour**
Prerequisite: 5013. Provides guidance for the development of the thesis exhibition proposal and the written statement required to accompany the exhibition of visual work. The student enrolls in this course the semester prior to the thesis exhibition and may enroll again for completion of the written component. (F, Sp)
- ARTH 3403 Theory and Application of Art Therapy 3 Credit Hours**
Prerequisite: junior standing, not for Art or Art History majors. Class considers the underlying principles, prevailing theories, current practice and evolving uses of art therapy with a focus on the theory and interdisciplinary nature of art therapy. In addition, the social and interpersonal applications of art, which are on a continuum with art therapy, will be addressed linking the disciplines of art and therapy. The primary approaches of art psychotherapy and art as therapy will be contrasted and students will create and discuss art within both theoretical frameworks. (Irreg.)

ARTH 3440 Mentored Research Experience 3 Credit Hours

0 to 3 hours. Prerequisites: ENGL 1113 or equivalent, and permission of instructor. May be repeated; maximum credit 12 hours. For the inquisitive student to apply the scholarly processes of the discipline to a research or creative project under the mentorship of a faculty member. Student and instructor should complete an Undergraduate Research & Creative Projects (URCP) Mentoring Agreement and file it with the URCP office. Not for honors credit. (F, Sp, Su)

ARTH 3503 Theory and Application of Creative Therapies 3 Credit Hours

Prerequisite: junior standing, not for Art or Art History majors. Class covers a broad range of therapeutic methods which all draw from a theoretical base in the arts, creativity, and expression. A strong focus will be on creativity theory and how it is applied through creative therapy disciplines such as art, music, dance and drama therapy. These creative therapies will be linked in terms of physical and mental outcomes expected and that are documented in the literature and research. Students will be required to take a critical look at both the theoretical basis and the practical applications of these creative modes. (Irreg.)

ARTH 3960 Honors Reading 1-3 Credit Hours

1 to 3 hours. Prerequisite: admission to Honors Program. May be repeated; maximum credit six hours. Consists of topics designated by the instructor in keeping with the student's major program. Covers topics not usually presented in the regular courses.

ARTH 3970 Honors Seminar 1-3 Credit Hours

1 to 3 hours. Prerequisite: admission to Honors Program. May be repeated; maximum credit six hours. Subjects covered vary. Deals with concepts not usually treated in regular courses. (Irreg.)

ARTH 3980 Honors Seminar 1-3 Credit Hours

1 to 3 hours. Prerequisite: admission to Honors Program. May be repeated; maximum credit six hours. Provides an opportunity for the gifted Honors candidate to work at a special project in the student's field. (F, Sp, Su)

ARTH 3990 Independent Study 1-3 Credit Hours

1 to 3 hours. Prerequisite: permission of instructor and junior standing. May be repeated once with change of content. Independent study may be arranged to study a subject not available through regular course offerings. (F, Sp, Su)

ARTH 4950 Art Therapy Practicum 2-6 Credit Hours

Prerequisite: junior standing, two courses in social sciences; not for Art or Art History majors. Class covers a broad range of therapeutic modalities which all draw from a theoretical base in creativity and expression. A strong focus will be on creativity theory and how it is applied through creative therapy modalities. Modalities taught will be linked in terms of physical and mental outcomes expected and that are documented in the creative therapies literature and research. Students will be required to take a critical look at both the theoretical basis and practical application of these creative modes. (Irreg.)

ARTH 4960 Directed Readings 1-4 Credit Hours

1 to 4 hours. Prerequisite: good standing in University; permission of instructor and dean. May be repeated; maximum credit four hours. Designed for upper-division students who need opportunity to study a specific problem in greater depth than formal course content permits. (Irreg.)

ARTH 4970 Special Topics/Seminar 1-3 Credit Hours

1 to 3 hours. Prerequisite: Senior standing or permission of instructor. May be repeated; maximum credit nine hours. Special topics or seminar course for content not currently offered in regularly scheduled courses. May include library and/or laboratory research and field projects. (Irreg.)

ARTH 4973 Special Topics in Art Therapy 3 Credit Hours

Prerequisite; 3403 or 3503, not for Art or Art History majors. May be repeated with change of content; maximum credit six hours. Covers various topics dealing with diverse issues relating to the visual arts in therapeutic applications. Special topics allows a focus on one particular area or application of art therapy through readings, artwork (arts-based research protocols), and class discussion. Individualized readings and assignments may focus on a student's interdisciplinary interest. (Irreg.)

ARTH 4990 Independent Study 1-3 Credit Hours

1 to 3 hours. Prerequisite: Senior standing and permission of instructor. May be repeated; maximum credit nine hours. Contracted independent study for a topic not currently offered in regularly scheduled courses. Independent study may include library and/or laboratory research and field projects. (Irreg.)

ATC 2823 Space - Introductory Studio Practice 3 Credit Hours

Prerequisite: Majors only; ART 1033 and ART 1043. Establishes a foundational perspective that considers embodiment and space in the digital age. Examines how networked information spaces might be understood, intervened with, repurposed, and inhabited as socially navigable spaces. This examination will be supported by an equal commitment to the physical via site specificity and emerging forms of public art practice. The goal is first of all, to engage the term 'space', and secondly, to examine possibilities as that engagement is extended into practice. (Irreg.)

ATC 2853 Image - Introductory Studio Practice 3 Credit Hours

Prerequisites: Majors only; ART 1033 and ART 1043 or concurrent enrollment. An introduction to light and lens-based imaging with a specific emphasis on photography and the photographic image. Instructor determines content and methodology; all courses will include refinement of basic technical skills as well as critical engagement with photography and its ontology. Readings and writings will supplement class discussion. (Irreg.)

ATC 2873 Time - Introductory Studio Practice 3 Credit Hours

Prerequisites: Majors only; ART 1033 and ART 1043. Introduces students to a variety of temporal experience given form in film, video, and uses of the Internet. Time is conceived in terms of: (1) a succession of passing frames, (2) the mediated presence of another consciousness, (3) the inscription of testimony for an archive, (4) the live performance in bodily or vocalized sound, and (5) the re-marking of community over the course of technological change. Basic instruction is provided in the various technologies necessary to explore these topics. (Irreg.)

ATC 3440 Mentored Research Experience 3 Credit Hours

0 to 3 hours. Prerequisites: ENGL 1113 or equivalent, and permission of instructor. May be repeated; maximum credit 12 hours. For the inquisitive student to apply the scholarly processes of the discipline to a research or creative project under the mentorship of a faculty member. Student and instructor should complete an Undergraduate Research & Creative Projects (URCP) Mentoring Agreement and file it with the URCP office. Not for honors credit. (F, Sp, Su)

ATC 3843 3D Modeling for Computer Animation 3 Credit Hours

Prerequisite: Majors only. Online intensive digital studio course covers beginning to advanced 3D modeling techniques in industry-standard animation software. Course content includes video tutorials, online discussion forums, projects, and critical feedback. Topics may include using curves, polygon modeling, material shaders, 3D sculpting, texturing, lighting and rendering. (Irreg.)

- ATC 3883 2D Computer Animation 3 Credit Hours**
Prerequisite: Majors only; ATC 2823, or ATC 2873 or permission of instructor. Introduction to computer animation as an art form. Course content includes technical tutorials, screenings, projects, and critiques. Topics may include stop motion, 2D animation, 3D animation, abstract motion graphics, effects, character design, and narrative and/or experimental approaches. A personal laptop is required. (Irreg.)
- ATC 3893 Experimental Animation 3 Credit Hours**
Prerequisite: Majors only; ATC 2823 or permission of instructor. Advanced studio course covers abstract and experimental approaches to animation as an art form. Course content includes technical tutorials, screenings, projects, and critiques. Topics may include advanced motion graphics, dynamics simulation, motion capture, and procedural animation. A personal laptop is required. (Irreg.)
- ATC 3913 Interface - Code Is Not Neutral 3 Credit Hours**
Prerequisite: Majors only; ART 1033 and ART 1043. This course teaches students to how to design and develop interactive User Interface and Extended Reality web products. Technical instruction covers the design and development process from wire framing, to mockups, to developing, to testing and debugging a usable web product. (Irreg.)
- ATC 4863 BFA Studio 3 Credit Hours**
Prerequisites: Majors only; ATC 2823, ATC 2853, and ATC 2873; admission to ATC major. May be repeated with change of content; maximum credit 12 hours. In this course, students develop research techniques in support of their studio practice. Seemingly diverse concentrations (for example: photography, performance, and robotics) synthesize with a common intent to investigate and communicate ideas. Students are exposed to experiences involving professional practices, including critical critique, proposed solutions and examinations of problems, public speaking/discourse, writing about art, and the formal presentation of artworks. Students' effort are concentrated through the series of Studio/Seminar courses that culminate in the public presentation of their thesis. (Irreg.)
- ATC 4883 Narrative Animation 3 Credit Hours**
Prerequisite: Majors only; ATC 3843 or ATC 3883 or ATC 3893 or permission of instructor. Advanced studio course covers narrative and cinematic approaches to animation as an art form. Course content includes technical tutorials, screenings, projects, and critiques. Topics may include storyboarding, character design, rigging, sound design, motion capture, dynamics, and advanced rendering techniques. A personal laptop is required. (Irreg.)
- ATC 4893 Expanded Animation 3 Credit Hours**
Prerequisite: Majors only; ATC 3843 or ATC 3893 or permission of instructor. Advanced studio course exploring special topics in animation which may include virtual reality, augmented reality, motion tracking, motion capture, projection mapping, and immersive media installation. A personal laptop is required. (Irreg.)
- DES 2633 Visual Communication I 3 Credit Hours**
Prerequisite: Majors only; ART 1033, ART 1043; corequisite: DES 2643. Introductory course in visual communication which focuses on nonverbal communication. Students are introduced to design research, theory and methods. This course explores the importance design plays in shaping meaning and interpretation through basic visual interaction. (F)
- DES 2643 Design Technology 3 Credit Hours**
Prerequisite: majors only, ART 1033 and ART 1043; corequisite: DES 2633. Introduction to electronic tools, processes and techniques as they relate to visual communications. (F)
- DES 2653 Visual Communication II 3 Credit Hours**
Prerequisite: Majors only; DES 2633, DES 2643; corequisite: DES 2663. Course is structured to help students apply various strategies, concepts, and form/content relationships to their work. Projects stress theory, application and an introduction to the computer as a design process tool. (Sp)
- DES 2663 Typography I 3 Credit Hours**
Prerequisite: Majors only; DES 2633, DES 2643; corequisite: DES 2653. Introduction to the basic concepts of typographic design through studio projects, critiques and lectures. (F, Sp)
- DES 2970 Special Topics 1-3 Credit Hours**
1 to 3 hours. Prerequisite: sophomore standing or permission of instructor. May be repeated; maximum credit six hours. Special topics or seminar course for content not currently offered in regularly scheduled courses. May include library and/or laboratory research and field projects. (Irreg.)
- DES 3440 Mentored Research Experience 3 Credit Hours**
0 to 3 hours. Prerequisites: ENGL 1113 or equivalent, and permission of instructor. May be repeated; maximum credit 12 hours. For the inquisitive student to apply the scholarly processes of the discipline to a research or creative project under the mentorship of a faculty member. Student and instructor should complete an Undergraduate Research & Creative Projects (URCP) Mentoring Agreement and file it with the URCP office. Not for honors credit. (F, Sp, Su)
- DES 3633 Visual Communication III 3 Credit Hours**
Prerequisite: Majors only; DES 2653, DES 2663; corequisite: DES 3663. Exploration and application of information systems as they apply to visual communications. (F)
- DES 3643 Integrated Technology 3 Credit Hours**
Prerequisite: Majors only; DES 3633, DES 3663; corequisite: DES 3653. Emphasis will be in developing user interfaces, experiences and outcomes in design communication, moving from the printed page to electronic media. Development of strategies using new technologies into integrated systems. (Sp)
- DES 3653 Visual Communication IV 3 Credit Hours**
Prerequisite: Majors only; DES 3633 and DES 3663; corequisite: DES 3643. Concentration is on design problem solving in visual communication at an intermediate level. (Sp)
- DES 3663 Typography II 3 Credit Hours**
Prerequisite: Majors only; DES 2653, DES 2663; corequisite: DES 3633. Concentrated exploration of issues within typography using word and image. Projects explore visual and verbal context and meaning through expressive and utilitarian aspects of typography. (F)
- DES 3960 Honors Reading 1-3 Credit Hours**
1 to 3 hours. Prerequisite: admission to Honors Program. May be repeated with change of subject matter; maximum credit six hours. Consists of either reading topics or independent study designated by the instructor in keeping with the student's major program. The topics of study will cover materials not usually presented in the regular courses. (F, Sp)
- DES 3970 Honors Seminar 1-3 Credit Hours**
1 to 3 hours. Prerequisite: admission to Honors Program, junior or senior standing. May be repeated with change of subject matter; maximum credit six hours. The projects covered will vary. The content will deal with concepts not usually presented in regular coursework. (Irreg.)

DES 3980 Honors Research 1-3 Credit Hours

1 to 3 hours. Prerequisite: admission to Honors Program. May be repeated with change of subject; maximum credit six hours. Provides an opportunity for the gifted honors candidate to work at a special project in the student's field. (F, Sp)

DES 4643 Visual Communication V 3 Credit Hours

Prerequisite: Majors only; DES 3653, DES 3643; corequisite: DES 4653. Students explore contemporary and critical issues in visual communications. This course deals with the planning, design and implementation of multi-faceted design problems directed towards an understanding and integration of people and visual communication. (F)

DES 4653 Typography III 3 Credit Hours

Prerequisite: Majors only; DES 3643, DES 3653; corequisite: DES 4643. Typographic problem solving, exploration, and experimentation. Emphasis is on the development of syntactic typographic relations in visual communication. (F)

DES 4663 Visual Communication VI 3 Credit Hours

Prerequisite: Majors only; DES 4643 and DES 4653. An advanced course in visual communication exploring multi-component graphic design problems that convey complex information. (Sp)

DES 4673 Professional Practice 3 Credit Hours

Prerequisite: DES 4643, DES 4653, majors only, and Senior standing; Co-requisite: DES 4663. The course focuses on concept development, methodology and creation of a professional body of graphic design work. The concentration is on portfolio development and assessment, client relationships, interviewing, contracts and pricing, budgeting, best practices, presentations, and identifying and pursuing goals and career paths. (Sp)

DES 4930 Internship 1-6 Credit Hours

1 to 6 Hours. Prerequisite: permission of instructor; majors only. May be repeated; maximum credit six hours. Students arrange and participate in a professional work experience with an approved internship site. (Irreg.)

DES 4970 Special Topics/Seminar 1-3 Credit Hours

1 to 3 hours. Prerequisite: Senior standing or permission of instructor. May be repeated; maximum credit six hours. Special topics or seminar course for content not currently offered in regularly scheduled courses. May include library and/or laboratory research and field projects. (Irreg.)

DES 4983 Senior Capstone Experience 3 Credit Hours

Prerequisite: senior standing; majors only. May not be repeated for credit. Primary objective is to provide a culminating experience for the senior-year student. Satisfies the University-wide General Education Requirement for a capstone course for design majors. (F, Sp) [V].

DES 4990 Independent Study 1-3 Credit Hours

Prerequisite: majors only; junior standing or permission of instructor. May be repeated: Maximum credit six hours. Contracted independent study for a topic not currently offered in regularly scheduled courses. Independent Study may include library and/or laboratory research and field projects. Title is variable only to reflect specific discipline area within the School of Art & Art History. (Irreg.)

DES 4993 Visual Communication Topics 3 Credit Hours

Prerequisite: majors only; junior standing. May be repeated with change of subject matter; maximum credit nine hours. Special topics course in visual communication for content not currently offered in regularly scheduled courses. (Irreg.)

DES 5093 Graduate Studio Visual Communication I 3 Credit Hours

Prerequisite: graduate standing in Art. Individual problems in visual communications area. (Irreg.)

DES 5970 Special Topics 1-3 Credit Hours

1 to 3 hours. Prerequisite: graduate standing or permission of instructor. May be repeated; maximum credit nine hours. Special topics or seminar course for content not currently offered in regularly scheduled courses. May include library and/or research and field projects. (Irreg.)

DES 5990 Independent Study 1-3 Credit Hours

1 to 3 hours. Prerequisite: Graduate standing and permission of instructor. May be repeated; maximum credit nine hours. Contracted independent study for a topic not currently offered in regularly scheduled courses. Independent study may include library and/or laboratory research and field projects. (Irreg.)

Warner	Emily		2022	ASSISTANT PROFESSOR, 2022	PhD, Univ of Pennsylvania

Art, B.A.

Minimum Total Credit Hours: 120

Major Hours: 39

Minimum Upper-Division Hours: 40

Upper-Division Hours Within Major: 24

Overall GPA - Combined and OU: 2.50

Major GPA - Combined and OU: 2.50

Program Code: B050

Major Requirements

A grade of C or better is required in all courses taken within the OU School of Visual Arts.

Code	Title	Credit Hours
Core Curriculum - Core Courses		
ART 1033	Core Studio I: Surface	3
ART 1043	Core Studio II: Space and Time	3
ART 3143	Core III: Integrated Studio	3
ART 4993	Senior Experience	3

Area of Specialization - Core Studio Courses

Choose 27 hours from courses in ART, ATC, ARTC, and DES (at least 12 hours must be upper-division) 27

Total Credit Hours 39

Major Support Requirements

A grade of C or better is required in all courses taken within the OU School of Visual Arts.

Code	Title	Credit Hours
Art History Requirements		
A HI 1314	Introduction to Art History	4
	A HI Elective, 2000-level course	3
	Choose one Upper-Division A HI course	3
	Choose one Upper-Division A HI course ¹	3
Total Credit Hours		13

¹ A HI must be General Education approved selected from Core IV.

Secondary Emphasis and Electives

Additional coursework outside the OU School of Visual Arts.

Code	Title	Credit Hours
Choose one of the following: 15-30		
	Minor (approx. 15-24 hours) ¹	
	Double major (approx. 30 hours) ¹	
	Develop a specialized area of concentration (approx. 24-30 hours)	
Free Electives		
	Hours not used for the secondary emphasis may be taken in any college or department except the OU School of Visual Arts to arrive at the minimum total hours required for the degree.	3-18
<i>Total Credit Hours</i>		<i>33-34</i>

¹ If the emphasis is an official minor or major offered by the university, it must be formally declared in the appropriate college advising office

General Education and College Requirements

Courses designated as Core I, II, III, IV, or V are part of the General Education curriculum. Students must complete a minimum of 40 hours of General Education courses, chosen from the approved list, including at least one upper-division Gen. Ed. course outside of the student's major. **Courses graded S/U or P/NP will not apply.**

UNIVERSITY-WIDE GENERAL EDUCATION (MINIMUM 40 HOURS) AND COLLEGE REQUIREMENTS

Code	Title	Credit Hours
Core Area I: Symbolic and Oral Communication		
<i>English Composition</i>		
ENGL 1113	Principles of English Composition	3
ENGL 1213	Principles of English Composition	3
	or EXPO 1213 Expository Writing	
<i>Language</i>		

A student who has not completed the 2 year high school language requirement must complete Core I: Language (6-10 hours).

Mathematics

Choose one course (Core I) 3

Core Area II: Natural Science

Choose two courses from different disciplines; one must include a laboratory 7-8

Core Area III: Social Science

P SC 1113 American Federal Government 3

Choose one course 3

Core Area IV: Arts and Humanities

Artistic Forms

Will be satisfied in Art History Requirements 0

Western Culture

HIST 1483 United States to 1865 3

or HIST 1493 United States, 1865 to the Present

Choose one course 3

World Culture

Choose one course 3

Core Area V: First-Year Experience

Choose one course 3

Other Gen Ed

Will be satisfied in Art History Requirements 0

Total Credit Hours 34-45

Note: The Bachelor of Arts degree requires at least 80 hours of liberal arts coursework.

According to the Oklahoma State Regents, "Liberal Arts and Sciences Courses are those traditional fields of study in the humanities; social and behavioral sciences; communication, natural and life sciences; mathematics; and the history, literature and theory of the fine arts (music, art, drama, dance). Courses in these fields whose primary purpose is directed toward specific occupational or professional objectives, or courses in the arts which rely substantially on studio or performance work are not considered to be liberal arts and sciences for the purpose of this policy." 3.15.2 (p 145), OSRHE Policy & Procedures Manual.

Suggested Semester Plan of Study

At least 24 hours of upper-division Art and Art History credit must be earned in residence as a declared major. This plan of study should not be used in lieu of academic advisement. Unless otherwise stated on the degree sheet, the College of Fine Arts does **not** permit coursework to fulfill more than one degree requirement.

Two college-level courses in a single world language are required; this may be satisfied by successful completion of 2 years in a single world language in high school. Students who must take language at the University will have an additional 6-10 hours of coursework.

¹ A HI 1113 (The Understanding of Art) may be an advised substitution for A HI 1314.

General Education and College Requirements

Courses designated as Core I, II, III, IV, or V are part of the General Education curriculum. Students must complete a minimum of 40 hours of General Education courses, chosen from the approved list, including at least one upper-division Gen. Ed. course outside of the student's major. **Courses graded S/U or P/NP will not apply.**

UNIVERSITY-WIDE GENERAL EDUCATION (MINIMUM 40 HOURS) AND COLLEGE REQUIREMENTS

Students must complete one General Education course at the 3000-4000 level outside the OU School of Visual Arts.

Code	Title	Credit Hours
Core Area I: Symbolic and Oral Communication		
<i>English Composition</i>		
ENGL 1113	Principles of English Composition	3

¹ To meet this requirement a student may continue a language begun in high school or begin a new language. (High school language does not fulfill this requirement for the BA in Art History.) French, German,

or Spanish are suggested because most graduate programs require proficiency in one or more of these languages.

² A HI 1113 (The Understanding of Art) may be an advised substitution for A HI 1314.

³ These electives may be chosen from any school or any college to fulfill the 120 hours required for the degree. May be graded P/NP. Courses used to fulfill General Education and/or major requirements may **not** fulfill electives.

Note: The Bachelor of Arts degree requires at least 80 hours of liberal arts coursework.

According to the Oklahoma State Regents, "Liberal Arts and Sciences Courses are those traditional fields of study in the humanities; social and behavioral sciences; communication, natural and life sciences; mathematics; and the history, literature and theory of the fine arts (music, art, drama, dance). Courses in these fields whose primary purpose is directed toward specific occupational or professional objectives, or courses in the arts which rely substantially on studio or performance work are not considered to be liberal arts and sciences for the purpose of this policy." 3.15.2 (p 145), OSRHE Policy & Procedures Manual.

Suggested Semester Plan of Study

At least **24 hours of upper-division Art History** credit must be earned in residence as a declared major. This plan of study should not be used in lieu of academic advisement. Unless otherwise stated on the degree sheet, the College of Fine Arts does **not** permit coursework to fulfill more than one degree requirement.

¹ MATH 1473 is recommended.

² The course taken to fulfill the upper-division General Education outside the major requirement may not be chosen from A HI, ARTC, or the crosslisted equivalent.

³ A HI must be General Education approved selected from Core IV.

Art, Minor

Minimum Total Credit Hours: 18

Program Code: N065

The requirements for a minor must be completed concurrently with the major degree requirements.

No minor may be added by completing courses after receiving the bachelor's degree.

See form available in Fine Arts Dean's office:

- Complete 2 copies of this form, and have both copies approved by an Art Faculty advisor.
- Take one copy to the OU School of Visual Arts office, Fred Jones Center, Rm. 202.
- Take one copy to the Office of the Dean, Weitzenhoffer Family College of Fine Arts FJC122.
- An Art faculty member selected by the student should serve as an advisor regarding course selection for the Art Minor degree.

No single course may be used by a student to satisfy a major requirement and a minor requirement.

Students must earn a minimum grade of C in each course.

A minimum of 9 hours must be upper division studio courses.

A maximum of 6 hours of transfer credit may be applied to the Art minor.

- **Students must achieve a minimum 2.50 GPA (OU and overall) in the minor coursework.**

Required Courses

Code	Title	Credit Hours
Students must successfully complete at least eighteen (18) hours of coursework. A minimum of 15 hours must be in ART and/or ATC and may take up to 3 hours in ARTC or AHI. A minimum of 9 hours must be upper-division studio courses. ¹		18
Total Credit Hours		18

¹ ART 1033 or ART 1043 are highly recommended but not required. A minimum of nine (9) hours must be upper division studio courses.

Minors are available to all undergraduate students at OU. If the minor is officially declared and approved, successfully completed, and noted on the graduation application, the student's transcript will so indicate at the time the bachelor's degree is posted.

Art History, Minor

Minimum Total Credit Hours: 18

Program Code: N070

The requirements for a minor must be completed concurrently with the major degree requirements.

No minor may be added by completing courses after receiving the bachelor's degree.

See form available in Fine Arts Dean's office:

- Complete 2 copies of this form, and have both copies approved by an Art History faculty advisor.
- Take one copy to the OU School of Visual Arts office, Fred Jones Center, Rm. 202.
- Take one copy to the Office of the Dean, Weitzenhoffer Family College of Fine Arts FJC122

No single course may be used by a student to satisfy a major requirement and a minor requirement.

Students must earn a minimum grade of C in each course.

A minimum of 9 hours must be upper division Art History courses.

- **Students must achieve a minimum 2.50 GPA (OU and overall) in the minor coursework.**

Required Courses

Code	Title	Credit Hours
Students must successfully complete at least eighteen (18) hours of coursework in art history. A minimum of nine (9) hours must be upper-division art history courses. The Art History electives should be advised by an Art History faculty member selected by the student. ¹		18
Total Credit Hours		18

¹ A HI 2213 and A HI 2223 are highly recommended, but not required.

Minors are available to all undergraduate students at OU. If the minor is officially declared and approved, successfully completed, and noted on the graduation application, the student's transcript will so indicate at the time the bachelor's degree is posted.

Museum Studies, Undergraduate Certificate

Minimum Total Credit Hours: 15

Program Code: T432

Certificate Requirements

The certificate requires 15 hours, including 12 upper-division hours.

- **Must earn a minimum grade of C in each course**
- **Students must achieve a minimum 2.50 GPA (OU and overall) in the certificate coursework.**

Art History, M.A.

Minimum Total Hours (Thesis): 36

Program Code: M070

Required Courses

Candidates for the MA in Art History must pass a reading proficiency exam in either French or German before filing the Admission to Candidacy form with the Graduate College.

In certain specially advised cases, another language may be substituted for French or German, or grades of A in the two semesters of German for Reading or French for Reading (FR 1013 and FR 1023), or equivalent reading course in the approved substituted language may be accepted as satisfying the language proficiency requirement with approval of each member of the student's thesis committee. The language proficiency exam may be administered by OU, or the student can pass the Princeton language proficiency exam or another exam approved by the Art History faculty.

¹ Although many students will wish to take all of their required hours in art history courses, and all students will be required to take a minimum of 21 hours in art history, some students may wish to take a minor in another area, especially if this area contributes to their desired thesis topic. The following fields are often considered suitable minor areas for graduate art history students: history, literature (in any language), philosophy, anthropology, sociology, history of music, history of drama and women's studies. Studio art is not an option. A student should consult with his or her thesis advisor about the suitability of a proposed minor. Those students who have not majored in art history at the undergraduate level will often be advised not only to take all of their coursework in art history, but to take an additional course or two in art history to present the strongest possible transcript upon graduation.

General Requirements for all Master's Degrees

The master's degree requires the equivalent of *at least* two semesters of satisfactory graduate work and additional work as may be prescribed for the degree.

All coursework applied to the master's degree must carry graduate credit.

Master's degree programs which require a thesis consist of *at least* 30 credit hours. All non-thesis master's degree programs require *at least* 30 credit hours.

Credit transferred from other institutions must meet specific criteria and is subject to certain limitations.

Courses completed through correspondence study may *not* be applied to the master's degree.

To qualify for a graduate degree, students must achieve an overall grade point average of 3.0 or higher in the degree program coursework and in all resident graduate coursework attempted. A student must also have at least a 3.0 in all coursework (including undergraduate coursework if any).

Additional information for master's degree students may be found in the Graduate College Bulletin.
